COTTON MARKETS

Cotton Advances Sharply

NEW YORK, July 6.—There was a renewal of yesterday's sharp buying movement in the cotton market today and further sharp advance in prices followed contracts for instance, sold up to 25.75, making a net advance of 85 points and a recovery of no less than 182 points from the low level of Wednesday. Realizing caused reactions later, with the delivery closing steady at a net gain of 28 to 34 points.

So far as indicated by the talk around the ring there was no fresh factor connected with the advance. It seemed the opinion among local brokers that the break on the government crop report of last Tuesday had left traders in a strong technical position. Nervousness over the complaints of drought in Texas with the possibility of weevil damage in eastern belt sections, and the absence of more general selling against either old or prospective new crop cotton was considered chiefly responsible for the covering movements which started yesterday and which was active again during today's early trading.

The market opened at an advance of 5 to 18 points. The rises soon gave way to profit taking. Liverpool was a good buyer again, while there was further covering by Wall Street and wire houses interests, with scattered southern selling.

Reports that the government had made arrangements whereby the producers of Indian would sell only to approved buyers at a fixed price of 34.50 c. is points of speculation, were without immediate influence.

New Orleans Market Stronger

NEW ORLEANS, July 6.—Very wintry weather in the belt helped the cotton market here today and a big overnight advance in Liverpool was followed by the Cotton Buyers Association, which announced here yesterday by the purchase by the government of cotton of points to be fixed by the President. The attitude adopted by the market seemed to be that the generally unfavorable conditions over the belt combined with the prospect of a government of a bumper crop and the cotton situation which were the basis of the advance outlined at the conference. Last prices showed net gains of 28 to 32 points.

The weather was warm and dry and the forecast called for continued fair weather. Some Sunday reports from interior centers in Texas described the wind of moderate or been nothing short of summer.

GRAIN MARKETS

Corn Prices Sag

CHICAGO, July 6.—Hardly had the markets of this country been fairly launched on the upward trade in corn when a decided reaction set in today. Liquidation on the part of speculators who had bought for July delivery for August and September against wheat in the expectation that prices would advance with those of the coarse grain, proved a factor of importance. Cash corn was in good demand, and July delivery sold up to a premium of 2 cents over September, but the bulk of the trade was in the latter delivery, and it was from this quarter that the bulk of the selling came. Cash corn at Chicago closed 1 to 2 cents lower, with receipts 179 cars. Oats followed the lead of corn, and lost ground from the start. Cash oats closed 1 to 1½ cents lower, with receipts 154 cars. Provisions weakened under the influence of the decline in the price of the grain.
