PREFACE.

I have had thirteen summers at Mackinac. Fellow visitors there have often suggested that I should furnish, in written form, some studies of the island.

While it is believed this sketch may have interest for the general reader, it at the same time carries a local coloring which may more particularly appeal to those who know the place. As the charm of the locality is due, in no small degree, to that halo of antiquity which hangs over it, I have felt warranted in restricting myself to early Mackinac, with but slight allusion to anything short of sixty years ago.

This sketch embodies the result of considerable research among books and documents. Some fifty different works have been consulted. Generally, though not always, these are indicated in the narrative. As the reader will perceive, I am greatly indebted to the various writings of Henry R. Schoolcraft. I would also express my special sense of obligation to the valuable series of "Collections and Researches," a work carried on by the Michigan Pioneer and Historical Society. These Collections, at present, number twenty-six volumes. The use they make of the important "Haldimand Papers" of Canada, brings to hand much of the early military history of the Straits and of the Island fort. Instead of a foot-note reference in every case, I make here a general acknowledgement.

During the progress of my work I have had great satisfaction in a correspondence with Col. Wm. Montague Ferry, of Park City, Utah, a son of the Rev. Wm. M. Ferry, of the Island Mission work of long ago, and who well remembers Mackinac as the home of his childhood days.

St. Louis, Mo.,
June, 1897.

(Inglenook, Mackinac Island.)
EARLY MACKINAC.

CHAPTER I.

Michilimackinac was the old-time name, not for our beautiful island alone, but for all the country round about us, north to Lake Superior and west to the head of Green Bay. It was the island only that was first thus called. The word grew out of it, and, small bit of land though it is, it threw its name over a vast territory.

The name has been variously spelled. In old histories, reports, and other documents, I have found Mishlimakina, Missilimakinac, Mishilmaki, Michilimachina, Missilimakina, Michiliakimawk; while in one standard history, when this region is spoken of, it invariably appears as Michilimakina. In its abbreviated form it has been written Mackinack, Macina, Maquina, Mackinac, Mackinaw. In all the earlier periods following the settlement of the island by the whites, in books of travel and of history, the two ways of writing it were used interchangeably, though the form Mackinaw was most commonly adopted. Also in many of the early maps and atlases it is so given. Steamboat companies running boats to the island, generally advertised them as of the "Mackinaw Line," and likewise business firms here so wrote the word.

—Henry Adams' "History of the United States."
at least as frequently as the other form. So this was quite general during all that time, except that the official name of the military post held to the termination "ac." But since the railroad companies built their modern terminal town across the straits and called it Mackinaw City, for the sake of convenience in distinguishing, the name of the island is now uniformly written Mackinac. In pronunciation, however, without attempting to settle the question by the laws of orthoepy, it may be remarked that it is considered very incorrect; and to the ears of residents, and old habitues and lovers of the island, it is almost distressful to hear it pronounced anything else than Mackinaw. A compromise may perhaps be allowed by taking the name as if it bore the termination "ah," and giving it a sound between the flat and the very broad. The c must never be sounded.

The origin of the word is in some obscurity. All agree that the first part of it, "Michi," means great. It is preserved in the name of the State, Michigan, and in the name of the Lake, Lake Michigan—meaning great waters. The French took it up, spelling it Missi; hence the name of the river Mississippi—great river, the father of waters. Concerning the remainder of the name which follows the Michi, we are not so sure. The common view is that the form of the island, high-backed in the center, as it rises above the waters, and handsomely crowning the whole, suggested to the Indian fancy the figure of a large turtle. Hence that it became known as the land of the Great Turtle.
Schoolcraft, who is the best authority on all questions pertaining to the Indian language, as well as to the customs and characteristics of that race, says that the original name of the island was Mishi-min-auk-in-ong, and that it means the place of the great dancing spirits—these spirits being of the more inferior and diminutive order, instead of belonging to the Indian collection of gods; a kind of pukwees, or fairies, or sprites, rather than Manitous.

Heriot, an English traveler in North America, and who published his "Travels through the Canadas," in 1807, touched at Mackinac and reports as the origin of the name that the island had been given, as their special abode, to an order of spirits called Imakinakos, and that "from these aerial possessors it had received the appellation of Michilimackinac."

Perhaps these different views can in a manner be combined. The turtle was held in great reverence by the Indians. In their mythology it was regarded as a symbol of the earth and addressed as mother.* The fancied physical resemblance of the island could easily work in with their mythical

*Andrew Lang in his "Myths, Ritual and Religious." (Vol. 1, p. 182), mentions certain of the Indian tribes as holding the fancy that the earth grew out of the tortoise. One form that the legend took was that Atahenstic, a woman of the upper world, had been banished from the sky, and falling, dropped on the back of a turtle in the midst of the waters. The turtle consulted with the other aquatic animals and one of them, generally said to have been the musk-rat, fished up some soil, and fashioned the earth. Here the woman gave birth to twins and thus began the peopling of the globe. Thus in the crude fancy of the Western Indians do we find a reflection or fragment of the ancient myth which once prevailed in the oriental mind that the world rested on the back of a turtle.
idea of the turtle, apart from its having any etymological connection. And thus whatever way the name is studied it becomes associated with some Indian conception of spirit. All singular or striking formations in the work of nature—objects that were of an unusual kind or very large and imposing, as lofty rocks, overhanging cliffs, mountains, lakes and such like—these poor untutored children looked upon as the habitations of spirits. Our island therefore, physically so different from the other islands and the mainland about it, with its glens and crags, and its many remarkable and strange looking stone formations, would easily be peopled for them with spectres and spirits. They regarded it as their sacred island, and a favorite haunt of their gods, and cherished for it feelings akin to awe; and from the surrounding regions would bring their dead for burial in its soil. The island seems to have been rather their place of resort and temporary sojourn than of permanent abode.

There is something very fascinating in the fragments of early Indian fancies and traditions and legends which are associated with our island. It is interesting, too, to note how the legends and the mythology of the Indians and their dim religious ideas so often took a poetic form. For instance, in their pagan and untutored minds they thought of the island as the favorite visiting place of Michibou, the great one of the waters, their Manitou of these lakes. That, coming over the waters from the sunrise in the east, he would touch the beach at the foot of Arch Rock; that the large
mass of stone which had fallen from the face of the cliff in the long ago, causing the arch above, was "Manitou's Landing Place;" that the arch was his gateway through which, ascending the hill, he would proceed in stately step to "Sugar Loaf," which in fancy they made to be his wigwam, or lodge—the cave on the west side, known to all today, being his doorway. Then again, the Sugar Loaf stone and others of that conical, pyramidal shape—such as the one which stands in St. Ignace and in different parts of the northern peninsula, and yet others which formerly stood on the island—that these strange, uncanny looking rock formations, by a modification of fancy, they would personify with great giants or monsters who towered over them as sentinels to note whether they made due offerings and sacrifices to Manitou, their success in the hunting and trapping being conditioned on this kind of religious fidelity.*

The Indians, so spontaneously recognizing the world of spirits, were fruitful in ideas and sentiments of reverence. We are told there were no profane words in their vocabulary. Think of a people who did not know how to swear because they had no

---

*Schoolcraft noted a curious fact among the Chippewas—that they fancied the woods and shores and islands were inhabited by innumerable spirits who during the summer season were wakeful and quick to hear everything that was spoken, but during the winter existed only in a torpid state. The Indian story tellers and legend mongers were therefore very free in amusing their listeners with fanciful and mysterious tales during the winter, as the spirits were then in a state of inactivity and could not hear. But their story telling was suspended the moment the piping of the frog announced that spring had opened. That he had endeavored, but in vain, to get any of them to relate this sort of imaginary lore at any other time than in the winter. They would always evade his attempts by some easy or indifferent remark.
words for it! It is said that the nearest they approached to cursing a man was to call him "a bad dog." So too in the nomenclature of wild or uncouth looking objects of nature—while our white pioneers and prospecting miners and avant couriers of civilization in the west have so often attached to such objects the name of the devil, as "Devil's Lake," "Devil's Slide," "Devil's Half-acre," "Devil's Scuttle-hole," and such like, the Indians generally gave them some expressive and harmonious poetic name. On the island we have the "Devil's Kitchen," but we may feel sure that was not of the Indian's naming. The writer of this sketch was told by an old resident who had passed the whole of an extremely long life on the island,* that once, long ago, a shoemaker took up his abode in that cavern and did his cobbling and his cooking there. Possibly that gave rise to the name.

In this habit of nomenclature which linked their ideas with the phenomena of physical nature, we see a beautiful though often rude and childish vein of poetry. Their name for the great cataract of Niagara was "Thunder of the Waters," as that for the gentle falls now within the limits of the City of Minneapolis was Minnehaha, or "Laughing Waters." The familiar white fish of these regions was the "Deer of the waters." To the horizon limit when they looked out on the lake to where the thread-like line of blue water loses itself in the clouds and sky, they gave a name which signified the "Far off sight of water." Their name for General Wayne, who did so much to overthrow

*Ignace Pelotte, died Feb. 1897.
their power in the west, was "Strong Wind;" while the American soldiers from their use of the sabre and sword in battle, were known as the "Long Knives." Their conception of a fort with its mounted cannon was "The high-fenced house of thunder," while the discharge was "The arrow that flies out of the big gun." A little son of Mr. Schoolcraft, when he was Government agent at the Sault, was admiringly called by the Chippewas, Penaci, or "The Bird;" and the English authoress, Mrs. Jameson, when visiting there, after "shooting the rapids" with the Indian guides, was re-named "The woman of the Bright Foam." As their whole life and range of observation was constantly associated with tempests, forests, waters and skies, and all the various phenomena of physical nature, this gave shape to their conceptions and their questionings. It has always seemed very significant that when John Eliot, the pioneer missionary to the Indians in New England, two hundred and fifty years ago, began his instructions among them, he was met at once by their eager and long pent-up questions of wonder: "What makes the sea ebb and flow?" "What makes the wind blow?" "What makes the thunder?"

Parkman represents the Jesuit missionaries in Canada, two centuries since, as testifying that the Indians had a more acute intellect than the peasantry in France. At his best, however, the red man was but the "Child of the forest," and in the presence of the pale faces was not destined to endure. They are a doomed and a passing race. Many reasons, or causes, might be assigned for
this. One reason is that which was given by a very thoughtful Indian in a speech on a certain occasion long ago, before a company of government agents here on our island beach. Said he, very reflectively: "The white man no sooner came than he thought of preparing the way for his posterity; the red man never thought of that." In this profound observation is embodied one of the latest deductions in social philosophy.

Of course, in thus speaking of the Indians, reference is had to manifestations of their mental character as seen in earlier days, and not to Indian life of the present, as seen in the western reservations.*

*Catlin, who ranks next to Schoolcraft in his study of the Indians, in an extensive classification of qualities, contrasts their original character in their "primitive and disabused state" with their secondary character after "being beaten into a sort of civilization." From being handsome he says they had become ugly; from free, enslaved; from affable, reserved; from bold, timid; from warlike, peaceable; from proud, humble; from independent, dependent; from healthy, sickly; from sober, drunken; from increasing, decreasing; from landholders, beggars.
CHAPTER II.

The annals of our island since its discovery and occupation by the whites carry us back to an early day. Explorers from France and settlers from Canada were here two hundred and fifty years ago. Traces of French and Indian mixture are everywhere seen. Indian wars and massacres have reddened these shores. Stories of English power victorious over French, in far back colonial times, have a part in the history of this region. In a later day the island had its stirring incidents in our own war with Great Britain, in 1812. Here was the headquarters of the Mackinaw Fur Company and the Southwest Fur Company, and afterwards of the powerful American Fur Company, of which John Jacob Astor was the chief proprietor, and which made our island for the time the largest seat of commerce in the western country.* Christianity, too, has had here its early enterprises, at the hands first of the French Jesuit missionaries of the 17th Century, and afterwards of Protestantism.

In regard to early military annals, history points to the fact that with the exception of the brief abandonment by the French forces from about 1701 to 1714, this region of the straits had been a seat of continuous military occupation from the

*Detroit, Vincennes, St. Louis, Lake Winnipeg, Lake of the Woods, and other far distant points were but dependencies of Michilimackinac, as the metropolis of the Indian trade,
last quarter of the 17th century down to 1895, when to the surprise and regret of all who knew the island's history, the United States Government abolished the post. Three different flags have floated over a fort in these Straits of Mackinaw during this long period past. These have been in the order of French, English and American. The French were the pioneers. They established Fort Michilimackinac, over where now the town of St. Ignace stands, four miles across on the northern peninsula. This was about two hundred and twenty-five years ago.

Baron La Hontan, who had come from France to Canada at an early age and afterwards became Lord Lieutenant of a French Colony in Newfoundland, visited our Mackinac neighborhood in 1688. In a publication of his travels in North America he gives three letters from the Michilimakinac settlement of that day.* As accompanying his picture on the adjoining page he thus writes: "You can scarce believe what vast shoals of white fish are caught about the middle of the channel, between the continent and the isle of Missilimakinac. The Outaouas† and the Hurons could never subsist here, without that fishery; for they are obliged to travel about twenty leagues in the woods before they can kill any harts or elks, and it would be an infinite fatigue to carry their carcasses so far over land. This sort of white fish, in my opinion, is the only one in all these lakes that can be called good;

---

*The book was first published in French, 1705. Afterwards an enlarged edition appeared in English form, 1735.
†Ottawas.
LA HONTAN'S SKETCH—1688.

Islands Mackinac. Round and Bois blanc at top of Picture. Point St. Ignace in foreground. Southern Peninsula on the right.
and indeed it goes beyond all other sorts of river fish. Above all, it has one singular property, namely, that all sorts of sauces spoil it, so that it is always eat either boiled or broiled, without any manner of seasoning.

"In the channel I now speak of, the currents are so strong that they sometimes suck in the nets, though they are two or three leagues off. In some seasons it so falls out that the currents run three days eastward, two days to the west, one to the south, and four northward; sometimes more and sometimes less. The cause of this diversity of currents could never be fathomed, for in a calm they will run, in the space of one day, to all the points of the compass, i. e., sometimes in one way, sometimes another, without any limitation of time; so that the decision of the matter must be left to the disciple of Copernicus.

Here the savage catch trouts as big as one's thigh; with a sort of fishing-hook made in the form of an awl, and made fast to a piece of brass wire, which is joined to the line that reaches to the bottom of the lake. This sort of fishery is carried on not only with hooks, but with nets, and that in winter as well as in summer.

"The Outaouas and the Hurons have very pleasant fields, in which they sow Indian corn, pease and beans, besides a sort of citruls and melons. Sometimes these savages sell their corn very dear, especially when the beaver hunting happens not to take well; upon which occasion they make sufficient reprisals upon us for the extravagant price of our commodities."
For a short interval the French Government, under the instigation of the post Commander, Cadillac, withdrew the garrison (as already mentioned) and abandoned this region as a military seat in favor of the new settlement at Detroit. That was about the opening of last century. But this vacating was soon seen to be bad policy, and in 1714 the fort was re-established. When, however, the restored fort becomes known again in history it is found located on the Southern Peninsula, across the Straits, where now stands the railroad town, Mackinaw City. Whether on the return from Detroit the military at once located the fort there, or first resumed the old site at St. Ignace, and removed to the other Peninsula at some later period, is not definitely known. At any rate it was the same military occupation, and the same Fort Michilimackinac, irrespective of the time of change in the site. It stood about half a mile from the present Light House, and southwesterly from the railroad station; and was so close to the water's edge that when the wind was in the west the waves would often break into the stockade. Its site is plainly visible to-day, and visitors still find relics in the sand.

After the conquest of Canada by the English, in the deciding battle of Quebec on the heights of Abraham in 1759, all this country around came under the English flag. The Indians, however, liked better the French dominion and their personal relations with the French people than they did the English sway and English associations, and they did not take kindly to the transfer. One reason
for this preference is said to have been that the French were accustomed to pay respect to all the Indians' religious or superstitious observances, whereas an Englishman or an American was apt, either to take no pains to conceal his contempt for their superstitions or to speak out bluntly against them. To this can be added the well-known fact of the greater readiness of the French to intermarry and domesticate with the Indian.*

This strong feeling of discontent under the change of empire, on the part of the Indians, was fanned and skillfully directed by that great leader and diplomat, Pontiac;‡ and "The Conspiracy of Pontiac" is the well-known title of one of Parkman's series of North American history. This conspiracy was no less than a deep and comprehensive scheme, matured by this most crafty savage chief, for a general Indian rising, in which all English forts, from the south to the upper lakes, were to be attacked simultaneously, and the English rule forever destroyed. The Indians would vauntingly say, "You have conquered the French, but you have not conquered us." Out of twelve forts, nine were taken, but not long held.

* "When the French arrived at this place," said a Chippewa Chief at a council once held at the Sault, "they came and kissed us. They called us children and we found them fathers. We lived like brothers in the same lodge."—Schoolcraft, in an address before the Michigan Historical Society in 1830.

"In force of character, subtlety, eloquence and daring, Pontiac was perhaps the most brilliant man the Indians of North America have produced."—"A History of Canada," by Chas. G. D. Roberts. Schoolcraft rated him in the same way. Drake, in his "Indians of the Northwest," says of him: "His fame in his time was not confined to his own continent, but the gazettes of Europe spread it also."
While this scheme was, of course, a failure in its larger features, the plot against the old post of Michilimackinac across the water succeeded only too well. The strategy and horrors of that capture read like a tale of fiction. The story is old, but to repeat it in this sketch will not be amiss. It may be introduced under the title of

AN HISTORIC BALL GAME.

In 1763 a band of thirty-five English soldiers and their officers formed its garrison. Encamped in the woods not far off was a large number of Indians. One morning in the month of June, with great show of friendliness, the Indians invited the soldiers to witness their match game of ball, just outside the stockade. The Chippewas were to play the Sacs.* Then, as now, ball playing had great fascination. And as this was the birthday of the King of England, and the men were in the celebrating mood, some indulgence was shown, discipline for a time relaxed, gates were left ajar and the soldiers and officers carelessly sauntered and looked on, enjoying the sport. In the course of play, and as a part of the pre-concerted stratagem, the ball was so struck that it fell within the stockade line of the fort. As if pursuing it, the players came rushing to the gate. The soldiers, intent in watching the play, suspected nothing. The Indians now had an open way within, and instantly turned from ball-players into warriors, and a terrifying "whoop" was given. The squaws, as sharing in the plot, were standing near with tomahawks concealed under their blankets. These were seized,

*Baggatiway was their kind of ball game,
and then followed a most shocking massacre. The surprise of the fort and the success of the red men were complete.

The details of this dreadful event are vividly and harrowingly given by the English trader, Alexander Henry, sojourning at the time, with his goods, within the stockade, and who was a participant in the dreadful scenes and experiences. The humble Henry may well be called the Father of History, like another Herodotus, as far as this episode is concerned. Excepting the very meagre report of the humiliating capture made by Captain Etherington, the officer in command, there seems to be nothing but the narrative of this English trader. His description of the fort, the purpose it had been serving, the movements of the Indians preceding the affair, as well as the minute description of the stratagem and its success, and the terrible scenes enacted, is the chief source of information; and one can take up no history of this period and this locality without seeing how all writers are indebted to his plain and simple narrative.

When the fort was captured by the savages, he himself was hidden for the first night out of their murderous reach, but was discovered the next day. Then followed a series of experiences and hair-breadth escapes and turns of fortune very remarkable, while all the time the most barbarous fate seemed impending, the suspense in which made his sensations, if possible, only the more distressful and torturing. It was not enough that his goods were confiscated and his very clothes stripped off his body, but his savage captors thirsted
for his blood. They said of him and their other prisoners, that they were being reserved to "make English broth." After four days of such horrors there came a turn which Henry says gave "a new color to my lot." During his residence at the post before the massacre, a certain Chippewa Indian named Wawatam, who used to come frequently to his house, had become very friendly and told him that the Great Spirit pointed him out as one to adopt as a brother, and to regard as one of his own family. Suddenly, on the fourth day of his captivity, Wawatam appeared on the scene. Before a council of the chiefs he asked the release of his brother, the trader, at the same time laying down presents to buy off whatever claims any may have thought they had on the prisoner. Wawatam's request, or demand was granted, and taking Mr. Henry by the hand he led him to his own lodge where he received the utmost kindness.

A day or two afterwards, fearing an attack of retaliation by the English, the whole body of Indians moved from the fort over to our island as a place of greater safety. They landed, three hundred and fifty fighting men. Wawatam was among them, with Henry in safe keeping. Several days had passed, when two large canoes from Montreal, with English goods aboard, were seized by the Indians. The invoice of goods contained among other things, a large stock of liquor, and soon mad drunkenness prevailed. The watchful and faithful Wawatam told Henry he feared he could not protect him when the Indians were in liquor, and besides, as he frankly confessed, "he could not
himself resist the temptation of joining his comrades in the debauch.” He therefore took him up the hill and back in the woods, and hid him in a cave, where he was to remain hidden “until the liquor should be drank.” After an uncomfortable and unrestful night, Henry discovered next morning, to his horror, that he had been lying on a heap of human bones and skulls. This charnel-house retreat is now the well-known “Skull Cave” of the Island, one of the regular stopping places of the tourists’ carriages.

But we cannot follow trader Henry’s fortunes farther. In a relation between guest and prisoner, and generally treated with respect, moving with the band from one place to another, following the occupation of a hunter, and taking up with Indian life and almost fascinated by it, he at length finds himself at the Sault, where soon an opportunity opened for his deliverance and his return home. Subsequently he made another trip to the country of the upper lakes and remained for a longer time. Of his good friend Wawatam, it is a sad tradition that he afterwards became blind and was accidentally burned in his lodge on the island at the Point, formerly known as Ottawa Point, in the village, then as Biddle’s, and more recently as Anthony’s Point.

It may be that some have felt incredulous in respect to Henry’s thrilling tale. But there is reason to think it entirely trustworthy. It is contained in a book which he wrote, entitled “Travels and Adventures in Canada and the Indian Territories, between 1760 and 1766.” It was first pub-
lished in 1808, and is dedicated to Sir Joseph Banks, "Baronet of his Majesty's Privy Council and President of the Royal Society." Some copies contain the author's portrait. It has long been out of print, and copies of it to-day are very rare and command a high price. Mr. Henry's residence in his latter years was at Montreal, and he was still living as late as 1811, an old man past eighty years of age, hale and cheerful looking. He bore a good name and an unquestioned reputation for veracity among those who knew him. I have already named him the Herodotus of this particular period of history. By another person, an enthusiastic English visitor at Mackinac, over sixty years ago, he was called also the Ulysses of these parts; and of his book it was said it bore the relation to the Michilimackinac shores and waters which the Odyssey does to the shores of Sicily.*

*The chronological order in which early travelers and visitors, who have left any annals of their journeys, came to this region, may be stated as follows: Niccollet, in 1634; Marquette, 1671; LaSalle and Hennepin, 1673; LaHontan, 1688; Charlevoix, 1721; Alexander Henry, 1762; Capt. John Carver, 1766.
CHAPTER III.

The victory of the Indians over at the old fort on the Southern mainland was nothing beyond a shocking and atrocious massacre. It was utterly barren as regards any permanent results, and the status of supremacy was not changed. The stockade had not been destroyed, and British troops soon came and resumed possession. Subsequently, however, the question of transferring the military seat of the Michilimackinac region across the Straits to our island came up, and was duly considered. Major Sinclair made a careful preliminary examination. In a letter written in October, 1779, he says: "I employed three days from sun to sun in examining the Island of Mackinac, on which I found great quantities of excellent oak, elm, beech and maple, with a vein of the largest and finest cedar trees I ever saw. * * The soil is exceedingly fine, with abundance of limestone. * * The situation is respectable, and convenient for a fort." He also mentions that he found on the island "a run of water, sufficient for a saw mill."

He submitted drawings and cuts of the island, and plans for fortification, to Gen. Haldimand, the officer in command of the department, and whose headquarters were at Quebec. The superiority of the island, as a strong position against Indian attacks, and Indian threats and insults, was pointed
out; also its advantages in having one of the best harbors in the upper country, and as respects the fishing interests likewise. It is thought, too, that the transfer was somewhat connected, in the British mind, with the American war of the Revolution, which was then in progress. Sinclair spoke of the "liability of being attacked by the Rebels," at the old fort, and that the place might "justly be looked upon as the object of a separate expedition." As a precautionary measure, he made every trader take oath of allegiance to the king, and to hold in "detestation and abhorrence the present unnatural and horrid rebellion." At any rate, the garrison did not feel safe in a mere stockade of timbers on the mainland. Gen. Haldimand accordingly gave orders for the removal. The following letter on the subject was written by him, April 16, 1780, to Major DePeyster, formerly in command of the old Mackinac fort, but who had been transferred, the year before, to the command at Detroit.*

"Sir—Having long thought it would be expedient to remove the fort, etc., from its present situation to the Island of Michilimackinac, and being encouraged in this undertaking by advantages enumerated by Lt. Gov. Sinclair, that must result from it, and the earnest desire of the traders,

*Major DePeyster was of American birth, and had served in the British army in various parts of this country, besides commanding at Mackinac, and afterwards at Detroit. He held a commission for 77 years, and lived to the age of 96. He spent his latter years in Dumfries, Scotland, the early home of his wife. During his residence there, he and the poet Burns were great friends. Burns addressed one of his fugitive poems to DePeyster,
I have given directions that necessary preparations, by collecting materials, etc., be made with as much expedition as possible, as the strength of that post will admit of. I am sure it is unnecessary to recommend to you to furnish him every assistance he may require, and that Detroit can afford, in forwarding this work, farther than by giving you my sanction for the same, which I do in the fullest manner."

A government house and a few other buildings were at once erected on the site of the present village; the old block houses were built, and His Majesty’s troops took possession on the 13th of July, 1780, Major Sinclair commanding, though the entire removal was only gradually effected.

The Indians, as proprietors of the land, had been first consulted about this occupancy, and agreement and treaty terms were obtained. The consideration was £5,000. Two deeds were signed, with their mark, by four chiefs, in behalf of themselves and all the Chippewas. One was to be lodged with the Governor of Canada, and one to remain at the island post; while the chiefs engaged to preserve in their villages a belt of wampum seven feet long, to be a memorial of the transaction. But it seems that after the work was under way and the post established, the Indians showed discontent, and threatened the troops; and so serious was the hostility manifested, that Sinclair sent in great haste to Detroit for cannon. The vessel was back in eight days, bringing the guns, and as soon as she touched on the harbor she fired a salute, and that "speaking out" by the
cannon's mouth at once settled the question, and the poor Indians had no more to say.

The old site being abandoned (since when it is often referred to as "Old Mackinaw," and the garrison removed, the families of the little settlement, could not do otherwise than follow the fort. Many of the houses were taken down and transported piecemeal across the straits, and set up again as new homes on the island. And hardly were the settlers thus re-established before they addressed a petition to the government, asking for remuneration to compensate for the loss and expense incurred, on the ground that their removal was in the interest of the State and the public welfare. What response was made to this petition I have found no record which tells.

The first commandant of the island, Major Sinclair, was also known as Lieutenant Governor. It appears that he had been appointed inspector and superintendent of the English forts, and bore some general civic position as representative of the government, besides his military rank; also as having charge of Indian affairs. Hence he is frequently spoken of in the records as Gov. Sinclair, as well as Major. It seems to have been on this account, as an officer with a more embracing scope, rather than as of higher military rank, that he superseded Major DePeyster, in command at old Mackinac, in 1779. After the transfer he remained two years in charge of the new post. Sinclair appears, from the style of his letters and reports, a more cultured and better educated man than some of his cotemporaries among the officers of that
period. But his services as a post commandant and general manager of affairs, seem to have been unsatisfactory, because of his lavish expenditures, and because of "abuses and neglects in different shapes," as it was said. He was continually being cautioned from headquarters in regard to his financial transactions. For half a century and more, after he left the post, the inhabitants continued to talk about his extravagance; and one of the stories long current on the island, was that he had paid at the rate of one dollar per stump for clearing a cedar swamp in the government fields at the west end of the village. It subsequently appears that, on his return to England, this recklessness in expenditure while on the island led to his imprisonment for debt. He speaks himself, in one of his letters, of being "liberated upon paying the Michilimakinac bills protested."

Major, or Governor, Sinclair was succeeded by Captain Daniel Robertson, who seems to have been in command from 1782 to 1787. This Robertson is also called Robinson, and is the one whose name will probably be always associated with the island, and a figure mark in the guide books and the traditionary stories—for when will "Robinson's Folly" cease to be visited and talked about?

The official annals of that time show a great many of Captain Robinson's letters, written while he was commandant of the post. He seems to have been a rough-and-ready, energetic officer; not very elegant in his style of composition or his orthography, prosaic and practical, and perhaps not quite fulfilling the sentimental and romantic ideal which
some of the legends and stories, connecting his name with the "Folly," would suggest. In one of his reports of this time, a very good plat is given, showing the contour of the island and the location of the fort, and the harbor bearing the name, "Haldimand's Bay," named, presumably, in honor of the English commander of the province.* In a letter of April, 1783, the Captain commends the climate of Mackinac as "preferable to any in Canada, and very healthy;" but he says "it is an expensive place." He tells in 1784 of the wharf being broken to pieces by the ice, so that no kind of craft could be loaded or unloaded, but that he set men to work and got it in repair. He adds: "It was a very troublesome job." He wants to know, he says, in one of his letters, whether or not he is to "have any rum;" and again he says, he is at a loss to know how he is to act at this post without that liquor, and he is sorry he is "obliged to cringe and borrow rum from traders on account of Government." At another time he writes, "I have had no rum this season, and you know it is the Indian's God." And yet again he pours forth his complaint: "Rum is very much wanted here for various purposes, particularly for Indians, and I have had only seven barrels this twelve month."

However, it is but due to the Captain to say that, unfortunately, he was not alone in this opinion of the indispensableness of rum in the relations of the whites and the military with the

---

*The name was evidently given up after the island changed its flag. In the early days, subsequent, it was familiarly designated by the island people as "The Basin."
Indians. We find Major Sinclair, his predecessor, as commandant of the fort, writing to General Haldimand in 1781, as follows: "The Indians cannot be deprived of nearly their usual quantity of rum, however destructive it is, without creating much discontent." There is a sad vein running through all this early history, made by rum; first as one of the government supplies to the Indians, and next as an article of traffic. The poor red men facetiously called it "The English Milk;" but their more serious name for it was the truer one, "Fire water."*

Robertson, (Robinson) was in command from 1782 to 1787. There are intimations of his having been disapproved at Gen. Haldimand's headquarters. Captain Scott succeeded him—"sent in the room of Robertson," as the record reads. It is reported of Scott, that "he gained infinite credit at Mackinac but, poor fellow, his pocket had paid for it." He was followed by Captain Doyle, who seems to have remained in command of the post until its delivery to the United States.

The fort was not built complete at once, but gradually took on its dimensions and its strength. In 1789, after an inspection by the Engineer's Department, the fortifications, as originally designed, were reported as being only in part executed, and that the work had been discontinued for some

---

*H. M. Robinson in his interesting book, "The Great Fur Land," descriptive of the regions of the Hudson's Bay Company, says of the Indian's liquor, "It must be strong enough to be inflammable, for he always tests it by pouring a few drops in the fire."

"The effects of ardent spirits in the lodge, are equal to the appearance of a grizzly bear amongst them."—Schoolcraft.
years, and that in the mean time a strong picketing had been erected around the unfinished works. And again, as late as 1792, the plans were reported as not yet finished; the officers' stone quarters were only about half completed; the walls were up the full height and the window frames in, but the roof and floors wanting. (Sharp criticism was made, too, by the officer then inspecting, on the whole design of the fort.) And yet again, in 1793, the commandant, Captain Doyle, writes concerning the "ruinous state of the fort," but says he purposed "sending to the saw mill for planks, and would give the Barracks a thorough repair, having received orders from His Excellency, Maj. Gen. Clarke, to that purpose;" also asking for "an engineer and some artificers to render the miserable fortress in some degree tenable."

It is not a fort of to-day's construction. It is a military structure of a century ago, a memento of the past, and replete in historic reminiscence. As a fortification, it is a curious mixture of American frontier post and old-world castle. Its thick walls and sally-ports, and bastions and ditch, along with its old block-houses of logs, loop-holed for musketry; its sloping path down to the village street, buttressed along the hillside with heavy masonry, above which grow grass and cedars up to the foot of the overlooking old "officer's quarters"—all this makes it a striking and picturesque object, a sort of mountain fortress, and certainly something unique in this country,
CHAPTER IV.

Although the war of the Revolution had been fought, and American independence acknowledged; and the Treaty of Paris in 1783 had secured all this upper lake country on the same boundary lines as we have them to-day, yet it was thirteen years afterwards before the American flag floated over the island fort. It was the same also in respect to four or five other posts which were situated on the American side of the lakes. Washington, then President, sent Baron Steuben to Gen. Haldimand, commissioned to receive them; but Haldimand replied he had no instructions from his government to make the delivery, and that he could not even discuss the subject. The Government, too, by John Adams, our minister to England, had insisted on the same, but without effect. England urged in explanation of her course, that it was due to an imperfect fulfillment on our side of some of the treaty stipulations. It required another treaty (this matter, however, being only one of many points embraced in it) before the tardy transfer of these stations on the confines was effected. It was then agreed that on June 1st, 1796, they should be evacuated by the English. Owing to delays on the part of Congress, our occupation of the posts was deferred beyond that date. As Washington said in his address to Congress, December, 1796:
"The period during the late session, at which the appropriation was passed for carrying into effect the treaty of amity, commerce and navigation, between the United States and His Britannic Majesty, necessarily procrastinated the reception of the posts stipulated to be delivered, beyond the date assigned for that event." He adds: "As soon, however, as the Governor General of Canada could be addressed with propriety on the subject, arrangements were cordially and promptly concluded for their evacuation, and the United States took possession of them, comprehending Oswego, Niagara, Detroit, Michilimackinac and Ft. Miami.* In the case of Fort Mackinac, it was not until October 2nd, of that year, that the actual transfer was made.

But, besides negotiating with the English in the recovery of Mackinac, the American government had to deal with another class of proprietors—the original possessors of the soil. Accordingly, while the delivery of the island and post was still pending, Gen. Wayne's treaty with the Indians, (Treaty of Greenville) was made in August, 1795, by which "a tract of land was ceded on the main, to the north of the island on which the post of Michilimackinac stands, to measure six miles on Lakes Huron and Michigan, and to extend three miles back from the waters of the lake on the strait."† Bois Blanc, or White Wood Island, was also ceded as the voluntary gift of the Chippewas. The Indians were to receive $8,000 annually, besides $20,000 then distributed.

Perhaps the unfinished state of the post, as reported in 1792, and the complaint made of its condition in 1793, and its sore need of repairs, (referred to above), may be explained on the ground that the English authorities, well knowing it was within American lines, and apprehending that it must soon pass out of their control, deemed it unwise to incur any large expenditure on it. In fact, we find Captain Robertson saying in a letter, as early as 1784, that in compliance with orders he had received, no more labor was given to a post which by treaty had been ceded to the Americans, than was necessary to "command some respect for the safety of the garrison and traders, surrounded as I am by a great number of Indians not in the best humor." It is probable, therefore, that when at length it came into our hands it was in need of considerable attention, for we find Washington, in the same address to Congress just quoted from, saying of these posts that "such repairs and additions had been ordered as appeared indispensable."* It is also probable that the American force sent to occupy the post at the departure of the British soldiers was quite imposing, as we have Timothy Pickering, Washington's Secretary of War, in his report of February, 1796, saying: "To appear respectable in the eyes of our British neighbors, the force with which we take possession of these posts should not be materially less than that with which they now occupy them. This measure," he adds, "is also important in relation to the Indians, on whom first impressions may have very beneficial effects." * Accordingly, the

*American State Papers.
first detachment to occupy Mackinac, as an American garrison, consisted of four officers, one company of Artillery and Engineers, and one company of Infantry, Major Henry Burback being in command of the whole force. The British retired to the island of St. Joseph, on the Canada side a little above Detour, and established a fort there.

Following the change of flag and sovereignty, nothing very stirring seems to have developed in the island history during the years immediately succeeding. It soon became, however, a great commercial seat and emporium in the wilderness. The chief commodity was furs. From an early day this had been a business carried on by the individual traders who went among the Indians. Later many of those engaged in it combined, and about 1787 formed the famous "Northwest Company," which became a most powerful organization, and which "held a lordly sway over the wintry lakes and boundless forests of the Canadas, almost equal to that of the East India Company over the realms of the Orient." Its headquarters was Fort William, on Lake Superior, and the fields of operation lay principally in far northern latitudes. The success of this company led to similar enterprises in the territory lying south and west, with our island as the head-center. There was a "Mackinaw Company," and a "Southwestern Company," which, uniting under John Jacob Astor, became the "American Fur Company." This, together with other lines of traffic which it stimulated, made the island for many years a great commercial seat. It is reported, for instance, for the
year 1804, that the goods entered at the Mackinac Custom House yielded a revenue to the United States of about $60,000.

While at this time our island was United States territory, and the fort with its ever floating flag was a visible token of its Americanism; the village as a whole, with its Indian and French population and its style of construction—much of its architecture being a kind of cross between the white settler's hut and the Indian's birch bark lodge—perhaps did not appear so characteristically American. Let us look at its picture as drawn by Washington Irving in his "Astoria." It is Mackinac as seen in 1810. He is describing an expedition under way for the far northwest and the head waters of the Missouri, in the interest of Mr. Astor's enterprises. The party had fitted out in Montreal, under Wilson P. Hunt, of New Jersey; and in one of the large canoes, thirty or forty feet long, universally used in those days in the schemes of commerce, had slowly made their way up the Ottawa river, and by the old route of the fur traders along a succession of small lakes and rivers, to our island. Here the party remained about three weeks, having stopped for the purpose of taking on more goods and to engage more recruits. Irving thus describes the place:

"It was not until the 22nd of July that they arrived at Mackinaw, situated on the island of the same name, at the confluence of Lakes Huron and Michigan. This famous old French trading post continued to be a rallying point for a multifarious and motley population. The inhabitants were
amphibious in their habits, most of them being or having been voyageurs or canoe-men. It was the great place of arrival and departure of the southwest fur trade. Here the Mackinaw Company had established its principal post, from whence it communicated with the interior and with Montreal. Hence its various traders and trappers set out for their respective destinations about Lake Superior and its tributary waters, or for the Mississippi, the Arkansas, the Missouri, and the other regions of the west. Here, after the absence of a year or more, they returned with their peltries, and settled their accounts; the furs rendered in by them being transmitted, in canoes, from hence to Montreal. Mackinaw was, therefore, for a great part of the year, very scantily peopled; but at certain seasons, the traders arrived from all points, with their crews of voyageurs, and the place swarmed like a hive.

"Mackinaw, at that time, was a mere village, stretching along a small bay, with a fine broad beach in front of its principal row of houses, and dominated by the old fort, which crowned an impending height. The beach was a kind of public promenade, where were displayed all the vagaries of a seaport on the arrival of a fleet from a long cruise. Here voyageurs frolicked away their wages, fiddling and dancing in the booths and cabins, buying all kinds of knick-knacks, dressing themselves out finely, and parading up and down, like arrant braggarts and coxcombs. Sometimes they met with rival coxcombs in the young Indians from the opposite shore, who would
appear on the beach, painted and decorated in fantastic style, and would saunter up and down, to be gazed at and admired, perfectly satisfied that they eclipsed their pale-faced competitors.

"Now and then a chance party of 'North-westers' appeared at Mackinaw from the rendezvous at Fort William. These held themselves up as the chivalry of the fur trade. They were men of iron, proof against cold weather, hard fare, and perils of all kinds. Some would wear the northwest button, and a formidable dirk, and assume something of a military air. They generally wore feathers in their hats, and affected the 'brave.' "Je suis un homme du nord!'"—'I am a man of the north,' one of these swelling fellows would exclaim, sticking his arms akimbo and ruffling by the South-westers, whom he regarded with great contempt, as men softened by mild climates and the luxurious fare of bread and bacon, and whom he stigmatized with the vain-glorious name of 'pork eaters.' * * The little cabarets and sutlers' shops along the bay resounded with the scraping of fiddles, with snatches of old French songs, with Indian whoops and yells."

But the reader must not think there was no other side to the social life of the early Mackinac of that period. Irving's picture is only that of the wharves, and the floating population, such as the manager of a water expedition, stopping over but a little while, would be the most likely to see. Although the resident population was very small, there were, at the same time, the families of settled homes, and with the social interests and
sympathies and pleasures common to American village life—subject of course to many inconveniences and privations incident to their remoteness in a wilderness world. I find a pleasing description written by a lady, who was taken to the island when a child, in the year 1812, just before the war opened and who spent the years of her girlhood there.*

The houses of the village at that time, she says, were few, quaint and old. Every house had its garden enclosed with cedar pickets. These were kept whitewashed, as also the dwellings and the fort. There were but two streets in the village. One ran from point to point of the crescent harbor, and as near the water’s edge as the beach would permit—the pebbles forming a border between the water and the road. (It will be remembered that the water’s edge in earlier years was considerably more inland than now.) A foot path in the middle was all that was needed, as there were no vehicles of any description, except dog-trains or sleds in the winter. There were no schools, no physician, and no resident minister of religion. Occasionally a priest would come on visitation to the Catholic flock. In winter the isolation was complete. Navigation closed usually by the middle of October, and about eight months were passed in seclusion from the outer world. The mail came once a month "when it did not miss." There were no amusements other than parties. The children, however,

made houses in the snow drifts, and coasted down hill. Spring always came late, and as it was the custom to observe May day they often planted the May pole on the ice. Once she records, for the 8th of May, "Ice in the Basin good." She relates that in the autumn of 1823, the ice formed very early, but owing to high winds and a strong current it would break up over and over, and be tossed to and fro, until it was piled to a great height in clear, towering blue masses; and all that met the eye across to the opposite island were beautiful mountains of ice. The soldiers and fishermen cut a road through. This made a winter's highway for the dog sleds, the passage winding between high walls of ice, with nothing to be seen but the sky above. Again, in other seasons, the ice would be perfectly smooth. The exciting times on the Island, she says, were when Le Caneau du Nord came. As the canoes neared the town there would come floating on the air the far-famed Canadian boat song. The voyageurs landing, the Indians would soon follow and the little island seemed to overflow with human life. These exciting times would last for six or eight weeks. "Then would follow the quiet, uneventful, and to some, dreary days, yet to most, days that passed happily."
CHAPTER V.

The year 1812 brought our second war with the mother country. In it our little island played a part, and indeed it may be said to have "opened the ball." The very first scene of the war was enacted here. The two governments had been under strained relations for some time before, and on the 19th of June, of that year, the state of war was declared by President Madison. It was a mystery at the time, and something which excited clamor and, in the frenzy of the hour, even insinuations of treachery against high officials at Washington, that the English commanders in Canada knew the fact so much in advance of our own. One explanation is that our very deliberate Secretary of War trusted to the ordinary postal medium in communicating with the frontier troops, while the agents of the English government sent the news by special messengers. General Hull, commander of the department of Michigan, said he did not receive information of the fact until fourteen days after war was declared; while General Brock, the British commander opposite, had official knowledge of it four or five days sooner. And likewise Lieutenant Hanks, of our island post, was in blissful ignorance of the fact, until he saw the British cannon planted in his rear, just four weeks after war had been determined upon.
The English officer, Captain Roberts, commanding at the Island of St. Joseph, on the near-by Canada border, had received orders immediately to undertake the capture of the strategic point of Mackinac. He gathered a force, consisting of Canadian militia (the English Fur Co's voyageurs and other employees), and a large number of Indians, besides having the regular soldiers of the garrison. The expedition was admirably managed. An open attack in front would have been impossible of success. So, secretly sailing from St. Joseph, they landed, unperceived, on the northwest side of the island, at 3 o'clock in the morning, on the spot known ever since as "British Landing." The troops had an unobstructed march across the island and were soon in position with their cannon on the higher ground commanding the fort in the rear, the Indian allies establishing themselves in the woods on either flank.

The American commandant and his little handful of men then learned, at the same moment, the two facts, that the United States and Great Britain were at war, and that the surrender of Fort Mackinac was demanded. Resistance was impossible, and thus again the flag was raised over its walls that had first floated there. Pothier, an agent of the Northwest Fur Company, who accompanied the expedition and commanded a part of the force, thus laconically reported it to Sir Geo. Prevort: "The Indian traders arrived at St. Joseph with a number of their men, so that we were now enabled to form a force of about two hundred and thirty Canadians and three hundred and
twenty Indians, exclusive of the garrison. With that force we left St. Joseph on the 16th, at eleven o'clock A. M., landed at Michilimackinac at three o'clock the next morning, summoned the garrison to surrender at nine o'clock, and marched in at eleven'—just twenty-four hours after setting forth on their hostile errand. He adds further, that there were between two and three hundred other Indian warriors who had expected to join the expedition, but failed; that two days after the capitulation, they came. But he intimates that this band was in an undecided state of mind and partly inclined to favor the Americans.

Captain Roberts, in his report to General Brock, dated the day of the capture (July 17th), says: 'We embarked with two of the six pounders and every man I could muster, and at ten o'clock we were under weigh. Arrived at three o'clock A. M. One of those unwieldy guns was brought up with much difficulty to the heights above the fort and in readiness to open about ten o'clock, at which time a summons was sent in and a capitulation soon after agreed on. I took immediate possession of the fort and displayed the British colors.'

As presenting an American account of the surprise and capture, the official report of Lieut. Hanks is herewith given. It was made to Gen. Hull, his commanding officer, and was issued from Detroit, whither the officers and men of the captured garrison had been sent on parole:
"Detroit, August 12th, 1812.

"Sir:—I take the earliest opportunity to acquaint Your Excellency of the surrender of the garrison of Michilimackinac, under my command, to His Britannic Majesty's forces, under the command of Captain Charles Roberts, on the 17th ultimo, the particulars of which are as follows: On the 16th, I was informed by the Indian interpreter that he had discovered from an Indian, that the several nations of Indians then at St. Joseph (a British garrison, distant about forty miles) intended to make an immediate attack on Michilimackinac. * * *

'I immediately called a meeting of the American gentlemen at that time on the island, in which it was thought proper to dispatch a confidential person to St. Joseph, to watch the motions of the Indians.

"Captain Michael Dousman, of the militia, was thought the most suitable for this service. He embarked about sunset, and met the British forces within ten or fifteen miles of the island, by whom he was made prisoner and put on his parole of honor. He was landed on the island at daybreak, with positive directions to give me no intelligence whatever. He was also instructed to take the inhabitants of the village, indiscriminately, to a place on the west side of the island, where their persons and property should be protected by a British guard, but should they go to the fort, they would be subject to a general massacre by the savages, which would be inevitable if the garrison fired a
gun. This information I received from Dr. Day,* who was passing through the village when every person was flying for refuge to the enemy. I immediately, on being informed of the approach of the enemy, placed ammunition, etc., in the block houses; ordered every gun charged, and made every preparation for action. About nine o'clock I could discover that the enemy were in possession of the heights that commanded the fort, and one piece of their artillery directed to the most defenseless part of the garrison. The Indians at this time were to be seen in great numbers in the edge of the woods.

"At half past eleven o'clock the enemy sent in a flag of truce demanding a surrender of the fort and island to His Britannic Majesty's forces.† This, Sir, was the first information I had of the declaration of war. I, however, had anticipated it, and was as well prepared to meet such an event as I possibly could have been with the force under my command, amounting to fifty-seven effective men, including officers. Three American gentlemen, who were prisoners, were permitted to accompany the flag. From them I ascertained the strength of the enemy to be from nine hundred to

---

*The Post surgeon.

†As to the difference in the hour which appears in these three official statements, it is probable each writer had in mind some different stage of the event. The question of the surrender of the island had its preliminary stage at an earlier hour in the morning at the old distillery at the western end of the village, between some of the British officers and certain of the citizens, while the formal demand on the post was not made until later in the day. And, again, Captain Roberts may have noted the time of writing his demand at his own headquarters and Lieut. Hanks the time it reached his hands.
one thousand strong, consisting of regular troops, Canadians and savages; that they had two pieces of artillery, and were provided with ladders and ropes for the purpose of scaling the works, if necessary.* After I had obtained this information I consulted my officers, and also the American gentlemen present, who were very intelligent men; the result of which was, that it was impossible for the garrison to hold out against such a superior force. In this opinion I fully concurred, from the conviction that it was the only measure that could prevent a general massacre. The fort and garrison were accordingly surrendered.

* * * *

"In consequence of this unfortunate affair, I beg leave, Sir, to demand that a Court of Inquiry may be ordered to investigate all the facts connected with it; and I do further request, that the Court may be specially directed to express their opinion on the merits of the case.

"Porter Hanks,
"Lieutenant of Artillery."

"His Excellency Gen. Hull,
"Commanding the N. W. Army."

It is not necessary to discuss the question whether the surrender at Fort Mackinac, without a show of resistance, was justifiable. The garrison was but a handful of men. By no fault of his, the

*A discrepancy in the estimate of troops as made by opposing sides, especially in reports from the battle field, is very common. A recent History of Canada, however, (published in 1897), is inexcusably out of the way, when it makes Captain Roberts' attacking force 'less than two hundred,' as far as voyageurs and regulars were concerned, and makes no mention whatever of the large number of Indian allies.
Lieutenant in command had been taken entirely unawares. The enemy were in overwhelming numbers and occupying a position with their cannon which commanded the fort. Their Indian allies were waiting in savage eagerness for the attack, and had the fighting once begun it would have been beyond the power of the officers to restrain them.*

The capture of Mackinac, the first stroke of the war, was of the highest importance to the British interests. Valuable stores of merchandise, as well as considerable shipping which stood in the harbor, were secured. It gave them the key to the fur trade of a vast region, and the entire command of the upper lakes. It exposed Detroit and all lower Michigan. It greatly terrified General Hull, who commanded the department of Michigan. It arrested his operations in Canada. He said: "The whole northern hordes of Indians will be let down upon us." His surrender, just one month later, was in part due to the panic it caused—one historian of that day, saying: "Hull was conquered at Mackinac."

On the island, the British proceeded at once to strengthen their position. In order to guard against any approach in the rear, like the successful one they themselves had made, they built a very strong earth-work on the high hill, a half mile, or little more, back of the post, which they called Fort George, in honor of the King of England. This fortification still remains, now known to all visitors.

*John Askin, of the British storekeeping department, and present with the besiegging force, said, that had the soldiers of the fort fired a gun, he firmly believed not a soul of them would have been saved.
as Fort Holmes. In its construction the citizens of the village were impressed, every able bodied man being required to give three days in the pick and shovel work.

A common error prevails that this ancient earth-work was actually constructed the very night the British arrived, and that it made part of the formidable investment of Fort Mackinac which led to its speedy surrender. A moment’s reflection will show this could not have been the case. The invading force only landed at three o’clock that morning and then, with all their trappings, had to march two miles to get into position, and yet were ready by ten o’clock to open fire. It is probable this hill was the “heights above the fort,” to which, as Captain Roberts says in his report, “one of those unwieldy guns was brought up with much difficulty;” and that far the Fort Holmes’ site figured in the demonstration against Lieut. Hanks’ command. The fortification itself, however, being the scientific work of military engineers, and involving a protracted period of hard labor, was constructed afterwards at the British commandant’s leisure. The other one of Captain Roberts “two six-pounders,” together with the great bulk of his men, including his Indians, we may suppose, occupied the ridge of ground, part open and part wooded, between the hill and the post, just beyond the old parade ground, which lies outside the present fort fence.

Captain Roberts was relieved, September 1813, and Captain Bullock appointed in his place. Col. McDonall assumed charge in the spring of 1814. This officer’s name often appears as McDouall.
CHAPTER VI.

By Commodore Perry's victory on Lake Erie, and General Harrison's victorious battle of the Thames, the autumn of 1813 found the Americans in possession of Lake Huron, and nearly all of Michigan. The re-capture of Mackinac was determined on. In the early spring of 1814, an expedition for this purpose was planned, which, however, did not get under sail until July 3rd, embarking from Detroit that day. It was a joint naval and military force. There were seven war vessels under Commodore Sinclair, and a land force of 750 men, under command of Col. Croghan. The object, besides the retaking of Mackinac, was also to destroy the English post at St. Joseph, and to inflict whatever damage it could on the military stores and shipping of the enemy on the neighboring border of Canada. These war brigs and other vessels of the squadron were the largest ever seen, up to that time, on the waters of St. Clair and Huron. The commanders, instead of sailing at once to Mackinac, concluded to first dispatch their other errands. They found St. Joseph already abandoned by the British, but they captured some English schooners and supplies. They then turned back for Mackinac Island, where they arrived on the 25th of July. But no success awaited them there.

The English fully appreciated the great value,
strategically and commercially, of Mackinac and were determined to hold it. They took strong measures for its defense. Col. McDonall, who had been sent there in May of that year as the new commandant, was a very energetic and skillful soldier. He brought with him fresh troops from Canada, ammunition and provisions, and other things needful. Besides this fact, the garrison were by no means ignorant of the expedition in their northern waters, and of its object; and there was no possibility of a surprise attack. One of the officers belonging to the reinforcement which had been sent to the post thus wrote: "After our arrival at the island all hands were employed strengthening the defences of the fort. For upwards of two months half the garrison watched at night against attack." The Indians from the surrounding country, and Canadians here and there, were called in for aid. Besides the additional fort which they had built, Fort George, (now Fort Holmes, and already referred to) batteries were placed at various points outside the walls which commanded the approaches to the beach. One was on the height overlooking the ground in front of the present Grand Hotel, another on the high knoll just west of the fort, while others lined the east bluff between the present fort grounds and Robinson's Folly.

Our American officers at first thought of erecting a battery on Round Island and shelling the fort from there. A yawl was sent with a squad of men to reconnoitre, and a spot fixed upon. This was seen by the English commander and he immediately
sent over a large detachment of Indians, who forced the little party to flee. One of the men, however, waited too long, tempted by the berries which grew at his feet, and missed the boat and was captured. The Indians rowed in with their prisoner, chanting the death dirge and expecting to dispose of him on the shore in their usual barbaric manner; and in their wild frenzy of delight, some of the squaws, before the canoe had touched the beach, rushed into the water, waist deep, with whetted knives raised aloft, to begin at once the work of savage torturing. But the officer of the fort, divining their object, had sent a squad of soldiers to protect the hapless prisoner.

The extended level ground just west of the village streets, was also considered as a point where a landing could be made, and the taking of the fort be attempted, under cover of the guns of the vessels. But Captain Sinclair, who described the fort hill as a "perfect Gibraltar," found that his vessels would only be exposed to a raking fire from the heights above without his being able to elevate the guns sufficiently for return shots.

After hovering about the island for a week it was concluded there was no other way than to imitate the plan of the successful enemy, two years before. So they sailed around to "British Landing" and disembarked, August 4th, and marched as far as the Dousman farm (now Early's farm). But the conditions were entirely different from those of two years ago, and the movement was ill-starred, and a melancholy failure. According, however, to the reports made by the joint commanders of the
expedition, it was not so much their plan to attempt the storming of the works, as to feel the enemy's strength and to establish a lodgment from which by slow and gradual approaches, and by siege, they might hope for success. All such expectations were soon dissipated. Facing the open field on the Dousman farm were the thick woods. This was a perfect cover to the Indian skirmishers, who, concealed in their vantage points, hotly attacked our soldiers; to say nothing of an English battery of four pieces, firing shot and shells. There could be neither advance nor encamping. The only wise thing was to retreat to the vessels. This was done and the expedition left the island, having lost fifteen killed and about fifty wounded. Major Andrew Hunter Holmes, next in command to Colonel Croghan, was one of the slain in this most unfortunate and fruitless action. He fell while leading his battalion in a flank movement on the right. One story is that the gun which pierced his breast with two balls was fired by a little Indian boy. Another tradition is that the Major had been warned that morning, by a civilian aboard the vessel, not to wear his uniform which would make him a target, but that he declined the friendly advice saying, that if it was his day to fall he was ready. *

Major Holmes was a Virginian, an intelligent and promising young officer who enjoyed the friendship of Thomas Jefferson. He had already distinguished himself in a battle near Detroit, and had performed well a special service assigned him.

in this same expedition, when at the Sault St. Marie. In the official reports of the Mackinac battle he was referred to as that "gallant officer, Major Holmes, whose character is so well known to the war department;" and again as "the valuable and ever-to-be lamented officer." His body had been carried off the field and secreted by a faithful negro servant, and the next day was respectfully delivered to the Americans by Colonel McDonall and taken to Detroit for burial. A very fitting tribute to his memory was it, that when in the following year the island again came under our flag, the name of the new fort on the summit heights, which had been built by the English, was changed from Fort George to Fort Holmes.

The fort being found impregnable by assault, no further attempts at capture were made, and the expedition returned down the lake to Detroit, the most of the soldiers being sent to join General Brown's forces on the Niagara.

But the ambition to regain the island was not yet abandoned. It was thought to starve out the garrison and thus force a surrender. English supplies could now come only from Canada through the Georgian Bay. Near the mouth of the Nottawasaga river at the southeast corner of that bay, near a protecting block house, was the schooner "Nancy" loaded with six months' supplies of provisions intended for the Mackinac fort. A detachment of the American troops landing there blew up the block house and destroyed the schooner and her supplies. There remained now nothing more to do than to so guard the waters
that the destitution of the island could not be repaired. Two of the vessels, the "Tigress" and the "Scorpion," were left to maintain a strict blockade. This was proving very effective, and provisions ran so low in Mackinac, that a loaf of bread would sell for a dollar on the streets, and the men of the garrison were killing horses for meat.

The following extract from a letter written by one of the English officers depicts the situation within the fort at this time: "After the failure of the attack, the Americans established a blockade by which they intercepted our supplies. We had but a small store of provisions. The commander grew very anxious. The garrison was put on short allowances. Some horses that happened to be on the island were killed and salted down, and we occasionally were successful in procuring fish from the lake. To economize our means the greater part of the Indians were induced to depart to their homes. At length we saw ourselves on the verge of starvation with no hope of relief from any quarter."

During all the summer we find Colonel McDonall in his letters to the department begging and entreating for supplies.

There were yet other embarrassments. Although throughout the whole period the Indians of the Mackinac region were allies of the British, the alliance was not without its difficulties. Many of them showed an indecision when success was doubtful, as one of the English agents wrote, and "a predilection in favor of the Americans seemed to influence them." About the island "they be-
came very clamorous," another officer said. And Col. McDonall spoke of them as "an uncertain quantity"—that they "were fickle as the wind and it was a difficult task to keep them with us." He was embarrassed, too, by their flocking to the island and requiring to be fed.

But relief, and that by their own sagacity and daring, was at hand for the beleaguered garrison. When the "Nancy" and the block house on the Nottawasaga were destroyed, the officers in charge of that supply of stores, Lieut. Worsley, with seventeen sailors of the Royal Navy, had managed to escape and effect a passage in an open boat to the fort at Mackinac and had reported the loss of the stores. Forced by the necessity of the situation, a bold and desperate project was undertaken—that was, the capture of the two blockading vessels. Batteaux were fitted out and equipped at Mackinac, manned under Lieut. Worsley with his seamen and by volunteers from the garrison and Indians, making in all about seventy men. These set forth on the bold errand. The Scorpion and Tigress were then cruising in the neighborhood of Detour. On a dark night, rowing rapidly and in silence, they approached first the Tigress, which lay at anchor off St. Joseph, and taking it entirely by surprise, leaped aboard and after a hand to hand struggle soon had possession. Its crew were sent next day, as prisoners to Mackinac. The Tigress's signals were in the hands of the captors, and the American pennant was kept flying at the mast-head. On the second day after, the Scorpion was seen beating up towards her companion ship
unaware of its change of fortune. Night coming on she anchored some two miles off. About daylight the Tigress set all sail, swept down on her, opened fire and boarded and captured her. Sad fate, indeed, for these two war vessels, which only a year before had honorably figured in Commodore Perry’s victory on Lake Erie. I prefer not to dwell on the mortifying bit of history, except to say that candor and justice compel our highest admiration for this English feat of daring and prowess.

This ended all attempts to dislodge the English from our island. It remained under their flag until terms of peace and settlement were secured by the treaty of Ghent, February 1815. Mackinac was ever a favorite point in the eyes of the British, and all along an object of their strong desire; and they were loath to give it up. Col. McDonall, the able and successful commandant, spoke with strong feeling of the ‘unfortunate cession of the fort and the island of Michilimackinac to the United States.’ It had been a matter of official complaint and criticism in the province of Upper Canada, that after the first war it had been ‘injudiciously ceded’ by the English government. John Jay, our American representative in the conference of the treaty and the boundary lines, found that the commissioners of the Crown were more interested in an ‘extended commerce than in the possession of a vast tract of wilderness.’ The fur trade at that time was the main thing and Mackinac was the gateway to all the fur traffic of the west and southwest fields. And again, it ap-
pears in negotiating the treaty of 1815 that the commissioners of the crown, even when feeling obliged to forego a large part of their demands, still held out for the island of Mackinac (and Fort Niagara) as long as possible.* Thirty-two years had now passed since the American right to the island had been acknowledged by the treaty of 1783. Of these years only three had been years of war. But for one-half of that whole period the British flag had been flying over Fort Mackinac. In the complete sense, therefore, the destiny of the northwest was not assured until the treaty of Ghent.† With that treaty the question was finally and conclusively settled.

The posts of the English which had been captured by us, and ours here and there, which they had taken, were to be restored by each government to the other. In connection with this mutual delivery is an interesting fact mentioned in a private letter which Colonel McDonall wrote to his friend and fellow officer of the English army, Captain Bulger. He says that in the equipment of Fort Mackinac, at the time he was making the transfer, were cannon bearing the inscriptions: "Taken at Saratoga;" "Taken from Lord Cornwallis," and other such, and he speaks of his chagrin in being obliged to include, in his restoration of the fort, guns which told of English defeat and humiliation in the Revolutionary war; and that as an Englishman he felt "a strong temptation to a breach of

*Henry Adams' "History of the United States," vol. 9, p. 34.
†Hinsdale's "Old Northwest," p. 185.
that good faith which in all public treaties it is infamous to violate."

Surely it adds to our antiquarian and patriotic interest in the old fort to know that guns, captured from Burgoyne and from Cornwallis in the battles of the Revolution, once held position on these ramparts.

We do not know how these honorable trophies of the Revolution ever found their way to our remote pioneer out-post. We do know, however, that our loss of the fort, three years before, explains how they got back, temporarily, to their former English ownership. And now in their alternations of estate, after taking part in keeping off American troops from the island, and thus, as it were, redeeming themselves in English eyes from the bad fortune incurred in our war for independence, they again fell to our hands. And we can appreciate Col. McDonall's sense of regret at having to give them up. It was the same sentiment which Capt. McAfee, in his narrative of that war in which he himself had a part, tells us was exhibited by some of the British officers when by Hull's surrender several brass cannon fell to their hands which our forces had captured in the war of the Revolution—they "saluted them with tears."

It is vain to surmise the history of those interesting guns subsequent to 1815. How long they remained at the island post, and whether in time they were sent to the smelter's furnace, or are still in honorable preservation somewhere with other war relics, we cannot say. In this connection it

*"History of the Late War in the Western Country."
may be well to remark concerning that old fashioned cannon which has been lying in position on the village beach in front of the "fort garden," a familiar object for generations past. The story is that the gun figured in Com. Perry's battle on Lake Erie, though whether one of his own guns in the action or a British gun which he captured is uncertain; that it was left here long ago by one of the government revenue vessels. That it was put in charge of the Mackinac Custom House, and that it used to serve on 4th of July and other national occasions which called for celebration "at the cannon's mouth."

Upon their withdrawal from Mackinac, the English garrison established themselves on Drummond's Island in the northern end of Lake Huron, and maintained a strong post there. It was afterwards decided, however, by the joint commissioners in settling the boundary lines between the United States and Canada, that that part of the lake in which Drummond's Island lay belonged to the United States side of the line. Accordingly in 1828 the British garrison removed, and the island was turned over to our government.

Col. Anthony Butler was the American officer to whom the fort was delivered July, 1815, but he remained only until the arrangements for evacuation were completed, when he withdrew to Detroit, and Captain Willoughby Morgan became the first commandant under the restored American regime. From that time on there was a long succession of regular army soldiers and officers, inhabiting the old quarters and barracks. Many
of the officers who afterwards acquired high rank and distinction during our civil war, 1861-1865, either in the Union Army or Southern, had been in service here as young Captains or Lieutenants. Among them were Gen. Sumner, Gen. Heintzelman, Gen. Kirby Smith, Gen. Silas Casey, and Gen. Fred Steele, for whom a fort in the west has been named. General Pemberton was once a member of the garrison, and in a private letter written by one of the citizens in 1840, when the little island was ice-bound and there was a dearth of news, it is incidentally mentioned that "Lieut. Pemberton in the fort is engaged in getting up a private theatre, in an endeavor to ward off winter and solitude,"—the young officer little dreaming of that more serious drama in which he was to act, twenty-three years later, as commander of Vicksburg, with Grant's besieging army around him.

During the civil war, all troops being needed at the front, the soldiers were withdrawn from our fort. This was but temporary, however, and did not mean its abandonment.* Its flag and a solitary serjeant were left to show that it was still a military post of the United States. This faithful soldier remained at the fort for many years after the war, and was known to the visitors as the "Old Serjeant." For a period during the war it was made the place of confinement of some of the Confederate prisoners, principally notable officers who had been captured, at which time Michigan volunteer troops held it.

At the close of the war the fort resumed its old

---

*Occasionally at other times, also, the garrison would be temporarily sent elsewhere, but this never meant the giving up of the post.
time service as a garrison post, generally about fifty or sixty men of the regular army, with their officers, composing the force. A detachment would serve a few years, then be transferred and another would take its place, to enjoy in its turn the recuperative climate of the summer, and to endure the rigors and the isolation of the winters. So the old fort continued in use, with its morning and evening gun, its stirring bugle notes, its daily "guard mount," its pacing sentry, its drill, its "inspection days," until 1895. Then the sharp and decisive voice of authority called "halt" to the long march of military history in the straits of Mackinaw. The United States government, by formal act of Congress abandoned the fort, and gave it over, together with the National Park of eleven hundred acres, to the State of Michigan. The fort was dismantled, the old cannon were removed from the walls, and every soldier withdrawn. We do not question the fact, that as a fort constructed in primitive times it was unsuited to the days of modern warfare; nor the fact that with the numerous other well equipped posts, the department is maintaining for its troops, this old-fashioned one was not an absolute necessity. Nor do we question for a moment the propriety of making the State of Michigan the legatee and successor to this property, if the general government was determined to dispossess itself of it. It could not have been more suitably bestowed, if it had to pass into other hands. The commissioners, to whose charge it is now committed, appreciate and will cherish that historic and patriotic interest which attaches to the
old fort, and will keep the grounds intact and carefully guard the buildings. They will aim likewise to preserve the trees and the drives of the park in that natural beauty which has so long given them such charm. But while thus assured, it is at the same time a matter of deep regret that the national government should have forsaken the island. For sentimental reasons alone, even had there been no other, the old fort should have been retained as a United States post. A military seat which has two hundred years or more of history behind it, is not often to be found in the western world. Indeed, with the possible exception of Fort Marion, the old Spanish fortification at St. Augustine, Fla., it is doubtful if there be another on this whole continent, which could boast of so long a period of continuous occupation as old Fort Michilimackinac, which was established first at St. Ignace in the 17th century, then removed to old Mackinaw, and since 1780 has been located on our island.
CHAPTER VII.

Early Mackinac had among its citizens, sparse though its population was, a number of men of strong character and great business enterprise. Among them, not to speak of all, were Michael Dousman, John Dousman, Edward Biddle, Gurdon S. Hubbard, Samuel Abbot and Ambrose Davenport. John Dousman, Abbott and Davenport were the deputation of three gentlemen referred to by Lieut. Hanks, in his report of the surrender of the fort, as having accompanied the flag of truce in the negotiations between Captain Roberts and himself. After the English came into possession, the citizens were required to take the oath of allegiance to the king. Of those then living on the island, five are reported as refusing to do this—Messrs. Davenport, Bostwick, Stone, and the two Dousmans.*

With the exception of Michael Dousman, who was permitted to remain neutral, they were obliged to leave their homes and their property until the close of the war. Besides these, there were afterwards three men in particular who figured in large spheres, and were in reputation in other parts of the land as well as in this remote wilderness point. These were Ramsey Crooks, Robert Stuart and Henry R. Schoolcraft.

Mr. Crooks came to America from Scotland, as a young man. His career was an active and

*Biddle and Hubbard were not then residents of the island.
stirring one. He was known in connection with the fur trade, it is said, from the Atlantic to the Pacific. His business involved much of perilous journeying and startling adventure in the north and in the far west. He was with Hunt's expedition across the Rocky Mountains and to the Pacific coast, as far back as 1811, and again the next year he made the same overland journey back to the East. He was an educated, intelligent man, well experienced in human nature, and highly rated for his judgment, his enterprise and his integrity. He was one of Mr. Astor's right hand men in the extensive business of the fur company. In the American expedition against the island in 1814, in the attempt to dislodge the English, he, together with Davenport and John Dousman, had accompanied the squadron—the latter two as expatriated citizens, well acquainted with the waters, to help as guides; and Crooks to watch, as far as he could, the interests of Mr. Astor.* He did not make Mackinac his permanent residence during the whole time of his connection with the business, but was more or less on the island and engaged in its office work. New York, afterwards, was his home; and on Astor's selling out, he became chief proprietor and the president of the company. It is said of him that he concentrated, in his reminiscences, the history of the fur trade in America for forty years. He died in New York in 1859.

*Schoolcraft speaking of Davenport, (who, he says, was a Virginian), refers to his thus 'sailing about the island and in sight of his own home.' He remarks, too, that for his sufferings and losses, he ought to have been remunerated by the Government.
Robert Stuart was also a native of Scotland, born in 1784. He came to America at the age of twenty-two years, and illustrated the same spirit of enterprise and adventure. He first lived in Montreal, and served with the Northwestern Fur Co. In 1810 he connected himself, together with his uncle, David Stuart, with Mr. Astor's business, and was one of the party that sailed from New York by the ship "Tonquin" to found the fur trade city of Astoria, on the Pacific Coast. In 1812, it being exceedingly important that certain papers and dispatches be taken from Astoria to New York, and the ship in the meantime being destroyed, and there being no way of making the trip by sea, Stuart was put at the head of a party to undertake the journey overland. Ramsey Crooks was one of the band. This trip across the mountains and through the country of wild Indians, and over arid plains, involved severe hardships and peril, and illustrated the nerve, and vigor, and resources of the young leader. The party was nearly a year on the way. In 1819 he came to Mackinac and became a resident partner of the American Fur Company, and superintendent of its entire business in the west. He was remarkably energetic in business, a leader among men, and a conspicuous and forceful character wherever he might be placed. In the lack of hotel accommodations his home was constantly giving hospitable welcome and entertainment to visiting strangers. He dwelt on the island for fifteen years, and when the company sold out in 1834, removed to Detroit. He was afterward appointed by the Government as
Robert Stuart.

Indian Commissioner for all the tribes of the northwest, and guarded their interests with paternal care. The Indians used to speak of him as their best friend. He also served as State treasurer, and at the expiration of his term of office was trustee and secretary of the Illinois and Michigan Canal Board. Active in great commercial and public interests, he was also, subsequent to his conversion on the island in 1828, zealous and prominent in church work and always bore a high Christian character. He died very suddenly at Chicago, in 1848. His body was taken by a vessel over the lakes to Detroit for burial. In passing Mackinac the boat laid awhile at the dock, and all the people of the village paid their respects to the dead body of one who had been in former years a resident of the island, so well known and so greatly esteemed.

In connection with the Fur Company work of the island, which these two men did so much to promote, it may be well to quote from Mrs. John Kinzie, the wife of a Chicago pioneer, who with her husband was here in 1830. In her interesting book "Wau-Bun, the 'Early Day' in the Northwest," she thus writes, speaking of that period: "These were the palmy days of Mackinac. It was no unusual thing to see a hundred or more canoes of Indians at once approaching the island, laden with their articles of traffic; and if to these was added the squadron of large Mackinaw boats constantly arriving from the outposts with the furs, peltries and buffalo robes collected by the distant traders, some idea may be formed of the extensive
operations and the important position of the American Fur Company, as well as of the vast circle of human beings either immediately or remotely connected with it."

Henry R. Schoolcraft lived on the island from 1833 to 1841. He was a native of the State of New York. He was a student, an investigator into the facts and phenomena of nature, a remarkable linguist, a great traveler and explorer, and a prolific writer. He was given to archaeological researches; he explored the valley of the Mississippi; he investigated the mineral resources of much of the west, particularly of Missouri; and he discovered the source of the Mississippi river. His great work, and by which he is most known, was that in connection with the Indian race, having spent thirty years of his life in contact with them. Besides his travels among the tribes throughout the west and northwest, where his pursuits led him, he was the Government agent in Indian affairs, first at Sault Ste. Marie for eleven years, and then at Mackinac for eight years. He mentions that at one time over four thousand Indians were encamped along the shores of the island for a month; and that the annuities he paid that year amounted to $370,000 in money and goods. He also served in the negotiation of treaties for the Government with the tribes. While living at the Sault, he married a half-blood Indian girl. Her father, Mr. John Johnston, was an Irish gentleman of good standing, who, dwelling in the wilderness country of Lake Superior, had found a wife in the daughter of an Indian Chief. This daughter, Miss Johnston,
had been sent to Europe while a young girl to be educated under the care of her father's relatives, and she became a refined and cultivated Christian lady.

Mr. Schoolcraft in his eight years' residence on the island, lived in the house known to all readers of Miss Woolson's "Anne" as the "Old Agency." He writes on his arrival: "We found ourselves at ease in the rural and picturesque grounds and domicile of the United States Agency, overhung, as it is, by impending cliffs and commanding one of the most pleasing and captivating
views of lake scenery."* Every subject of scientific interest, all the physical phenomena of the island, and its antiquities and historic features, and all questions pertaining to the Indians and their race characteristics, their habits and customs, their language, their traditions and legends, their religion, and especially all that might lead to their moral and social improvement—these were matters of his constant study. At the same time he kept abreast of the general literature of the day, reading the books of note as they appeared and himself making contributions to literature by his own books and review articles and treatises, which were published in the East and in England. In his remote island home, ice-bound for half the year and largely shut out from the world, he was yet well known by his writings in the highest circles of learning. Visitors of note, from Europe as well as from the Eastern States, coming to the island, were frequently calling at his house with letters of introduction. He was voted a complimentary membership in numerous scientific, historical and antiquarian societies, both in this country and in the old world. He had correspondents among scholars and savants of the highest rank. His opinions and views on subjects of which he had made a study were greatly prized. The eminent Sir Humphrey Davy, of England, for instance, expressed the highest appreciation of certain contributions of scientific interest which Mr. Schoolcraft had pre-

*In the minds of some now living on the island he has been confused with his brother, James Schoolcraft, who also lived in the village and was murdered by a John Tanner, in 1845.
pared in his island home; and Charles Darwin, in his work, "The Descent of Man," quotes with approval some opinion he had expressed, and calls him "a most capable judge." Prof. Silliman, also ex-Presidents John Adams, Thos. Jefferson and James Madison, wrote him letters of marked approbation respecting a contribution he had written for the American Geological Society. Bancroft conferred with him before writing those parts of his "History of the United States," which pertain to the Indians, and was in frequent correspondence with him; and Longfellow, in his Hiawatha Indian notes, expresses his sense of obligation to him. Some of Schoolcraft's lectures were translated into French, and a prize was awarded him by the National Institute of France. Among his frequent correspondents, as he was an active Christian and in sympathy with all church interests, were the secretaries of different missionary societies in the East, seeking his opinion and his counsel in reference to the location of stations and the methods of work among the Indian tribes. The amount of literary work he accomplished was remarkable, especially in view of his public services, which often required extensive journeys in distant wilderness regions, and much of camp life. He was of remarkable physical vigor and industry, however, and it is said of him, that he had been known to write from sun to sun almost every day for many years.

Mr. Schoolcraft removed from the island to New York in 1831, and after an extensive travel through Europe, devoted himself principally to
literary work. He published about thirty different books. These largely pertained to his explorations, and to scientific subjects. The chief products of his pen in respect to the Indians were his "Algic Researches," and later his very extensive "Ethnological Researches among the Red Men," which was prepared under the direction and patronage of Congress. It is in six large volumes with over 300 colored engravings, and was issued in the best style of the printer's art. It is a thesaurus of information, and furnishes the most complete and authentic treatment the subject has ever received.

For nearly twenty years Mr. Schoolcraft lived at Washington, and died there in December, 1864. The Rev. Dr. Sunderland, for over forty years a Presbyterian pastor in that city, has said of him: "He was a noble Christian man, and his last years were spent in the society of his friends and among his books * * a modest, retiring, unostentatious man, but of deep, sincere piety and greatly interested in the welfare of mankind."
CHAPTER VIII.

With the explorer, the trader and the soldier, in the early days of the French occupation, there came also the missionary. More than two centuries ago pioneer Jesuit priests planted the cross in these wilds of the upper lakes; first at Sault Ste. Marie, as early as two hundred and fifty years since, and then in 1671 in our Michilimackinac region of St. Ignace,* on the northern mainland, four miles across from the island. The latter work is associated particularly with Marquette, who founded it, and who was one of the most heroic and devoted of the early missionaries who came to this continent from France. He was a scholar and a man of science, according to the attainments of that day. It is said he was acquainted with six different languages. He was held in reverent esteem, both by the savages of the woods and by the traders and officers of the settlements. To his culture, his refinement and his spirituality were added the enthusiasm and daring of the explorer. He went out to find new countries as also to preach in the pagan wilds. In 1673, accompanied by Joliet, he set forth from St. Ignace with a small company in two bark canoes, on a long voyage of discovery. He struck out into Lake Michigan, thence into the rivers of Wisconsin, and thence into the Mississippi, and floated down that great river as far as to a

*Point Iroquois, as it was first known.
point some thirty miles below the mouth of the Arkansas river, almost to the Louisiana line. There the southern journey was ended and the return trip was begun—ascending the Mississippi, entering the Illinois and thus reaching Lake Michigan again. But for Marquette the trip was never finished. He died at a point on the eastern shore of that lake, about midway between its upper and lower ends, and was buried there by his ever faithful and devoted Indian companions. Two years afterwards his body was exhumed and reverently taken back for interment at the St. Ignace Mission, which he had longingly desired again to reach, but had died without the sight. The discovery of his grave in the present town of St. Ignace, in the year 1877, has given new interest to that locality.

Following the temporary abandonment of the French post of Michilimackinac in 1701, and the removal of the settlement to Detroit, as already referred to, the St. Ignace Mission was given up, and the church burned by the priests themselves in fear lest it should be sacrilegiously destroyed by the savages. Subsequently, on the re-establishment of the fort on the southern peninsula opposite, the Catholic mission was revived and the Church of St. Ann was organized—the church and the entire settlement of families, as well as the garrison, being within the palisade enclosure. When in 1780 the fort was removed to the island—and the settlers following—the church was also removed, its logs and timbers being taken down separately and then rejoined and set up again. It stood on
the old burying lot south of the present Astor House. Subsequently it was removed to another site. An addition was made extending its length, and the old church continued to stand until it gave way to the present large edifice, built on the same spot, in 1874. As an organization, however, the church dates far back to the early days over at old Mackinaw. The ground on which the building now stands was a bequest to the parish by a Madam La Framboise, who lived near by, with the stipulation that at death her body should be buried under the altar, in case the church should be removed to the place indicated. This being done, the conditions of the will were fulfilled. This Madam was of Indian blood, and the widow of a French fur trader. She is reported to have been a woman of remarkable energy and enterprise, and on the death of her husband ably managed the business he had left. She acquired the rudiments of education after her marriage, being taught by her husband, and in later years made it a custom to receive young pupils at her house to teach them to read and write, and also to instruct them in the principles of her religion. Her daughter became the wife of Lieut. John S. Pierce, a brother of President Pierce, who was an officer at the garrison in the early days, 1815-1820.

In the early times, the island being so remote a pioneer point, and its population meagre, this parish did not always have a resident priest, and for much of the time could only be visited by one at irregular and often distant intervals. In 1782, a petition signed by the merchants and other in-
habitants of the village, was addressed to General Haldimand, the English Governor General of the Province, asking that the Government take steps to aid in securing a cure, or minister of religion, for the stated maintenance of services. There appears nothing to show that this was granted. The fur trade brought an element of population of a very mixed character. There were the educated officers and clerks of the company, and the voyageurs and trappers, who spent most of their time in the woods and on the water, with Mackinac as their place of resting and wage-payment, and the place of the reckless wasting of their hard-earned money. One who knew well the early character of the island, said of it, that few places on the continent had been so celebrated a locality for wild enjoyment; that the earnings of a year were often spent in the carousals of a week or a day; that the lordly Highlander, the impetuous son of Erin, and the proud and independent Englishman, did not do much better on the score of moral responsibilities than the humble voyageurs and courir des bois; that they broke generally, nine out of the ten commandments without a wince, but kept the other very scrupulously, and would flash up and call their companions to a duel who doubted them on that point!

Protestant Missions in the west gradually took shape as the settlement of the country advanced from the sea-board. The Rev. David Bacon, of the Connecticut Missionary Society, the father of the late Dr. Leonard Bacon, preached on the island for a short time as far back as 1802; not, however, es-
establishing a mission or organizing a church. Then, in 1820, the Rev. Jedidiah Morse, D.D., a Congregational minister, the father of the inventor of the telegraph system, visited the island, and made a short stay. The same Dr. Morse was the author of "Morse's Geography," once extensively used in our schools, and still well remembered. In earlier years the fort was a chaplaincy post, and the clergyman in charge, the Rev. Mr. O'Brien, from 1842 until the opening of the civil war in 1861, conducted stated services of the Episcopal form of worship, which accommodated the people of the village as well as the soldiers. Out of this work grew the Trinity Episcopal Church, organized in 1873, under the ministration of the Rev. Wm. G. Stonex, who continued for some years the resident clergyman. For a time the parish held its Sunday services in the fort chapel; then the old Court House building was used, and in 1882 the present Trinity Church building was erected, under the leadership of the Rev. M. C. Stanley. This remains still the only organized Protestant church on the island. It has, generally, a resident clergyman in charge. The Rt. Rev. Thomas F. Davies, D.D., bishop of the diocese of Michigan, being a summer cottager on the island, frequently officiates during the visitors' season.

To go back again to our earlier period. At the time of Dr. Morse's visit to the island, he was under commission by the U.S. government on a two years' tour of observation and inspection among the various Indian tribes with a view "to devise the most suitable plan to advance their civilization
and happiness."

He arrived at the island, June 16th, in the evening, and writes of the view that greeted his eye in the morning— ** "the fort looking down from the high bluff, and a fleet of Indian canoes drawn up on the beach, along which were pitched fifty or one hundred lodges—cone-shaped bark tents—filled with three or four hundred Indians, men, women and children, come to receive their annuities from the United States Government and to trade." He remained a little over two weeks and preached in the Court House to large and attentive audiences. A week-day school and a Sabbath-school were formed for the children, and arrangements effected for Bible Society and Tract Society work. On his return to the East, the United Foreign Missionary Society, learning of the situation, took steps to plant a mission at Mackinac. The island was considered a strategic point for such operations, even as previously it had been a strategic situation from a military point of view. It was a central gathering place for the Indians for hundreds of miles away as well as from near at hand. The mission was established in 1823. The Rev. Wm. Ferry, a Presbyterian minister from the East, was appointed superintendent.

The Mission was designed chiefly as a school for the training of Indian youth. It opened with twelve pupils. The second year it numbered seventy. Two years after the opening of the enterprise the large school building and boarding house, now the hotel at the east end of the island,

*From letter of instructions written him by John C. Calhoun, Secretary of War, Feb. 1820.*
GOOD WORK OF THE SCHOOL.

and bearing the original name "Mission House," was built. In 1826 the Society which had begun the work and maintained it for three years, was merged with the American Board of Commissioners for Foreign Missions. Henceforth, until it closed, the Mackinac Mission was the work of that Board with headquarters in Boston. For several years the attendance at the school averaged about one hundred and fifty a year. Major Anderson, of the Government service, writing in 1828, says that when this mission building was erected it was thought to be large enough to accommodate all who might desire its privileges, but such was the thirst for knowledge, that the house was then full; and that at least fifty more had sought admission that season who could not be received for lack of room.

Besides the rudiments of English education, the boys were taught the more useful sort of handi-craft and trades, and the girls were taught sewing and housework. They were at all times under Christian influence, and were systematically instructed in the truths of the Gospel. In the Biography of Mrs. Jeremiah Porter, who before her marriage was Miss Chappelle, and who spent two years (1830-32) on the island, is given an extract from her diary, in which she speaks of visiting the Mission House and hearing the young Indian girls, at their evening lesson, repeat together the 23d Psalm and the 55th chapter of Isaiah, and of hearing a hymn sung "by sixteen sweet Indian voices which was particularly touching." Thomas L. McKenney, of the Indian Depart-
ment, gives another interesting glimpse of the school in his book, "Sketches of a Tour to the Lakes," published in 1827. He had been sent out, the year before, from Washington as joint commissioner with General Cass in negotiating a treaty with the Indians of the North. Having touched at Mackinac he describes his calling, in company with Mr. Robert Stuart, at "the Missionary establishment in charge of Mr. Ferry." The school family were at supper, and he writes, "we joined them in their prayers, which are offered after this meal." On another day he again visited the school, and reported of it: "The buildings are admirably adapted for the object for which they were built. They are composed of a center and two wings—the center is occupied chiefly as the eating department and the offices connected therewith. The western wing accommodated the family. In the eastern wing are the school rooms, and below, in the ground story, are apartments for shoemakers and other manufactures. In the girls' school were seventy-three, from four to seventeen years old. In personal cleanliness and neatness, in behavior, in attainments in various branches, no children, white or red, excel them. The boys' school has about eighty, from four to eighteen. One is from Fond du Lac, upwards of seven hundred miles. Another from the Lake of the Woods. How far they have come to get light!" Referring to the Superintendent, Mr. Ferry, he speaks of him in terms of unqualified approbation. "Few men possess his skill, his qualification, his industry and devotion to the work. Such a pattern of practical industry
is without price in such an establishment. Indeed, the entire mission family appeared to me to have undertaken this most interesting charge from the purest motives.” He makes mention of Mrs. Robert Stuart as “an excellent, accomplished and intelligent lady, whose soul is in this work of mercy. This school is in her eyes, the green spot of the island. With her influence and means she has held up the hands that were ready, in the beginning of this establishment, to hang down. She looks upon Mr. Ferry and his labors as being worth more to the island than all the land of which it is composed; whilst he, with gratitude, mentions her kindness, and that of her co-operating husband.”

Mrs. John Kinzie, already referred to as being on the island in 1830, visited the Mission, and in her book makes similar testimony concerning it, saying among other things: “Through the zeal and good management of Mr. and Mrs. Ferry, and the fostering encouragement of the congregation, the school was in great repute.”

A church for the island soon grew out of the school. It was Presbyterian in name and form. It was a branch of Mr. Ferry’s work, and he was the pastor during the whole time he remained on the island. A church building, the historic “Old Mission Church,” still standing in its original dimensions and appearance, was built in 1829-30. Mackinac in those days shared with Detroit in distinction, the two towns being almost the only places of note in the State of Michigan. The Fur Company’s business, together with the general
trading interests which centered here, brought to the island a considerable population. Thus large and interesting congregations were furnished for this church. Besides the teachers and their families, and the pupils of the mission school, there were many families of the village, officers and clerks of the company, traders, native Indian converts and others, who were members in regular attendance. The military post, too, used to be represented—officers and men coming down the street on Sunday mornings in martial step. The soldiers would stack their guns outside in front of the church; one of the men would be detailed to stand guard over the arms, while the others would file into the pews set apart for their accommodation.

The whole number of members enrolled during the history of the church was about eighty, exclusive of the mission family. As a pioneer church on the wilderness frontier, it was remarkable in having on its membership roll, and among its office bearers as Ruling Elders, two men of such standing and public name as Robert Stuart and Henry R. Schoolcraft.

The Mackinac experiment of mission work, unfortunately, was not continued long enough to show the largest results. Changes took place on the island which seriously affected the situation. It ceased to be the great resort for the Indians it had been at first. The Michigan lands were coming in demand for settlement; and the Government was deporting some of the tribes to reservations farther West. Mr. Astor retired from the
Fur Company, and that business lost its former magnitude. This involved the loss of many families and a change in social conditions. In 1834, Mr. Ferry removed from the island,* as did Mr. Stuart, the same year. Thus, for a variety of reasons the place ceasing to be an advantageous point for the work, it was deemed best to discontinue it; and about 1836 the land (some twelve acres) and the buildings thereon were sold, and in 1837 the Mission was formally given up. During the brief history of the school, however, not less than five hundred children of Indian blood and habits acquired the rudiments of education, and were taught the pursuits and toils of civilized life, and many became Christians. The American Board at that time considered that the Mackinac Mission had been very successful, especially in its out-reaching influence throughout the surrounding regions.

One instance of remarkable conversion in the work of the Mission, was that of an old Indian necromancer or "medicine man." His name was Wazhuska, or more popularly, Chuska. For 40 years he had been famous on the island in the practice of that mysterious occultism which has often been found among low and barbarous races. He was supposed by his people to have supernatural power, and indeed the instances which have been reported of his strange facility, seem remarkable. A sorcerer he might have been called, or, as such have also been designated, a "practitioner of the

*Mr. Ferry settled at what became Grand Haven, in Michigan, himself founding the city and also its Presbyterian Church, and continued to reside there until his death in 1867.
black art.” He embraced the Christian faith with clear perception of its essential truths, and with great simplicity of spirit; and entirely renounced all his “hidden works of darkness,” together with the vice of drunkenness to which he had been lamentably addicted, and after a year of testing and probation was admitted to membership in the Mission Church. He died in 1837, and was buried on Round Island. This story of Chuska and his conversion by the power of divine grace, was considered of such interest that we find it related by Schoolcraft in three of his books—his “Personal Memoirs,” his “Oneota,” (a collection of miscellany which tells of Chuska under the heading “The Magician of the Manitouline Islands,”) and in his elaborate six volume work published by act of Congress. In his account of the case as given in the last named publication he furnishes representations of the crude pictographic charms, and totems and symbols, which Chuska was accustomed to use in his pagan incantations, and which at the time of his conversion he had surrendered to Mr. Schoolcraft. The tale of Chuska is also told by Mrs. Jameson in the narrative of her visit to Mackinac in 1835; and in Strickland’s “Old Mackinaw.”

The Mission given up, the school closed, the teachers and their families gone, the trade and emporium character of the village falling away, the church organization did not long survive. There was no successor of Mr. Ferry in the pastorate. Mr. Schoolcraft, as an office bearer in the church, and always actively interested in its welfare, did all
that a layman, so fully occupied as he, could do for its maintenance, often conducting a Sabbath service and reading a sermon to the people from some good collection. But so largely losing its families by removal, and unable under existing conditions to secure a pastor, the church organization became extinct. The church building, however, the "Old Mission Church" as it is familiarly known to this day, has survived for sixty years the lapse of the organization. It is probably the oldest Protestant Church structure in the whole Northwest. And while other ancient church buildings have been enlarged and changed in the course of years; an extension put on, or a front or a tower added, or other material alterations made; this one, from end to end, and in its entire structural form, remains the same as at the time of its early dedication. It has stood four square to all the winds that have blown, as "solid as the faith of those who built it,"* unchanged from its original style and its bare and simple appearance, with its old weather-vane and its wondrously bright tin-topped belfry—a mute memorial of a most worthy history of two generations ago. Despite its disuse and its increasing dilapidation, it has long been an object of tender interest, and has been visited by hundreds every season. It is gratifying, therefore, to know that a number of the summer cottagers and other visitors, joined by some of the island residents, have purchased the old church, and repaired and restored it so as to present the old-time appearance in which it had been known

*Miss Woolson's "Anne."
for well nigh seventy years.* The gray weather-worn exterior is purposely left unpainted. The same old "high-up" pulpit, the plain square pews with doors on them, the diminutive panes of glass in the windows, the quaint old-fashioned gallery at the entrance end—all these features appear as at the first. The property is held in trust for the purchasers by a board of seven trustees, five of whom are to be visitors who own or rent cottages, and two to be residents of the village. There is no ecclesiastical organization in connection with the building, nor any denominational color or control. The motive in the movement has been, first, to preserve the old sanctuary as a historic relic of the island and memorial of early mission work; and, second, to use it as a chapel for union religious services during the few weeks when summer tourists crowd the island.

*Repaired and restored in 1895.
CHAPTER IX.

Our Island in its dimensions is three miles east and west, and two miles north and south. It has a crescent shaped harbor, which gives the same outline to the village nestling on the rounded beach. There can be few places so small and circumscribed that can furnish so many pleasing impressions. In its antiquarian interest, in its unlikeness to the outside world, in its dim traditions, and in its entrancing charms of natural scenery, there is found every variety for the eye, the taste and the imagination. While small enough to steam around it in an hour on the excursion boats, it is yet large enough to admit of long secluded walks through its quiet, gentle woods. In the three score years or more that visitors have been coming here, there have grown up for it such tributes and terms of admiration as, Gem of the Straits, Fairy Isle, Tourists' Paradise, Princess of the Islands, and such like.

Rising almost perpendicularly out of the water, one hundred and fifty feet high, with its white stone cliffs and bluffs, and twice that height back on the crest of the hill, and covered with the densest and greenest foliage, it is an object of sight for many miles in every direction. Throughout we find that development and variety of beauty which nature makes when left to herself. The trees are the maple, and pine, and birch, and old beeches with strait and far-reaching branches and with
rugged trunks, on which can be seen initials and dates running back many years—the mementos of visitors of long ago. The hardy cedar abounds also, and the evergreen spruce, larch and laurel, and tamarack. Throughout the woods running in different directions, are winding roads, arched and shaded by the overhanging tree-tops, as if they were continuous bowers, and bewitching foot-paths and trails; the fragrance of the fir and the balsam is everywhere, and a buoyancy in the atmosphere which invites to walking—the whole tract being safe, always, for even children to wander in. You come upon patches of the delicate wild strawberry with its aromatic flavor, the wild rose, the blue gentian, profuse beds of daisies, said to be of the largest variety in America, the curious "Indian pipes," luxuriant ferns in dark nooks, forever hidden from the sun, and thickest coverings of moss on rocks and old tree trunks. Then always, from every quarter and in every direction, are to be seen the great waters of the lakes, so many "seas of sweet water," as they were described by Cadillac, the early French commander in this region—Huron to the east and Michigan on the west, with the Mackinac Straits between, and all so deep, so pure, so beautifully colored; and whether in the dead calm, when smooth as a floor, or shimmering and glistening in the sunshine, or in the silvery sheen of the moon at night, or again tossing and billowing in the storm—always exercising the power of a spell upon the beholder. Ever in sight, too, are the neighboring islands, standing out in the midst as masses of living green;
and the light-houses with their faithful, friendly night work; and the young cities on the two mainlands in opposite directions; and always the picturesque old fort. Then, scattered over the islands are glens, and dells, and springs, and fantastic rock formations, ("rock-osities" they were sometimes facetiously called in early days.) Many of these formations are interesting in a geological point of view as well as for their marked appearance and their legendary associations; and two of them, Sugar Loaf and Arch Rock, have been much studied by scientists, and are pictured in certain college text books to illustrate the teachings of natural science.

On the eastern part of the island you come on certain openings which the earlier French termed Grands Jardins. Schoolcraft says no resident pretended to know their origin; that they had evidently been cleared for tillng purposes at a very early day, and that in his time there were mounds of stones, in a little valley near Arch Rock, which resembled the Scotch cairns, and which he supposes were the stones gathered out in the preparation of these little fields. These openings continued, at times, to be utilized for planting purposes to a period within the memory of persons now living on the island. For a long time past, however, they have been left alone, and nature has beautifully adorned them with a very luxuriant and graceful growth of evergreen trees and parterres of juniper in self-arranged grouping and order, making each such place appear as if laid out and
cultivated on the most artistic plans of landscape gardening.

For summer comfort—that is, for the escape of heat and the enjoyment of sifted, clean, delicious air—there can be no place excelling. As an old-time frequenter once said of it: "It must be air that came from Eden and escaped the curse." The immense bodies of water in the necklace of lakes thrown about the island become the regulator of its temperature. The only complaint that visitors ever make of the climate, is that it is not quite warm enough, and that blankets can not be "put away for the summer," but are in nightly requisition, and that the "family hearthstone" claims July and August as part of its working season. Malaria and hay fever are unknown. Dr. Daniel Drake, of Cincinnati, an eminent medical authority in his day, thus wrote from the island: "To one of jaded sensibilities, all around him is refreshing. A feeling of security comes over him, and when, from the rocky battlements of Fort Mackinac, he looks down upon the surrounding wastes, they seem a mount of defense against the host of annoyances from which he had sought refuge—the historic associations, not less than the scenery of the island, being well fitted to maintain the salutary mental excitement."

The island has its legends, and folk-lore, and traditionary tales of romance and tragedy. There is not so much of this, however, as many suppose.

"Hygeia, too, should place her temple here; for it has one of the purest, driest, cleanest and most healthful atmospheres."—Schoolcraft.
It is small in area and its scope for scenes, and tales, and associations is limited. Reference has already been made to Arch Rock as the gateway of entrance, in the Indian mind, for their Manitou of the lakes, when he visited the island, and to Sugar Loaf as his fancied wigwam, and to other rock formations which towered above the ground and were personified into watching giants. The Devil's Kitchen, on the southwest beach, has also been mentioned, but as divested of all mystery and as-
association with the dim and early past. Chimney Rock and Fairy Arch are but appropriate names for interesting natural objects. The lofty, jutting cliff known as Pontiac's Look-out, is undoubtedly an admirable look-out spot, and is often so used now, as it probably often was in the days of Indian strifes when canoes of war parties went to and fro over the waters of the Straits. But we can not vouch for its ever having been Pontiac's watch-tower; for although the influence of that chieftain was felt in these remote parts, his home was near Detroit, and while we read of his travelling to the East and the South, and as having had part in the battle of Braddock's defeat near Pittsburgh, we find nothing to show that he had ever been so far north as our island, or at least had ever sojourned there. Lover's Leap, rising abruptly 145 feet above the lake, is too good a pinnacle, and too suitable for such sadly romantic purpose, as far as precipitous height and frightful rocks beneath are concerned, not to have suggested the tale of the too faithful, heart-sore Indian maiden. The story of Skull Cave has already been told; and although a piece of history, as far as the name of Henry the trader figures in it, should be justly regarded with as much interest as if it belonged to myth and fable. But at the same time, with all the modifications which a sober realism may demand, there is begotten in the mind of every one who breathes the soft and dreamy air, and surrenders himself to the witchery of the little island, an impression of the wierd, and the mystical, and the poetic, however little defined and embodied it may be. This im-
pression is increased in the sense of charm imparted by the dim and shadowy past of a noble but untutored race of nature's children in connection with a spot of such rare attractiveness, and which, dis-

ARCH ROCK.

similar in formation and character from all the other land about, seems as though it were separate from the ordinary seats of life.

Arch Rock has long been celebrated. It ap-
pears as if hanging in the air, and as a caprice of nature. It is a part of the precipitous cliff-side, and stands a hundred and forty feet above the water’s edge. It has been accounted for by the more rapid decomposition of the lower than of the upper parts of the calcareous stone bank—which process, however, it used to be thought, was fast extending to the whole. McKenney in his "Tour of the Lakes," published in 1827, thus writes: "This arch is crumbling, and a few years will deprive the island of Michilimackinac of a curiosity which it is worth visiting to see, even if this were the only inducement." The latter remark is most true but we are glad he was so mistaken in the first part of his sentence. The arch has survived the unfortunate prophecy for seventy years, and bids fair still to hold on. It is true, however, that some portions may have fallen, and the surface of the cross-way been reduced, since the days when boys played on it, and when, according to an early tradition, a lady rode horse-back over the span.

Sugar Loaf is another curiosity in stone; conical in shape, like the old-fashioned form in which hard, white sugar used to be prepared. Including the plateau out of which it rises, it is two hundred and eighty-four feet high, erect and rugged, in appearance somewhat between a pyramid of Egypt and an obelisk. Like the Arch, it is a "survival of the fittest"—the softer substance about it being worn away and carried off in the process of geological changes, and leaving it solitary among the trees.

Robinson’s Folly is the lofty, broad and blunt
precipitous cliff at the East end of the island, one hundred and twenty-seven feet above the beach. The origin of the name is uncertain, save that it is associated in some way with the English Captain Robinson (Robertson) who belonged to the fort garrison for seven years, and, as already mentioned, was its commandant from 1782 to 1787. There are no less than five traditionary stories, or legends, in explanation of the name. These stories vary from the prosaic and trifling, to the very romantic and tragical. A common account is that he built a little bower house on the very edge of the cliff which he made a place of resort, and revelry mayhap, in summer days; and that once, either by a gale of wind or by the crumbling of the outer ledge of stone, the house fell to the beach below. One version of the legend has Robinson himself in the house at the time, and, like a devoted sea captain "going down with his ship," dashed to death in the fall. Another is that on one occasion when a feast and carousal were projected on the cliff, and when the things of good cheer were all in readiness, and the participants, led by their host, delaying for a little their arrival, some lurking Indians, watchful and very hungry, stole a march on the company and devoured all that was in sight.

The other tales are of a different hue. One is, that once walking near this spot the Captain thought he saw just before him, and gazing at him, a beautiful maiden. In attempting gallantly to approach her, she kept receding, and walking backwards as she moved she came dangerously
near the edge. Rushing forward to her rescue, the girl proved to be but a phantom and dissolved into thin air, while the impetuous captain was dashed to death on the rocks below. Yet another is of this order: That Captain Robinson had been one of the garrison force at the old fort across the Straits at the time of the massacre in 1763, and had been saved by an Indian girl who was exceedingly attached to him. After removing to the island, and bringing a white bride there, the Indian girl followed him and dwelt in a lodge he had built for her on the brow of the great cliff, nursing her jealousy and revenge. She begged one last interview with him before leaving the place forever. On the Captain's granting this, and standing beside her on the edge, she suddenly seized his arm in her frenzy and leaped off, dragging him with her to death.

There is one more of this harrowingly tragical kind, in the attempt to explain the naming, which had much currency in earlier days, and is given in tourists' notes of sixty years ago: That Robinson had married an amiable and attractive Indian girl, Wintemoyeh, the youngest daughter of Peezhicki, a great war chief of the Chippewas, and had brought her to his home at the fort. This aroused the deadly hatred of Peezhicki, who had reserved the girl for one of the warriors of his tribe. Robinson celebrated the marriage by giving a banquet feast in his bower on the cliff. The bride was present, and a company of guests. The father learned of the feast and concealed himself in the cedar bushes to shoot the man who had taken his daughter.
A faithful sergeant, (the story even gives his name, MacWhorter,) was present and saw the Indian level his gun. He sprang up to protect the Captain, and himself received the shot and fell dead. Robinson then grappled with the fierce chief, and in the struggle the two men came dangerously near the brow. The Indian, with his tomahawk raised, took a step or two backward to get better poise for his blow. This brought him to the very edge. A piece of stone gave way and he fell, but saved himself by catching at the projecting root of a tree. The girl now seeing her husband safe and only her father in danger, sprang forward to his help. He was thus able to raise himself to where she stood. Then seizing her around the waist, he dashed off from the cliff and both perished together.

The first two of these stories concerning the famous cliff, might very naturally suggest the name "Folly." But the others smack more of profound tragedy, spiced with romance. Of course, Robinson was not in the massacre affair of long before, across the straits; he being at that time in army service, under Gen. Bouquet, against the Indians in Eastern Pennsylvania. That he met his death on the island by falling over the cliff, or even in a more normal manner, is a supposition only, without any evidence. There is reason to suppose he still "lived to fight another day" after leaving the island post. It may be added, too, that at the period of his Mackinac command he had already seen over thirty years of service in the English army, and was no longer in the romance
and lively heyday of youth. There must, however, have been something about a summer bower or hut, and something about feasting, and something about a dreadful fall, which illustrated the "folly" of establishing a pleasure resort on the very brow of a dreadful precipice. Viewed together, these stories all become interesting as throwing some light on the origin of myths, and as showing how traditions, exceedingly variant, may yet have some of the same threads running through them all. But I would not philosophize. I simply rehearse these stories, the trivial and the grave, and leave them to the imagination and the choice of the reader.
CHAPTER X.

From an early day the island's charm of sylvan and water scenery and its delightful summer air, together with its historical associations and its flavor of antiquity, gave it a wide-spread fame. There are but few places anywhere in our country that are older as tourist resorts. Seventy and eighty years ago visitors were coming here, despite the difficulty and tedium in that time, of reaching so remote a point. Persons of high distinction in public life and in the walks of literature, and travelers from foreign countries, were often among the visitors; and our island has figured in many descriptive books of travel. As some of these authors wrote so appreciatingly of the island, and as those particular books of long ago are now out of print and not easily accessible, I think the readers of this sketch will be pleased to see a few extracts. These writers all speak of having known the island by reputation in advance of their coming, and of being drawn by its fame.

In 1843, the Countess Ossoli, better known as our American Margaret Fuller, of Boston, spent nine days in Mackinac, as part of a protracted journey she made in the northwest, and which she detailed in her book, "Summer on the Lakes." She expressed in advance her pleasurable anticipation of "the most celebrated beauties of the island of Mackinac;" and then adds her tribute to "the
exceeding beauty of the spot and its position.” She arrived at a time when nearly two thousand Indians (and “more coming every day”) were encamped on the beach to receive their annual payments from the government. As the vessel came into the harbor “the Captain had some rockets let off which greatly excited the Indians, and their wild cries resounded along the shores.” The island was “a scene of ideal loveliness, and these wild forms adorned it as looking so at home in it.” She represents it as a “pleasing sight, after the raw, crude, staring assemblage of houses everywhere sure to be met in this country, to see the old French town, mellow in its coloring, and with the harmonious effect of a slow growth which assimilates naturally with objects around it.” Concerning Arch Rock, she says: “The arch is perfect, whether you look up through it from the lake, or down through it to the transparent waters.” She both ascended and descended “the steep and crumbling path, and rested at the summit beneath the trees, and at the foot upon the cool mossy stones beside the lapsing wave.” Sugar-Loaf rock struck her as having “the air of a helmet, as seen from an eminence at the side. The rock may be ascended by the bold and agile. Half way up is a niche to which those, who are neither, can climb a ladder.” The woods she describes as “very full in foliage, and in August showed the tender green and pliant leaf of June elsewhere.” She gives us a view from the bluffs on the harbor side: “I never wished to see a more fascinating picture. It was an hour of the deepest serenity;
A SCENE ON THE BEACH.

bright blue and gold with rich shadows. Every moment the sunlight fell more mellow. The Indians were grouped and scattered among the lodges; the women preparing food over the many small fires; the children, half naked, wild as little goblins, were playing both in and out of the water; bark canoes upturned upon the beach, and others coming, their square sails set and with almost arrowy speed.” And a familiar picture is this: “Those evenings we were happy, looking over the old-fashioned garden, over the beach, and the pretty island opposite, beneath the growing moon.”

A two-volume book, (published anonymously and giving no clue to its author, except that he was a practicing physician of New York City), titled “Life on the Lakes, or a Trip to the Pictured Rocks,” describes a visit to Mackinac in 1835.* “Though the first glance,” he says, “at any looked for object is most always disappointing, it is not so when you first see Mackinac.” A moonlight view of the island from the waters, he thus describes: “The scene was enchanting; the tall white cliff, the whiter fort, the winding, yet still precipitous pathway, the village below buried in a deep, gloomy shade, the little bay where two or three small, half-rigged sloops lay asleep upon the water.” It reminded him of descriptions he had read of Spanish scenery, “where the white walls of some Moorish castle crown the brow of the lofty Sierra.” In describing his stay on the island he

*The author is supposed to have been Dr. Chandler R. Gilman, of the College of Physicians and Surgeons, New York.
makes interesting mention of a Sunday service he attended at the Old Mission Church. He reports the building as neat and commodious, though the congregation was small. There was no Protestant clergyman on the island, but Mr. Schoolcraft (the ruling elder of the church) conducted the service and read from some book a very good sermon. The singing of the choir was excellent, and was led by a sergeant of the fort. The whole appearance of the congregation, he thought, was very striking; officers and privates of the garrison, with the marks of rank of the one class, and the plainer uniforms of the other, were mingled together in the body of the church; there were well-dressed ladies and gentlemen of the village along with those of simpler attire; and here and there were Indians wearing blankets, and standing about the doors were others of that race in their ordinary savage dress.

He mentions in evident astonishment, and as conveying a hint about the island climate, his eating cherries and currants in Mr. Schoolcraft’s garden in the month of September. And as a piece of harmless pleasantry, we may give yet another of his observations of sixty-two years ago: “There are more cows in Mackinac than in any other place of its size in the known world, and every cow has at least one bell.”

English visitors in their tours of observation through the United States were often drawn thither—making the long journey to these upper lakes, and stopping off to see the island of whose fame they had heard. Captain Marryatt, first an
officer of celebrity in the English navy, but more known in this country as a novelist largely given to sea tales, was here in the summer of 1837. In his "Diary of America" he writes of Mackinac: "It has the appearance of a fairy island floating on the water, which is so pure and transparent that you may see down to almost any depth, and the air above is as pure as the water that you feel invigorated as you breathe it."

*Marryatt's admiration of the transparent waters suggests what I find related of a certain lady of long ago, that once sailing in the harbor and gazing with rapt fondness into the pellucid depths, she enthusiastically exclaimed; "Oh, I could wish to be drowned in these pure, beautiful waters!"
ence brought to my mind after I had landed was the description by Walter Scott of the island and residence of Magnus Troil and his daughters Minna and Brenda, in the novel, 'The Pirate.'" The appearance of the village streets, largely given to sails, cordage, nets, fish barrels and the like, still further suggested the resemblance to his mind, and he says he might have imagined himself "transferred to that Shetland Isle, had it not been for the lodges of the Indians on the beach, and the Indians themselves, either running about or lying on the porches before the whisky stores."

There were also two lady visitors here from England, in the days of early Mackinac: Mrs. Jameson and Miss Harriet Martineau. Both have high rank and distinction in English literature. Each of them published her impressions of Mackinac after returning home. In their admiration and enthusiasm for the island they could not be surpassed by the most devoted American visitor who ever touched these shores.

Mrs. Jameson is well known as the writer of such books as, "Sacred and Legendary Art," "Legends of the Madonna," "Essays of Art, Literature and Social Morals," "Memoirs of the Early Italian Painters," etc. Miss Martineau was of more vigorous intellect, and her writings deal more with subjects of political economy and social philosophy. She it was, too, who translated and introduced into England the writings of the French philosopher Comte. As both these books which touch on Mackinac, written over sixty years
ago, were descriptive of travels, and not of the same general interest which attaches to their other writings, they are now out of print and have become rare.

Mrs. Jameson's visit was in the summer of 1835. She came up Lake Huron from Detroit by steamboat, and arrived in the harbor at early dawn. She thus describes her first view of the island as she had it from the deck of the vessel: "We were lying in a tiny bay, crescent-shaped. On the east the whole sky was flushed with a deep amber glow flecked with softest shadows of rose color, the same splendor reflected in the lake; and between the glory above and the glory below stood the little missionary church, its light spire and belfry defined against the sky." She speaks of the "abrupt and picturesque heights robed in richest foliage," and of the "little fortress, snow-white and gleaming in the morning light;" of an encampment of Indian wigwams, ("picturesque dormitories," she calls them) up and down the beach on the edge of the lake which, "transfused and unruffled, reflected every form as in a mirror, * * an elysian stillness and balmy serenity enwrapping the whole." And, again, we hear her speaking of "the exceeding beauty of this little paradise of an island, the attention which has been excited by its enchanting scenery, and the salubrity of its summer climate."

Mrs. Jameson made quite an extended stay at Mackinac, the guest of Mr. and Mrs. Schoolcraft, at their home in the Old Agency—"The house embowered in foliage, the ground laid out in gardens,
the gate opening on the very edge of the lake." She pictures Mrs. Schoolcraft with "features decidedly Indian, accent slightly foreign, a soft, plaintive voice, her language pure and remarkably elegant, refined, womanly and unaffectedly pious."

She saw the island throughout, taking tramps over it and "delicious drives," and writes of it as "wonderfully beautiful—a perpetual succession of low, rich groves, alleys, green dingles and bosky dales." After her glowing description, she sums up by saying, "It is a bijou of an island. A little
bit of fairy ground, just such a thing as some of our amateur travelers would like to pocket and run away with (if they could) and set down in the midst of their fish ponds; skull-cave, wigwams, Indians and all."

Miss Martineau spent two years in this country, traveling extensively through the States and writing her impressions. She published two books as the outcome of this journeying, "Society in America," and afterwards, her "Retrospect of Western Traveling." It was in July, 1836, that she visited Mackinac, and it is in the first named of these two books that she tells of it. She came by way of Lake Michigan, from Chicago, traveling in a slow-going sail-vessel, and approached the island in the evening towards sun-setting time. As did Mrs. Jameson, so Miss Martineau first pictures it as viewed from the vessel: "We saw a white speck before us; it was the barracks of Mackinaw, stretching along the side of its green hills, and clearly visible before the town came into view. The island looked enchanting as we approached, as I think it always must, though we had the advantage of seeing it first steeped in the most golden sunshine that ever hallowed lake or shore."

The day of her arrival was the 4th of July, and, "The colors were up on all the little vessels in the harbor. The national flag streamed from the garrison. The soldiers thronged the walks of the barracks; half-breed boys were paddling about in their canoes, in the transparent waters; the half-French, half-Indian population of the place were
all abroad in their best. An Indian lodge was on the shore, and a picturesque dark group stood beside it. The cows were coming down the steep green slope to the milking. Nothing could be more bright and joyous."

Describing the appearance of the village, she took note of some of the old French houses, "dusky and roofed with bark. The better houses stand on the first of the three terraces which are distinctly marked. Behind them are swelling green knolls; before them gardens sloping down to the narrow slip of white beach, so that the grass seems to grow almost into the clear rippling waves. There were two small piers with little barks alongside, and piles of wood for the steamboats. Some way to the right stood the quadrangle of missionary buildings, and the white missionary church. Still further to the right was a shrubby precipice down to the lake; and beyond, the blue waters."

She did not leave the vessel that evening, but some of the party having met the commandant of the fort, an engagement was made for an early walk in the morning. So they were up and ashore at five o'clock, and under the escort of the officer they took in the beauties of the hill and the woods. And thus she tells us of it: "No words can give an idea of the charms of this morning walk. We wound about in a vast shrubbery, with ripe strawberries under foot, wild flowers all around, and scattered knolls and opening vistas tempting curiosity in every direction." Coming suddenly on Arch Rock, which she calls the "Natural Bridge of
Mackinaw,” she is “almost struck backwards” by the grandeur—‘‘the horizon line of the lake falling behind the bridge, and the blue expanse of waters filling the entire arch; shrubbery tufting the sides and dangling from the bridge, the soft, rich hues in which the whole was dressed seeming borrowed from the autumn sky.’’

But especially charming and impressive, she thought, was the prospect from Fort Holmes. As she looked out on the glossy lake and the green tufted islands, she compares it to what Noah might have seen the first bright morning after the deluge. “Such a cluster of little paradises rising out of such a congregation of waters. Blue waters in every direction, wholly unlike any aspect of the sea, cloud shadows and specks of white vessels. Bowery islands rise out of it; bowery promontories stretch down into it; while at one’s feet lies the melting beauty which one almost fears will vanish in its softness before one’s eyes; the beauty of the shadowy dells and sunny mounds, with browsing cattle and springing fruit and flowers. Thus, would I fain think, did the world emerge from the flood.”

After their early walk, Miss Martineau and her party took breakfast with the courteous commandant at one of the old stone quarters of the fort, and sat a while on the piazza overlooking the village and the harbor. In response to her inquiries about the healthfulness and the climate, the officer humorously replied that it was so healthy people had to get off the island to die; and that as to the climate, they had nine months winter and three months cool weather.
The sailing vessel on which the party were passengers was bound for Detroit, and the Captain had already overstayied his time. So they had to leave that same day. In reference to her departure she writes: "We were in great delight at having seen Mackinaw, at having the possession of its singular imagery for life. But this delight was dashed with the sorrow of leaving it. I could not have believed how deeply it is possible to regret a place, after so brief an acquaintance with it." And then she tells how she did, just what thousands since have done, who after visiting the island have regretfully sailed away from it: "We watched the island as we rapidly receded. Its flag first vanished; then its green terraces and slopes, its white barracks, and dark promontories faded, till the whole disappeared behind a headland and light-house of the Michigan shore."

We close Miss Martineau's tribute with this comprehensive note of admiration: "From place to place in my previous traveling, I had been told of the charms of the lakes, and especially of the Island of Mackinaw. This island is chiefly known as a principal station of the great Northwestern Fur Company. Others know it as the seat of an Indian Mission. Others, again, as a frontier garrison. It is known to me as the wildest and tenderest piece of beauty that I have yet seen on God's earth."
Captain Marryatt, who had read this description before his visit to the island (already referred to) said, when writing his own impressions, "Miss Martineau has not been too lavish in her praises of Mackinaw." These testimonies by persons of wide travel, and of cultivated taste and power of observation, and visitors as they were from another land, come down to us very pleasantly from sixty years ago.

I know an isle, an emerald set in pearl,  
Mounting the chain of topaz, amethyst,  
That forms the circle of our summer seas—  
The fairest that our western sun hath kissed.

For all things lovely lend her loveliness;  
The waves reach forth white fingers to caress,  
The four winds, murmuringly meet to woo  
And cloudless skies bend in blue tenderness.

The classic nymphs still haunt her grassy pools;  
Her woods, in green, the Norseland elves have draped,  
And fairies, from all lands, or far or near,  
Her airy cliffs, and carving shores, have shaped.

Of old, strange suitors came in quest of her,  
Some in the pride of conquest, some for pelf;  
Priests in their piety, red men for revenge—  
All seek her now, alone, for her fair self.

David H. Riddle.
