IN all receipts in this book calling for baking powder use "Royal." Better and finer food will be the result, and you will safeguard it against alum.

In receipts calling for one teaspoonful of soda and two of cream of tartar, use two spoonfuls of Royal, and leave the cream of tartar and soda out. You get the better food and save much trouble and guess work.

Look out for alum baking powders. Do not permit them to come into your house under any consideration. They add an injurious substance to your food, destroying in part its digestibility. All doctors will tell you this, and it is unquestionable. The use of alum in whiskey is absolutely prohibited; why not equally protect the food of our women and children?

Alum baking powders may be known by their price. Baking powders at a cent an ounce or ten or twenty-five cents a pound are made from alum. Avoid them. Use no baking powder unless the label shows it is made from cream of tartar.

We may live without poetry, music and art;  
We may live without conscience, and live without heart;

FOREWORD

HE Boston Alumnae Chapter of Eta, of Alpha Phi, takes great pleasure in presenting this little Cook Book to its members and their friends. Each alumna of Eta will certainly prize these recipes, not only for their practical value, but for the pleasant associations which they will recall of college days. It is hoped that the friends outside the fraternity will find the book useful and suggestive.

Where several duplicate recipes have been contributed, it has been necessary for the interest of the book to make a choice and discard all but one or two. All others, with a few exceptions, have been published in their original form.

The attention of each reader is called to the advertisements. It is hoped that the firms herein represented will receive generous patronage.

Lemon, Sponge or Snow Pudding

One envelope Knox sparkling gelatine, one cup sugar, whites of two eggs, three-fourths pint cold water, three-fourths pint boiling water, rind and juice of two lemons. Soak the gelatine in the cold water five minutes. Dissolve in boiling water and add grated rind and juice of the lemons and sugar. Stir until dissolved. Strain and let stand in a cool place until nearly set. Then add the whites of the eggs, well beaten, and beat the mixture until it is light and spongy. Put lightly into glass dish or shape in mold. Serve with a thin custard made of the yolks of the eggs, or cream and sugar. Other fruit juices may be used, keeping the same proportion; when juice of less strength than that of lemon is used it may take the place of a part of the water. In this case the juice of one lemon to each quart of jelly will bring out the flavor of the fruit.

When somewhat cooled add to one part one-half teaspoon of the lemon flavor found in separate envelope dissolved in one tablespoon water and one tablespoon lemon extract. To the other part add one tablespoon brandy, if desired, one-half teaspoon extract of cloves and color with the pink color. Pour into shallow tins that have been dipped in cold water.
