(SECRET) 0122 (SECRET) 1300) Action This Period - We had held off visiting the Cambodian leaders in Tri Ton (D) Chau Doc (P) until we had developed our Cambodian language proficiency. We have completed the letters to the Cambodian monks and some posters with the Cambodian message lettered on by hand (Pal C). Armed with these and some of the school copy books, copter to initiate an investigation of this case. In an uncertain visit (not yet received), we have to visit Tri Ton (D) and Chau Doc (P) by helito SOP I hope to research the files for additional information on the eyewitnesses. SSF unit involved in this action in an effort to locate the eyewitnesses. There is a possibility we may have to go for a change of status in this case because a recovery of remains is not probable. The chances of anyone having buried him in that area are remote.

Present Opinion - We have developed no further information to indicate that this (SECRET) was not killed, as reported, at the base of Nui Coc in Chau Doc (P). Unless someone buried him, location and recovery in this area are virtually impossible at this time.
