Thank you for your email...after looking into this issue...we have found:

As of December 31, 2022...we had transitioned from our cable tv system to an IPTV system...we no longer have a headend...we receive programming from a separate headend...because of this we were under them impression that Space M should be zeroes at this point...

If we are mistaken on this please let me know and we will file an amended report...or however you'd like us to proceed with it...

Thank you

Jason

RE: Omni III Cable TV, Inc – 2022/2
Jay, OK (ID #62413)

Dear Cable Operator:

Space M requires that you provide: (1) the number of channels on which the cable system carried television broadcast stations to its subscribers. This number should be the total number of network, educational and independent signals carried by the system; and (2) the cable system's total number of activated channels. This number should include the total number of channels used for broadcast stations mentioned above, and nonbroadcast services such as HBO, ESPN, Showtime, CBN, etc. carried by the system.

The submission of a Statement of Account lacking the required information or fees may jeopardize the validity of your statutory license, and your secondary transmission activity may be subject to full liability under the copyright act. Without a statutory license, a cable system could be sued by copyright owners for the full range of civil remedies for copyright infringement, including injunctions, actual damages and profits, or statutory damages (of up to \$150,000 in cases of willful infringement). The statute also provides for criminal penalties in cases of willful infringement for commercial purposes.

As of March 20, 2020, a \$50 amendment fee will apply to any changes or alterations made to a previously submitted statement of account regardless of content, or effect on royalties or refunds.

Please provide this information and return to this office via email (dloy@loc.gov).

Sincerely,

Donna M. Loy
