ALLOTMENTS AND YIELDS

§ 722.512 *National baleage allotment.* The national allotment of cotton for the calendar year beginning January 1, 1943, is 10,000,000 standard bales of 500 pounds gross weight, increased by that number of standard bales of 500 pounds gross weight equal to the production in 1943 of that number of acres required to be allotted for 1943 as set forth in § 722.513 (c), relating to minimum State acreage allotments, and in § 722.514 (a), relating to minimum county acreage allotments. The production in 1943 of the acreage allotments referred to in § 722.513 (e), relating to a special fund of acreage allotments consisting of four percent of the State acreage allotment, and in § 722.513 (f), relating to minimum farm acreage allotments, shall be in addition to such national allotment. (Sec. 343 (a), (b), and (c), 52 Stat. 56, as amended by 53 Stat. 1125)

§ 722.513 *State baleage allotments and State acreage—(a) State baleage allotment.* Ten million standard bales

of the national baleage allotment of cotton for the calendar year 1943 shall be apportioned among the several States on the basis of the average of the normal production of cotton in each State for the five years 1937 to 1941. The normal production of a State for each such year shall be (1) the quantity of cotton produced therein in such year plus (2) the normal production of the acres diverted from the production of cotton in all counties in the State under the agricultural adjustment or conservation program in such year. The normal production of the acres diverted from the production of cotton in any county in any year shall be the average yield per acre of the acres planted to cotton in such county in such year times the number of acres so diverted in such county in such year. (Sec. 344 (a), 52 Stat. 57)

(b) *State acreage allotment.* A State acreage allotment shall be established for each State to which an allotment is made under paragraph (a). The State acreage allotment shall be that number of acres equal to the result obtained by dividing the number of standard bales allotted to the State under paragraph (a) by the average yield per acre for the State expressed in standard bales. The average yield per acre for any State shall be determined on the basis of the average of the normal production for the State for the five years 1937 to 1941 and the average, for the same period, of the acres diverted from the production of cotton in the State under the agricultural adjustment or conservation programs and the acres planted to cotton. (Sec. 344 (b), 52 Stat. 57)

(c) *Minimum State acreage allotment.* Notwithstanding the foregoing provisions of this section, the State acreage allotment for any State which is less than 5,000 acres shall be increased to 5,000 acres if at least 3,500 bales of cotton were produced in such State in any of the five years 1938 to 1942. (Sec. 344 (e) (2), 52 Stat. 58)

(d) *State acreage reserve for new farms.* An acreage not greater than one percent of the State acreage allotment shall be made available for apportionment to farms in the State on which cotton was not planted in any one of the three years 1940, 1941, and 1942. (Sec. 344 (c) (2), 52 Stat. 57)

(e) *Special State acreage allotment of four percent of State acreage allotment.* In addition to the State acreage allotment, a special State acreage allotment (hereinafter referred to as the "four-percent State reserve") equal to four percent of the State acreage allotment shall be established for each State for apportionment as set forth in § 722.515 (a), (b), (d), (e), and (f). (Sec. 344 (g), 52 Stat. 203)

(f) *Increases to provide for minimum farm acreage allotments.* There shall be available in each State for allotment to farms that number of acres equal to the total amount by which farm acreage allotments in the State are increased as set forth in § 722.515 (b), relating to certain minimum and maximum farm acreage allotments. This increase shall be in addition to the State acreage allotment and the four-percent State reserve.

(Sec. 344 (h), 52 Stat. 57, 203, and 586, and 53 Stat. 512, 853)

§ 722.514 *County acreage allotments—(a) Regular county acreage allotments.* The State acreage allotment (less that part set aside under § 722.513 (d) for apportionment to new farms) shall be apportioned among the counties in the State on the basis of the sum of (1) the acreage therein planted to cotton during the five years 1937 to 1941 and (2), in the applicable years, the acreage therein diverted from the production of cotton under agricultural adjustment and conservation programs, with adjustments for abnormal weather conditions and trends in acreage, during such five-year period. The acreage allotment for each county to which an allotment is so apportioned shall be increased by the number of acres, if any, required to provide an acreage allotment for each such county of not less than 60 percent of the sum of (i) the acreage therein planted to cotton in 1937 and (ii) the acreage therein diverted from the production of cotton in 1937 under the agricultural conservation program. (Sec. 344 (c) (1), Sec. 344 (e) (1), 52 Stat. 57 and 58)

(b) *Administrative areas.* If in any county there are one or more areas which, because of difference in types, kinds, and productivity of the soil or other conditions, should be treated separately in order to prevent discrimination, each such area shall, in accordance with applicable instructions, be designated by the county committee as an administrative area, and the county acreage allotment shall be apportioned among such areas (1) on the basis of the acreage in each such area planted to cotton in 1937 plus the acreage therein diverted from the production of cotton in 1937 under the agricultural conservation program or (2), if conditions affecting the acreage planted to cotton were not reasonably uniform throughout the county in 1937, on the basis of the cotton base acreage in each such area which was or could have been established in 1937 under the agricultural conservation program. (Sec. 344 (f), 52 Stat. 57, 203, 586)

§ 722.515 *Apportionment of acreage allotments among established farms—(a) Acreage available for allotment.* The county committee, with the assistance of other local committees established in the county, shall apportion, in the manner set forth in this section, acreage allotments among all farms in the county on which cotton was planted in any one or more of the three years 1940 to 1942. The acreage allotments to be apportioned among such farms shall consist of (1) the regular county acreage allotment, consisting of an apportionment of the State acreage allotment made to the county, with such increase in the county acreage allotment as is necessary to provide for the county a minimum acreage allotment of not less than 60 percent of the planted plus diverted cotton acreage in the county in 1937, plus any acreage apportioned to the county from the four-percent State reserve in supplementing county allotments which are

determined, in accordance with applicable instructions, to be inadequate and unrepresentative, and (2) a distributive part, applicable to the county, of the four-percent State reserve. This distributive part shall be the sum of the acreage allotted to farms in the county, insofar as the amount of the four-percent State reserve will permit, under the following conditions in the order listed: (i) in supplying any deficiency in the regular county acreage allotment for the making of initial acreage allotments not exceeding five acres for each such farm; (ii) in supplementing any acreage allotment made to any farm out of the regular county acreage allotment which, in consequence of the making of such initial acreage allotments, is inadequate and unrepresentative, and (iii) in supplementing any acreage allotment made to any farm under this section which the county committee determines, in accordance with applicable instructions, is inadequate and unrepresentative. The committee shall not establish any farm acreage allotment which is not covered by the allotments mentioned above, except that after but not before the apportionment among farms of all the allotments mentioned above in this paragraph an additional farm acreage allotment shall be made, as set forth in paragraph (h), to any farm in respect to which the acreage allotment otherwise made is less than the minimum acreage allotment set forth in paragraph (h). The term "planted plus diverted cotton acreage", as used in this section, shall be taken to mean the sum of the acreage planted to cotton and the acreage diverted from cotton production under agricultural adjustment or conservation programs. (Sec. 344 (d), (e), (f), (g), (h), 52 Stat. 58, 203, and 586)

(b) *Initial farm acreage allotments.* The regular county acreage allotment shall be first apportioned among farms on which cotton was planted in any one or more of the three years 1940 to 1942, and in making such apportionment there shall be first established for each such farm an initial acreage allotment equal to the highest planted plus diverted cotton acreage on the farm in any of the three years 1940 to 1942: *Provided*, That no initial allotment shall exceed five acres for any such farm. These allotments shall be known as initial allotments and are referred to accordingly in this section. Any deficiency in the amount of the regular county acreage allotment for the making of such initial allotments shall be supplied by the use of the four-percent State reserve insofar as such reserve will permit for the county. (Sec. 344 (d) (1), sec. 344 (g) (1), 52 Stat. 58 and 203)

(c) *Reserve for small farms.* In the event that the regular county acreage allotment is more than sufficient to make the initial allotments, there shall be set aside for increase of allotments to small farms, as set forth in paragraph (g), an amount of not more than three percent of that amount of the regular county acreage allotment which remains after making the initial allotments. (Sec. 344 (d) (2), 52 Stat. 58)

(d) *Apportionment on the basis of tilled land.* The remainder of the regular county acreage allotment, plus the additional allotment, if any, made to the county from the four-percent State reserve pursuant to paragraph (a), shall be apportioned among all farms on which the highest planted plus diverted cotton acreage in any of the three years 1940 to 1942 was more than five acres. The acreage thus to be apportioned to each such farm shall, together with the initial allotment made to the farm, be a percentage (which shall be the same percentage for all farms in the county or administrative area within the county) of the acreage on the farm in 1942 which was tilled or was in regular rotation, excluding therefrom the acreage devoted to the production of sugarcane for sugar, wheat, tobacco, or rice for market, or of wheat or rice for feeding to livestock for market. (Sec. 344 (d) (3), 52 Stat. 58)

(e) *Increases as a result of making initial farm acreage allotments.* If, as a result of the making of initial allotments, the farm acreage allotments for farms made in accordance with paragraph (d) are substantially smaller than the farm acreage allotments which would have been made without regard to any provision for the making of initial allotments, the farm acreage allotments to such farms shall be increased to the acreage which would have resulted in the absence of any provision for the making of initial allotments, insofar as the remainder, if any, of the four-percent State reserve will permit for the county after the making of initial allotments. (Sec. 344 (g) (2), 52 Stat. 203 and 53 Stat. 853)

(f) *Increases in view of past production.* After allotments have been made from the four-percent State reserve as provided in paragraphs (b) and (e), one-half of the remainder, if any, of such reserve, less the additional allotment, if any, made to all counties in the State from the four-percent State reserve pursuant to paragraph (a), shall be apportioned to farms for which the acreage allotment otherwise determined is less than 50 percent of the planted plus diverted cotton acreage on the farm in 1937, and the other one-half of the remainder, if any, of such reserve shall be available for increasing the allotments for any farms which are determined, in accordance with applicable instructions, to be inadequate and not representative in view of past production on the farm: *Provided*, That the cotton acreage allotment for any farm shall not be increased under this paragraph (f) above 40 percent of the acreage on such farm in 1942 which was tilled or was in regular rotation. (Sec. 344 (g) (3), 52 Stat. 203 and 53 Stat. 853)

(g) *Distribution of reserve for small farms.* Any farm acreage allotment made as aforesaid of more than five acres, but not exceeding 15 acres, may be increased from the reserve of not more than three percent of the county acreage allotment mentioned in paragraph (c). In making such increase due consideration shall be given to, and

such allotments shall be made on the basis of, the land, labor, and equipment available for the production of cotton, crop-rotation practices, and the soil and other physical facilities affecting the production of cotton. (Sec. 344 (d) (2), 52 Stat. 58)

(h) *Certain minimum and maximum farm acreage allotments.* Notwithstanding the foregoing provisions of this section, (1) the farm acreage allotment made to any farm shall not exceed the highest planted plus diverted cotton acreage in any of the three years 1940 to 1942 and (2) any farm acreage allotment which after but not before the apportionment of all acreage allotments, as provided in the foregoing paragraphs of this section, is less than 50 percent of the planted plus diverted cotton acreage on the farm in 1937 shall be increased to such amount, provided that such increase shall not be so made as to raise the farm acreage allotment above 40 percent of the acreage on the farm which in 1942 was tilled or was in regular rotation. The acreage allotments required to effect this minimum provision shall be in addition to all acreage allotments represented by the regular county acreage allotment and by the four-percent State reserve. (Sec. 344 (d) (3), (g), and (h), 52 Stat. 58, 203, and 586 and 53 Stat. 512 and 853)

(i) *Use of 1942 allotment for 1943.* Notwithstanding any other provision of this section, in accordance with instructions issued by the Agricultural Adjustment Agency (Cotton 708—Part I for the particular region), the 1943 farm acreage allotment shall be the 1942 acreage allotment adjusted for any change in tilled acreage or highest planted plus diverted cotton acreage. (Sec. 344 (d)-(1), 52 Stat. 58, 203, 204, 586, and 53 Stat. 512, 853)

(j) *Reallocation of allotments due to displacement of producers.* Except as provided in the next succeeding paragraph, the cotton allotment for any land which is removed from agricultural production because of acquisition by a State or Federal agency or for use in connection with the war effort shall be available to the State committee for use in providing equitable allotments for farms on which cotton was grown in one or more of the three years 1940 through 1942 and which are operated by persons who were producers of such crop on the land so removed from agricultural production. Insofar as possible the allotments for farms operated by such persons shall compare with the allotments for other farms in the locality taking into consideration the allotment for the land removed from agricultural production.

The cotton allotment determined, or which would have been determined, for any land acquired in 1940 or thereafter by any Federal agency for war purposes shall be placed in a State pool and shall be used only for making equitable allotments for farms owned or acquired by owners dispossessed by a Federal agency because of acquisition of the farm for war purposes. The allotment made for any such farm, including farms on which cotton was not planted during any of the

three years 1940 through 1942, shall compare with the allotments established for other farms in the same area which are similar except for the past acreage of cotton, taking into consideration the character and adaptability of the soil and other physical facilities affecting the production of cotton. (Sec. 344 (j), 56 Stat. 52)

(k) *Reapportionment of unused farm acreage allotments.* After making the allotments under this section, any part of the acreage allotted to individual farms which it is determined, in accordance with applicable instructions in Cotton 708, will not be planted to cotton in 1943 shall be deducted from the allotments to such farms and may be apportioned in accordance with said instructions, preference being given to farms in the same county receiving allotments which are inadequate and not representative in view of the past production of cotton on each farm. Notwithstanding the foregoing provisions of this paragraph, the acreage shall be apportioned to those farms designated by the county committee. In designating the farm to which the apportionment is to be made, the county committee shall consider only the character and adaptability of the soil and other physical facilities affecting the production of cotton and the need of the operator of such farm for an additional allotment to meet the requirements of the families engaged in the production of cotton in 1943 on the farm. Any transfer of allotments for 1943 as set forth in this paragraph shall not affect apportionment for any subsequent year. (Sec. 344 (h), 52 Stat. 57, 203, 586, and 53 Stat. 512, 853)

§ 722.516 *Apportionment of acreage allotments among new farms.* The county committee, with the assistance of other local committees, shall, in accordance with applicable instructions in Cotton 708, apportion among farms for which an application for a farm acreage allotment was made in writing within the time limit prescribed therefor by the Agricultural Adjustment Agency and on which cotton was not planted in any of the three years 1940 to 1942 and on which cotton will be planted in 1943 the distributive part, applicable to the county, of acreage allotments which constitute a reserve of not more than one percent of the State acreage allotment. The basis of the apportionment shall be the land, labor, and equipment available on the farm for the production of cotton, crop-rotation practices, and the soil and other physical facilities affecting the production of cotton thereon, taking into consideration the applicant's intention to plant cotton in 1943 on the farm. As a reflection of the several factors to be taken into consideration, the acreage on the farm which was tilled in 1942 or will be tilled in 1943, as determined by the county committee, will be the basic index of the farm's capacity for cotton production; *Provided*, That the allotment shall not exceed an acreage equal to 50 percent of the county percentage factor, determined under paragraph (d), times the tilled acreage in the farm used in determining the cotton acreage al-

lotment, except that (a), for any such farm with respect to which the county committee's recommendation of an allotment is less than three acres, such recommendation shall be the cotton acreage allotment for the farm if the State reserve for new farms is sufficient therefor, or for any such farm with respect to which the county committee's recommendation of an allotment is three acres or more the allotment for the farm shall not be less than three acres if the State reserve for new farms is sufficient therefor, taking into consideration also the local committee's recommendation, and (b) for a farm on which the operator was, in 1942, a producer of cotton on land subsequently removed from agricultural production because of acquisition by a State or Federal agency for use in connection with the National Defense Program, the county cotton factor times the filled acreage for the farm may be regarded as the basic index for the farm's capacity for cotton production. (Sec. 344 (c) (2), 52 Stat. 57)

§ 722.517 *Normal yields.* A normal yield per acre of lint cotton shall be determined for each farm for which a farm acreage allotment is established as follows:

(a) *Yields based on reliable records.* Where reliable records of the actual average yield of lint cotton per acre for all of the five years 1937 to 1941 are presented by the farmer or are available to the committee, the normal yield per acre of lint cotton for the farm shall be the average of such yields, adjusted, in accordance with applicable instructions in Cotton 708, for abnormal weather conditions.

(b) *Appraised yields.* If for any year of the five-year period 1937 to 1941 (1) records of the actual average yield are not available, or (2) there was no actual yield because cotton was not planted in such year, the normal yield per acre of lint cotton for the farm shall be appraised by the county committee, taking into consideration the normal yield for the county, the yield in the years for which data are available, and the rainfall, temperature, and other weather conditions during the years for which data are available as compared with those for which data are not available, provided the appraised yield so obtained shall be adjusted in accordance with paragraph (c).

(c) *Adjustments in appraised yields.* The yields determined under this section shall be adjusted so that the average of the normal yields per acre of lint cotton determined for all farms in the county (weighted by the cotton acreage allotments established for such farms) shall conform to but not exceed the county normal yield per acre of lint cotton established for 1943 by the Secretary of Agriculture. (Sec. 301 (b) (13) (B) and (E), 52 Stat. 38, 202)

§ 722.518 *Applicability of detailed instructions.* The provisions of §§ 722.512 through 722.517 shall be carried out in detail in accordance with the provisions of Part I, "Instructions for Determining 1943 Farm Cotton Acreage Allotments and Normal Yields", of the following in-

structions applicable to the regions indicated below:

Southern Region: Cotton 703-SR, "Instructions Pertaining to Cotton Marketing Quotas for 1943".

East Central Region: Cotton 703-ECR, "Instructions Pertaining to Cotton Marketing Quotas for 1943".

Western Region: Cotton 703-WR, "Instructions Pertaining to Cotton Marketing Quotas for 1943".

North Central Region: Cotton 703-NCR, "Instructions Pertaining to Cotton Marketing Quotas for 1943". (Sec. 375, 52 Stat. 66)

FARM MARKETING QUOTAS

§ 722.519 *Farm marketing quotas—*

(a) *Amount of farm marketing quota.* The farm marketing quota for any farm for the 1943-1944 marketing years shall be that number of pounds of lint cotton equal to the sum of the following: (1) the amount of the normal production or the actual production, whichever is the greater, of the farm acreage allotment, and (2) the amount of any carry-over penalty free cotton.

(b) *Initial farm marketing quotas.* Notwithstanding any other provisions of this section, the amount of the normal production of the farm acreage allotment, plus the amount of any carry-over penalty free cotton, shall be the farm marketing quota for any farm unless and until it is determined by the county committee that the actual production in 1943 of the farm acreage allotment therefor is in excess of the normal production thereof. If the owner or operator refuses to permit measurements for any farm, the farm marketing quota therefor shall be the normal production of the farm acreage allotment therefor, plus the amount of carry-over penalty free cotton.

(c) *Farm marketing quotas based on actual production.* When the actual production in 1943 of the farm acreage allotment for any farm, as shown by satisfactory evidence such as the reports of cotton ginned from or produced on the farm, is found by the county committee to be in excess of the normal production of the farm acreage allotment, the farm marketing quota for the farm shall be adjusted upward by the amount by which the actual production of the farm acreage allotment exceeds the normal production thereof. Such adjustment shall be made as soon as practicable after all cotton produced on the farm in 1943 is harvested and satisfactory records pertaining to the amount thereof are presented to the county committee; however, intermediate adjustments for any farm may be made earlier if the adjustment is requested by the operator of the farm and determined by the county committee to be justifiable on the basis of the amount of cotton produced on the farm in 1943 that is harvested at the time of the request. (Sec. 346 (a), 52 Stat. 59)

(d) *Conversion of carry-over penalty cotton.* The amount of unmarketed cotton at the end of the 1942-1943 marketing year which, if marketed during that marketing year, would have been subject to penalty at a rate per pound less than

the penalty rate applicable to cotton of the 1943 crop shall, for the purposes of these regulations, be regarded as having been converted, on the basis of the rate of penalty applicable to cotton of the 1943 crop, into such an amount thereof as is subject to such rate of penalty and such an amount thereof as is henceforth not subject to any penalty. The conversion is made by taking as carry-over penalty cotton subject to the rate of penalty applicable to cotton of the 1943 crop an amount of such unmarketed cotton which bears the same ratio to the total amount thereof as the lower rate of penalty bears to the rate of penalty applicable to the 1942 crop and by taking as carry-over penalty free cotton the remainder of such unmarketed cotton.

§ 722.520 *Notice of farm marketing quotas.* Immediately upon the establishment of farm acreage allotments and the determination of normal yields per acre of lint cotton for farms in a county or other local administrative area, the county committee shall mail or deliver directly to the operator of each farm a written notice of the farm marketing quota for the farm. The notice shall contain the following statement: "To all persons who as operator, landlord, tenant, or sharecropper are interested in the above-described farm" (the farm for which the quota is established). Notice so given shall constitute notice to all such persons. The notice shall contain the amount of the farm acreage allotment and normal yield for the farm, together with a brief statement of the manner in which the amount of the farm marketing quota is determined pursuant to § 722.519. The notice shall contain also a brief statement of the procedure whereby application for review of the quota may be made under section 363 of the Act. A copy of each notice, containing a notation thereon of the date of mailing or delivering the notice to the operator of the farm, shall be kept among the permanent records of the county committee, and upon request a copy thereof, duly certified as true and correct, shall be furnished without charge to any person who as operator, landlord, tenant, or sharecropper is interested in the cotton produced in 1943 on the farm for which the notice is given. The county committee shall also mail or deliver directly to the operator of each new cotton farm for which it determines that no farm marketing quota will be established a similar written notice, informing the producers on such farm of its determination. (Sec. 362, 52 Stat. 62)

§ 722.521 *Publication of farm acreage allotments, normal yields, and farm marketing quotas.* One copy of each notice of the farm marketing quota for farms in a county shall be placed in binders or folders and posted in the office of the county committee in a manner that will make the copies of the notices freely available for public inspection for a period of not less than 30 calendar days. At the end of such period the copies of the notices shall be filed in the office of the county committee and remain readily available for further public inspection. (Sec. 362, 52 Stat. 62)

§ 722.522 *Marketing quotas in effect.* Marketing quotas shall be in effect during the 1943-1944 marketing year with respect to the marketing of cotton. Cotton produced in the calendar year 1943 shall be subject to the quotas in effect, notwithstanding that it may be marketed prior to August 1, 1943. (Secs. 345 and 347, 52 Stat. 58 and 59)

§ 722.523 *Successors-in-interest.* Any person who succeeds to the interest of a producer in a farm, or in a cotton crop, or in cotton for which a farm marketing quota was established shall, to the same extent as his predecessor, be entitled to all the rights and privileges incident to such marketing quota and be subject to the restrictions on the marketing of cotton. (Sec. 375 (b), 52 Stat. 66)

§ 722.524 *Marketing quotas not transferable.* A farm marketing quota is established for a farm and may not be assigned or otherwise transferred in whole or in part to any other farm. (Sec. 375 (b), 52 Stat. 66)

§ 722.525 *Review of quotas—(a) Review committees.* Any producer who is dissatisfied with the farm marketing quota established for his farm, or, in the case of a new cotton farm, with the action of the county committee in refusing to establish a farm marketing quota for such farm, may, by making written application within 15 calendar days after the mailing or delivery directly to him of the notice provided for in § 722.520, have such quota or determination reviewed by a local review committee composed of three farmers appointed by the Secretary of Agriculture. The review committee shall, upon proper application, review the action of the county committee. The review committee in determining any farm marketing quota shall, to the same extent as the county committee, be limited to the establishment of a farm marketing quota in the amount which, under the law and these regulations, should have been established. Unless such application is made within 15 days the original determination of the farm marketing quota shall be final so far as concerns the producers involved. All applications for review shall be made in accordance with the Review Regulations (38-AAA-2, Revised) issued by the Secretary of Agriculture. (Secs. 363 and 364, 52 Stat. 63)

(b) *Court review.* If the producer is dissatisfied with the determination of the review committee, he may, within 15 days after the notice is mailed to him by registered mail, institute proceedings against the review committee to have the determination of the review committee reviewed of a court in accordance with section 365 of the Act. (Secs. 365 and 366, 52 Stat. 63)

GENERAL

§ 724.511 *Definitions.* As used in this procedure and in all instructions, forms, and documents in connection therewith, the words and phrases defined in this section shall have the meanings herein assigned to them, unless the context or subject-matter otherwise requires.

(a) "Burley Allotment Procedure for 1943" means this Tobacco 703 (Burley).

(b) "County committee" means the group of persons elected within any county to assist in the administration of the Agricultural Conservation Programs in such county.

(c) "New farm" means a farm on which tobacco was not produced in any of the five years 1938 to 1942 but on which tobacco will be produced in 1943.

(d) "Old farm" means a farm on which tobacco was produced in one or more of the five years 1938 to 1942 and on which tobacco will be produced in 1943.

(e) "Operator" means the person who is in charge of the supervision and conduct of the farming operations on the entire farm.

(f) "Person" means an individual, partnership, association, corporation, estate or trust or other business enterprise or other legal entity and wherever applicable, a State, a political subdivision of a State or any agency thereof.

(g) "State committee" means the group of persons designated within any state to assist in the administration of the Agricultural Conservation Programs in such State.

(h) "Tobacco" means Burley tobacco as classified in Service and Regulatory Announcement No. 118 of the Bureau of Agricultural Economics of the United States Department of Agriculture, as type 31.

§ 724.512 *Extent of calculations and rule of fractions.* (a) All percentages shall be calculated to the nearest whole percent. Fractions of more than fifty-hundredths of one percent shall be rounded upward, and fractions of fifty-hundredths of one percent or less shall be dropped. For example, 87.51 percent would become 88 percent and 87.50 percent would become 87 percent.

(b) All acreage shall be calculated to the nearest one-tenth of an acre. Fractions of more than fifty-thousandths of an acre shall be rounded upward, and fifty-thousandths of an acre or less shall be dropped. For example, 1.051 would become 1.1 and 1.050 would become 1.0.

§ 724.513 *Instructions and forms.* The Administrator of the Agricultural Conservation and Adjustment Administration of the United States Department of Agriculture shall cause to be prepared and issued with his approval such instructions and such forms as may be necessary or expedient for carrying out this procedure.

§ 724.514 *Applicability of procedure.* This allotment procedure for 1943 shall govern the establishment of farm acreage allotments and normal yields for Burley tobacco for use in connection with the 1943 Agricultural Conservation Program and in connection with farm marketing quotas for tobacco for the marketing year beginning October 1, 1943.

ACREAGE ALLOTMENTS AND NORMAL YIELDS FOR OLD FARMS

§ 724.515 *Determination of acreage allotments for old farms.* The tobacco acreage allotment for an old farm shall be 110% of the 1942 acreage allotment (corrected if found to be in error) for the farm plus any acreage by which such allotment was reduced for the marketing year beginning October 1, 1942, because of violation of the 1941-42 Marketing Quota Regulations except as adjusted in accordance with the provisions of §§ 724.516, 724.517 and 724.518 below: *Provided, however,* No acreage allotted to the farm in 1942 from the State pools, except the acreage allotted to a farm, the owner of which was dispossessed of another farm by the acquisition thereof by a Federal agency for national defense purposes, shall be used in determining the 1943 allotment. This provision shall not be construed to prohibit determining any allotment for 1943 under the provisions of § 724.518 (a) below. Notwithstanding the provisions of § 724.512 (b) hereof, all

1942 acreage allotments of five-tenths of one acre or less shall be increased one-tenth of one acre.

§ 724.516 *Reduction of acreage allotment for violations of the 1942-43 Marketing Quota Regulations.* If tobacco was sold or was permitted to be sold on a marketing card for any farm which was produced on a different farm the acreage allotment established for each such farm for 1943 shall be reduced by the amount of tobacco so marketed: *Provided,* That such reduction shall not be made if the Secretary, through the county committee, determines that no person connected with such farm during the 1942-43 marketing year caused, aided, or acquiesced in such marketing. If proof of the disposition of any amount of tobacco produced on a farm is not furnished, as required by the Secretary, the acreage allotment shall be reduced by such amount of tobacco.

The amount of tobacco involved will be converted to an acreage basis by dividing such amount of tobacco by the actual yield for the farm during the year in which such tobacco was produced.

§ 724.517 *Allotments by county committees.* An amount not in excess of one-half of one percent of the 1942 acreage allotment for each State will be apportioned to the counties in the State on the basis of the percentage the county acreage allotment is of the State acreage allotment, unless otherwise recommended by the State committee and approved by the Regional Director. The acreage so apportioned to the county will be available for allotment by the county committee. A farm shall be eligible for allotment as provided hereunder (1) if the committee finds that the 1942 allotment for the farm is relatively smaller in relation to the land, labor and equipment available for the production of tobacco on the farm than the average of the allotments in relation to such factors on other farms in the county, or (2) if tobacco was harvested on the farm in 1942 and the acreage allotment for the farm was zero. In making the adjustment in the farm acreage allotment the county committee shall consider the past acreage of tobacco (harvested and diverted), the land, labor and equipment available for the production of tobacco, and crop rotation practices. In no event shall the amount of the adjustment of the acreage allotment for any farm under this provision be more than the larger of ten percent of the 1942 allotment or five-tenths of an acre: *Provided,* That in the case of any farm on which tobacco was harvested in 1942 for which no acreage allotment was established the committee may establish an allotment not exceeding five-tenths of an acre.

Any adjustment as provided above shall be subject to the approval of the State committee.

§ 724.518 *Reallocation of allotments released from farms removed from agricultural production.* (a) Except as provided in paragraph (b) of this section the tobacco allotment determined or which would have been determined for any land which is removed from agricultural production because of acquisition by a State

or Federal agency for any purpose or by a person for use in connection with the national defense program shall be available to the State committee for use in providing equitable allotments for farms on which tobacco was grown in one or more of the three years, 1940 through 1942 and which are operated in 1943 by persons who were producers of tobacco on land so removed from agricultural production. In so far as possible the allotments for farms operated by such persons shall be comparable to the allotments for other old farms in the same community which are similar with respect to land, labor, and equipment available for the production of tobacco, crop-rotation practices, soil and other physical factors affecting the production of tobacco, taking into consideration the allotment for the land removed from agricultural production. The allotment so determined shall be subject to the approval of the State committee and shall not exceed the larger of (1) the 1943 allotment previously determined for such farm, or (2) the allotment which was or would have been determined for the land removed from agricultural production: *Provided,* That in no event shall the allotment so determined exceed the larger of 20 percent of the acreage of cropland in the farm or three acres.

(b) The allotment determined or which would have been determined for any land acquired on or since January 1, 1940, by any Federal agency for national defense purposes shall be placed in a State pool and shall be used in determining equitable allotments for farms owned or purchased by owners displaced because of acquisition of their farm by a Federal agency for national defense purposes. Upon application to the county committee, any owner so displaced shall be entitled to have an allotment for any one of the other farms owned or purchased by him, equal to an allotment which would have been determined for such other farm plus the allotment which would have been determined for the farm acquired by the Federal agency: *Provided,* That such allotment shall not exceed 20 percent of the acreage of cropland in the farm. The provisions of this paragraph shall not be applicable if (1) there is any marketing quota penalty due with respect to the marketing of tobacco from the farm or by the owner of the farm at the time of its acquisition by the Federal agency; (2) any tobacco produced on such farm has not been accounted for as required by the Secretary; or (3) if the allotment next to be established for the farm acquired by the Federal agency would have been reduced because of false or improper identification of tobacco produced on or marketed from such farm.

§ 724.519 *Farms subdivided or combined by reconstitution.* (a) If land operated as a single farm in 1942 or any previous year has subsequently been subdivided and will be operated in 1943 as two or more farms, the 1943 tobacco acreage allotment determined or which otherwise would have been determined for the entire farm shall be apportioned among the tracts in the same proportion

as the acreage of cropland suitable for the production of tobacco on each such tract in such year bore to the total number of acres of cropland suitable for the production of tobacco on the entire farm in such year unless otherwise recommended by the county committee and approved by the State committee.

(b) If two or more farms operated separately in 1942 or any previous year have subsequently been combined and will be operated in 1943 as a single farm, the 1943 allotment shall be the sum of the 1943 allotments determined or which otherwise would have been determined for each of the farms composing the combination.

§ 724.520 *Determination of normal yields.* The normal yield for any farm shall be that yield which the county committee determines is normal for the farm taking into consideration (1) the yields obtained on the farm during the years 1937-41; (2) the soil and other physical factors affecting the production of tobacco on the farm and (3) the yields obtained on other farms in the locality which are similar with respect to such factors. The weighted average of the normal yields for all farms in each county shall not exceed the normal yield established for the county in 1942, unless an adjustment for abnormal conditions is made by the Secretary upon recommendations of the State committee.

ACREAGE ALLOTMENTS AND YIELDS FOR NEW FARMS

§ 724.521 *Determination of acreage allotments for new farms.* The acreage allotment other than an allotment made under § 724.518 (b) for a new farm shall be that acreage which the county committee determines is fair and reasonable for the farm taking into consideration each of the following factors:

- (1) The past tobacco experience of the farm operator;
- (2) The acreage of cropland in the farm suitable for tobacco production;
- (3) The acreage capacity of barns which are located on the farm and which are in usable condition and available for the curing of tobacco;
- (4) The customary crop rotation practices; and
- (5) The adaptability of the soil to the growing of tobacco;

Provided, That the acreage allotment so determined shall be subject to approval by the State committee and shall not exceed the smallest of (a) one-fifth of the total acreage of tobacco grown by the farm operator during the five years 1938 through 1942; (b) 75 percent of the average acreage allotment for old farms in the county; or (c) one acre.

Notwithstanding any other provisions of this section a tobacco acreage allotment shall not be established for any new farm unless the following conditions have been met:

- (1) The farm operator shall have had two years or more experience in growing tobacco as a sharecropper, tenant, or as a farm operator during the past five years;
- (2) The farm operator shall be living on the farm and largely dependent on this farm for his livelihood;

(3) The farm covered by the application shall be the only farm owned or operated by the farm operator on which any tobacco is produced; and

(4) No kind of tobacco other than Burley will be grown on such farm in 1943.

The acreage allotments established as provided in this section shall be subject to such downward adjustment as is necessary to bring such allotments in line with the total acreage available for allotment to all new farms. The acreage available for establishing allotments for new farms shall be one-tenth of one percent of the national allotment.

§ 724.522 *Time for filing application.* In order to obtain an allotment for a new tobacco farm in 1943, the operator of the farm shall file an application for such allotment with the county committee prior to February 1, 1943.

§ 724.523 *Determination of normal yields.* The normal yield for a new farm shall be that yield per acre which the local committee determines is reasonable for the farm as compared with yields for other farms in the locality on which the soil and other physical factors affecting the production of tobacco are similar.

or amended or superseded by regulations hereafter made under said Act. (Authority Secs. 729.202 to 729.207, inclusive, issued under authority contained in 52 Stat. 38; 7 U. S. C., 1940 ed., 1301 *et seq.*, as amended.)

729.205 Determination of farm acreage allotments for 1943.
729.206 Normal yields.
729.207 Reconstituted farms.

DEFINITIONS AND ISSUANCE OF FORMS AND INSTRUCTIONS

§ 729.202 *Definitions.* As used in these regulations and in all instructions, forms, and documents, in connection therewith, unless the context or subject matter otherwise requires, the following terms shall have the following meanings:

(1) "Secretary" means the Secretary or the Acting Secretary of Agriculture of the United States.

(2) "State committee or State office" means the group of persons comprising the State Agricultural Conservation Committee appointed by the Secretary of Agriculture to assist within any State in the administration of the Soil Conservation and Domestic Allotment Act, or the office of such persons.

(3) "Committee" means a committee within a county or community utilized under the Soil Conservation and Domestic Allotment Act. "County Committee", "community committee", or "local committee" shall have corresponding meanings in the connection in which they are used.

(4) "Acreage of peanuts" means the acreage of land from which peanuts are harvested for nuts on any farm on which any peanuts are picked and threshed.

(5) "Farm" means any tract(s) of land considered as a farm under the provisions of the 1943 Agricultural Conservation Program issued pursuant to the Soil Conservation and Domestic Allotment Act.

(6) "Tillable acreage available for the production of peanuts." The acreage in the farm in 1942 which was tilled or was in regular rotation minus the sum of the acreages devoted to the production of sugarcane for sugar, wheat or rice for market or for feeding to livestock for market, cotton or tobacco for market.

§ 729.203 *Instructions and forms.* The Administrator of the Agricultural Conservation and Adjustment Administration of the United States Department of Agriculture shall cause to be prepared and issued with his approval such instructions and forms as may be necessary for carrying out these regulations.

ALLOTMENTS AND YIELDS

§ 729.204 *Rule of fractions.* All acreages shall be rounded to the nearest one tenth of an acre. All yields shall be rounded to the nearest whole pound.

§ 729.205 *Determination of farm acreage allotments for 1943.* Peanut allot-

ments shall be determined for all farms for which a 1942 peanut allotment was determined and on which peanuts were produced during any of the three years 1940 through 1942, on the basis of the average acreage of peanuts grown on the farm in the three years 1940 through 1942, and the tillable acreage available for the production of peanuts on the farm, taking into consideration the peanut allotments determined for the farm under previous agricultural conservation programs and other crop allotments determined for the farm for 1943: *Provided, however,* That any acreage of peanuts harvested in excess of the 1941 or 1942 farm peanut allotment shall not be considered in determining the 1943 peanut allotment.

For those farms for which the 1942 peanut allotment reflects the above factors in accordance with conditions as applicable in 1943, the 1942 allotments may be used in determining 1943 allotments. The allotment for any farm shall compare with the allotments for other farms in the same community which are similar with respect to the foregoing factors. The peanut allotments determined for all farms in the State shall not exceed the State peanut allotment.

§ 729.206 *Normal yields—(1) Farms for which normal yields will be established.* The county committee with the assistance of the other local committees established in the county shall determine the normal yield per acre of peanuts for each farm for which a farm acreage allotment is determined.

(2) *Yields based on reliable records.* Where reliable records of the actual average yield of peanuts per acre for all of the five years 1937-1941 are presented by the farmer or are available to the committee, the normal yield for the farm shall be the average of such yields, adjusted, in accordance with applicable instructions, for abnormal weather conditions.

(3) *Appraised yields.* If for any year of the five-year period 1937-1941 (a) records of the actual average yield are not available, or (b) there was no actual yield because peanuts were not produced on the farm in such year, the normal yield for the farm shall be the yield which, on the basis of all available facts, including the yield in years for which data are available, abnormal weather conditions, type of soil, drainage, production practices, and general fertility of the land, the committee determines to be the yield which was or could reasonably have been expected on the farm for such five-year period, provided the appraised yield so obtained shall be adjusted in accordance with paragraph (4).

(4) *Adjustments in appraised yields.* The yields determined under paragraph (3) shall be adjusted so that the average of the normal yields determined for all farms in the county (weighted by the peanut acreage allotments established for such farms) shall conform to but not exceed the county normal yield per acre of peanuts established for 1943 by the Secretary of Agriculture.

§ 729.207 *Reconstituted farms.* (1) If land operated as a single farm in 1942 is subdivided for 1943 into two or

more tracts, the 1943 peanut allotment determined for the farm as constituted in 1942 shall be apportioned among the tracts in the same proportion as the acreage of cropland suitable for the production of peanuts on each tract is of the total number of acres of cropland suitable for the production of peanuts on the farm prior to the division, unless otherwise recommended by the county committee and approved by the State committee.

(2) If two or more farms which were operated separately in 1942 are combined into a single farm for 1943, the 1943 allotment shall be the sum of the 1943 allotments for each of the farms contained in the combination.

Done at Washington, D. C. this 31st day of December 1942. Witness my hand and the seal of the Department of Agriculture.

PART 729—NATIONAL MARKETING QUOTA FOR PEANUTS¹

1943 COUNTY NORMAL YIELDS

PART 701—AGRICULTURAL CONSERVATION PROGRAM¹

WAR CROP GOALS, ETC.

Pursuant to the authority vested in the Secretary of Agriculture under sections 7 to 17, inclusive, of the Soil Conservation and Domestic Allotment Act, as amended, the 1943 Agricultural Conservation Program, as amended, is further amended as follows:

1. Section 701.402 (c) [7 F.R. 10036] is amended to read as follows:

§ 701.402 *War crop goals.* * * *

(c) *Farm goals.* Farm war crop goals shall be determined by the county committee with the assistance of local committees by distributing the county goals in accordance with instructions issued by the Agricultural Adjustment Agency, on the basis of adaptability of the soil, availability of cropland, equipment, labor, and the acreage and production of each war crop on the farm during recent years, and other related factors. The sum of the farm goals for any war crop shall not be less than the corresponding county goal.

2. Section 701.403 (b),² the first paragraph thereof, is amended to read as follows:

§ 701.403 *Production adjustment allowance and deductions.* * * *

(b) *Deductions for failure to have acreage equal to at least 90 percent of allotted acreage.* Deductions for failure to have an acreage of any special crop equal to at least 90 percent of the allotment for such crop shall not exceed that part of the farm production adjustment allowance computed for that crop. No deduction shall be made where the county committee finds, in accordance with instructions issued by the Agricultural Adjustment Agency, that the failure to have an acreage of the crop equal to at least 90 percent of the allotment is due to flood, drought, hail, insects, or plant bed diseases. For the purpose of this provision any acreage of peanuts in excess of the peanut allotment, any acreage of other war crops, any acreage of rice in excess of the rice allotment, and in areas designated by the Agricultural Adjustment Agency any acreage of essential crops designated by the Agricul-

tural Adjustment Agency in excess of the usual acreage may be substituted acre for acre for any special crop. If more than one special crop on a farm is subject to a deduction under this provision, the acreage of crops available for substitution shall be substituted for the special crop or crops which will result in the largest payment for the farm. These deductions shall be determined as follows:

3. Section 701.415 (c)³ is amended to read as follows:

§ 701.415 *Authority, availability of funds, and applicability.* * * *

(c) *Applicability.* The provisions of the 1943 program contained herein, except § 701.407 are not applicable to (1) Hawaii, Puerto Rico, and Alaska; (2) counties for which special agricultural conservation programs are approved for 1943 by the Secretary; (3) any department or bureau of the United States Government and any corporation wholly owned by the United States; and (4) grazing lands owned by the United States which were acquired or reserved for conservation purposes or which are to be retained permanently under Government ownership. Such lands include, but are not limited to, lands owned by the United States which are administered under the Taylor Grazing Act or by the Forest Service or the Soil Conservation Service of the United States Department of Agriculture or by the Bureau of Biological Survey of the United States Department of the Interior.

The program is applicable to lands owned by corporations which are only partly owned by the United States, such as Federal Land Banks and Production Credit Associations.

The 1943 program is also applicable to any land which, although owned by the United States or a corporation wholly owned by it, is to be temporarily under such Government or corporation ownership and was not acquired or reserved for conservation purposes. Such land shall include that administered by the Farm Security Administration, the Reconstruction Finance Corporation, the Home Owners' Loan Corporation, or the Federal Farm Mortgage Corporation, or by any other Government agency which the Agricultural Adjustment Agency finds complies with all the provisions of the preceding sentence. The 1943 program will also be applicable to any cropland farmed by private persons which is owned by the United States or a corporation wholly owned by it, if the Congress so provides.

Indian lands are within the scope of the program except that where grazing operations are carried out on Indian lands administered by the Department of the Interior, such lands are within the scope of the program only if covered by a written agreement approved by the Department of the Interior as giving the operator an interest in the grazing and forage growing on the land and a right to occupy the land in order to carry out the grazing operations.

Chapter VIII—Sugar Agency

PART 802—SUGAR DETERMINATIONS

PROPORTIONATE SHARES FOR SUGARCANE FARMS IN PUERTO RICO

Pursuant to the provisions of section 302 of the Sugar Act of 1937, as amended, the following determination is hereby issued:

§ 802.46d *Proportionate shares for sugarcane producers in Puerto Rico*—(a) *General.* The proportionate share of sugarcane for the 1942-43 and any subsequent crop, in terms of sugar commercially recoverable from sugarcane, for any farm in Puerto Rico, except as provided in paragraph (b) hereof, shall be obtained by multiplying the base production for the farm, as defined herein, by a fraction whose numerator shall be the quantity of sugar required to be produced to enable Puerto Rico to meet its quota (and provide a normal carryover inventory) estimated by the Secretary for the calendar year during which the larger part of the sugar from such crop normally would be marketed, less the total proportionate shares allocated pursuant to paragraph (b) hereof, and whose denominator shall be the sum of the base productions of all such farms less the average total amount by which such farms failed to fill their original proportionate shares under the 1939-40 and 1940-41 Puerto Rican sugarcane programs, and converting the result to raw value.

(b) *New and small growers.* The minimum proportionate share for any farm in Puerto Rico, subject to the conditions set forth in this paragraph, shall be:

(1) For any farm for which a base production has been established, 9 tons of sugar.

(2) For any farm purchased or leased by the producer from or through the Puerto Rico Reconstruction Administration or Farm Security Administration, the sugar commercially recoverable from three planted acres of sugarcane.

(3) For any farm not covered by subparagraphs (1) or (2) above, the operator of which resides on the farm and derives the major portion of his income from the farm, 9 tons of sugar: *Provided,* That applications for proportionate

shares under this subparagraph (3) must be filed at such time and in such manner as may be prescribed by the Secretary of Agriculture.

(c) *Definition of base production.* Base production means the amount of 1940-41 proportionate share, in terms of sugar, 96° basis, assignable to any farm.

(d) *Designation of agent.* The Chief, or the Acting Chief, of the Sugar Agency, and the Officer in Charge of the San Juan Office of the Agricultural Adjustment Agency, or the Acting Officer in Charge thereof, are hereby designated to act, jointly or severally, as agents of the Secretary of Agriculture in administering the provisions of this section.

These regulations are also contained in War Department Procurement Regulations No. 7, September 5, 1942, as amended October 14, 1942 and November 28, 1942. Numbers to the right of the decimal point in section numbers correspond with the respective paragraph numbers in procurement regulations.

DISPOSITION OF PERSONAL PROPERTY

§ 83.701 *Rescission of regulations.* Army Regulations 5-50, May 22, 1939, as amended, and all other instructions inconsistent herewith are hereby rescinded. This Procurement Regulation No. 7 does not, however, rescind or in any way supersede any other Army regulations and any specific grants of authority to dispose of property contained in any such Army regulations are not in any way affected by this procurement regulation.

§ 83.702 *Real property.* This Procurement Regulation No. 7 does not relate to the disposition of real property which is governed by AR 30-1425. The term property as hereinafter used in this Procurement Regulation No. 7 means personal property.

§ 83.703 *Classification of property.* For the purposes of this Procurement Regulation No. 7:

(a) All property is divided into serviceable and unserviceable property.

(b) Unserviceable property is all property which has been declared unsuitable for use by competent authority within the supply service concerned, or which

has been presented for condemnation to an inspector in accordance with AR 20-35 and condemned by such inspector.

(c) Serviceable property is all property other than that specified in paragraph (b) above.

(d) Serviceable property is in turn subdivided into property declared surplus and property not declared surplus.

(e) Property declared surplus is serviceable property which, in the manner set forth in §§ 83.712 to 83.714 has been declared surplus.

(f) Property not declared surplus is all serviceable property other than that specified in paragraph (e) above.

§ 83.704 *Negotiation.* The term negotiation as used in this Procurement Regulation No. 7 means any method of reaching an agreement on the terms of sale except the formal sealed bid procedure contemplated by section 3709, Revised Statutes

§ 83.705 *Disposition of proceeds of sales.* The subject of disposition of the proceeds of sales of property is not covered by this procurement regulation. Reference is made to AR 35-780 and AR 35-6660.

§ 83.706 *Redefinition of authority.* Attention is called to the fact that, in accordance with § 81.107 (f), the chiefs of the supply services may redelegate all authority conferred upon them by this Procurement Regulation No. 7, including the power to make determinations under the First War Powers Act, to other officers or civilian officials of the War Department.

DISPOSITION OF SERVICEABLE PROPERTY NOT DECLARED SURPLUS

§ 83.707 *Disposition under contracts or agreements executed under First War Powers Act.* Under Title II of the First War Powers Act (Public Law, 354, 77th Congress) and Executive Order No. 8001, the War Department is authorized, without regard to the provisions of law relating to the making, performance, amendment or modification of contracts, to enter into contracts, including "agreements of all kinds . . . for all types and kinds of things and services necessary, appropriate or convenient for the prosecution of war . . ."

It is to be noted that the exercise of the authority thus conferred on the War Department must be predicated upon a determination that the contract or agreement will facilitate the prosecution of the war. The basis in fact for a determination that a contract for the disposition (whether by sale, lease or otherwise) of Government property will facilitate the prosecution of the war will exist principally in cases where either directly or indirectly the procurement of supplies or services is the primary objective and the contract or agreement for the disposition of Government property is merely incidental thereto. However, numerous other circumstances may exist where such contracts for the disposition of such property will facilitate the prosecution of the war, as, for instance, where War Department control of the allocation of scarce materials makes necessary or desirable the acquisition of

such materials in bulk by the War Department and the disposition, either for war production or for other purposes, of such of these as the War Department can spare. In cases of doubt the approval of the Director, Purchases Division, Headquarters, Services of Supply, should be sought. See Opinions J.A.G.O., SPJGC 160 May 30, 1942; J.A.G.O., SPJGC 19421 4522. The latter opinion was rendered with respect to a draft of this Procurement Regulation No. 7.

(a) *Sales.* The chiefs of the supply services are authorized, when it is determined by them that such action will facilitate the prosecution of the war, without further approval, to make contracts by negotiation for the sale of and to sell to manufacturers and suppliers having war contracts any machine tool equipment, processing equipment, uniforms, safety clothing and equipment, plant protective clothing and other special articles necessary to persons employed in or otherwise connected with war industries or establishments, manufacturing aids, raw materials, manufactured materials or other materials or facilities presently owned or hereafter acquired by the Government. Such sales shall, however, be made only for the purpose of facilitating the performance of such war contracts by such manufacturers and suppliers, and shall in no case involve a contract price in excess of \$1,000,000.

(b) *Leases.* The chiefs of the supply services are authorized, when it is determined by them that such action will facilitate the prosecution of the war, (1) To enter into agreements to lease any machine tool equipment, processing equipment, manufacturing aids, or other facilities presently owned or hereafter acquired by the Government and under the control of the chiefs of the supply services or any of them, such leases (i) to be made only to manufacturers and suppliers having war contracts for the purpose of facilitating the performance of such contracts (ii) in no case to cover property having an estimated value in excess of \$1,000,000 and (iii) to comply with § 81.1002 and any other applicable sections of these procurement regulations:

(2) In cases where the property involved was acquired under authority of section 1 (b) of the Act of July 2, 1940 (54 Stat. 712), as continued in effect by section 13 of the Act of June 5, 1942 (Public Law 580, 77th Congress), to include in any lease agreement an option to buy the property which is the subject of the lease, such option to come into effect (i) either one year after the expiration of the lease or (ii) upon the receipt by the contractor of a written notice from the Government that it does not desire to remove the facilities, whichever happens first; and to continue only for a limited time.

(3) To waive the requirement of performance bonds in connection with leases or agreements made pursuant to subparagraphs (1) and (2) above.

(c) *Other sales and leases.* In addition to the contracts of sale and agreements of lease specifically authorized by paragraphs (a) and (b) of this section,

the chiefs of the supply services are authorized by negotiation to enter into any other contracts of sale or agreements of lease (with or without options to purchase) authorized by the First War Powers Act and Executive Order No. 9001: *Provided*, That the approval of the Director, Purchases Division, Headquarters, Services of Supply, is first obtained.

§ 83.708 *Leases under other statutes.* In addition to the authority contained in the First War Powers Act, as set forth in § 83.707 (b) and (c), authority for the execution of leases may be found in other statutes. See AR 850-30 for the terms of those statutes.

§ 83.709 *Transfer to another Supply Service.* Property not declared surplus may, upon the request of another supply service, be transferred to such service without reimbursement, except for the costs of packing, handling and transportation.

§ 83.710 *Transfer to other Federal agencies.* Property not declared surplus may, upon the requisition of another federal agency made pursuant to section 7 (a) of the Act of May 21, 1920 (41 Stat. 613), as amended by section 601 of the Act of June 30, 1932 (47 Stat. 417) and by Public Law 670, 77th Congress; 31 U. S. C. 686, be transferred to such agency in accordance with said section.

§ 83.711 *Gifts and loans of drawings and similar property.* The chiefs of the supply services are authorized, without further approval, to give or lend to contractors and private firms which are or may likely be manufacturers or furnishers of supplies and equipment for the use of the War Department under approved production plans, drawings, manufacturing and other information and samples of supplies and equipment to be manufactured or furnished, *Provided*, That if in the case of a gift the estimated value of the property in question exceeds \$1,000.00 or in the case of a loan, \$50,000, the approval of the Director, Purchases Division, Headquarters, Services of Supply, will be first obtained.

DECLARATION OF SERVICEABLE PROPERTY AS SURPLUS AND DISPOSITION THEREOF

§ 83.712 *General.* In view of existing and potential shortages of materials, and to diminish, so far as possible, current demands upon the manufacturing and producing resources of the nation during the war period, it is important that serviceable property shall not be permitted to accumulate unreasonably and unnecessarily in the possession of the War Department. Accordingly, pursuant to the First War Powers Act, 1942 and Executive Order No. 9001 and any other relevant provisions of law, in order to facilitate the prosecution of the war, by making unneeded serviceable property available for any proper use, property may be declared surplus and disposed of in the manner set forth in this section III notwithstanding the provisions of section 14a of chap. 440 of Title I of the Act of June 28, 1940; 54 Stat. 681; 10 U.S.C. 1262a.

§ 83.713 *Declaration—(a) By chiefs of supply services.* Chiefs of supply services are authorized to declare serviceable property surplus without reference to higher authority under the following conditions:

(1) When the property (i) is of no present or apparent future use to the supply service possessing such property or to any other supply service or War Department agency and (ii) is not, and, to the knowledge of the chief of the supply service concerned, apparently will not be of use to others than the War Department in connection with work contributing to the prosecution of the war; and

(2) When the total current estimated value does not exceed \$50,000.

(b) *By Commanding General, Services of Supply.* In those cases where property is of the character described in paragraph (a) (1) of this section and has a total current value in excess of \$50,000, such property will be recommended to the Commanding General, Services of Supply (to the attention, Director, Purchases Division) for the declaration as surplus. The following information will be furnished with each such recommendation:

(3) An estimate of the storage space which the property occupies; and

(4) Brief statement of steps taken to ascertain that property was of character described in (a) (1) of this section. The Director, Purchases Division, Services of Supply, is authorized in behalf of the Commanding General to declare any such property surplus.

(c) *By Special Representative of The Under Secretary of War.* In case of the Army Air Forces, the recommendation specified in paragraph (b) of this section should be made to Colonel Albert J. Browning, as Special Representative of the Under Secretary of War, who is hereby authorized to declare property surplus.

§ 83.714 *Disposition—(a) Transfer to another supply service.* Property declared surplus may, upon request of another supply service, be transferred without reimbursement except for the costs of packing, handling and transportation.

(b) *Transfer to other Federal agencies.* Property declared surplus will be reported promptly to the Procurement Division, Treasury Department, by the chief of the supply service concerned for the purpose of effecting the transfer of the property to some other Federal agency. Property so reported will be withheld from sale, pending a possible transfer, for such length of time as the chief of the supply service concerned shall permit.

(c) Upon request from the Procurement Division, Treasury Department, property so held for transfer may be transferred to another Federal agency without reimbursement except for the costs of packing, handling and transportation.

(d) If a transfer is not effected pursuant to paragraph (c) of this section, property declared surplus may be sold by negotiation under the direction and the supervision of the chief of the supply service concerned. If however, the sales price exceeds \$1,000,000, the approval of the Director, Purchases Division, Headquarters, Services of Supply, will first be obtained.

(e) *Sales to National Council of the Boy Scouts of America.* Property declared surplus may be sold to the National Council of the Boy Scouts of America under the direction and supervision of the chief of the supply service concerned. The sales price will represent a fair value to the War Department, including costs of packing, handling and transportation.

(f) When property consists of articles or materials on which maximum prices have been placed by any authorized agency of the Government, no award will be made at a price higher than the prescribed maximum.

§ 7.20 *Introductory.* The Tax Convention and Protocol between the United States and Canada (hereinafter referred to as the Convention), proclaimed by the President of the United States on June 17, 1942 and effective January 1, 1941, provides as follows:

ARTICLE I

An enterprise of one of the contracting States is not subject to taxation by the other contracting State in respect of its industrial and commercial profits except in respect of such profits allocable in accordance with the Articles of this Convention to its permanent establishment in the latter State.

No account shall be taken in determining the tax in one of the contracting States, of the mere purchase of merchandise effected therein by an enterprise of the other State.

ARTICLE II

For the purposes of this Convention, the term "industrial and commercial profits" shall not include income in the form of rentals and royalties, interest, dividends, management charges, or gains derived from the sale or exchange of capital assets.

Subject to the provisions of this Convention such items of income shall be taxed separately or together with industrial and commercial profits in accordance with the laws of the contracting States.

ARTICLE III

1. If an enterprise of one of the contracting States has a permanent establishment in the other State, there shall be attributed to such permanent establishment the net industrial and commercial profit which it might be expected to derive if it were an independent enterprise engaged in the same or similar activities under the same or similar conditions. Such net profit will, in principle, be determined on the basis of the separate accounts pertaining to such establishment.

2. The competent authority of the taxing State may, when necessary, in execution of paragraph 1 of this Article, rectify the accounts produced, notably to correct errors and omissions or to reestablish the prices or remunerations entered in the books at the value which would prevail between independent persons dealing at arm's length.

3. If (a) an establishment does not produce an accounting showing its own operations, or (b) the accounting produced does not correspond to the normal usages of the trade in the country where the establishment is situated, or (c) the rectifications provided for in paragraph 2 of this Article cannot be effected the competent authority of the taxing State may determine the net industrial and commercial profit by applying such methods or formulae to the operations of the establishment as may be fair and reasonable.

4. To facilitate the determination of industrial and commercial profits allocable to the permanent establishment, the competent authorities of the contracting States may consult together with a view to the adoption of uniform rules of allocation of such profits.

ARTICLE IV

1. (a) When a United States enterprise, by reason of its participation in the management or capital of a Canadian enterprise, makes or imposes on the latter, in their commercial or financial relations, conditions different from those which would be made with an independent enterprise, any profits which should normally have appeared in the balance sheet of the Canadian enterprise but which have been, in this manner, diverted to the United States enterprise, may be incorporated in the taxable profits of the Canadian enterprise, subject to applicable measures of appeal.

(b) In order to effect the inclusion of such profits in the taxable profits of the Canadian enterprise, the competent authority of Canada may, when necessary, rectify the accounts of the Canadian enterprise, notably to correct errors and omissions or to reestablish the prices or remuneration entered in the books at the values which would prevail between independent persons dealing at arm's length. To facilitate such rectification the competent authorities of the contracting States may consult together with a view to such determination of profits of the Canadian enterprise as may appear fair and reasonable.

2. The same principle applies, mutatis mutandis, in the event that profits are diverted from a United States enterprise to a Canadian enterprise.

ARTICLE V

Income which an enterprise of one of the contracting States derives from the operation of ships or aircraft registered in that State shall be exempt from taxation in the other contracting State.

The present Convention will not be deemed to affect the exchange of notes between the United States of America and Canada, dated August 2 and September 17, 1928, providing for relief from double income taxation on shipping profits.

ARTICLE VI

Wages, salaries and similar compensation paid by the Government, or any agency or instrumentality thereof, of one of the contracting States or by the political subdivisions or territories or possessions thereof to citizens of such State residing in the other State shall be exempt from taxation in the latter State.

Pensions and life annuities derived from within one of the contracting States and paid to individuals residing in the other contracting State shall be exempt from taxation in the former State.

ARTICLE VII

1. The rate of income tax imposed by one from United States income tax upon compensation for labor or personal services performed within the United States of America if he conforms to either of the following conditions:

(a) He is temporarily present within the United States of America for a period or periods not exceeding a total of one hundred and eighty-three days during the taxable year and such compensation (A) is received for labor or personal services performed as an employee of, or under contract with, a resident or corporation or other entity of Canada and (B) does not exceed \$5,000 in the aggregate during such taxable year; or (b) he is temporarily present in the United States of America for a period or periods not exceeding a total of ninety days during the taxable year and the compensation received for such services does not exceed \$1,500 in the aggregate during such taxable year.

2. The provisions of paragraph 1 (a) of this Article shall have no application to the professional earnings of such individuals as actors, artists, musicians and professional athletes.

3. The provisions of paragraphs 1 and 2 of this Article shall apply, *mutatis mutandis*, to a resident of the United States of America deriving compensation for personal services performed within Canada.

ARTICLE VIII

Gains derived in one of the contracting States from the sale or exchange of capital assets by a resident or a corporation or other entity of the other contracting State shall be exempt from taxation in the former State, provided such resident or corporation or other entity has no permanent establishment in the former State.

ARTICLE IX

Students or business apprentices from one of the contracting States residing in the other contracting State for purposes of study or for acquiring business experience shall not be taxable by the latter State in respect of remittances received by them from within the former State for the purposes of their maintenance or studies.

ARTICLE X

Income derived from sources within one of the contracting States by a religious, scientific, literary, educational, or charitable organization of the other contracting State shall be exempt from taxation in the State from which the income is derived if, within the meaning of the laws of both contracting States, such organization would have been exempt from income tax.

ARTICLE XI

1. A resident of Canada shall be exempt of the contracting States, in respect of income derived from sources therein, upon individuals residing in, or corporations organized under the laws of, the other contracting State, and not engaged in trade or business in the former State and having no office or place of business therein, shall not exceed 15 percent for each taxable year.

2. Notwithstanding the provisions of paragraph 1 of this Article, income tax in excess of 5 percent shall not be imposed by one of the contracting States in respect of dividends paid by a subsidiary corporation organized under the laws of such State, or of a political subdivision thereof, to a parent corporation organized under the laws of the other contracting State, or of a political subdivision thereof: *Provided, however*, That this paragraph shall not apply if the competent authority in the former State is satisfied that the corporate relationship between the two corporations has been arranged or is maintained primarily with the intention of taking advantage of this paragraph.

3. Notwithstanding the provisions of Article XXII of this Convention, paragraph 1 or paragraph 2, or both, of this Article, may be terminated without notice on or after the termination of the three-year period beginning with the effective date of this Convention by either of the contracting States imposing a rate of income tax in excess of the rate of 15 percent prescribed in paragraph 1 or in excess of the rate of 5 percent prescribed in paragraph 2.

4. The provisions of this Article shall not be construed so as to contravene the Tax Convention between the United States of America and Canada, effective January 1, 1936, to April 29, 1941.

ARTICLE XII

Dividends and interest paid on or after the effective date of this Convention by a corporation organized under the laws of Canada to individual residents of Canada, other than citizens of the United States of America, or to corporations organized under the laws of Canada shall be exempt from all income taxes imposed by the United States of America.

ARTICLE XIII

Corporations organized under the laws of Canada, more than 50 percent of the outstanding voting stock of which is owned directly or indirectly throughout the last half of the taxable year by individual residents of Canada, other than citizens of the United States of America, shall be exempt from any taxes imposed by the United States of America with respect to accumulated or undistributed earnings, profits, income or surplus of such corporations. With respect to corporations organized under the laws of Canada not exempt from such taxes under the provisions of this Article the competent authorities of the two contracting States will consult together.

ARTICLE XIV

1. (a) The United States income tax liability for any taxable year beginning prior to January 1, 1936, of any individual resident of Canada, other than a citizen of the United States of America, or of any corporation organized under the laws of Canada, remaining unpaid as of the date of signature of this Convention may be adjusted on a basis satisfactory to the Commissioner: *Provided*, That the amount to be paid in settlement of such liability shall not exceed the amount of the liability which would have been determined if—

(A) the Revenue Act of 1936 as modified by the Tax Convention between the United States of America and Canada, effective January 1, 1936, to April 29, 1941 (except in the case of a corporation organized under the laws of Canada more than 50 percent of the outstanding voting stock of which was owned directly or indirectly throughout the last half of the taxable year by citizens or residents of the United States of America) and (B) Article XII and XIII of this Convention had been in effect for such year.

If the taxpayer was not, within the meaning of the Revenue Act of 1936, engaged in trade or business within the United States of America and had no office or place of business therein during the taxable year, the amount of interest and penalties shall not exceed 50 percent of the amount of the tax with respect to which such interest and penalties have been computed.

(b) The United States income tax liability remaining unpaid as of the date of signature of this Convention for any taxable year beginning after December 31, 1935 and prior to January 1, 1941, in the case of any individual resident of Canada, other than a citizen of the United States of America, or in the case of any corporation organized under the laws of Canada shall be determined as if the

provisions of Articles XII and XIII of this Convention had been in effect for such year.

2. The provisions of paragraph 1 of this Article shall not apply—

(a) Unless the taxpayer files with the Commissioner within two years from the date of signature of this Convention a request that such tax liability be so adjusted together with such information as the Commissioner may require;

(b) In any case in which the Commissioner is satisfied that any deficiency in tax is due to fraud with intent to evade the tax.

ARTICLE XV

In accordance with the provisions of Section 8 of the Income War Tax Act as in effect on the day of the entry into force of this Convention, Canada agrees to allow as a deduction from the Dominion income and excess profits taxes on any income which was derived from sources within the United States of America and was there taxed, the appropriate amount of such taxes paid to the United States of America.

In accordance with the provisions of Section 131 of the United States Internal Revenue Code as in effect on the day of the entry into force of this Convention, the United States of America agrees to allow as a deduction from the income and excess profits taxes imposed by the United States of America the appropriate amount of such taxes paid to Canada.

ARTICLE XVI

Where a taxpayer shows proof that the action of the revenue authorities of the contracting States has resulted in double taxation in his case in respect of any of the taxes to which the present Convention relates, he shall be entitled to lodge a claim with the State of which he is a citizen or resident or, if the taxpayer is a corporation or other entity, with the State in which it was created or organized. If the claim should be deemed worthy of consideration, the competent authority of such State may consult with the competent authority of the other State to determine whether the double taxation in question may be avoided in accordance with the terms of this Convention.

ARTICLE XVII

Notwithstanding any other provision of this Convention, the United States of America in determining the income and excess profits taxes, including all surtaxes, of its citizens or residents or corporations, may include in the basis upon which such taxes are imposed all items of income taxable under the revenue laws of the United States of America as though this Convention had not come into effect.

ARTICLE XVIII

The competent authorities of the two contracting States may prescribe regulations to carry into effect the present Convention within the respective States and rules with respect to the exchange of information.

The competent authorities of the two contracting States may communicate with each other directly for the purpose of giving effect to the provisions of the present Convention.

ARTICLE XIX

With a view to the prevention of fiscal evasion, each of the contracting States undertakes to furnish to the other contracting State, as provided in the succeeding Articles of this Convention, the information which its competent authorities have at their disposal or are in a position to obtain under its revenue laws in so far as such information may be of use to the authorities of the other contracting State in the assessment of the taxes to which this Convention relates.

The information to be furnished under the first paragraph of this Article, whether in the

ordinary course or on request, may be exchanged directly between the competent authorities of the two contracting States.

ARTICLE XX

At the moment of signing the Convention for the avoidance of double taxation, and the establishment of rules of reciprocal administrative assistance in the case of income taxes, this day concluded between the United States of America and Canada, the undersigned plenipotentiaries have agreed upon the following provisions and definitions:

1. The taxes referred to in this Convention are:

(a) For the United States of America: the Federal income taxes, including surtaxes, and excess-profits taxes.

(b) For Canada: the Dominion income taxes, including surtaxes, and excess-profits taxes.

2. In the event of appreciable changes in the fiscal laws of either of the contracting States, the Governments of the two contracting States will consult together.

3. As used in this Convention:

(a) The terms "person," "individual" and "corporation", shall have the same meanings, respectively, as they have under the revenue laws of the taxing State or the State furnishing the information, as the case may be;

(b) The term "enterprise" includes every form of undertaking, whether carried on by an individual, partnership, corporation or any other entity;

(c) The term "enterprise of one of the contracting States" means, as the case may be, "United States enterprise" or "Canadian enterprise";

(d) The term "United States enterprise" means an enterprise carried on in the United States of America by an individual resident in the United States of America, or by a corporation, partnership or other entity created or organized in or under the laws of the United States of America, or of any of the States or Territories of the United States of America;

(e) The term "Canadian enterprise" is defined in the same manner mutatis mutandis as the term "United States enterprise";

(f) The term "permanent establishment" includes branches, mines and oil wells, farms, timber lands, plantations, factories, workshops, warehouses, offices, agencies and other fixed places of business of an enterprise, but does not include a subsidiary corporation.

When an enterprise of one of the contracting States carries on business in the other contracting State through an employee or agent established there, who has general authority to contract for his employer or principal or has a stock of merchandise from which he regularly fills orders which he receives, such enterprise shall be deemed to have a permanent establishment in the latter State.

The fact that an enterprise of one of the contracting States has business dealings in the other contracting State through a commission agent, broker or other independent agent or maintains therein an office used solely for the purchase of merchandise shall not be held to mean that such enterprise

has a permanent establishment in the latter State.

4. The term "Minister", as used in this Convention, means the Minister of National Revenue of Canada or his duly authorized representative. The term "Commissioner", as used in this Convention, means the Commissioner of Internal Revenue of the United States of America, or his duly authorized representative. The term "competent authority", as used in this Convention, means the Commissioner and the Minister and their duly authorized representatives.

5. The term "United States of America", when used in a geographical sense, includes only the States, the Territories of Alaska and Hawaii, and the District of Columbia. The term "Canada" when used in a geographical sense means the Provinces, the Territories and Sable Island.

6. The term "subsidiary corporation" referred to in Article XI of this Convention means a corporation all of whose shares (less directors' qualifying shares) having full voting rights are beneficially owned by another corporation, provided that ordinarily not more than one-quarter of the gross income of such subsidiary corporation is derived from interest and dividends other than interest and dividends received from its subsidiary corporations.

7. (a) The term "rentals and royalties" referred to in Article II of this Convention shall include rentals or royalties arising from leasing real or immovable, or personal or movable property or from any interest in such property, including rentals or royalties for the use of, or for the privilege of using patents, copyrights, secret processes and formulas, good will, trade marks, trade brands, franchises and other like property;

(b) The term "interest", as used in this Convention, shall include income arising from interest-bearing securities, public obligations, mortgages, hypothecs, corporate bonds, loans, deposits and current accounts;

(c) The term "dividends", as used in this Convention, shall include all distributions of the earnings or profits of corporations.

8. The term "pensions" referred to in Article VI of this Convention means periodic payments made in consideration for services rendered or by way of compensation for injuries received.

9. The term "life annuities" referred to in Article VI of this Convention means a stated sum payable periodically at stated times, during life, or during a specified number of years, under an obligation to make the payments in consideration of a gross sum or sums paid by the recipient or under a contributory retirement plan.

10. The terms "engaged in trade or business" and "office or place of business" as used in Article XI of this Convention shall not be deemed to include an office used solely for the purchase of merchandise.

11. The provisions of the present Convention shall not be construed to restrict in any manner any exemption, deduction, credit or other allowance accorded by the laws of one of the contracting States in the determination of the tax imposed by such State.

12. The citizens of one of the contracting States residing within the other contracting State shall not be subjected to the payment of more burdensome taxes than the citizens of such other State.

[SEAL] FRANKLIN D. ROOSEVELT

By the President:

CORDELL HULL,
Secretary of State.

The Internal Revenue Code provides in part as follows:

SEC. 22. GROSS INCOME.

(b) *Exclusions from gross income.* The following items shall not be included in gross income and shall be exempt from taxation under this chapter:

(7) *Income exempt under treaty.* Income of any kind, to the extent required by any treaty obligation of the United States;

SEC. 62. RULES AND REGULATIONS.

The Commissioner, with the approval of the Secretary, shall prescribe and publish all rules and regulations for the enforcement of this chapter

Pursuant to section 62 of the Internal Revenue Code, Article XVIII of the Convention, and other provisions of the internal revenue laws, the following regulations are hereby prescribed and all regulations inconsistent herewith are modified accordingly.

§ 7.21 *Scope of regulations.* The primary purposes of the Convention, to be accomplished on a mutually reciprocal basis, are the application of a limited rate of taxation to certain classes of income derived from within one of the contracting States by residents or corporations of the other contracting State, the avoidance of double taxation, the modification of certain taxation provisions with a view to harmonizing as nearly as may be the taxation principles of the two countries, and exchange of fiscal information complementary to other provisions of the Convention, including those relating to the avoidance of double taxation. The Convention also lays the basis for facilitating the settlement of pending cases relating to the Federal taxation of residents of Canada, other than citizens of the United States, and of corporations organized under the laws of Canada (hereinafter referred to as Canadian corporations). These regulations are concerned with the accomplishment of those purposes and with the taxation of nonresident alien residents of Canada and of Canadian corporations.

The specific classes of income from sources within the United States which are exempt by reason of the Convention from United States income taxes are:

(a) Industrial and commercial profits of a Canadian enterprise having no permanent establishment in the United States (Article I);

(b) Income derived by a Canadian enterprise from the operation of ships or aircraft registered in Canada (Article V);

(c) Wages, salaries and similar compensations paid by Canada or any agency or instrumentality thereof, or any political subdivision or territory or possession thereof, to citizens of Canada residing in the United States (Article VI);

(d) Pensions and life annuities paid to nonresident alien individuals resident in Canada (Article VI);

(e) Compensation for labor or personal services performed within the United States by a nonresident alien individual, resident in Canada, such exemption, however, being subject to the limitations set forth in Article VII of the Convention and in § 7.23 of these regulations;

(f) Gains derived from the sale or exchange of capital assets by a nonresident alien individual resident in Canada or by a Canadian corporation or other entity having no permanent establishment in the United States (Article VIII);

(g) Remittances from sources within Canada (if and to the extent they constitute gross income) received in the United States by a nonresident alien individual, resident of Canada, who is temporarily resident in the United States for the purposes of study or for acquiring business experience, such remittances being for the purposes of his maintenance or studies (Article IX);

(h) Income of a Canadian religious, scientific, literary, educational or charitable organization (Article X);

(i) Dividends and interest paid on or after January 1, 1941 by a Canadian corporation to individual residents of Canada, other than citizens of the United States, or to Canadian corporations (if and to the extent that such dividends and interest are taxable in the hands of such persons without regard to this Convention) (Article XII).

The Convention does not, except as provided in the first paragraph of Article VI, affect the liability to United States income tax of Canadian citizens resident in the United States nor does it affect such liability of a citizen of the United States residing in Canada. It has no application to individuals nonresident as to Canada even though such nonresident is a citizen of Canada.

The income tax liability of a nonresident alien individual, resident of Canada, and of a Canadian corporation or other entity, except as to (1) the reduced rate of taxation applicable in the case of such taxpayers and (2) items of income expressly exempted from tax by the Convention, is determined in accordance with the provisions of the internal revenue laws of the United States and the regulations thereunder applicable generally to the taxation of nonresident alien individuals and foreign corporations.

§ 7.22 *Definitions.* As used in these regulations:

(a) The term "permanent establishment" includes branches, mines and oil wells, farms, timberlands, plantations, factories, workshops, warehouses, offices, agencies and other fixed places of business of an enterprise. A Canadian parent corporation having a domestic subsidiary corporation in the United States shall not be deemed by reason of such fact to have a permanent establishment in the United States. The mere fact that a foreign subsidiary corporation of a Canadian parent corporation has a permanent establishment in the United States does not mean that such Canadian parent corporation has a permanent establishment in the United States. The fact that a Canadian enterprise has business dealings in the United States through a commission agent, broker or other independent agent or maintains therein an office used solely for the purchase of merchandise shall not be held to mean that such enterprise has a permanent establishment in the latter State. If, however, the Canadian enterprise carries on business in the United States through an employee or agent established there who has general authority to contract for such Canadian enterprise or has a stock of merchandise located in the United States from which it regularly fills orders, such Canadian enterprise shall be deemed to have a permanent establishment in the United States. The mere fact that salesmen, employees of a Canadian enterprise, promote the role of its products in the United States or that such enterprise transacts business therein by means of mail order activities does not mean such enterprise has a permanent establishment therein.

(b) The term "enterprise" means any commercial or industrial undertaking whether conducted by an individual, partnership, corporation or other entity. It includes such activities as manufacturing, merchandising, mining and banking. It does not include the rendition of personal services. Hence, a nonresident alien individual, a resident of Canada, rendering personal services within the United States is not, merely by reason of such services, engaged in an enterprise within the meaning of the Convention and his liability to income tax is unaffected by Article I of the Convention.

(c) The term "Canadian enterprise" means an enterprise carried on in Canada by a nonresident alien individual resident in Canada or by a Canadian corporation or other Canadian entity. The term "Canadian corporation or other entity" means a partnership, corporation or other entity created or organized in Canada or under the laws of Canada. For example, an enterprise carried on wholly outside Canada by a Canadian corporation is not a Canadian enterprise within the meaning of the Convention.

(d) The term "industrial and commercial profits" means the profits arising from the industrial, mercantile, manufacturing, or like activities of a Canadian enterprise as defined in this section. Such term does not include rentals and royalties, interest, dividends, fees or charges for managerial activities or gains derived from the sale or exchange of capital assets, nor compensation for labor

or personal services. Such enumerated items of income are not governed by the provisions of Article I but, to the extent covered by the Convention, are subject to the rules elsewhere set forth therein and in these regulations.

§ 7.23 *Scope of Convention with respect to determination of "industrial and commercial profits" of a nonresident alien individual, resident of Canada, or of a Canadian corporation or other entity carrying on a Canadian enterprise in the United States*—(a) *General.* Article I of the Convention adopts the principle that an enterprise of one of the contracting States shall not be taxable in the other contracting State in respect of its industrial and commercial profits unless it has a permanent establishment in the latter State. Hence, a Canadian enterprise is subject to United States tax upon its industrial and commercial profits to the extent of such profits from sources within the United States only if it has a permanent establishment within the United States. From the standpoint of Federal income taxation, the article has application only to a Canadian enterprise and to the industrial and commercial income thereof from sources within the United States. It has no application, for example, to compensation for labor or personal services performed in the United States nor to income derived from real property located in the United States nor to any interest in such property, including rentals and royalties therefrom, nor to gains from the sale or disposition thereof, nor to dividends and interest. Such enumerated items of income, to the extent covered by the Convention, are treated separately elsewhere in these regulations and are subject to the rules laid down in the sections having specific reference to the respective items of income. As to what is a "Canadian enterprise", a "permanent establishment" and "industrial and commercial profits", see § 7.22 of these regulations.

(b) *No United States permanent establishment.* A nonresident alien individual, a resident of Canada, or a Canadian corporation or other entity carrying on a Canadian enterprise but having no permanent establishment in the United States is not subject to United States income tax upon industrial and commercial profits from sources within the United States. For example, if such Canadian corporation sells stock in trade, such as ore, or wood pulp, or paper, through a bona fide commission agent or broker in the United States, the resulting profit is, under the terms of Article I of the Convention, exempt from United States income tax. Such Canadian corporation, however, remains subject to tax upon all other items of income from sources within the United States which are not expressly exempted from such tax under the Convention. Such Canadian corporation is, however, engaged in trade or business within the United States and hence is not entitled to the reduced rate of 15 percent upon fixed or determinable annual or periodical income as provided in Article XI of the Convention. See § 7.31 of these regulations. Such corporation is, however, by reason of its not

having a permanent establishment in the United States not subject to tax upon capital gains. See also § 7.29 of these regulations.

(c) *United States permanent establishment.* A nonresident alien individual, resident in Canada, or a Canadian corporation or other entity, carrying on a Canadian enterprise having a permanent establishment in the United States is subject to tax upon industrial and commercial profits from sources within the United States. In the determination of the income of such resident of Canada or Canadian corporation or other entity from sources within the United States, all industrial and commercial profits from such sources shall be deemed to be allocable to the permanent establishment within the United States. Hence, for example, if a Canadian enterprise having a permanent establishment in the United States, sells in the United States through a commission agent therein, goods produced in Canada, the resulting profits derived from United States sources from the latter transactions are allocable to such permanent establishment. In determining such income no account shall be taken of the mere purchase of merchandise effected in the United States by such Canadian enterprise.

§ 7.24 *Allocation of compensation for labor or personal services.* Except as provided in section 119 (a) (3) of the Internal Revenue Code, gross income from sources within the United States includes compensation for labor or personal services performed within the United States regardless of the residence of the payor, of the place in which the contract for service was made, or of the place of payment. If a specific amount is paid for labor or personal services performed in the United States, such amount (if income from sources within the United States) shall be included in the gross income. If no accurate allocation or segregation of compensation for labor or personal services performed in the United States can be made, or when such labor or service is performed partly within and partly without the United States, the amount to be included in the gross income shall be determined by an apportionment on the time basis, i. e., there shall be included in the gross income an amount which bears the same relation to the total compensation as the number of days of performance of the labor or services within the United States bears to the total number of days of performance of labor or services for which the payment is made.

§ 7.25 *Control of a domestic enterprise by a Canadian enterprise.* Article IV of the Convention provides that if a Canadian enterprise by reason of its control of a domestic business imposes conditions different from those which would result from normal business relations between independent enterprises, the accounts between the enterprises will be adjusted so as to ascertain the true net income of the domestic enterprise. The purpose is to place the controlled domestic enterprise on a tax parity with an uncontrolled domestic enterprise by determining, according to the standard

of an uncontrolled enterprise, the true net income from the property and business of the controlled enterprise. The Convention contemplates that if the accounting records do not truly reflect the net income from the property and business of such domestic enterprise the Commissioner shall intervene and, by making such distributions, apportionments or allocations as he may deem necessary of gross income or deductions of any item or element affecting net income as between such domestic enterprise and the Canadian enterprise by which it is controlled or directed, determine the true net income of the domestic enterprise. The provisions of § 19.45-1, Regulations 103, (Part 19, Title 26, Code of Federal Regulations, 1940 Sup.) shall, insofar as applicable, be followed in the determination of the net income of the domestic business.

§ 7.26 *Income from operation of ships or aircraft.* The income derived by a Canadian enterprise from the operation of ships or aircraft registered in Canada is, under Article V of the Convention, exempt from United States income tax. However, the profits derived by such enterprise from the operation of ships or aircraft, if any, not so registered are treated as are industrial and commercial profits generally. See Article I of the Convention and section 7.23 of these regulations.

§ 7.27 *Wages, salaries and similar compensations, pensions and life annuities.* Under Article VI of the Convention, wages, salaries and similar compensation paid by the Government of Canada or any agency or instrumentality thereof or any political subdivision, or territory thereof, to citizens of Canada residing in the United States are exempt from Federal income tax. The provisions of Article XVII have no application to such income of such individuals. As to the taxation generally of the compensation of employees of foreign governments, see section 116 (h) of the Internal Revenue Code and § 19.116-1 of Regulations 103.

Under the provisions of the same article of the Convention, pensions and life annuities derived from sources within the United States by nonresident alien individuals residing in Canada are exempt from Federal income tax. Such items of income are, therefore, not subject to the withholding provisions of the Internal Revenue Code. See paragraph 9 of the Protocol to the Convention as to what constitutes life annuities. However, for the purposes of the Convention and these regulations:

(a) The exemption with respect to annuities (other than those paid under a contributory retirement plan) applies only to the individual who has actually paid the consideration upon which the annuity is based; and

(b) The exemption with respect to payments under a contributory retirement plan applies alike to the original beneficiary and to the successor beneficiary even though the latter has not himself actually made payments into the fund from which such payments are made.

See paragraph 8 of the Protocol as to what constitutes "pensions" within the meaning of the Convention. See section 22 (b) (5), Internal Revenue Code.

§ 7.28 *Compensation for labor or personal services.* Article VII of the Convention provides, upon a reciprocal basis, that a nonresident alien, a resident of Canada, is exempt from Federal income tax upon compensation for labor or personal services performed within the United States if he conforms to either of the following conditions:

He is temporarily present within the United States for a period or periods:

(1) Not exceeding 183 days during the taxable year and his compensation for labor or personal services performed in the United States during such period (i) is received for labor or personal services performed as an employee of, or under contract with, a resident or corporation or other entity of Canada and (ii) does not exceed \$5,000 in the aggregate during such taxable year; or

(2) Not exceeding 90 days during the taxable year and the compensation received for such services does not exceed \$1,500 in the aggregate during such taxable year even though such compensation is paid by a United States resident or domestic corporation or other domestic entity.

If, therefore, such nonresident alien individual (a) is temporarily present in the United States for a period or periods in excess of 90 days during the taxable year or (b) receives more than \$1,500 in the aggregate during such taxable year for labor or personal services performed in the United States, he is not exempt under (2) and his right to exemption under the Convention will depend on his meeting the following tests:

(A) His stay in the United States is not in excess of 183 days during the taxable year; and

(B) His compensation from United States sources is paid by a Canadian employer; and

(C) Such compensation does not exceed \$5,000 in the aggregate during the taxable year.

As to source of compensation for labor or personal services, see § 7.24 of these regulations.

The provisions of paragraph (1) do not extend to the professional earnings of actors, artists, musicians, professional athletes and other individuals engaging in similar pursuits. If, therefore, such latter persons do not come within the provisions of paragraph (2) they are subject to the provisions of the Internal Revenue Code applicable generally to the taxation of nonresident alien individuals. See section 211, Internal Revenue Code, and regulations thereunder.

§ 7.29 (a) *Capital gains.* Under Article VIII of the Convention gain derived from the sale or exchange within the United States of capital assets by a nonresident alien individual resident in Canada or by a Canadian corporation or other Canadian entity is exempt from Federal income tax unless such individual, corporation or other entity has a permanent establishment in the United States. As to what constitutes capital assets, see

section 117, Internal Revenue Code, and § 19.117-1, Regulations 103. As to what constitutes a permanent establishment, see § 7.22 of these regulations.

(b) *Remittances.* Under Article IX of the Convention, nonresident alien individuals, residents of Canada, who are temporarily residing in the United States for the purposes of study or for acquiring business experience are exempt from Federal income tax upon amounts representing remittances from Canada for the purposes of their maintenance and studies if and to the extent such amounts constitute gross income.

§ 7.30 *Exempt organizations.* Article X of the Convention provides that religious, scientific, literary, educational or charitable organizations of Canada shall be exempt from Federal taxation with respect to income derived from sources within the United States. Paragraph 11 of the Protocol to the Convention provides that the provisions of the Convention shall not be construed to restrict in any manner any exemption, deduction, credit or other allowance accorded by the laws of one of the contracting States in the determination of the tax imposed by such State. In view of the provisions of paragraph 11, the provisions of section 101 (relating to exemptions from tax on corporations) apply to all Canadian organizations coming within the scope of that section, regardless of whether Canada recognizes such organization as exempt from income and excess profits taxes imposed by that Country. The article contemplates that similar exemptions to those granted under the revenue laws of the United States to such organization of Canada will be granted by Canada to a like organization of the United States if any such organization is also a religious, scientific, literary, educational or charitable organization under the laws of Canada, even though such latter organization is nonresident as to Canada. For example, the A Corporation organized under the laws of Canada and conducting no activities in the United States is operated exclusively for religious and charitable purposes and no part of the net earnings of the corporation inures to the benefit of any private shareholders and the corporation meets the other tests of section 101 (6), Internal Revenue Code. The A Corporation is exempt from United States income tax with respect to its income from United States sources. Conversely Article X contemplates that a United States religious or charitable organization similarly circumstanced with respect to Canada shall be exempt from income and excess profits tax otherwise imposed by Canada with respect to income derived by such United States organization from sources in Canada.

§ 7.31 *Reduction in rate of the tax withheld at source—(a) General.* Under the terms of the Convention, the provisions of which are retroactive to January 1, 1941, the rate of tax of 27½ percent, or 30 percent, as the case may be, imposed by section 211 (a) of the Internal Revenue Code (relating to nonresident alien individuals not engaged in trade or business within the United States and not having an office or place

of business therein) and by section 231 (a) of the Internal Revenue Code (relating to foreign corporations not engaged in trade or business in the United States and not having an office or place of business therein) is reduced to 15 percent in the case of such individuals who are residents of Canada and in the case of such corporations organized under the laws of Canada, with respect to amounts received from sources within the United States as interest (except interest exempt from tax), dividends, rents, salaries, wages, premiums, compensations, remunerations, emoluments or other fixed or determinable annual or periodical gains, profits and income, other than annuities and pensions which are exempt from the tax under the Convention. Such tax Convention, however, does not affect the rates of tax prescribed under the prior tax Convention with Canada, effective January 1, 1936 and terminated effective April 30, 1941. Under such prior Convention, the reduced rate of tax with respect to such income, including annuities and pensions, in the case of nonresident aliens, residents of Canada, was 5 percent and in the case of Canadian corporations, 5 percent with respect to dividends only.

Under the provisions of Article XI, dividends paid to a Canadian corporation not engaged in trade or business within the United States and not having an office or place of business therein by a domestic subsidiary corporation are subject to tax at the rate of only 5 percent, such dividends constituting an exception to the general rule laid down in paragraph 1 of Article XI. For the purposes of that article, a "subsidiary corporation" is defined in paragraph 6 of the Protocol as a corporation (in this case a domestic corporation) all of whose shares (less directors' qualifying shares) having full voting rights are beneficially owned by another corporation (in this case a Canadian corporation), provided that ordinarily not more than one-quarter of the gross income of such subsidiary corporation is derived from interest and dividends other than interest and dividends received from its subsidiary corporations. Thus, for example, the A Corporation is a domestic corporation all of whose shares are owned by B Company, Ltd., a Canadian corporation not engaged in trade or business within the United States and not having any office or place of business therein. The A Corporation pays a dividend to B Company, Ltd., on June 30, 1943. The A Corporation is on a calendar year basis and throughout 1940, 1941 and 1942 derived not more than 15 percent of its gross income from interest and dividends from corporations not controlled by the A Corporation. The Commissioner ascertains and has so notified the A Corporation that the corporate relationship between the A Corporation and the B Company, Ltd., has not been arranged and is not maintained primarily for the purpose of securing the lower rate of tax prescribed in paragraph 2 of Article XI of the Convention. The dividend paid by the A Corporation is subject to withholding of the tax at the lower rate of 5 percent.

Any domestic corporation which claims on contemplates claiming, that dividends paid by it, or to be paid by it, are subject only to the 5 percent rate, shall file, as soon as practicable, with the Commissioner the following information: (1) The date and place of its organization; (2) the number of its outstanding shares of stock having full voting rights; (3) the person or persons beneficially owning such stock and their relationship to such corporation; (4) the amount of gross income, by years, of the paying corporation for the three-year period immediately preceding the taxable year in which such dividend is paid; (5) the amount of interest and dividends, by years, included in such gross income and the amount of interest and dividends, by years, received from the subsidiary corporations, if any, of such domestic corporation; and (6) the corporate relationship between such domestic corporation and the Canadian corporation to which it pays the dividend. As soon as practicable after such information is filed, the Commissioner shall examine it and determine whether the dividends concerned fall within the provisions of such paragraph and may authorize the release of excess tax withheld with respect to dividends which are shown to the satisfaction of the Commissioner to come within the provisions of paragraph 2 of Article XI of the Convention. In any case in which the Commissioner has notified such domestic corporation that it comes within the provisions of paragraph 2 of Article XI of the Convention, the reduced rate of 5 percent applies to any dividends subsequently paid by such corporation unless its stock ownership or the character of its income materially changes. In the event of such changes occurring, such corporation shall promptly notify the Commissioner of the then existing facts with respect to such stock ownership and income.

(b) *Specific terms.* Under paragraph 7 (b) of the Protocol, the term "interest" as used in the Convention includes income arising from interest-bearing securities, public obligations, mortgages, hypothecs, corporate bonds, loans, deposits and current accounts. The term "dividends" as used in the Convention includes all distributions of the earnings or profits of corporations. The term "rentals and royalties" as used in Article II of the Convention includes rentals or royalties arising from leasing real or immovable, or personal or movable property, or from any interest in such property, including rentals or royalties for the use of, or for the privilege of using, patents, copyrights, secret processes and formulae, goodwill, trade marks, trade brands, franchises and other like property.

By reason of the provisions of paragraph 11 of the Protocol, nonresident aliens, residents of Canada, and Canadian corporations and other Canadian entities are entitled to any exemption, deduction, credit, or other allowance or reliefs accorded by the revenue laws of the United States to nonresident alien individuals and foreign corporations generally. If, therefore, the terms "interest", "dividends" and "rentals and

royalties" as used in the Convention include items not subject to Federal tax, such latter items remain nontaxable under the Convention.

As to refund of tax withheld for 1941 in excess of the rates provided in the Convention, application of the reduced rate of withholding under the Convention, and instructions with respect to United States and Canada withholding agents as to withholding of the tax and the filing of returns by such withholding agents, see Treasury Decision 5157.

§ 7.32 *Dividends and interest paid by Canadian corporations.* A dividend paid by a foreign corporation constitutes income from sources within the United States, and hence is subject to tax in the hands of nonresident alien or foreign corporations, if 50 percent or more of the gross income of the foreign corporation paying such dividend is derived from sources within the United States during the period prescribed by the statute. Section 119 (a) (2) (B), Internal Revenue Code and § 19.119-3 (b), Regulations 103. Interest paid by a resident foreign corporation constitutes income from sources within the United States, and hence is subject to tax in the hands of a nonresident alien individual or foreign corporation, if 20 percent or more of the gross income of the foreign corporation paying such interest is derived from sources within the United States during the period prescribed by the statute. Section 119 (a) (1) (B), Internal Revenue Code and § 19.119-2 (b), Regulations 103.

Under the provisions of Article XII of the Convention, dividends and interest paid by a Canadian corporation to a nonresident alien resident in Canada, or to another Canadian corporation are not subject to Federal income tax regardless of whether the corporation paying such dividend or interest is a resident foreign (as to the United States) corporation and regardless of the percentage of its gross income derived from sources within the United States, and regardless further of whether such resident of Canada is a Canadian citizen. However, such dividends and interest still remain income from sources within the United States if the conditions prescribed in the cited sections of the Internal Revenue Code are met. Such dividends and interest, to the extent they constitute income from sources within the United States, are, therefore, taken into consideration in ascertaining whether the dividends and interest paid by the recipient Canadian corporation in turn constitute income from sources within the United States for the purpose of taxation of nonresident alien individuals, nonresident as to Canada, and of foreign corporations, other than Canadian corporations. If, for example, the A Company, Ltd., a Canadian corporation, derives 75 percent of its gross income in the form of dividends from the B Company, Ltd., another Canadian corporation which derives all of its gross income from sources within the United States, such dividends from the B Company, Ltd., to the A Company, Ltd., are exempt from Federal income tax in the hands of the A Company, Ltd. However,

any dividend paid by the A Company, Ltd., to a nonresident alien individual, nonresident as to Canada, or to a foreign corporation, other than a Canadian corporation, is subject to Federal income tax as constituting income from sources within the United States to the extent provided in section 119 (a) (2) (B), Internal Revenue Code and regulations thereunder.

§ 7.33 *Canadian corporations; exemption from Federal taxation with respect to accumulated surplus or undistributed income.* Section 102 of the Internal Revenue Code imposes (in addition to other taxes imposed by chapter 1 of such Code) a graduated income tax or surtax upon any domestic or foreign corporation formed or availed of to avoid the imposition of the individual surtax upon its shareholders or the shareholders of any other corporation through the medium of permitting earnings or profits to accumulate instead of dividing or distributing them. Such tax, however, does not apply in the case of personal holding companies as defined in section 501 of the Internal Revenue Code nor to foreign personal holding companies as defined in Supplement B (section 331) of such Code. Section 500 of the Internal Revenue Code imposes (in addition to the taxes imposed by chapter 1 of such Code) a graduated income tax or surtax upon corporations classified as personal holding companies, regardless of whether or not they are formed or availed of to accumulate earnings or profits for the purpose of avoiding surtax upon shareholders. A foreign corporation, whether resident or nonresident, classified as a personal holding company under section 501 (not including a foreign personal holding company as defined in section 331) is subject to the tax imposed by section 500 with respect to its income from sources within the United States even though such income is not fixed or determinable annual or periodical income specified in section 231 (a).

Under the provisions of Article XIII of the Convention, Canadian corporations are subject to neither the tax imposed by section 102, supra, nor the tax imposed by section 500, supra, if more than 50 percent of the outstanding voting stock of such corporation is owned directly or indirectly throughout the last half of the taxable year by nonresident alien individuals, residents of Canada. To come within the scope of the exemption, the prescribed proportion of the stock of the Canadian corporation concerned must be so owned at all times throughout the last half of the taxable year in which the taxable status of the corporation is involved. In determining the ownership of the voting stock of the Canadian corporation, the provisions of §§ 19.503 (a) (1) to 19.503 (a)-7, inclusive, and § 19.503 (b)-1, Regulations 103 shall, insofar as not inconsistent with the Convention, be applicable in the administration of the provisions of the Convention.

§ 7.34 *Adjustment of tax liability of Canadians for 1940 and prior years.* Article XIV (1) confers upon the Commissioner authority to adjust the tax liability

for 1935 and prior taxable years of non-resident aliens, residents of Canada, and Canadian corporations in any case in which such tax liability remained unpaid as at the date of the signing of the Convention, March 4, 1942. Such provision, however, will not apply in any case unless:

(1) The Commissioner is satisfied that the additional income tax involved did not arise by reason of fraud with intent to evade the tax on the part of the taxpayer concerned and

(2) The taxpayer files with the Commissioner a notarized statement showing for each year involved and for such other years as the Commissioner may require, (i) by items and classes of income the amounts of interest, dividends, rents, salaries, wages, premiums, annuities, compensations, remunerations, emoluments, or other fixed or determinable annual or periodical income, gains, profits and income derived from sources within the United States; (ii) the business transactions, if any, carried on in the United States by or in behalf of the taxpayer during each of such years and (iii) such further information as the Commissioner may require in the particular case.

In any case in which the Commissioner deems it appropriate to exercise the authority thus conferred, the resulting tax liability for any such year or years may not exceed the amount of the liability which would have been determined had the following been taken into effect for such year or years:

(1) The Revenue Act of 1936 as modified by the tax Convention between the United States and Canada, effective January 1, 1936, to April 29, 1941 but this does not apply in the case of a corporation organized under the laws of Canada, more than 50 percent of the outstanding voting stock of which was owned directly or indirectly throughout the last half of the taxable year by citizens or residents of the United States;

(2) Article XII of the Convention exempting from United States tax dividends and interest paid by a Canadian corporation to individual residents of Canada or to corporations organized under the laws of Canada; (see § 7.32 of these regulations) and

(3) Article XIII of the Convention exempting Canadian corporations from the tax imposed by the United States with respect to accumulated or undistributed earnings and profits, income or surplus (see § 7.33 of these regulations).

In any case in which the Commissioner has exercised his authority to apply the provisions of Article XIV (1) (a) of the Convention, the aggregate amount of interest and penalties cannot exceed 50 percent of the amount of the tax with respect to which such interest and penalties have been computed, if in such case the taxpayer was not engaged in trade or business within the United States and had no office or place of business therein during the taxable year involved.

Article XIV (b) of the Convention provides that the Federal income tax liability remaining unpaid as at March 4, 1942, the date of signature of the Convention, for taxable years beginning after December 31, 1935, and prior to January 1, 1941, in the case of any nonresident alien individual, a resident of Canada, or a Canadian corporation shall be determined under the United States internal revenue laws properly applicable thereto, except that Article XIII and Article XIII of the Convention shall be treated as being in effect for such years. (See §§ 7.32 and 7.33 of these regulations.) Since for such years the income tax laws properly applicable thereto are modified by the Tax Convention between the United States and Canada effective January 1, 1936, there exists no necessity to make application to the Commissioner for the adjustment of the tax liability for such years on such basis.

§ 7.35 *Credit against United States tax liability for income tax paid to Canada.* For the purpose of avoidance of double taxation Article XV provides that, on the part of the United States, there shall be allowed against the United States income and excess profits tax liability a credit for any such taxes paid to Canada by United States citizens or domestic corporations. Such principle also applies in the case of a citizen of Canada residing in the United States. Such credit, however, is subject to the limitations provided in section 131, Internal Revenue Code (relating to the credit for foreign taxes). See §§ 19.131-1 to 131-8, Regulations 103. The article is complementary to the provisions of Article XVII, which provides that the United States in ascertaining the income and excess profits tax of its citizens and residents and corporations may take into the basis upon which such taxes are imposed all items of income as though the Convention had not come into effect.

§ 7.36 *Reciprocal regulations.* Article XVIII contemplates that both the United States and Canada may prescribe regulations for the purpose of carrying the Convention into effect within the respective countries and reciprocal rules relating to the exchange of information and that in the formulation of such regulations and rules the Commissioner and the Minister may communicate with each other directly and outside diplomatic channels. See paragraph 4 of the Protocol of the Convention. As used in this Treasury Decision the term "Commissioner" means Commissioner of Internal Revenue or his duly authorized representative, and the term "Minister" means the Minister of National Revenue of Canada or his duly authorized representative. See § 7.24 of this Treasury Decision relating to allocation of income.

§ 7.37 *Reciprocal administrative assistance.* By Article XIX of the Convention, the United States and Canada

adopt the principle of exchange of information for use in the determination and assessment of the taxes with which the Convention is concerned. See § 7.36 of these regulations. Pursuant to such principle, every United States withholding agent shall make and file with the collector, in duplicate, an information return on Form 1042B, for the calendar year 1942 and each subsequent calendar year, in addition to withholding return, Form 1042, with respect to the items of income from which a tax of 15 percent was withheld from persons whose addresses are in Canada (5 percent in the case of dividends falling within the scope of paragraph 2 of Article XI of the Convention). There shall be reported on Form 1042B not only such items of income listed on Form 1042, but also such items of interest listed on monthly returns, Form 1012, including items of interest where the liability for withholding is only 2 percent.

The information and correspondence relative to exchange of information may be transmitted directly by the Commissioner to the Minister.

§ 7.38 *Information to be furnished in due course.* In accordance with the provisions of Article XX (1) of the Convention, the Commissioner shall forward to the Minister as soon as practicable after the close of the calendar year 1942 and of each calendar year thereafter during which the Convention is in effect the names and addresses of all persons whose addresses are within Canada and who derive from sources within the United States, dividends, interest, rents, royalties, salaries, wages, pensions, and annuities or other fixed or determinable annual or periodical profits and income, showing the amounts of such profits and income in the case of each addressee. For these purposes, the transmission to the Minister of Information Return, Form 1042B, as provided in § 7.37 of these regulations for the calendar year 1942 and subsequent calendar years shall constitute a compliance with the provisions of Article XX (1) of the Convention and of these regulations.

§ 7.39 *Information in specific cases.* Under the provisions of Article XXI of the Convention and upon request of the Minister, the Commissioner may furnish to the Minister any information available to, or obtainable by, the Commissioner under the revenue laws relative to the tax liability of any person (whether or not a citizen or resident of Canada) under the revenue laws of Canada.

§ 651.2 *Ordering Class IV-E registrants to report for final-type physical examination.* (a) When the order number of a registrant placed in Class IV-E has been reached under the circumstances set out in § 651.1, the local board shall prepare for each such man an Order to Report for Final-type Physical Examination (Form 48A) in duplicate. The local board shall mail the original to the registrant and shall file the copy in his Cover Sheet (Form 53).

(b) The time specified for reporting shall be at least 10 days after the date the order is mailed: *Provided, however,* if the registrant is quarantined because of a communicable disease, is sick, has some temporary ailment, is awaiting an operation, or when he has some other good and sufficient reason for being unable to appear, the local board may, after the Order to Report for Final-type Physical Examination (Form 48A) has been issued, postpone the date when any such registrant is to appear for final-type physical examination.

(c) The time of issuance and the date of expiration of any period of delay or postponement authorized in (b) above shall be noted in the "Remarks" column of the Classification Record (Form 100).

3. Amend § 651.3 to read as follows:

§ 651.3 *Separate Delivery List (Form 151) for Class IV-E registrants.* (a) Before the time set for Class IV-E registrants to report for final-type physical examination, the local board shall prepare a separate Delivery List (Form 151) for Class IV-E registrants, in triplicate, and stamp each such list at the top with the notation "IV-E." The local board shall make no entry in column 4 of this form.

(b) If a Class IV-E registrant fails to report as ordered, his absence shall be noted in column 3 of the Delivery List (Form 151) prepared for Class IV-E registrants before it is turned over to the leader of such registrants.

(c) If a Class IV-E registrant ordered to report for final-type physical examination has been transferred to another local board for final-type physical examination, his name shall nevertheless be carried on the Delivery List (Form 151) for Class IV-E registrants in the same manner as though he were being sent for final-type physical examination, but a notation shall be made in column 3 opposite his name stating that he was transferred to another local board for final-type physical examination and identifying the local board to which such man was transferred for final-type physical examination.

(d) If a Class IV-E registrant ordered to report for final-type physical examination has been transferred from another local board for final-type physical examination, his name shall appear on the Delivery List (Form 151) for Class IV-E registrants but a notation shall be made in column 3 opposite his name stating that he was transferred from another local board for final-type physical examination and identifying the local board from which such man was transferred for final-type physical examination.

4. Amend the regulations by adding a new section to be known as § 651.4 to read as follows:

§ 651.4 *Transportation requests and meal or lodging requests.* (a) Before the time set for Class IV-E registrants to report for final-type physical examination at the induction station, the local board, unless otherwise directed, shall prepare Government Requests for Transportation (Standard Form No. 1030) and Government Request for Meals or Lodgings for Civilian Registrants (Form 256) to cover the Class IV-E registrants' trip to the induction station and return to the local board.

(b) As a convenience to the leader of the Class IV-E registrants, the local board may exchange the prepared transportation requests for transportation tickets.

5. Amend the regulations by adding a new section to be known as § 651.5 to read as follows:

§ 651.5 *Records sent to induction station for Class IV-E registrants.* For each Class IV-E registrant ordered to report for final-type physical examination, the following papers shall be turned over to the leader of the Class IV-E registrants for delivery to the commanding officer of the induction station:

(1) The original and all three copies of the Report of Physical Examination and Induction (Form 221), which will be stamped by the local board with the notation "IV-E" at the top and immediately left of the block provided for the local board stamp and in the blank space provided for the registrant's name in item 79 (a); and

(2) Three copies of the Delivery List (Form 151) stamped by the local board at the top with the notation "IV-E."

6. Amend the regulations by adding a new section to be known as § 651.6 to read as follows:

§ 651.6 *Appointment of leader for Class IV-E registrants.* The local board shall designate one Class IV-E registrant to be the leader of the group of such registrants in the same manner as it selects a leader for selected men under the provisions of § 633.2.

7. Amend the regulations by adding a new section to be known as § 651.7 to read as follows:

§ 651.7 *Procedure for sending Class IV-E registrants to the induction station for final-type physical examination.* (a) At the time and place designated for the Class IV-E registrants to report for final-type physical examination, the local board shall:

(1) Call the roll of Class IV-E registrants.

(2) Read and issue the appointment of the leader of Class IV-E registrants.

(3) Turn over to the leader of Class IV-E registrants the transportation request or tickets and the meal and lodging requests to cover a trip to the induction station and return to the local board and records for final-type physical examination.

(4) Specifically order the Class IV-E registrants to obey their leader.

(5) Specifically order the Class IV-E registrants to report to the induction station and, after final-type physical examination, to return to the local board.

(b) Class IV-E registrants shall proceed to the induction station for their final-type physical examination along with the selected men who are being delivered to the induction station with the next call on the local board, but if there is no such delivery of men to fill a call at an early date, it shall deliver such Class IV-E registrants specially whenever the induction station is receiving men.

8. Amend the regulations by adding a new section to be known as § 651.8 to read as follows:

§ 651.8 *Final-type physical examination at induction station.* At the induction station, Class IV-E registrants will be given a final-type physical examination in the same manner as that conducted for selected men. Upon completion of the final-type physical examination, Class IV-E registrants will return to their local board under direction of their leader.

9. Amend the regulations by adding a new section to be known as § 651.9 to read as follows:

§ 651.9 *Records returned by induction station commander for Class IV-E registrants.* Each local board delivering Class IV-E registrants for final-type physical examination to an induction station will receive by mail from the induction station commander the following records: (1) The original and all copies of the Delivery List (Form 151) for Class IV-E registrants and (2) the original and all three copies of the Report of Physical Examination and Induction (Form 221). The local board will then forward to the State Director of Selective Service of its

State a copy of each Delivery List (Form 151) for Class IV-E registrants.

10. Amend the regulations by adding a new section to be known as § 651.10 to read as follows:

§ 651.10 *Action of local board following final-type physical examination of Class IV-E registrants.* (a) When the Report of Physical Examination and Induction (Form 221) indicates that a registrant in Class IV-E is physically and mentally qualified for service, such registrant will be assigned to and delivered for work of national importance under civilian direction in the manner provided in part 652. Until the registrant is forwarded for work of national importance under civilian direction, the original and all copies of the Report of Physical Examination and Induction (Form 221) of each such registrant will be retained by the local board in the registrant's Cover Sheet (Form 53).

(b) When the Report of Physical Examination and Induction (Form 221) indicates that a registrant in Class IV-E is physically, mentally, or otherwise disqualified for service, the local board shall reopen his classification and classify him in Class IV-F. The Surgeon General's Copy and the National Headquarters' Copy of the Report of Physical Examination and Induction (Form 221) of each such registrant will be forwarded to the State Director of Selective Service, who will forward both copies to the Director of Selective Service, and the Armed Forces' Original and the Local Board's Copy of the Report of Physical Examination and Induction (Form 221) will be filed in the registrant's Cover Sheet (Form 53).

11. Amend § 651.11 to read as follows:

§ 651.11 *Transferring Class IV-E registrants for final-type physical examination.* (a) When the local board determines that a Class IV-E registrant who has been ordered to report for final-type physical examination is so far from his local board as to make his return for such physical examination a hardship, it shall direct the registrant to be referred for final-type physical examination to the local board having jurisdiction of the area in which he is at the time located.

(b) When the local board of a registrant refers the registrant to another local board for final-type physical examination, it shall prepare, in triplicate, an Order Referring Registrant to Another Local Board for Physical Examination Only (Form 203) and shall indicate on the original and copies thereof that the registrant is being referred for final-type physical examination for registrants in Class IV-E and that such final-type physical examination shall be conducted in the manner provided in part 651. One copy of the Order Referring Registrant to Another Local Board for Physical Examination Only (Form 203), together with the original and three copies of the Report of Physical Examination and Induction (Form 221), shall be sent to the local board to which the registrant is referred for final-type physical examination only; one copy of the Order Referring Registrant to Another

Local Board for Physical Examination Only (Form 203) shall be sent to the registrant; and the third copy placed in the registrant's Cover Sheet (Form 53).

(c) The local board to which the registrant is referred for final-type physical examination only shall mail to the registrant an Order to Report for Final-type Physical Examination (Form 48A) and shall send a copy of such notice to the local board of the registrant. The local board of the registrant shall note the date of mailing of the Order to Report for Final-type Physical Examination (Form 48A) on the Classification Record (Form 100) in the same manner as if it had sent the Order to Report for Final-type Physical Examination (Form 48A) itself.

(d) The local board to which such man is transferred for final-type physical examination only shall proceed to send him to the induction station for such examination as soon as practicable. If possible, the transferred man shall be sent to the induction station for final-type physical examination along with the selected men who are being delivered to the induction station with the next call on the local board to which he has been transferred, but if there is no such delivery of men to fill a call at an early date, it shall deliver such transferred man specially whenever the induction station is receiving men.

12. Amend the regulations by deleting § 651.21 in its entirety.

13. Amend the regulations by deleting § 651.31 in its entirety.

14. The foregoing amendments to the Selective Service Regulations shall be effective February 1, 1943.

Chapter IX—War Production Board
Subchapter B—Director General for Operations
PART 1010—SUSPENSION ORDERS

[Suspension Order S-193]

PIONEER SUPPLY COMPANY

Pioneer Supply Company is the trade name under which D. Kaplan, Seattle, Washington, transacts business as a dealer and distributor of plumbing supplies. Between May 23 and September 25, 1942, the company made numerous sales and deliveries of new metal plumbing equipment and new metal heating equipment to ultimate consumers on orders which did not bear any preference ratings and did not contain the certification required by Limitation Order L-79. These sales and deliveries constituted willful violations of Limitation Order L-79.

From May 9 to August 14, 1942, the company applied preference ratings of A-10 under Preference Rating Order P-84 to numerous purchase orders for material. At the time that these preference ratings were applied, the company did not have A-10 rated orders from its customers to support such applications. The application of such ratings constituted willful violations of Preference Rating Order P-84 and misrepresentations to the War Production Board.

The foregoing violations of Limitation Order L-79 and Preference Rating Order P-84 have hampered and impeded the war effort of the United States by diverting scarce materials to uses unauthorized by the War Production Board. In view of the foregoing, *It is hereby ordered, That:*

§ 1010.193 *Suspension Order No. S-193.* (a) D. Kaplan, individually or doing business as Pioneer Supply Company or otherwise, is hereby prohibited from accepting deliveries of, receiving, delivering, selling, transferring, trading or dealing in any new metal plumbing equipment or new metal heating equipment as defined in Limitation Order L-79, except as specifically authorized in writing by the Regional Compliance Chief, San Francisco Regional Office, War Production Board.

(b) Nothing contained in this order shall be deemed to relieve D. Kaplan, individually or doing business as Pioneer Supply Company or otherwise, from any restriction, prohibition, or provision contained in any other order or regulation of the Director of Industry Operations or the Director General for Operations, except in so far as the same may be inconsistent with the provisions hereof.

(c) This order shall take effect on January 4, 1943, and shall expire on July 4, 1943, at which time the restrictions contained in this order shall be of no further effect.

PART 921—ALUMINUM SCRAP

[Supplemental Order M-1-d as Amended Jan. 1, 1943]

Whereas national defense requirements have created a shortage of aluminum; and

Whereas aluminum scrap of acceptable quality for reprocessing for use for defense purposes is not coming forward in sufficient volume, due, for the most part, to the fact that under prevailing practices the scrap generated in the course of industrial processes is not being appropriately segregated by alloy content; and

Whereas this can only be remedied by the institution, in all plants generating aluminum scrap, of effective scrap collection programs designed to effect such segregation; and

Whereas the restrictions and requirements relating to the use of aluminum hereinafter set forth are necessary to conserve the supply and direct the distribution thereof in the interest of national defense;

Now, therefore, it is ordered, That:

§ 921.6 *Supplementary Order M-1-d—*
(a) *Definitions.* For the purposes of this order:

(1) "Aluminum" means any material the principal individual ingredient of which by either weight or volume is metallic aluminum.

(2) "Scrap" means all materials or objects which are the waste or by-product of industrial fabrication, or which have been discarded on account of obsoles-

cence, failure or other reason, the principal ingredient of which by either weight or volume is metallic aluminum.

(3) "Plant scrap" means scrap which is generated in the course of manufacture and defective or rejected material, the principal metallic ingredient of which is aluminum; and shall also include all types and grades of aluminum residues, such as drosses, skimmings, fines, grindings, sawings, and buffings, provided that the recoverable metallic aluminum content, as determined by the fire assay, hydrogen evolution or other method of comparable efficiency, constitutes 15 per cent or more by weight of such residues.

(4) "Segregated scrap" means scrap which has been segregated and otherwise handled in such manner as to be acceptable for reprocessing into aluminum of the original specifications, without the necessity for other than routine examination by the processor.

(5) "Mixed scrap" means all scrap other than segregated scrap.

(6) "Person" means any individual, partnership, association, business trust, corporation, governmental corporation or agency, or any organized group of persons, whether incorporated or not.

(7) "Producer" means the Aluminum Company of America, the Reynolds Metals Company and any other person who may be so designated by the Director General for Operations.

(8) "Approved smelter" means any person whose name appears on Schedule A attached to this order, as the same may be amended from time to time by the Director General for Operations.

(9) "Dealer" means any person regularly engaged in the business of buying and selling scrap.

(b) *Contamination.* No person shall contaminate scrap or other aluminum with any other metal or material unless specifically authorized by the Director General for Operations, whether by allocation of aluminum for the purpose or otherwise. The foregoing provision shall not prevent a producer or approved smelter from mixing aluminum with other metals in the production of aluminum alloys.

(c) *Restrictions on use of scrap.* No person other than a producer or approved smelter may melt, reprocess, smelt or otherwise use aluminum scrap unless specifically authorized by the Director General for Operations: *Provided, however,* That a person who in normal course of operations melts aluminum scrap in fabricating aluminum products may use his plant scrap in the plant in which it is generated in the production of those products (and only those products) for which he is currently obtaining allocations of aluminum from the Director General for Operations if in applying for such allocations he shall have reduced his requirements by a reasonable amount in anticipation of the amount of recoverable plant scrap.

(d) *Segregation of plant scrap.* (1) After March 1, 1942, no person who at any one plant generates 1,000 pounds, or more, of aluminum scrap per month may sell or otherwise dispose of any scrap generated in such plant unless he is carrying out the Aluminum Scrap

Segregation Program set forth as Schedule B attached to this order and made a part hereof.

(2) The Director General for Operations may at any time terminate the right of a plant to dispose of aluminum scrap if he is not satisfied with the manner in which such segregation program is being carried out.

(e) *Sale of plant scrap.* Unless specifically authorized by the Director General for Operations, no person generating plant scrap may sell or deliver any such scrap that he is not entitled to use in accordance with paragraph (c), except as follows:

(1) *17S, 24S, and 52S solids.* Segregated scrap consisting of 17S, 24S, and 52S aluminum alloys in solid form, respectively, shall be sold and shipped directly to a producer: *Provided, however,* That where the amount of such scrap of any one alloy specification does not amount to 5,000 pounds or more per month, it may be sold to a producer, approved smelter, or dealer.

(2) *Other scrap.* All other segregated scrap and all mixed scrap shall be sold to a producer, approved smelter, or dealer.

(f) *All other scrap.* No person who owns or originates any scrap, (other than a person generating plant scrap or a dealer) may sell or deliver such scrap except to a producer, approved smelter or dealer; he shall not use or dispose of such scrap in any other way.

(g) *Dealer's operations.* No dealer may sell or deliver any scrap or other aluminum owned or accumulated by him except to a producer or approved smelter, and shall not use or dispose of such scrap or other aluminum except by such a sale: *Provided, however,* That he may sell any scrap to another dealer if, in the regular course of business, he does not currently collect sufficient scrap to make it practicable for him to sell directly to a producer or an approved smelter.

(h) *Certification upon sale of segregated scrap.* The maker of segregated scrap shall furnish the buyer with a signed document showing (i) the alloy number or specification, (ii) form of scrap, (iii) weight (on a clean and dry basis), and (iv) the name and address of the plant where generated. This document shall bear a notation as to the date of sale and the names and addresses of the parties to the transaction, and, in case of resale of such scrap, shall be similarly endorsed and transferred by the seller. The seller of segregated scrap shall see that it is clearly marked showing the alloy number or specification and source. No scrap other than segregated scrap shall be so designated by any person.

(i) *Tolling prohibited.* Except as the Director General for Operations may specifically authorize, no scrap shall be delivered for processing or returned under any toll, repurchase, or similar arrangement.

(j) *No acquisition or delivery in violation of order.* No person shall after January 7, 1942 acquire or deliver aluminum scrap or products made therefrom if he has reason to believe such material has

been or is to be used in violation of the terms of this or of any other order of the Director General for Operations: *Provided,* That for any purpose permitted by this order, any producer or approved smelter may freely acquire aluminum scrap at any time, irrespective of the status under this order of the person disposing of the same.

(k) *Record and reports.* Each person who participates in any transaction to which this order applies (except an individual originating scrap other than plant scrap) shall keep and preserve for at least two years complete and accurate records as to all transactions in scrap, which shall be subject to inspection by the War Production Board. Each such person shall file such reports and questionnaires as the Director General for Operations may require.

(l) *Specific authorizations.* Where this order calls for specific authorization by the Director General for Operations, an allocation or other written authorization to carry out the particular action proposed is required; and preference rating orders or certificates do not constitute such specific authorization.

(m) *Revocation.* Supplementary Order M-1-c, all serially numbered orders of Preference Rating Order No. P-12, and all authorizations and directions issued pursuant thereto are hereby terminated, effective January 7, 1942, except that the following, if operative immediately prior to January 7, 1942, shall constitute valid authorization hereunder:

(1) Any approval issued by the Director General for Operations subsequent to October 31, 1941, of any toll arrangement;

(2) Any approval on the basis of a Form PD-1 application issued by the Director General for Operations subsequent to September 30, 1941; and

(3) Insofar as concerns scrap which is in transit as of January 7, 1942, any other applicable authorization from the Director General for Operations issued prior to January 7, 1942.

(n) *Effective date.* This order shall continue in effect until revoked by the Director General for Operations.

SCHEDULE B—ALUMINUM SCRAP SEGREGATION PROGRAM

I. Segregation by alloy content and form—
(1) *By alloy content.* Scrap of each individual alloy (for example 17S, 24S, 52S, 112, 64S, etc., also 2S pure aluminum) shall be segregated from scrap of other alloys.

Exception. In any division of a plant devoted to any one phase of operations, no more than the three most important alloys need be segregated.

[NOTE: Scrap from coated material (Alclad or Pureclad sheet) may be included with uncoated material of the same alloy specification; but scrap from painted material shall not be included with unpainted material of the same alloy specification except in very minor amounts.]

(2) *By form.* In addition to the above segregation on the basis of alloy content, the scrap of each alloy shall be segregated into two form types:

(i) "Solids"—generated by shearing, clipping, cutting, blanking, or similar process, also defective or rejected wrought aluminum parts, defective or rejected castings and gates, sprues, risers or similar foundry scrap;

(ii) "Machinings"—generated by machining, drilling, boring, turning, milling or like operations.

In no event shall solids and machinings be combined.

[NOTE: Grindings, sawings or other fines, drosses, skimmings and sweepings need not be segregated as to alloy specification but shall be treated as mixed scrap as provided below.]

II. Mixed scrap. All scrap which is not required to be segregated as to alloy content as above provided, or which cannot be identified as to alloy content, shall be classified as mixed scrap. However, mixed scrap consisting of (i) drosses and skimmings, (ii) solids, and (iii) machinings shall be handled separately from each other and from all other mixed scrap.

III. General provisions—(1) *Official responsible for handling scrap.* Each person operating a plant shall appoint a responsible employee to supervise the collection, segregation and handling of all scrap generated in

the plant. The name of such employee shall be forwarded to the Aluminum and Magnesium Division, War Production Board, Washington, D. C. All such functions shall be performed by employees in the plant acting under direction of such supervisory employee. No dealer or other person not a regular employee of the plant shall perform any such functions except as the Director General for Operations may specifically authorize.

(2) *Collection and identification.* Segregation shall be effected by collection at the machine where the scrap is generated. Separate containers for collection and bins for storage shall be provided for scrap of each alloy as distinct from other alloys, and also for the solid scrap and for the machining scrap of the same alloy. All containers and bins shall be clearly marked to identify the alloy and the form of scrap for which they are intended, and they shall be kept clean, dry and in good condition, so that their contents shall be protected from contamination and the weather. Each container and bin shall be used only as a receptacle for the alloy and form of scrap for which it is designated and marked.

(3) *Identification of segregated scrap for shipment.* Each unit of segregated scrap shall, upon shipment, be clearly marked or labelled as to alloy specification, form, and source, i. e., the plant where generated.

(4) *Obligation as regards subcontractors.* Each person operating a plant, as part of his arrangement with any subcontractor to whom he furnishes aluminum, shall impose an obligation upon, and otherwise make every effort to see to it that, such subcontractor institutes and carries out an adequate scrap collection and segregation program.

PART 934—LEAD

[General Preference Order M-33 as Amended Jan. 1, 1943]

Whereas the national defense requirements have created a shortage of lead (as hereinafter defined) domestically produced, and there exists an uncertainty as to future shipments from abroad, for defense, for private account, and for export and it is necessary, in the public interest and to promote the defense of the United States, to conserve the supply and direct the distribution thereof;

Now, therefore, it is hereby ordered, That:

§ 934.1 *General preference order M-33—(a) Definitions.* For the purposes of this order:

(1) "Lead" means and includes lead metal produced from domestic ores and from imported ores, which has been refined by any recognized method, in all forms and shapes current in the trade; antimonial lead, and lead metal produced from scrap, excluding, however, metal in the hands of any manufacturer, produced by him either in his own plant or on toll from any lead-bearing material and mill residue originating in his own plant or returned to him by his customers in the usual course of business from material purchased from the manufacturer.

(2) "Refiner" means any person who produces lead as hereinbefore defined, from ores or scrap by any process in grades suitable for fabrication; and also includes any person who has such lead produced for him under toll agreement.

(3) "Dealer" means any person who procures lead either by importing or from domestic sources for resale without change in form, whether or not such person receives title to or physical delivery of the material, and includes selling agents, warehousemen, and brokers.

(b) *Regulations incorporated.* Except as modified by the terms of this order and as otherwise specifically provided herein, all of the provisions and definitions of Priorities Regulation No. 1, issued by the Director of Priorities on August 27, 1941 (Part 944), as amended from time to time, are hereby included as a part of this order with the same effect as if specifically set forth herein.

(c) *Directions as to deliveries by refiners and dealers—*(1) *Delivery schedules.* Each refiner and dealer shall file with the Director General for Operations, War Production Board, not later than the 20th day of the month next preceding the month during which any delivery of lead is to be made, and in such form or forms as may be from time to time prescribed by said Director, a schedule of his proposed shipments of lead for the ensuing month, including thereon such information as may be required by the instructions accompanying such form.

(2) *Withheld deliveries; Allocations.* Beginning October 1, 1941, each refiner shall set aside from his production of lead during each calendar month (in-

cluding therein lead produced for him by others under toll agreement and excluding lead produced by him for others under toll agreement) a quantity to be determined and specified from time to time by the Director General for Operations and to be delivered only upon express direction of the Director General for Operations. Any amount so set aside shall be excluded from the refiner's schedule of proposed shipments filed under the provisions of paragraph (c) (1) above. The Director General for Operations will from time to time allocate deliveries of lead to be made by refiners from the quantities withheld under the provisions of this paragraph. In shipping the balance of his production, each refiner must give preference to defense orders as required by the provisions of Priorities Regulation No. 1, and must be governed by preference ratings assigned to particular contracts or purchase orders: *Provided*, That a refiner may satisfy in full his commitments to any one customer during any calendar month up to, but not exceeding, one minimum carload lot.

(3) *Allocation of lead from Metals Reserve Company's supply.* Hereinafter all lead released by the Metals Reserve Company will be allocated by the Director General for Operations.

(4) *Basis of allocations and directions.* Any allocations or directions by the Director General for Operations pursuant to the provisions of paragraphs (c) (2) and (3) above will be made primarily to insure satisfaction of all defense requirements of the United States, both direct and indirect, and they may be made in the discretion of the Director General for Operations without regard to any preference ratings assigned to particular contracts or purchase orders. The Director General for Operations may also take into consideration the possible dislocation of labor, and the necessity of keeping a plant in operation so that it may be able to fulfill defense orders and essential civilian requirements.

(5) *Allotment of purchase orders.* The Director General for Operations may in his discretion require any person seeking to place a purchase order for lead to be delivered by a refiner or dealer to place the same with one or more particular refiners or dealers.

(d) *Assignment of preference rating.* Deliveries of lead, alloys of which lead is an essential component, and manufactured products made of lead or of such alloys under all defense orders, to which a preference rating of A-10 or higher has not been assigned are hereby assigned a preference rating of A-10.

(e) *Directions as to deliveries of lead alloys and lead products.* Until further order by the Director General for Operations, deliveries by any person of alloys containing lead as an essential component and of manufactured products made of lead or such alloys may be made subject only to the provisions of Regulation No. 1 of the Division of Priorities and to the provisions of any other order or direction issued by the Director General for Operations affecting any other ma-

terial used with lead in the manufacture or processing of such alloys or products.

(f) *Violations.* Any person affected by this order, who violates any of its provisions, or a provision of any other order, directive, or regulation issued by the Director General for Operations, may be prohibited by the Director from making or receiving further deliveries of lead, or of any other material subject to allocation, or he may be subjected to any other or further action as the Director may deem appropriate.

(g) *This order shall continue in effect until revoked.*

PART 1053—FATS AND OILS

[General Preference Order M-71, as Amended
Jan. 1, 1943]

§ 1053.1 *General Preference Order M-71—(a) Definitions.* (1) "Fats and oils" means all the raw, crude, refined and pressed fats and oils, whether vegetable, animal, fish or other marine animal, their by-products and derivatives, including grease (lard) oil, sulfonated and similarly processed fats and oils, fatty acids, and lard and rendered pork fat, but not including cocoa butter, butter, wool greases, essential oils, tall oil, mineral oils, and vitamin-bearing oils derived from fish or other marine animal livers or viscera.

(2) "Manufacturer" means any person who uses any fats or oils in the manufacture of any finished product, and shall include all other persons directly controlling or controlled by such person and all persons under direct or indirect common control with such person. The term shall not include any crusher, renderer, refiner or other processor except as and to the extent that his operations result in the production of a finished product, and shall also not include any person who uses fats, and oils in the home in the preparation of food for household consumption.

(3) The "inventory" of a manufacturer at any time shall include all fats and oils held or controlled by him and all fats and oils purchased by him for future delivery.

(4) "Finished product" means any product of a manufacturer produced for sale as his finished product and carried on his books as his finished product. Except for the purposes of paragraph (d) hereof, "finished product" shall not include: (i) grease (lard) oil; (ii) sulfonated or similarly processed fat or oil; (iii) fatty acids; (iv) lard or rendered pork fat; (v) any fat or oil product intended for sale to another manufacturer

for further processing in the manufacture of, or for inclusion in, any product (excepting a product falling within paragraph (a) (4) (vi) hereof); (vi) any edible product of which a fat or oil is not the principal ingredient; (vii) any edible product produced by any hotel or restaurant for consumption on the premises; (viii) any medicinal preparation other than medicated soap.

(5) "Crusher" means any person who presses, expels, or extracts oils from any seed, bean, nut or corn or other oil-bearing materials.

(6) "Implements of war" means combat end-products, complete for tactical operations (including, but not limited to, aircraft, ammunition, armaments, weapons, merchant and naval ships, tanks and vehicles) and any parts, assemblies, and material to be incorporated in any of the foregoing items. This term does not include facilities or equipment used to manufacture the foregoing items.

(7) "Soap" means the product commonly known by that term excluding, however, soap used for non-detergent purposes (including the processing of textiles).

(b) *Restrictions on manufacture.* (1) [Revoked Nov. 24, 1942.]

(2) No manufacturer, except as provided in paragraph (b) (6) hereof, shall in any calendar quarter beginning with the last quarter of 1942, use or consume any fat or oil in any class of use listed in Schedule A annexed hereto in a quantity in excess of the percentage specified in such Schedule A of his average quarterly use or consumption of fats and oils in such class of use during the corresponding quarters of the two years, 1940 and 1941.

(3) If any manufacturer shall not in any quarter use or consume the quantity of fat or oil permitted by paragraph (b) (2) hereof, the unused part of his quota for such quarter shall for the purposes of such paragraph (b) (2) be carried forward and added to his permitted quota for the succeeding quarters: *Provided*, however, That any unused part of his permitted quota for any prior quarter shall not be carried forward beyond June 30, 1943 and beyond the 30th day of June of each year thereafter.

(4) For the purpose of determining the quantity of raw "foots" which may be used or consumed, use or consumption shall be calculated on the basis of total fatty acid content.

(5) The restrictions on fats and oils hereby imposed are imposed with respect to fats and oils in the aggregate, and such restrictions are not to be construed to limit a manufacturer to the same fat or oil used or consumed by him in the base period.

(6) Nothing in paragraph (b) (2) hereof shall restrict:

(i) The use of fats and oils in any period or quarter by any manufacturer whose aggregate use or consumption of fats and oils in such period is less than 6,000 lbs.;

(ii) The use of fats and oils in the manufacture of any edible product delivered or to be delivered to the Army or Navy of the United States, or delivered or to be delivered pursuant to the Act of

March 11, 1941, entitled "An Act to Promote the Defense of the United States" (Lend-Lease Act), or the processing of fats and oils for delivery to another manufacturer for use in the manufacture of any such edible product: *Provided, however*, That this paragraph shall not exempt the use of fats and oils by any person other than the person having the prime contract with the Army or Navy or with the administrator of such Lend-Lease Act, unless the Quartermaster General of the Army or the Chief of the Bureau of Supplies and Accounts of the Navy, or the administrator of the Agricultural Marketing Administration (as the procurement agency for the administrator of such Lend-Lease Act), or the duly authorized representative of any of them, shall have issued to the manufacturer (whether prime contractor or subcontractor) who uses the fat or oil in the manufacture of the edible product contracted for, a certificate setting forth that such product is for direct Army or Navy issue or for delivery pursuant to such Lend-Lease Act and that the manufacture of such product will require a stated quantity of fats or oils, and designating the supplier or suppliers of such fats or oils to be exempted under the terms of this paragraph of this order.

(iii) The use of fats and oils in the manufacture of soap, including soap made from foets derived from domestic vegetable oils or their fatty acids, where such soap is delivered to the Army or Navy of the United States by the manufacturer or is delivered by such manufacturer, as a prime contractor, pursuant to such Lend-Lease Act.

(iv) The use of fats and oils in the manufacture, preparation or finishing of implements of war.

(v) The use of fats and oils in the manufacture of products to be exported by the manufacturer (a) to the Dominion of Canada where such Dominion has granted a license for the import of such products, or (b) to any other country pursuant to any export license issued by the Board of Economic Warfare.

(7) For the purposes of determining a manufacturer's permissible use or consumption under paragraph (b) (2) hereof, there shall be excluded from the quarter during which use or consumption is hereby limited, any fat or oil used in the manufacture of the products referred to in subdivisions (ii), (iii), (iv) and (v), of paragraph (b) (6) hereof, and there shall be excluded from the base period any fat or oil used by such manufacturer in such base period in the manufacture of any edible product or soap delivered by him to the Army or Navy of the United States or delivered by him, as a prime contractor, pursuant to such Lend-Lease Act, or exported to the Dominion of Canada or to any other country, and there also shall be excluded from such base period any fat or oil used in the manufacture, preparation or finishing of implements of war.

(8) A person who acquires all the manufacturing facilities of another per-

son in a particular class of use shall thereby become entitled to the quota of such other person in such class of use, whether or not he continues to operate such facilities in whole or in part: *Provided, however*, That he shall within 30 days following such acquisition inform the Director General for Operations of the facilities acquired, their location, whether or not operation will be continued in the same or another location, and the amount of quota which he claims to have acquired in each class of use.

(9) Fats and oils processed by a person pursuant to toll agreement shall be chargeable not to the quota of the processor but to the quota of the owner of such fats and oils: *Provided*, That title to the product shall remain in the hands of the owner of the fats and oils and that such owner shall market, invoice and collect for such product through his own organization.

(10) Each manufacturer of soap may in any quarter substitute in whole or in part for the fats and oils (other than foets made from domestic vegetable oils or their fatty acids) which he would be entitled to use under Schedule A in such manufacture, foets made from domestic vegetable oils or their fatty acids, the quantity of such foets or their fatty acids which may be used or consumed to be 150% of the base period use of fats and oils.

(c) *Restrictions on deliveries of linseed oil.* (1) No person engaged in the business of selling linseed oil at wholesale (whether crushed or processed by him or purchased for resale) shall deliver in the aggregate to persons other than manufacturers during any calendar quarter, beginning with the fourth quarter of 1942, more linseed oil (whether raw or processed) than 70% of the average quarterly amount of linseed oil so delivered by him during the corresponding quarters of the two years, 1940 and 1941.

(2) In reducing deliveries pursuant to paragraph (c) (1) hereof, no person shall make discriminatory cuts as between customers, whether new or old.

(3) This order shall not restrict the delivery by any person of linseed oil to the Army or Navy of the United States or pursuant to such Lend-Lease Act, and any amount so delivered by him shall be excluded both from the base period on which his quota is based and from the period or quarter during which future deliveries are hereby limited.

(d) *Restrictions on processing and inventories.* (1) No manufacturer shall hereafter change the condition of any fat or oil in his raw materials inventory, or add any additional materials thereto, except to the extent necessary to store any such fat or oil in his raw materials inventory in a form necessary to prevent deterioration thereof, or except to put such fats or oils into process for the manufacture of his finished products subject to the limitations of paragraph (d) (2). Nothing contained in this paragraph shall be construed to limit

the amount of fats and oils which may be held by any manufacturer in his raw materials inventory.

(2) No manufacturer shall hereafter increase the rate at which fats and oils are put into process by him, except to the extent necessary to meet the required deliveries of his finished products within the limitations established by this order, and to maintain only a practicable minimum working inventory of such finished products. The term "practicable minimum working inventory" is to be strictly construed. The mere fact that the turn-over has increased, or that materials are difficult to obtain, does not justify maintaining inventories above the minimum at which his operations can be continued.

(e) *Reports.* Every manufacturer and every other person affected by this order shall file such reports giving such information at such times and upon such form or forms as the Director General for Operations may from time to time prescribe.

(f) *Reports.* (1) Each manufacturer, who in any quarter commencing with the last quarter of the year 1942, uses or consumes more than 6,000 lbs. of fats and oils in the aggregate, shall file with the Bureau of Census, Washington, D. C., each of the following reports in the following manner:

(i) He shall file on or before the 15th day of each month of the succeeding quarter, Form BM 1 showing the consumption of fats and oils during the preceding month.

(ii) He shall file on or before the 15th day of the first month of the succeeding quarter, Form BM 2 showing the consumption of fats and oils during the preceding quarter.

(2) Every manufacturer and every other person affected by this order shall file such other reports at such times upon such form or forms as the Director General for Operations may from time to time prescribe.

NOTE: Paragraphs (g) and (h) were formerly designated (f) and (g).

(g) *Effect of other orders.* Insofar as any other order of the Director of Priorities, the Director of Industry Operations or the Director General for Operations, heretofore or hereafter issued, limits or curtails to a greater extent than herein provided the use, acquisition or disposition of any fat or oil, the limitations of such other order shall control.

(h) *Miscellaneous provisions.*—(1) *Applicability of priorities regulations.* This order and all transactions affected hereby are subject to all applicable provisions of War Production Board priorities regulations, as amended from time to time.

(2) *Appeals.* Any person affected by this order who considers that compliance therewith would work an exceptional and unreasonable hardship upon him,

whether because of the absence of use during the two-year base period, or otherwise, or that it would result in a degree of unemployment which would be unreasonably disproportionate compared with the amount of fats or oils conserved, or that compliance with this order would disrupt or impair a program of conversion from nondefense to defense work, may appeal to the Director General for Operations by addressing a letter to this War Production Board, Chemicals Division, Washington, D. C., Ref: M-71, setting forth the pertinent facts and the reasons he considers that he is entitled to relief. The Director General for Operations may thereupon take such action as he deems appropriate.

(3) *Violations.* Any person who willfully violates any provisions of this order or who in connection with this order willfully conceals a material fact or furnishes false information to any department or agency of the United States, is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using material under priority control and may be deprived of priorities assistance.

(4) *Communications to War Production Board.* All reports required to be filed hereunder, and all communications concerning this order, shall unless otherwise directed, be addressed to: War Production Board, Chemicals Division, Washington, D. C., Ref: M-71.

PART 1056—NATURAL GAS

[Limitation Order L-31, as Amended Jan. 1, 1943]

Whereas because of increased gas requirements for war production and civilian uses, and because of scarcity of materials for the construction of pipe lines and other facilities, shortages of natural gas have occurred in certain areas of the United States and are threatened in others; and

Whereas during periods of adverse weather conditions, the demand for natural gas in many areas will increase beyond the capacity of existing facilities to meet such demand; and

Whereas the limitations upon deliveries of natural gas and the integration of gas system operations hereinafter ordered are necessary in order to maintain gas deliveries to war industries and essential civilian services;

Now, therefore, it is ordered, That:

§ 1056.1 *General Limitation Order L-31—(a) Definitions.* For the purposes of this order:

(1) "Person" means any individual, partnership, association, business trust, corporation, governmental corporation or agency, or any organized group of persons whether incorporated or not.

(2) "Natural gas" means natural gas and mixtures of natural and manufactured gas.

(3) "Utility" means any person supplying natural gas, directly or indirectly, for general use by the public or supplying manufactured gas to a natural gas distribution system serving the general public.

(4) "Non-utility supplier" means any person who owns or operates natural or manufactured gas production or transmission facilities and who is not included in the definition of utility in paragraph (a) (3): *Provided*, That no person engaged in the production, refining or processing of petroleum or natural gas shall be considered or treated as a "non-utility supplier," except as such person's activities relate to the disposition of natural gas after such production, refining or processing.

(5) "Consumer" means any ultimate user of gas produced, transmitted, or distributed by any utility or by any non-utility supplier which is interconnected with any utility.

(6) "Standby facilities" means equipment in serviceable operating condition designed to use oil, electricity, coal or other fuel to replace natural gas, and for the operation of which a supply of such fuel is obtainable.

(7) "Space-heating equipment" means equipment used for the purpose of raising atmospheric temperature in any building or portion thereof.

(8) "Central space-heating equipment" means all space-heating equip-

ment intended by reason of its size, type, or location to heat more than one room.

(b) *Integration of gas system operation.* (1) Each utility shall as far as practicable so operate its gas manufacturing transmission, storage, and distribution facilities as to achieve maximum deliverability of natural gas in the area or areas in which a shortage exists or is imminent and to conserve existing gas reserves, and no utility shall abandon any such facilities except upon specific authorization from the Director General for Operations. Where necessary for such purposes, the Director General for Operations may, from time to time, issue specific directions as to the operation of gas manufacturing, transmission, storage and distribution facilities.

(2) Each utility shall maintain in operating condition all gas manufacturing facilities owned or operated by such utility which are in operating condition on November 12, 1942. Each utility shall repair and maintain in operating condition such other gas manufacturing facilities owned or operated by such utility as the Director General for Operations may, from time to time, direct. Where the repair and maintenance of gas manufacturing facilities requires the use of materials in excess of those available under any order issued by the War Production Board, application for authority to use or acquire such materials shall be made to the Director General for Operations in accordance with established procedures.

(3) The Director General for Operations may, from time to time, issue specific directions respecting the delivery of natural gas from one utility to another and the interconnection of utility facilities, and no utility shall deliver or accept, or fail to deliver or accept, deliveries of gas in violation of any such directions. Subject to such directions and to the provisions of paragraph (b) (4) each utility shall so interchange natural gas with other interconnected utilities as to achieve, directly or indirectly, the maximum deliverability in any area or areas in which a shortage exists or is imminent.

(4) No utility shall deliver natural gas to any utility system not theretofore regularly supplied by such utility (except emergency deliveries to relieve a shortage resulting from the failure or breakdown of gas production, transmission, or distribution facilities), without specific approval of the Director General for Operations. Any utility making such emergency deliveries shall report promptly to the War Production Board, Power Division, Ref: L-31, the nature of the emergency and the amount and duration of such deliveries.

(5) Each utility shall, as soon as practicable, make an investigation of the type, amount, and availability of any natural or manufactured gas production facilities owned or operated by any non-utility supplier located in or near its operating area, whether or not interconnected with such utility, and shall report to the War Production Board by January

1, 1943, such integration measures (including measures for interconnections and the interchange of gas of any type) as may be possible to meet or to anticipate shortages of natural gas. The Director General for Operations will, where necessary to accomplish the purposes of this order, issue specific directions to utilities and non-utility suppliers as to the integration of gas production facilities. Where such integration requires the use of materials in excess of those available under any priority order issued by the Director General for Operations, application for authority to use or to acquire such materials shall be made to the Director General for Operations in accordance with established procedures.

(6) Each non-utility supplier in any area served by any utility with which such non-utility supplier is interconnected, shall, upon notice from the Director General for Operations, so order its operations as to make available for delivery to such utility all natural or manufactured gas which it is capable of producing or supplying and which is not essential for its own operations, unless the Director General for Operations shall, upon application, determine that such gas, because of differences in heat value or chemical composition, cannot practicably be mixed with the gas supplied by such utility. Such non-utility supplier shall also make available for delivery to such utility further quantities of gas in accordance with directions of the Director General for Operations.

(c) *Operation during gas shortages.*

(1) In the event of a gas shortage in any area, each utility supplying such area shall operate its standby gas manufacturing facilities and shall reduce deliveries to consumers in accordance with the following schedule and with such further directions as the Director General for Operations may, from time to time, issue: *Provided*, That to the extent, if any, required by the emergency nature of the shortage, such utility may in the first instance reduce deliveries without regard to such schedule, but shall as soon as possible thereafter readjust its operations and deliveries to conform in all respects to such schedule during the continuance of the gas shortage.

(i) First, the utility shall, within the limits of its contractual rights, reduce deliveries to all consumers purchasing natural gas under contracts permitting the supplier to interrupt deliveries: *Provided*, That deliveries of gas necessary for the maintenance of the war production and essential civilian services listed in Exhibit A, as the same may be amended from time to time, shall be reduced only to the extent that the fuel requirements for such production and services can be supplied from the consumer's standby facilities.

(ii) Second, the utility shall, to the extent necessary, so operate its standby manufacturing facilities as to achieve maximum output of gas in the shortage area. Any utility may request the Director General for Operations to direct the operation of any consumer's standby

facilities under paragraph (c) (1) (iii) prior to the operation of such utility's standby manufacturing facilities. Such request will be granted only if the Director General for Operations determines that the operation of consumer standby facilities prior to operation of utility standby manufacturing facilities would relieve the gas shortage more expeditiously or with less use of critical fuels, or would otherwise aid in relieving the gas shortage.

(iii) Third, the utility shall, without regard to its contractual rights or those of any consumer, reduce deliveries to all consumers who have standby facilities to the extent to which the operation of such facilities will directly or indirectly alleviate the shortage of natural gas in the area.

(iv) Fourth, the utility shall, to the extent necessary, reduce deliveries, insofar as practicable on a uniform proportionate basis, to all commercial and industrial consumers except to the extent that such deliveries are necessary for the maintenance of the war production and essential civilian services listed in Exhibit A or to prevent permanent damage to the production facilities of such consumers.

(v) If, after effectuating the reduction in deliveries of gas required by or pursuant to the foregoing provisions of this paragraph, it becomes necessary to curtail deliveries of gas for the maintenance of the war production and essential civilian services listed in Exhibit A, as the same may be amended from time to time, the utility shall insofar as practicable reduce such deliveries on a uniform proportionate basis.

(vi) Notwithstanding any other provision of this order, if the Director General for Operations, after investigation, shall determine that any consumer having standby facilities has failed to provide himself with an adequate supply of fuel for the operation of such standby facilities despite the availability of such fuel, the Director General for Operations may prohibit deliveries of gas to, and acceptances of gas by, such consumer to the extent that his requirements of gas could have been decreased through the operation of such standby facilities.

(2) The Director General for Operations may issue such directions with respect to reductions in deliveries to residential consumers as may be necessary to alleviate gas shortages.

(3) Whenever pursuant to paragraphs (c) (1) or (c) (2) above or any direction issued thereunder, any utility is obliged to reduce deliveries to any consumer, such utility shall so inform such consumer, who shall, upon such notification, reduce his acceptance of deliveries of natural gas in accordance with such notification.

(4) Whenever any utility reduces deliveries of gas to any consumer pursuant to paragraph (c) (1) of this order, such utility shall immediately notify the Power Division of the War Production

Board, Ref: L-31, by telegram of the extent of such reductions.

(5) Following each such shortage period, each affected utility shall submit a detailed report of the quantities of gas conserved by the operation of standby facilities and the duration of curtailment and the extent to which each commercial and industrial consumer was curtailed. Such report shall be filed on Form PD 203.

(d) *Restrictions on deliveries of natural gas applicable prior to November 30, 1942.* (1) No utility shall deliver natural gas to any non-residential consumer in Areas I, II, III, IV, or V listed in Exhibit B for the operation of any new gas-fired equipment unless such deliveries were commenced in Area I prior to February 27, 1942, in Area II prior to March 20, 1942, in Area III prior to May 15, 1942, in Area IV prior to August 10, 1942, or in Area V prior to September 15, 1942, or unless:

(i) Such non-residential consumer shall have installed, prior to the date of such deliveries, standby facilities of sufficient capacity to replace such deliveries of such gas during period of shutoff, or

(ii) Such non-residential consumer cannot reasonably use any fuel other than natural gas because of technical utilization factors or process requirements, or

(iii) Such deliveries shall have been specifically approved in advance by the Director General for Operations.

(2) No utility shall deliver, and no consumer shall accept delivery of, natural gas in Areas I, II, III, IV or V listed in Exhibit B for either of the following purposes:

(i) For the operation of central space heating equipment (or heating equipment supplying the major portion of the heating requirements of the premises) unless such equipment was installed in Area I prior to March 1, 1942, in Area II prior to March 20, 1942, in Area III prior to May 15, 1942, in Area IV prior to August 10, 1942, or in Area V prior to September 15, 1942, or unless, in the case of new construction, the equipment was specified in the construction contract and the foundation under the main part of the structure in which the equipment is to be installed was completed in Area I prior to March 1, 1942, in Area II prior to March 20, 1942, in Area III prior to May 15, 1942, in Area IV prior to August 10, 1942, or in Area V prior to September 15, 1942; or

(ii) For the operation of central space heating equipment (or heating equipment supplying the major portion of the heating requirements of the premises), which has been converted from other fuel to natural gas unless such conversion has been completed in Area I prior to February 20, 1942, in Area II prior to March 20, 1942, in Area III prior to May 15, 1942, in Area IV prior to August 10, 1942, or in Area V prior to September 15, 1942.

(e) *Restrictions on deliveries of gas applicable on and after November 30, 1942.* (1) On or after November 30, 1942, no utility shall deliver to any non-

residential consumer, and no such consumer shall accept delivery of natural gas for the operation of any gas-fired equipment (including space-heating equipment) unless:

(i) Such equipment was installed (or if converted from some other fuel to natural gas, such conversion was completed) prior to November 30, 1942 at the same premises: *Provided*, That deliveries of natural gas for the operation thereof were not prohibited prior to that date by the provisions of paragraph (d) of this order, or

(ii) Such equipment replaces similar type gas-fired equipment of equal or greater capacity previously installed or operated by the same consumer at the same premises for the same purposes, or

(iii) Such deliveries have been specifically approved by the Director General for Operations.

(2) On or after November 30, 1942, no utility shall deliver to any residential consumer and no such consumer shall accept delivery of natural gas for the operation of any space-heating equipment unless:

(i) Such equipment was installed (or if converted from some other fuel to natural gas, such conversion was completed) at the same premises prior to November 30, 1942: *Provided*, That deliveries of natural gas for the operation of such equipment were not prohibited prior to that date by the provisions of paragraph (d) of this order, or

(ii) In the case of new construction in any area listed in Exhibit B, such equipment was specified in the construction contract and was installed prior to March 1, 1943, and the foundation under the main part of the structure in which the equipment is to be installed was completed in Area I prior to March 1, 1942, in Area II prior to March 20, 1942, in Area III prior to May 15, 1942, in Area IV prior to August 10, 1942, in Area V prior to September 15, 1942, or in Area VI prior to November 30, 1942, or

(iii) Such equipment replaces gas-fired equipment of equal or greater capacity previously installed or operated at the same premises whether by the same or by another consumer: *Provided*, That nothing contained in this subparagraph shall authorize the delivery of gas for the operation of central space-heating equipment which replaces non-central space-heating equipment or central space-heating equipment of a different type, or

(iv) Such deliveries have been specifically approved by the Director General for Operations. *Provided*, That deliveries of natural gas may be made to residential consumers in those areas not listed in Exhibit B for the operation of any space-heating equipment.

(3) On or after November 30, 1942, no person shall install or cause to be installed gas-fired equipment designed to receive deliveries of natural gas from any utility if such deliveries are prohibited by this paragraph (e).

(4) Applications by all consumers for exemption from the space-heating restrictions of this order shall be made on

Form PD 673. Applications by non-residential consumers for exemption from the restrictions on deliveries for non-space heating purposes shall be made on Form PD-672.

(5) If the Director General for Operations, after investigation, shall determine:

(i) That the gas-fired equipment owned or operated by any person can, without unreasonable expense or hardship to such person, be converted to the use of, or be replaced by equipment using, a less critical fuel of which a supply is available, and

(ii) That such conversion or replacement will contribute to the alleviation of actual or prospective gas shortages, or to the maintenance of gas deliveries to war producers or essential civilian services,

the Director General for Operations may, upon sufficient notice to permit such conversion or replacement, prohibit further deliveries or acceptances of natural gas for the operation of such gas-fired equipment.

(f) *Applications to Director General for Operations.* (1) Any person who considers that any reduction in or prohibition of deliveries of natural gas made or proposed to be made pursuant to paragraphs (c), (d), or (e), or any direction issued thereunder, interferes or will interfere materially with war production or the operation of an essential civilian service, may apply for relief to the Director General for Operations, who may grant such specific exemptions or take such other action as may be consistent with the purposes of this order. Such application shall state the nature of the war materials being manufactured or the nature of the service, the extent to which such production or service has been or may be curtailed because of the reduction in or prohibition of deliveries of gas, and the amount of increase in deliveries of gas required for restoration of full production or service.

(2) Any utility which considers that the supply of natural gas available on any utility system or portion thereof is sufficient to take care of all existing and estimated future requirements of war industry and unrestricted civilian use, may apply for exemption of the system or any portion thereof from the provisions of paragraphs (d) or (e), or both, of this order or of any direction issued pursuant thereto to the Director General for Operations, who may grant such exemptions or take such other action as may be consistent with the purposes of this order.

(g) *Appeal.* Any person affected by this order who considers that compliance therewith would work an exceptional and unreasonable hardship on him may appeal for relief to the Director General for Operations, who may grant such specific exemptions or take such other action as may be consistent with the purposes of this order.

(h) *Reports and information.* (1) Each utility shall keep and preserve for not less than two years accurate and complete records concerning deliveries of natural gas to consumers. Such records shall be subject to inspection by duly authorized representatives of the War Production Board.

(2) All persons affected by this order shall execute and file with the War Production Board such reports and questionnaires as said Board shall, from time to time, request.

(i) *Communications to War Production Board.* All reports required to be filed hereunder, and all communications concerning this order, shall, unless otherwise directed, be addressed to: War Production Board, Power Division, Washington, D. C., Ref: L-31.

(j) *Violations.* Any person who willfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States, is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making, or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

Any person affected by this order who considers that compliance therewith would work an exceptional and unreasonable hardship upon him, or that it would result in a degree of unemployment which would be unreasonably disproportionate compared with the amount of dyestuffs conserved, or that compliance with this order would disrupt or impair a program of conversion from nondefense to defense work, may appeal to the War Production Board by letter or telegraph, Reference M-103, setting forth the pertinent facts and the reason he considers he is entitled to relief. The Director General for Operations may thereupon take such action as he deems appropriate.

[General Limitation Order L-97, as Amended Jan. 1, 1943]

Section 1188.1 *General Limitation Order L-97* is hereby amended to read as follows:

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of locomotives for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 1188.1 *General Limitation Order L-97*—(a) *Applicability of priorities regulations.* This order and all transactions affected thereby are subject to all applicable provisions of the priorities regulations of the War Production Board, as amended from time to time.

(b) *Definitions.* For the purpose of this order:

(1) "Person" means any individual, partnership, association, business trust, corporation, governmental corporation or agency, or any organized group of persons, whether incorporated or not.

(2) "Locomotives" means all types of new or used locomotives, including but not limited to steam, electric, diesel, diesel-electric, gasoline, and gasoline-electric locomotives. This definition does not include locomotives used underground in such places as coal, metal, gypsum or salt mines or other locomotives of less than 20 tons which are used by mining companies in mining operations.

(3) "Producer" means any person engaged in the production of new locomotives; or in the repairing, rebuilding, redesigning, or otherwise processing of used locomotives.

(4) "Produce" means to produce new locomotives; or to repair, rebuild, redesign or otherwise process used locomotives for the purpose of sale or resale. This definition does not include the repairing, rebuilding, redesigning or otherwise processing of used locomotives by or for the owner thereof.

(c) *Restrictions on production and delivery of locomotives.* Irrespective of the terms of any contract of sale or purchase or of any other commitment, no producer shall produce or deliver any locomotives except as authorized pursuant to the provisions of paragraphs (d), (e), and (f) hereof.

(d) *Production and delivery schedules.* (1) Each producer shall schedule, or re-schedule, if necessary) his production and make deliveries of locomotives in accordance with such specific directions as may be issued from time to time by the Director General for Operations.

(2) The production and delivery schedules established by any specific direction issued pursuant to paragraph (d) (1) above shall be maintained without regard to any preference ratings already assigned or hereafter assigned to particular contracts, commitments, or purchase orders and without regard to production schedules in effect on the effective date of this order, and may be altered only upon specific direction of the Director General for Operations.

(3) If it becomes impossible for any producer to maintain production and delivery of locomotives in accordance with any such schedule, he shall immediately notify the Director General for Operations, and, unless otherwise directed by the Director General for Operations, he shall continue to produce and deliver locomotives in the order set forth in such schedule and shall postpone production and delivery of any such locomotives only to the extent required by the circumstances causing his failure to maintain production and delivery as required by such schedule.

(e) *Prohibition of transfer of used locomotives.* Except as provided in paragraph (f) hereof, no person shall sell, lease, trade, lend, deliver, ship or transfer any used locomotive, and no person shall accept any such sale, lease, trade, loan, delivery, shipment or transfer of any used locomotive.

(f) *Exceptions from prohibition of transfer of used locomotives.* Nothing in paragraphs (c), (d) or (e) hereof shall be construed to prevent:

(1) Any sale, lease, trade, loan, delivery, shipment or transfer of any used locomotive which has been specifically authorized by the Director General for Operations pursuant to an application filed upon Form PD-747; or

(2) Railroads from selling, leasing, trading, loaning, delivering, shipping or transferring used locomotives to other railroads; or

(3) The redelivery (to the owner) of any used locomotive which has been repaired, rebuilt, redesigned or otherwise processed for such owner; or

(4) Any person from transferring title to a locomotive which has been delivered pursuant to the terms of a conditional sale, chattel mortgage sale, bailment lease or similar installment contract entered into prior to the issuance date of this order, or from retaking, reposessing or obtaining redelivery of any such locomotive upon default, breach or other contingency under the terms of a conditional sale, chattel mortgage sale, bailment lease or similar installment contract entered into prior to such date.

(g) *Restriction on dismantling or scrapping.* Except upon specific authorization of the Director General for Operations, application for which may be filed upon Form PD-747, no person shall dismantle or scrap any locomotive.

(h) *Records.* All persons affected by this order shall keep and preserve for not less than two years accurate and complete records concerning inventories, production, sale or disposal of locomotives, which records shall be available for audit and inspection by duly authorized representatives of the War Production Board.

PART 3039—MANUFACTURED GAS [Limitation Order L-174 as Amended January 1, 1943]

ORDER CURTAILING CONSUMPTION OF MANUFACTURED GAS

Whereas because of increased manufactured gas requirements for war production and civilian uses, because of scarcity of materials for the construction and operation of manufactured gas plants, mains and other facilities, and because of shortages of transportation facilities to haul fuel and materials used in the production of manufactured gas, shortages of manufactured gas have occurred in certain areas of the United States and are threatened in others; and

Whereas during periods of adverse weather conditions, the demand for manufactured gas in many areas may increase beyond the capacity for existing facilities to meet such demand; and

Whereas the limitations upon deliveries of manufactured gas hereinafter

ordered are necessary in order to maintain deliveries of manufactured gas to war industries and essential civilian services;

Now, therefore, it is ordered:

§ 3039.1 *General Limitation Order L-174—(a) Definitions.* For the purposes of this order: (1) "Person" means any individual, partnership, association, business trust, corporation, governmental corporation or agency, or any organized group of persons whether incorporated or not.

(2) "Utility" means any person in the United States engaged in producing, transmitting or supplying manufactured gas directly or indirectly for general use by the public. Any system supplying natural or mixed natural and manufactured gas is not subject to this order but is subject to the provisions of Limitation Order L-31.

(3) "Non-utility producer" means any person who owns or operates any gas production or transmission facilities and who is not included in the definition of "utility" in paragraph (a) (2).

(4) "Consumer" means any ultimate user of manufactured gas produced, transmitted or distributed by any utility or by any non-utility producer which is interconnected with any utility.

(5) "Manufactured gas" means any combustible gas produced by any manufacturing process (other than liquefied petroleum gas unmixed with any gas produced by any other manufacturing process).

(6) "Standby facilities" means equipment designed to use a fuel other than fuel oil to replace manufactured gas, and for the operation of which a supply of such fuel is obtainable.

(7) "Space heating equipment" means equipment used for the purpose of raising atmospheric temperature in any building or portion thereof.

(b) *Gas system operations.* (1) Each utility shall so operate its gas manufacturing, transmission, storage, distribution, and other facilities, as to achieve so far as practicable the maximum output of gas in any area in which a shortage of manufactured gas exists or is imminent. Where necessary for the above purposes, the Director General for Operations will from time to time issue directions as to the operation of gas manufacturing, transmission, storage, distribution or other facilities, and as to deliveries of gas.

(2) Each utility shall, as soon as practicable, make an investigation of the type, amount, and availability of any manufactured gas production facilities owned or operated by any non-utility producer located in or near its operating area, whether or not interconnected with such utility, and shall make such arrangements (including arrangements for interconnections where feasible) as can be made by means of voluntary agreement among the parties and as may be necessary or advisable to meet or to anticipate shortages of manufactured gas. Where such arrangements require the use of materials in excess of those available under any priority order issued by the

Director General for Operations, application for authority to use or to acquire such materials shall be made to the Director General for Operations in accordance with established procedures. In any case in which efforts to complete voluntary arrangements fail, the utility shall report the fact to the Director General for Operations, setting forth all pertinent information. The Director General for Operations will, where necessary to accomplish the purposes of this order, issue specific directions to utilities and non-utility producers as to the integration of manufactured gas facilities.

(3) Upon notice from the Director General for Operations to any non-utility producer that a gas shortage exists or is imminent in any area served by any utility with which such non-utility producer is interconnected, such non-utility producer shall so order its operations as to make available for delivery to such utility all manufactured gas which it is capable of producing or supplying and which is not essential for its own operations, unless the Director General for Operations shall, upon application, determine that such gas, because of differences in heat value or chemical composition, cannot practicably be mixed with the gas supplied by such utility. It shall also make available for delivery to such utility further quantities of gas in accordance with directions of the Director General for Operations.

(c) *Limitations on deliveries of manufactured gas.* (1) In the event of a gas shortage in any area, each utility supplying such area shall reduce deliveries to consumers in accordance with the following schedule and with such further directions as the Director General for Operations may, from time to time, issue: *Provided*, That to the extent, if any, required by the emergency nature of the shortage, such utility may in the first instance reduce deliveries without regard to such schedules, but shall as soon as possible thereafter readjust its operations and deliveries to conform in all respects to such schedule during the continuance of the gas shortage.

(i) First, the utility shall, within the limits of its contractual rights, reduce deliveries to all consumers purchasing manufactured gas under contracts permitting the supplier to interrupt deliveries: *Provided*, That deliveries of gas necessary for the maintenance of the war production and essential civilian services listed in Exhibit A, as the same may be amended from time to time, shall be reduced only to the extent that the fuel requirements for such production and services can be supplied from the consumer's standby facilities.

(ii) Second, the utility shall without regard to its contractual rights or those of any consumer, reduce deliveries to all consumers who have standby facilities to the extent to which the operation of such facilities can directly or indirectly alleviate the shortage of manufactured gas in the area.

(iii) Third, the utility shall to the extent necessary, reduce deliveries to all commercial and industrial consumers except to the extent that such deliveries

are necessary for the maintenance of the war production and essential civilian service listed in Exhibit A or to prevent permanent damage to the production facilities of such consumers. Such reductions shall be made insofar as practicable on a uniform proportionate basis.

(iv) Fourth, if after effectuating the reduction in deliveries of gas required by or pursuant to the foregoing provisions of this paragraph, it becomes necessary to curtail deliveries of gas for the maintenance of the war production and essential civilian service listed in Exhibit A, the utility shall insofar as practicable reduce such deliveries on a uniform proportionate basis.

(v) Notwithstanding any other provision of this order, if the Director General for Operations, after investigation, shall determine that any consumer having standby facilities has failed to provide himself with an adequate supply of fuel for the operation of such standby facilities despite the availability of such fuel, the Director General for Operations, may prohibit deliveries of gas to, and acceptances of gas by, such consumer to the extent that his requirements of gas could have been decreased through the operation of such standby facilities.

(2) The Director General for Operations may issue such directions with respect to reductions in deliveries to residential consumers as may be necessary to alleviate gas shortages.

(3) The Director General for Operations may require any utility to file a specific curtailment schedule listing consumers proposed to be curtailed and the order of their curtailment during gas shortages and may issue such directions with respect thereto as may be necessary to assure compliance with the provisions of this paragraph (c).

(4) Whenever, pursuant to paragraph (c) (1) or (c) (2) above or any directions issued thereunder, any utility is obliged to reduce deliveries to any consumer, such utility shall so inform each consumer to be curtailed, and each such consumer shall, upon such notification, reduce his acceptance of deliveries of manufactured gas in accordance with such notification.

(5) Whenever any utility finds it necessary to reduce deliveries, pursuant to this paragraph (c), such utility shall immediately notify the Power Division of the War Production Board, Ref.: L-174, of such curtailment by telegram. Following each such curtailment, the utility shall submit to the Power Division a detailed report of the duration of curtailment and the extent to which deliveries to such consumers were curtailed. Such report shall be filed on Form PD-628.

(d) *Restrictions upon deliveries to consumers other than domestic consumers.* No utility shall deliver manufactured gas to any consumer, other than a domestic consumer, for the operation of any gas-fired equipment (including space-heating equipment) which was not installed (or if converted from some other

fuel, such conversion was not completed) at the same premises prior to September 1, 1942, unless:

(1) Such equipment is non-space heating equipment and has an aggregate input capacity of less than 150 cubic feet per hour.

(2) Such equipment replaces similar type gas-fired equipment of equal or greater capacity previously installed or operated by the same consumer at the same premises for the same purposes, or

(3) Such deliveries are specifically approved in advance by the Director General for Operations. Any consumer or utility which considers that such deliveries are necessary for war production or the operation of an essential civilian service may apply for such approval to the Director General for Operations.

No person shall install gas-fired equipment designed to receive deliveries of manufactured gas from any utility if such deliveries are prohibited by this paragraph.

(e) Restrictions upon deliveries to domestic consumers for space heating. Except where otherwise directed by the Director General for Operations, no utility shall deliver to any domestic consumer and no such consumer shall accept deliveries of manufactured gas for the operation of any space-heating equipment unless such equipment:

(1) Was installed (or if converted from some other fuel to manufactured gas, such conversion was completed) at the same premises prior to September 1, 1942, or

(2) Replaces similar type space-heating equipment of equal or greater capacity previously installed or operated at the same premises whether by the same or by another consumer, or

(3) Was installed prior to November 15, 1942, in a new building, and such equipment was specified in the construction contract, and the foundation under the main part of the structure in which the equipment is to be installed was completed prior to September 1, 1942.

No person shall install space-heating equipment designed to receive deliveries of manufactured gas from any utility if such deliveries are prohibited by this paragraph.

(e-1) Restrictions upon deliveries when conversion to less critical fuels has been ordered. If the Director General for Operations, after investigation, shall determine:

(1) That the gas-fired equipment owned or operated by any person can, without unreasonable expense or hardship to such person, be converted to the use of, or be replaced by equipment using, a less critical fuel of which a supply is available, and

(2) That such conversion or replacement will contribute to the alleviation of actual or prospective gas shortages, or to the maintenance of gas deliveries to war producers or essential civilian services,

the Director General for Operations may upon sufficient notice to permit such conversion or replacement, prohibit further deliveries or acceptances of manufactured gas for the operation of such gas-fired equipment.

(f) Applications to Director General for Operations. (1) Any person who considers that any reduction in or prohibition of deliveries of manufactured gas made or proposed to be made pursuant to paragraphs (c) (1) or (e), or any direction issued thereunder interferes or will interfere materially with war production or the operation of an essential civilian service, may apply for relief to the Director General for Operations who may grant such specific exemptions or take such other action as may be consistent with the purposes of this order. Such application shall state the nature of the war materials being manufactured or the nature of the service, the extent to which such production or service has been or may be curtailed because of reduced delivery of manufactured gas or inability to use gas for space heating, and the increase in deliveries of manufactured gas required for restoration of full production or service.

(2) Any utility which considers that the capacity of its gas manufacturing equipment and the supply of fuel oil, coal, coke or other fuel available for gas manufacturing are sufficient to take care of all existing and estimated future requirements of war industry and unrestricted civilian use, may apply for exemption of the system or any portion thereof from the provisions of this order or any direction issued hereunder to the Director General for Operations who may grant such exemptions or take such other action as may be consistent with the purposes of this order.

(3) Applications by all consumers for exemption from the space-heating restrictions of this order shall be made on Form PD-673. Applications by non-residential consumers for exemption from the restrictions on deliveries for non-space heating purposes shall be made on Form PD-672.

(g) Appeal. Any person affected by this order who considers that compliance therewith would work an exceptional and unreasonable hardship on him may appeal for relief to the Director General for Operations who may grant such specific exemptions or take such other action as may be consistent with the purposes of this order.

(h) Violations. Any person who willfully violates any provision of this order or any direction of the Director General for Operations issued hereunder, or who willfully furnishes false information to the Director General for Operations in connection with this order, is guilty of a crime and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from obtaining deliveries of manufactured gas or from making or obtaining further deliveries of, or from processing or using, other material under priority

control and may be deprived of priorities assistance by the Director General for Operations.

(i) Reports and information. (1) Each utility shall keep and preserve for not less than two years accurate and complete records concerning deliveries of manufactured gas to consumers.

(2) Such records shall be subject to inspection by duly authorized representatives of the War Production Board.

(3) All persons affected by this order shall execute, and file with the War Production Board such reports and questionnaires as said Board shall, from time to time, request.

(j) Communications to War Production Board. All reports required to be filed hereunder, and all communications concerning this order, shall, unless otherwise directed, be addressed to Power Division, War Production Board, Washington, D. C. Ref: L-174.

PART 3141—MILITARY ARMS

[Limitation Order L-230, as Amended Jan. 1, 1943]

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of military arms

and of steel scrap for defense, for private account and for export; and the following order is deemed necessary and appropriate in the war interest and to promote the national defense:

§ 3141.1 *Limitation Order L-230—(a) Definitions.* For the purpose of this order:

(1) "Military arms" means any cannon, machine gun, grenade, bomb, or other weapon using explosives, and any ammunition therefor, but does not include any pistol, rifle, or shotgun (except such as are machine guns as defined in paragraph (a) (2)) or ammunition therefor.

(2) "Machine gun" means any weapon which will fire more than one round without renewing pressure on the trigger or other firing device.

(3) "Non-operating" means in such condition that it cannot be used for the purpose for which it was originally made whether by reason of obsolescence, absence of necessary parts or explosive charge, accidental or intended damage or for any other reason.

(b) *Prohibited deliveries of military arms.* Notwithstanding any existing contract, payment or other action, no person shall hereafter sell, transfer or deliver, and no person shall accept delivery of, any military arms, whether operating or non-operating, or parts therefor, except as provided in paragraph (c).

(c) *Permitted deliveries.* The restrictions in paragraph (b) shall not apply to the following sales, transfers or deliveries:

(1) Sales, transfers or deliveries to or by any department or agency of the United States or of any State or political subdivision thereof or any person acting for the account of any such department or agency.

(2) Sales, transfers or deliveries for export if such export is covered by an export license previously issued by the appropriate agency or department of the United States Government.

(3) Sales, transfers or deliveries of non-operating military arms or parts for any military arms to any scrap dealer, when sold, transferred or delivered as scrap.

(4) Sales, transfers or deliveries of non-operating military arms or parts for any military arms by any scrap dealer, when sold, transferred or delivered as scrap to any person regularly engaged in the business of melting scrap.

(5) Sales, transfers or deliveries made with the specific authorization of the Director General for Operations.

(d) *Reports.* (1) Except as provided in paragraph (d) (2) hereof, any person making any delivery pursuant to paragraph (c) (3) or (c) (4) hereof shall at the time of such delivery report to the War Production Board a detailed description of the property delivered and the person to whom such delivery was made.

(2) Any person who, while engaged in the manufacture of military arms or

parts thereof, produces any such parts which are discarded as unfit for use, shall report monthly at the end of each month to the War Production Board, the name and address of all scrap dealers to whom such parts are sold, transferred or delivered, but shall not be required to report a detailed description of such parts unless required by the Director General for Operations. A scrap dealer who delivers any parts to a person regularly engaged in the business of melting scrap shall not be required to report the delivery of such parts unless so instructed by the Director General for Operations.

(3) Any person making delivery pursuant to paragraph (c) shall make such other reports as may be from time to time required by the Director General for Operations.

(e) *Records.* All persons affected by this order shall keep and preserve for not less than two years accurate and complete records concerning inventories, sales, transfers and deliveries of military arms.

(f) *Communications to War Production Board.* All reports required to be filed hereunder and all communications concerning this order shall be addressed to: War Production Board, Bureau of Governmental Requirements, Washington, D. C., Ref: L-230.

(g) *Violations.* Any person who willfully violates any provision of this order or who, in connection with this order, willfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

PART 1010—SUSPENSION ORDERS

[Suspension Order S-194]

SMILE BEVERAGE CO.

Smile Beverage Company is a business solely owned and operated by Isadore Christ, in Charleston, South Carolina, engaged in bottling non-alcoholic beverages, and is subject to the quota provisions of Conservation Order M-104. During the months of June, July, August and September, 1942, the Company used approximately fifteen hundred fifty

(1550) closures made of tinplate, terneplate, or blackplate in excess of its permissible quota under Conservation Order M-104. Isadore Christ was not fully familiar with the terms of Conservation Order M-104, but knew that such an Order existed, and that it restricted his permitted consumption of metal closures. His failure to ascertain the restrictions placed upon his business was grossly negligent, and the resulting over-use of closures thus constituted a willful violation of Conservation Order M-104.

This violation of Conservation Order M-104 has impeded and hampered the War effort by diverting scarce material to uses unauthorized by the War Production Board. In view of the foregoing facts, *It is hereby ordered, That:*

§ 1010.194 *Suspension Order S-194.*
(a) During each of the months from January, 1943 through May, 1943 both inclusive, the number of closures made of tinplate, terneplate, or blackplate, which may be processed, consumed, or used by Isadore Christ, individually, or doing business as the Smile Beverage Company or otherwise under the terms of Conservation Order M-104, shall be reduced by the amount of one hundred fifty (150) gross.

(b) During each of the months of June, 1943 to September, 1943, both inclusive, the amount of closures made from tinplate, terneplate, or blackplate, which may be processed, consumed, or used by Isadore Christ, individually, or doing business as the Smile Beverage Company or otherwise under the terms of Conservation Order M-104, shall be reduced by the amount of two hundred (200) gross.

(c) Nothing contained in this Order shall be deemed to relieve Isadore Christ, individually, or doing business as the Smile Beverage Company, his or its successors or assigns, from any restriction, prohibition, or provision of any Order or Regulation of the Director of Industry Operations, except insofar as the same may be inconsistent with the provisions hereof.

(d) This Order shall take effect on January 1, 1943, and shall expire September 30, 1943.

(P.D. Reg. 1, as amended, 6 F.R. 6680; W.P.B. Reg. 1, 7 F.R. 561; E.O. 9024, 7 F.R. 329; E.O. 9040, 7 F.R. 527; E.O. 9125, 7 F.R. 2719; sec. 2 (a), Pub. Law 671, 76th Cong., as amended by Pub. Laws 89 and 507, 77th Cong.)

Issued this 1st day of January 1943.

PART 1010—SUSPENSION ORDERS

[Suspension Order S-197]

ANGELES APPAREL CO.

Angeles Apparel Company, Los Angeles, California, is a manufacturer of feminine lounging robes and housecoats. From July 23 to October 5, 1942, the Company put into process 8,173 yards of

cloth for the manufacture of 2,137 women's lounging robes having a sweep measurement which exceeded the maximum measurements permissible under General Limitation Order L-118. The Company was fully aware of the restrictions contained in that Order but acted on an unjustifiable interpretation thereof. The Company's actions constituted willful violations of General Limitation Order L-118 which have hampered and impeded the war effort of the United States. In view of the foregoing, *It is hereby ordered, That:*

§ 1010.197 *Suspension Order S-197.*

(a) Angeles Apparel Company, its successors and assigns, shall not sell or deliver any of the garments manufactured by it in violation of General Limitation Order L-118 unless such garments are altered to conform to the maximum measurements prescribed in General Limitation Order L-118.

(b) For a period of three months from the effective date of this Order, Angeles Apparel Company, its successors and assigns, shall not put into process or cause to be put into process by others for its account any cloth for the manufacture of feminine lounging wear as defined in General Limitation Order L-118, except as specifically authorized by the Director General for Operations.

(c) Nothing contained in this Order shall be deemed to relieve Angeles Apparel Company from any restriction, prohibition, or provision contained in any other order or regulation of the Director of Industry Operations or the Director General for Operations, except in so far as the same may be inconsistent with the provisions hereof.

(d) This Order shall take effect on January 5, 1943.

(P.D. Reg. 1, as amended, 6 F.R. 6680; W.P.B. Reg. 1, 7 F.R. 561; E.O. 9024, 7 F.R. 329; E.O. 9040, 7 F.R. 527; E.O. 9125, 7 F.R. 2719; sec. 2 (a), Pub. Law 671, 76th Cong., as amended by Pub. Laws 89 and 507, 77th Cong.)

Issued this 1st day of January 1943.

PART 1010—SUSPENSION ORDERS

[Suspension Order S-199]

ARIZONA WHOLESALE ELECTRIC CO.

M. R. Craft and Mrs. M. R. Craft, doing business as Arizona Wholesale Electric Company, Phoenix, Arizona, are engaged in the business of distributing electrical supplies as a wholesaler. They operate a warehouse, as defined in General Preference Order M-9-a.

From February 7, 1942, to May 6, 1942, M. R. Craft and Mrs. M. R. Craft, doing business as Arizona Wholesale Electric Company, accepted and filled wholesale orders for 105,926 feet of copper wire, having a value of \$3,725.93, which did not bear a preference rating of A-10 or higher. From May 7, 1942, to July 14, 1942, they accepted and filled wholesale

orders for 51,662 feet of copper wire, having a value of \$1,254.03, which did not bear preference ratings of A-1-k or higher. These acts constituted willful violations of General Preference Order M-9-a, as amended on February 6, 1942, and May 7, 1942.

From January 20, 1942, to June 23, 1942, M. R. Craft and Mrs. M. R. Craft, doing business as Arizona Wholesale Electric Company, applied preference ratings of A-10 under Preference Rating Order P-100 to certain purchase orders for 52,806 feet of wire, 10,058 feet of conduit, and thirty-one other items of electrical supplies, certifying that such materials were for maintenance, repair or operating supplies, whereas said materials were not for maintenance, repair or operating supplies, as defined in Preference Rating Order P-100 and the Company did not have rated orders from its customers to support its use of these ratings. The use of such preference ratings constituted improper applications and over-extensions of preference ratings under Preference Rating Order P-100, and misrepresentations to the War Production Board, in violation of Preference Rating Order P-100.

These violations of General Preference Order M-9-a and Preference Rating Order P-100 have hampered and impeded the war effort of the United States by diverting scarce material to uses not authorized by the War Production Board. In view of the foregoing facts, *It is hereby ordered, That:*

§ 1010.199 *Suspension Order S-199.*

(a) Deliveries of material, directly or indirectly, to M. R. Craft and Mrs. M. R. Craft, doing business as Arizona Wholesale Electric Company or otherwise, their successors and assigns, shall not be accorded priority over deliveries under any other contract or order and no preference ratings shall be assigned or applied to such deliveries by means of Preference Rating Certificates, Preference Rating Orders, General Preference Orders or any other orders or regulations of the Director of Industry Operations or the Director General for Operations, except as specifically authorized by the Director General for Operations.

(b) No allocations shall be made, directly or indirectly, to M. R. Craft and Mrs. M. R. Craft, doing business as Arizona Wholesale Electric Company or otherwise, their successors and assigns, of any material the supply or distribution of which is governed by any order of the Director of Industry Operations or the Director General for Operations, except as specifically authorized by the Director General for Operations.

(c) Nothing contained in this Order shall be deemed to relieve M. R. Craft and Mrs. M. R. Craft, doing business as Arizona Wholesale Electric Company or otherwise, or their successors and assigns, from any restriction, prohibition, or provision contained in any other order or regulation of the Director of Industry Operations or the Director General for Operations, except in so far as the same may be inconsistent with the provisions hereof.

(d) This Order shall take effect on January 5, 1943, and shall expire on July 5, 1943, at which time the restrictions contained in this Order shall be of no further effect.

(P.D. Reg. 1, as amended, 6 F.R. 6680; W.P.B. Reg. 1, 7 F.R. 561; E.O. 9024, 7 F.R. 329; E.O. 9040, 7 F.R. 527; E.O. 9125, 7 F.R. 2719; sec. 2 (a), Pub. Laws 671, 76th Cong., as amended by Pub. Laws 89 and 507, 77th Cong.)

Issued this 1st day of January 1943.

Director General for Operations.

PART 1010—SUSPENSION ORDERS

[Suspension Order S-200]

SUPERIOR COACH CORP.

Superior Coach Corporation, Goshen, Indiana, is a manufacturer of house trailers. John Drexler is president of the Company and Donald R. Farr is Secretary-treasurer.

By a letter from the Director of Priorities, dated January 21, 1942, the Company was authorized to buy 90 tires and tubes to be used solely by it to transport trailers from its plant to eligible purchasers and which tires were to be then removed from the trailers and retained by the Company. Pursuant to this authorization, the Company bought 90 tires, 82 of which were used as authorized. Of the other eight, however, four were placed on Mr. Drexler's personal automobile and four on Mr. Farr's personal automobile. This use of the eight tires by the Company constituted a wilful violation of Priorities Regulation No. 1 and of the directions contained in the letter of January 21, 1942, which has hampered and impeded the war effort of the United States. In view of the foregoing, *It is hereby ordered*, That:

§ 1010.200 *Suspension Order S-200.*

(a) Deliveries of material to Superior Coach Corporation, its successors and assigns, shall not be accorded priority over deliveries under any other contract or order and no preference ratings shall be assigned or applied to such deliveries to Superior Coach Corporation by means of preference rating certificates, preference rating orders, general preference orders, or any other orders or regulations of the Director of Industry Operations or the Director General for Operations, except as specifically authorized by the Regional Compliance Chief, Chicago Regional Office, War Production Board.

(b) No allocation shall be made to Superior Coach Corporation, its successors and assigns, of any material the supply or distribution of which is governed by any order of the Director of Industry Operations or the Director General for Operations, except as specifically authorized by the Director General for Operations.

PART 1010—SUSPENSION ORDERS

[Suspension Order S-201]

SOUTHERN STOVE WORKS, INC.

Southern Stove Works, Inc. is a Virginia corporation doing business at Sixth and Dinwiddie Avenue, Richmond, Virginia, and is engaged in the manufacture of various types of heating equipment. From September 1, 1942 to October 8, 1942 the Company put into process approximately 320,000 pounds of iron to make 4,520 portable iron fireplace grates or parts thereof. All but approximately 600 grates were assembled and all but approximately 670 of the assembled grates were sold during that period. Although the Company was aware on or about September 1, 1942 that portable iron fireplace grates such as it manufactured were considered to be items of "fireplace equipment" whose manufacture, assembly and sale were prohibited by General Conservation Order M-126, and although General Conservation Order M-126 on September 3, 1942 specifically included fireplace grates on its list of prohibited items, the Company greatly accelerated its rate of production of these grates during the month of September 1942 and especially during the first week in October 1942. These acts of the Company constituted wilful violations of General Conservation Order M-126.

These violations of General Conservation Order M-126 committed by Southern Stove Works, Inc., have hampered and impeded the war effort of the United States by diverting iron to uses unauthorized by the War Production Board. In view of the foregoing, *It is hereby ordered*, That:

§ 1010.201 *Suspension Order S-201.*

(a) From March 1, 1943 to May 31, 1943 deliveries of materials to Southern Stove Works, Inc., its successors and assigns, shall not be accorded priority over deliveries under any other contract or order and no preference rating shall be assigned or applied to such deliveries by means of preference rating certificates, preference rating orders, general preference orders, or any other order or regulation of the Director of Industry

Operations or the Director General for Operations, except as specifically authorized by the Director General for Operations.

(b) From March 1, 1943 to May 31, 1943 no allocation shall be made to Southern Stove Works, Inc., its successors and assigns, of any material the supply or distribution of which is covered by any order of the Director of Industry Operations, or the Director General for Operations, except as specifically authorized by the Director General for Operations.

(c) Nothing contained in this order shall be deemed to relieve Southern Stove Works, Inc., its successors and assigns, from any restriction, prohibition or provision contained in any order or regulation of the Director of Industry Operations or the Director General for Operations, except in so far as the same may be inconsistent with the provisions hereof.

(P.D. Reg. 1, as amended, 6 F.R. 6680; W.P.B. Reg. 1, 7 F.R. 561; E.O. 9024, 7 F.R. 329; E.O. 9040, 7 F.R. 527; E.O. 9125, 7 F.R. 2719; sec. 2 (a), Pub. Law 671, 76th Cong., as amended by Pub. Laws 89 and 507, 77th Cong.)

Issued this 1st day of January 1943.

Director General for Operations.

PART 1192—DOMESTIC SEWING MACHINES

[Limitation Order L-98 as Amended January 2, 1943]

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of iron and steel and other materials for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 1192.1 *General Limitation Order L-98—(a) Definitions.* For the purposes of this order:

(1) "Domestic sewing machine" means any sewing machine designed for household use.

(4) "Attachment part" means any part of an attachment.

(5) "Repair part" means any sewing machine part used for the purpose of repairing or replacing a similar part which through wear, tear or damage has caused a domestic sewing machine to become unfit to perform its function of sewing in the most simplified manner. Repair

part shall not include any attachment part.

(6) "To produce a new domestic sewing machine" means to complete the manufacturing operations on a new domestic sewing machine other than the final assembly of the machine head into a cabinet, portable base and cover, or table and stand.

(7) "Manufacturer" means any person who produces any new domestic sewing machine or who manufactures or assembles any sewing machine part, attachment or attachment part.

(8) "Restricted period" means the period from April 25, 1942 to June 15, 1942, inclusive.

(9) "Average daily production" or "average daily manufacture" means the total production or manufacture within a specified period divided by the number of days (including Sundays and holidays) contained in such period.

(10) "Person" means any individual, partnership, association, business trust, corporation, governmental corporation or agency or any organized group of persons whether incorporated or not.

(b) *General restrictions.* (1) During the restricted period no manufacturer shall:

(ii) Manufacture more new attachments of any type than 75% of his average daily manufacture of new attachments of such type in the year 1940 multiplied by the number of days (including Sundays and holidays) in the restricted period.

(2) No manufacturer shall manufacture any new sewing machine parts except that during the year 1943 a manufacturer may produce sewing machine parts for use as repair parts under the following conditions:

(i) He may put into process in the manufacture of needles not more iron and steel than 75% of the iron and steel, by weight, contained in the needles manufactured by him during the two-year period ending December 31, 1941;

(ii) He may put into process in the manufacture of sewing machine parts (other than needles) not more iron and steel than 62½% of the iron and steel, by weight, contained in the sewing machine parts (other than needles) manufactured by him for use as repair parts during the two-year period ending December 31, 1941; and

(iii) He may not put into process any non-ferrous metal except that copper and copper base alloy may be used for the purpose of conducting electricity, provided that he does not put into process more copper and copper base alloy than 50% of the amount of copper and

copper base alloy, by weight, used for the purpose of conducting electricity in the sewing machine parts produced by him for use as repair parts during the two-year period ending December 31, 1941.

(3) No manufacturer shall on and after May 25, 1942, and no person other than a manufacturer shall on and after July 15, 1942, install any new sewing machine part, other than a repair part, in a new or used domestic sewing machine, except to complete the new domestic sewing machines, the production of which is permitted under the terms of paragraph (b) (1).

(4) On and after June 16, 1942, no manufacturer shall:

(i) Produce any new domestic sewing machines or (except as provided in paragraph (b) (5) of this order) assemble any new sewing machine parts for the production of such machines; or

(ii) Manufacture or assemble any new attachments or new attachment parts.

(5) Nothing in the foregoing provisions shall limit the final assembly by a manufacturer or any other person of a new domestic sewing machine head into a cabinet, portable base and cover, or table and stand: *Provided*, That such head, cabinet, base and cover, or table and stand were not produced or manufactured in violation of the terms of this or of any other order heretofore or hereafter issued by the Director of Priorities or by the Director of Industry Operations or by the Director General for Operations.

(6) Manufacturers shall sell materials in their inventory only in accordance with the provisions of Priorities Regulation No. 13 (Part 944) and all other applicable orders and regulations.

(c) *Inventory restrictions.* No manufacturer shall accumulate for use in the manufacture of domestic sewing machines, attachments, or parts thereof inventories of raw materials, semi-processed materials, or finished parts in quantities in excess of the minimum amount necessary to maintain production of domestic sewing machines, attachments, or parts thereof at the rates permitted by this order.

(d) *Records.* All persons affected by this order shall keep and preserve for not less than two years accurate and complete records concerning inventories, production and sales.

(e) *Audit and inspection.* All records required to be kept by this order shall, upon request, be submitted to audit and inspection by duly authorized representatives of the War Production Board.

(f) *Reports.* Each manufacturer to whom this order applies shall file with the War Production Board such reports and questionnaires as such board shall from time to time prescribe.

(g) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States,

(h) *Appeals.* Any appeal from the provisions of this order shall be filed on Form PD-500 with the field office of the War Production Board for the district in which is located the plant or branch of the appellant to which the appeal relates.

(i) *Applicability of other orders.* In so far as any other order heretofore or hereafter issued by the Director of Priorities, the Director of Industry Operations, or the Director General for Operations limits the use of any material in the production of domestic sewing machines, attachments, sewing machine parts or attachment parts to a greater extent than the limits imposed by this order, the restrictions in such other order shall govern unless otherwise specified therein.

(j) *Applicability of priorities regulations.* This order and all transactions affected thereby are subject to all applicable provisions of the priorities regulations of the War Production Board, as amended from time to time.

(k) *Communications.* All reports required to be filed hereunder and all communications concerning this order shall, unless otherwise directed, be addressed to the War Production Board, Consumer Durable Goods Division, Washington, D. C., Ref.: L-93.

PART 977—MANILA FIBER AND MANILA CORDAGE

[General Preference Order M-36, as Amended January 4, 1943]

Whereas the uncertainty of future shipments of Manila fiber from abroad and national defense requirements for

Manila cordage have created a shortage thereof for defense, for private account and for export, and it is necessary in the public interest and to promote the defense of the United States, to conserve the supply and direct the distribution thereof;

Now, therefore, it is hereby ordered, That:

§ 977.1 *General Preference Order M-36—(a) Applicability of priorities regulations.* This order and all transactions affected thereby are subject to the provisions of priorities regulations of the War Production Board, as amended from time to time.

(b) *Definitions.* For the purposes of this order:

(1) "Manila fiber" means fiber which is commonly known in the trade by this term and also known as abaca or Manila hemp (either stripped or decorticated), Sumatra abaca and Panama abaca. Except as provided in paragraph (d) (1), Manila fiber does not mean the fiber grades of T, O, W, or Y, as established by the Insular Government of the Philippine Islands.

(2) "Manila cordage" means cables and ropes 1/8 inch in diameter and larger, and twines used for fishing nets, in which Manila fiber either alone or in combination with other materials is used, but does not include Manila cordage sold or delivered for its scrap value.

(3) "Class A cordage" means Manila cordage which contains such a combination of grades of Manila fiber as will at least equal the fiber quality requirements of Federal Specification T-R-601a.

(4) "Class B cordage" means Manila cordage which contains such a combination of grades of Manila fiber as will give a Becker value not in excess of thirty-nine, such Becker value to be determined according to the methods set forth in said Federal Specification T-R-601a.

(5) "Cordage processor" means any person other than the Navy of the United States who spins, twists, weaves or otherwise uses Manila fiber in the production of Manila cordage.

(6) "Processing" means any use of Manila fiber for the manufacture of any other article or commodity into which the Manila fiber goes or of which it becomes a part.

(7) "Dealer" means any person who procures Manila cordage for storage or for sale, and includes selling agents, and other commercially recognized agents acting for their own account or for others, whether or not acquiring title to such Manila cordage, but shall not include an importer.

(8) "Basic monthly poundage" with respect to any cordage processor shall be the average number of pounds per month of Manila cordage sold by such processor during the period January 1 through December 31, 1939. Where this order specifies a percentage of the basic monthly poundage to be processed, sold or delivered during any period, any cordage processor keeping his books on a weekly basis shall apply the said percentage to the weekly periods most nearly approximating the period specified.

(9) "Import" means to transport in any manner into the continental United States from any foreign country or from any territory or possession of the United States, including the Philippine Islands. It includes shipments into a free port, free zone or bonded custody of the United States Bureau of Customs (bonded warehouse) in the continental United States, and shipments in bond into the continental United States for transshipment to Canada, Mexico or any foreign country.

(c) *Restrictions on deliveries of Manila fiber.* No person shall hereafter make or accept delivery of any Manila fiber unless specifically authorized by the Director General for Operations: *Provided, however,* That deliveries of Manila fiber may be made:

(1) By and to the Navy of the United States.

(2) By and to the Defense Supplies Corporation.

(3) By and to persons importing or otherwise handling Manila fiber in accordance with written instructions from the Navy of the United States or from Defense Supplies Corporation, provided that such Manila fiber is to be delivered, either processed or unprocessed, directly, or through one or more other persons, to the Navy of the United States or to Defense Supplies Corporation.

(4) By importers to cordage processors of Manila fiber rejected by the Navy of the United States or Defense Supplies Corporation as unfit for their use.

(5) By cordage processors to cordage processors of Manila fiber which at the time of any such delivery had been previously imported into the United States.

(d) *Restrictions on processing of Manila fiber.* (1) No person shall begin the processing of any Manila fiber, including the fiber of grades T, O, W, or Y, as established by the Insular Government of the Philippine Islands, except for the purpose of manufacturing Class A or Class B cordage for sale or delivery to fulfill the orders hereafter specified in paragraph (e) (2), or such cordage as may be required to meet the specifications of orders of the Army or Navy of the United States, the United States Maritime Commission, or the War Shipping Administration or its operating or general agents.

(2) No cordage processor shall put into process in any month, commencing January 1, 1943, more Manila fiber than 37% of his basic monthly poundage, of which percentage not more than 20% shall be put into process to fill purchase orders for Manila cordage uses specified in paragraph (e) (2) (ii).

(3) Any cordage processor shall, notwithstanding the limitations of paragraphs (d) (2) and (e) (1), and in addition to any action permitted thereunder:

(i) Process into Manila cordage any Manila fiber furnished to the said cordage processor by the Army or Navy of the United States, the United States Maritime Commission, or the War Shipping Administration or its operating or general agents, and sell and deliver such cordage to, or for the account of, the agencies furnishing the fiber.

(ii) Process into Manila cordage such additional amounts of Manila fiber and sell and deliver such additional amounts of Manila cordage as may from time to time be determined by the Director General for Operations to be necessary in the public interest and to promote the national defense.

(e) Restrictions on sales and deliveries of Manila cordage. (1) During the period January 1 through March 31, 1943, no cordage processor shall sell or deliver more Manila cordage than 124½% of his basic monthly poundage, of which percentage not more than 60% shall be sold or delivered to fill purchase orders for Manila cordage uses specified in paragraph (e) (2) (ii).

(2) In addition to the limitations in paragraphs (e) (1) and (e) (3) no cordage processor or dealer shall sell or deliver any Manila cordage and no person shall purchase or accept delivery of any Manila cordage except to fill the following:

(i) Orders for Manila cordage for delivery to or for the account of the Army or Navy of the United States, the United States Maritime Commission, or the War Shipping Administration or its operating or general agents, or for physical incorporation in other products to be delivered to or for the account of the Army or Navy of the United States, the United States Maritime Commission, or the War Shipping Administration or its general or operating agents. Every such purchase order for physical incorporation into products to be delivered to or for the account of the foregoing named agencies shall be accompanied by a certificate in substantially the following form:

(iv) Orders placed by Defense Supplies Corporation or Metals Reserve Company: *Provided, however,* That no cordage processor or dealer shall deliver any Manila cordage upon any order placed with him pursuant to paragraph (e) (2) (ii) or (e) (2) (iii) (b), unless and until such processor or dealer shall have first received from the person placing such order a certificate signed on behalf of such person by a duly authorized individual in substantially the following form:

The undersigned hereby represents that the Manila cordage covered by this order will be used by the undersigned only for the uses specified in paragraph (e) (2) of General Preference Order M-38, as amended, with the terms of which the undersigned is familiar.

(3) No person, other than the Army or Navy of the United States, the United States Maritime Commission, the War Shipping Administration or its operating or general agents, the Defense Supplies Corporation, the Metals Reserve Company or an importer, shall hereafter order or accept delivery of any Manila cordage if the amount of the Manila cordage held or under control of such person exceeds one and one half months' supply for such person; and no person, other than those hereinabove excepted, shall have outstanding at any one time orders for future deliveries of Manila cordage in an amount greater than one month's supply for such person. "Supply" as used in this paragraph means the average monthly amount of Manila cordage withdrawn from the inventory of such person, which has been resold or put into actual use by such person, in the three calendar months immediately preceding the calendar month in which said order is placed or delivery is accepted, or in the three calendar months of the previous year which immediately follow the calendar month of that year corresponding with the month in which said order is placed or delivery is accepted, whichever shall be the higher: *Provided, however,* No person shall be entitled to count as withdrawn from inventory and resold or put into actual use, for the purpose of calculating his permitted supply, any lots of Manila cordage purchased expressly for and resold or delivered to the Army or Navy of the United States, the United States

Maritime Commission, the Defense Supplies Corporation, or the Metals Reserve Company, but every such person shall be entitled to include in the said calculation as withdrawn from inventory and resold or put into actual use any lots of Manila cordage sold to any of the foregoing from his general supply of Manila cordage where such lots, or their equivalent, were not purchased by him expressly for such resale: *And provided further,* That nothing herein contained shall prohibit the importation of, or restrict the inventory of, imported Manila cordage which may be held by any dealer for whose account such Manila cordage was imported.

(f) *Control of stocks of Manila fiber.* Control is hereby taken of the distribution and use of Manila fiber. Any Manila fiber at any time hereafter in the inventory of any person shall be sold and delivered by such person if and as specifically directed in any order of the Director General for Operations which may be issued whenever the Director General for Operations shall determine that a shortage of any particular grade of Manila fiber for defense, or for private account and for export, renders it necessary or appropriate so to allocate such Manila fiber in the public interest or to promote the national defense by so directing its sale and delivery by such person. Any such sale shall be made at the established prices and terms of sale and payment therefor. No person shall dispose of or use Manila fiber in any manner inconsistent with any such order.

(g) *Exclusions from this order.* The terms and provisions of this order shall not apply to:

The Director General for Operations may thereupon take such action as he deems appropriate. Applications for specific exceptions from the limitations of paragraph (e) (3) should be made in writing by the person desiring to use the cordage.

PART 1047—CONSERVATION OF PRODUCTION
MATERIAL FOR THE OIL INDUSTRY

[Conservation Order M-68 as Amended Jan.
4, 1943]

Whereas the Congress of the United States has declared a "state of war between the United States and the Imperial Japanese Government," and has further adopted joint resolutions "declaring that a state of war exists between" the Government of Germany and the Government of Italy "and the Government and people of the United States"; and

Whereas the prosecution of this war requires the immediate increased use in emergency activities of vast quantities of steel, nonferrous metals, rubber and other critical materials; and

Whereas it is imperative to an effective prosecution of this war that the production of petroleum be conducted under circumstances and conditions which will assure a maximum recovery of petroleum and associated hydrocarbons, and which will not involve a waste and inefficient use of the limited quantities of critical materials available for petroleum production; and

Whereas conservation of materials by means of the restrictions hereinafter ordered in the use of such material in the production of petroleum is necessary in order to maintain the production of petroleum for war uses and essential civilian services and to assure a minimum expenditure of scarce equipment;
Now, therefore, it is ordered, That:

§ 1047.1 Conservation Order M-68—

(a) *Definitions.* (1) "Person" means any individual, partnership, association, corporation, or other form of enterprise.

(2) "Production" means the discovery, development, and depletion of petroleum pools, including without limitation the operation of cycling plants and plants for the extraction of natural gasoline and associated hydrocarbons.

(3) "Petroleum" means petroleum, petroleum products, and associated hydrocarbons including but not limited to natural gas.

(4) "Operator" means any person engaged in production.

(5) "Material" means any commodity, equipment, accessories, parts, assemblies, or products of any kind.

(6) "Exploratory well" means any well located not less than two miles from any well capable of producing petroleum.

Subject to the exceptions in paragraph (c) hereof, no person shall deliver or otherwise supply, or cause to be delivered or otherwise supplied, any material which he knows, or has reason to believe, is intended for such use.

(c) *Exceptions.* The provisions of paragraph (b) hereof shall not apply in the following instances:

(1) To any case where material is to be used by an operator for the maintenance or repair of the operator's property or equipment or is required as operating supplies, as these terms are defined in Preference Rating Order P-98.

(2) To any case where material is to be used by an operator exclusively for carrying out by means of an existing research laboratory investigations into more efficient or effective methods of conducting production operations.

(6) To any case where material is to be used by an operator for pumping, or other artificial lifting equipment to be installed on a well located on any single lease or tract in any field on which lease or tract the number of wells to which pumping or other artificial lifting equipment has been or is to be attached does not at any time exceed an average of one well to every 10 surface acres of that part or parts of such lease or tract as are contained within the productive limits of the field; or to any case where material is to be used by an operator for pumping or other artificial lifting equipment to be installed on a well located on any single lease or tract of 10 acres or less in any field on which lease or tract no other wells are located to which pumping or other artificial lifting equipment is attached.

(7) To any case where material is to be used by an operator to drill, complete, or provide additions to any well in any discovered or undiscovered oil field, other than a condensate field, where such well conforms to a uniform well-spacing pattern of not more than one single well to each 40 surface acres: *Provided*, That no well shall be drilled unless, prior to the actual commencement of development operations at the designated drilling location of such well, there has been a consolidation of all separate property interests within the appropriate 40 acre area surrounding such designated drilling location.

(8) To any case where material is to be used by an operator to drill, complete, or provide additions to any well in any discovered or undiscovered natural gas field, other than a condensate field, where such well conforms to a uniform well-spacing pattern of not more than one single well to each 640 surface acres: *Provided*, That no well shall be drilled unless, prior to the actual commencement of development operations at the designated drilling location of such well, there has been a consolidation of all separate property interests within the appropriate 640 acre area surrounding such designated drilling location.

(9) To any case where material is to be used by an operator to complete or provide surface connections for any well in any discovered or undiscovered oil or gas field or condensate field where such well has actually been "spudded" on or before December 23, 1941, and to any case where material is to be used by an operator to drill, complete, or provide surface connections for any well in any discovered or undiscovered gas field in the States of Kentucky, New York, North Carolina, Ohio, Pennsylvania, Tennessee, Virginia, or West Virginia where such

well had actually been "spudded" or where operations at a determined location had commenced on or before December 23, 1941 and had been suspended on or before January 15, 1942.

(10) To any case where the Director General for Operations, War Production Board, has determined that construction, reconstruction, expansion, remodeling, replacement, or improvement of any facility used in production is as to any operator or as to any field, fields or area necessary and appropriate in the public interest and to promote the war effort. Application for such a determination shall be made by letter and filed with the Petroleum Coordinator for National Defense, Department of the Interior, Washington, D. C. Information to be submitted in such application shall be in accordance with O.P.C. Form PD-214a, O.P.C. Form PD-214b, or O.P.C. Form PD-214c, issued by the Office of Petroleum Coordinator.

(d) *Determination of uniform well-spacing pattern.* (1) Subject to the provisions of subparagraph (2) below, each well "spudded" subsequent to December 23, 1941, in any oil or gas field, other than a condensate field, on any proposed drilling unit consisting of not less than forty surface acres in the case of any oil field or of not less than 640 surface acres in the case of any gas field, shall be deemed to conform to a "uniform well-spacing pattern" for the purposes of paragraphs (c) (7) and (8) of this section, where such well is drilled in accordance with the following terms:

(i) Each well shall bear the same geographical relationship with respect to the square drilling unit upon which it is to be located as all other wells drilled subsequent to December 23, 1941 bear to the respective square drilling units upon which such wells have been or are to be located: *Provided*, That subject to the provisions of (2) below, any well which is to be drilled shall be considered as conforming to a uniform well-spacing pattern where such well is to be located within 100 feet of the point at which absolute geographic identity would be attained or where such well is to be located within 150 feet of the geographic center of a square drilling unit; or

(ii) Where property interests (including leasehold or other property interests) in irregularly shaped tracts necessitate departures from square drilling units, a well may be located on any drilling unit consisting of not less than the prescribed number of surface acres (40 surface acres in the case of an oil field; 640 surface acres in the case of a gas field): *Provided*, That such well is drilled in conformity with the provisions of subparagraph (2) below.

(2) No well "spudded" subsequent to December 23, 1941 shall be considered as drilled in conformity with a uniform well-spacing pattern unless:

(i) The proposed drilling unit upon which such well is to be located consists entirely of acreage which is not attributable to any well other than such proposed well. The acreage attributable to wells offsetting the proposed drilling unit shall be determined by assigning to such

wells an acreage equivalent to that in the existing well density or drilling pattern contiguous to such wells. In the case of an oil field no portion of a drilling unit shall fall within 330 feet of an existing well; in the case of a gas field no portion of a drilling unit shall fall within 1320 feet of an existing well; and

(iv) Such well is drilled at least 990 feet in the case of an oil field or 3960 feet in the case of a gas field from any well "spudded" in such field subsequent to December 23, 1941; and

(v) Such well is drilled at least 660 feet in the case of an oil field or at least 2640 feet in the case of a gas field from any well "spudded" or completed in such field on or before December 23, 1941; and

(vi) Such well is drilled at least 330 feet in the case of an oil field or 1320 feet in the case of a gas field from any lease line, property line or subdivision line which separates unconsolidated property interests.

(e) *Restriction on subdivision.* No single lease or tract existing as such as of January 14, 1942 shall be subdivided or otherwise rearranged for the purpose of making available to any person the provisions of paragraph (c) (6).

(f) *Violations.* Any person affected by this order who violates any of its provisions or a provision of any other order or who by any act or omission falsifies records to be kept or information to be furnished pursuant to this order may be prohibited from receiving further deliveries of any material subject to allocation, and such further action may be taken as is deemed appropriate including a recommendation for prosecution under section 35A of the Criminal Code (18 U.S.C. 80).

(g) *Revocation or amendment.* This order may be revoked or amended at any time as to any person. In the event of revocation, deliveries shall be made in accordance with the provisions of any applicable preference rating order without further restrictions unless such deliveries have been specifically restricted.

(h) *Applicability of Priorities Regulation No. 1.* This order and all transactions affected thereby are subject to the provisions of Priorities Regulation No. 1, as amended from time to time, except to the extent that any provision of this or-

der may be inconsistent therewith, in which case such provision shall govern.

(i) [Revoked]

(j) The provisions of this order shall be applicable to deliveries of material by any person located in the United States, its territories and possessions to any other person located in the United States, its territories and possessions, but not elsewhere. The provisions of this paragraph supersede Interpretation No. 1 of this order issued February 7, 1942.

(k) *Administration of order.* The Petroleum Administrator for War or the Deputy Petroleum Administrator for War may extend, amend, modify or revoke Conservation Order M-68 (§ 1047.1), Supplementary Order No. M-68-1 (§ 1047.6), Supplementary Order No. M-68-2 (§ 1047.7), Supplementary Order No. M-68-3 (§ 1047.8), Supplementary Order No. M-68-4 (§ 1047.9), Supplementary Order No. M-68-5 (§ 1047.10), and Supplementary Order No. M-68-6 (§ 1047.11), as such orders may have been amended from time to time; and may take such measures with respect to any exception to any such order as he may deem necessary or appropriate; and may take such measures as he may deem necessary or appropriate with respect to any violation accrued or incurred under any such order.

(2) "Agave cordage" means cables and ropes 3/16" in diameter and larger, cordage or twines of any diameter used in the manufacture of any wire rope, twines used for fishing nets, and tarred marlines for use in manufacturing wire rope and for marine uses, in which agave fiber either alone or in combination with other material is used, but does not include agave cordage sold or delivered for its scrap value.

(3) "Processor" means any person who spins, twists, weaves or otherwise uses agave fiber in the production of cordage, twine or any other product.

(4) "Processing" means any use of agave fiber for the manufacture of any article or commodity into which agave fiber goes or of which it becomes a part.

Any such sale shall be made at the established prices and terms of sale and payment therefor and shall take precedence over any preference rated orders. No person shall dispose of or use agave fiber or agave cordage in any manner inconsistent with any such order.

(2) Applications for specific authority to purchase, receive or use agave fiber or agave products otherwise than as permitted by paragraphs (b), (c), (d) or (e) may be made to the Director General for Operations by the person desiring to use such agave fiber or agave cordage on form PD-709 or such other form or forms as may be prescribed. Such application shall also summarize the efforts made by the applicant to use substitutes and shall contain a statement of the reasons why the applicant believes the use of agave fiber or agave cordage, in the manner and the extent that application therefor is made, will promote the national defense or will be in the public interest.

(k) *Appeal.* Any person affected by this order who considers that compliance therewith would work an exceptional and unreasonable hardship upon him, or that it would result in a degree of unemployment which would be unreasonably dis-

proportionate compared with the amount of agave fiber conserved, or that compliance with this order would disrupt or impair a program of conversion from non-defense to defense work, may appeal to the War Production Board by letter or telegram, Reference M-84, setting forth the pertinent facts and the reason he considers he is entitled to relief. The Director General for Operations may thereupon take such action as he deems appropriate.

(l) *Communications.* All reports required to be filed hereunder, and all communications concerning this order, shall, unless otherwise directed, be addressed to: War Production Board, Textile, Clothing and Leather Division, Washington, D. C., Reference M-84.

(m) *Applicability of priorities regulations.* This order and all transactions affected thereby are subject to all applicable provisions of the priorities regulations of the War Production Board, as amended from time to time.

(n) *Violations.* Any person who willfully violates any provision of this order, or who, in connection with this order, willfully conceals a material fact or furnishes false information to any department or agency of the United States, is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

PART 1235—COMBED COTTON YARN (INCLUDING SALES YARN AND YARN FOR PRODUCERS' OWN USE)

[General Preference Order M-155 as Amended January 4, 1943]

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of combed cotton yarn and of certain combed cotton fabrics, for defense, for private account and for export, and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§1235.1 *General Preference Order M-155—(a) Applicability of Priorities Regulation No. 1.* This order and all transactions affected thereby are subject to the provisions of Priorities Regulation No. 1 (Part 944), as amended from time to time, except to the extent that any provision hereof may be inconsistent therewith, in which case the provisions of this order shall govern.

(b) *Definitions.* For the purposes of this order:

(1) "Combed cotton yarns" means greige cotton yarn, in all counts and descriptions up to and including 90's, which in addition to having been put through cotton carding machinery has also been through the further process of combing, whether produced for sale or in integrated mills for use directly in the manufacture of fabrics, braids, tapes or other products.

(2) "Medium combed yarns" means the combed cotton yarns in counts from 61s to 90s, inclusive, single or plied, whether produced for sale or for use in integrated mills directly in the manufacture of fabrics, braids, tapes or other products.

(3) "Coarse combed yarns" means the combed cotton yarns in counts coarser than 61s single or plied, whether produced for sale or for use in integrated mills directly in the manufacture of fabrics, braids, tapes or other products.

(4) "Reserved combed yarn" means the combed cotton yarns, required to be earmarked pursuant to the terms of this order, whether produced for sale or for use in integrated mills directly in the manufacture of fabrics, braids, tapes or other products.

(5) "Producer" means any person who, on February 28, 1942, was spinning medium or coarse combed yarns, or both, whether produced for sale or for use in integrated mills directly in the manufacture of fabrics, braids, tapes, or other products, or who, on that date, had idle equipment capable of producing either of them, except that any such person shall not be deemed a producer as to that portion of his production which is equivalent to the portion of his production dur-

ing the month of February, 1942 which was used or sold in the manufacture of combed yarn used in stitching thread (as distinguished from embroidery or decorative thread). The term "producer" shall include, but without limitation thereto, sales yarn mills, spinner-weavers, spinner-mercerizers and spinner-knitters.

(2) *Coarse combed yarns.* Notwithstanding the provisions of any contracts to which he may be a party, each producer of coarse combed yarns shall, as soon as may be necessary for him to do so in order to make delivery in accordance with the terms of any purchase order placed with him of the type specified in paragraph (d) (1) hereof and as soon as the required yarn counts and descriptions can be produced by him, but in any event not later than the week beginning March 1, 1943, and in each week thereafter until further direction, earmark at least 65 percent of his production thereof as reserved combed yarns.

(3) No producer shall fail to operate his equipment capable of producing medium or coarse combed yarns at maximum

practicable capacity or take any action which would decrease his weekly production of medium combed yarns, coarse combed yarns, or both, except to the extent necessary to meet his required deliveries of such yarns or of fabrics woven therefrom, within the limitations set forth in paragraph (c) (1), (2) and (5).

(4) Nothing in paragraph (c) (1), and (2) and (3) shall prevent or preclude any producer from earmarking a higher percentage of medium or coarse combed yarns as reserved yarns.

(4) No person, operating a warehouse or other place of storage shall hold in storage any combed yarns for a period longer than 30 days without notifying the War Production Board, stating the most complete description of the yarn known to him and the person for whose account it is being stored.

(5) No person, except those mentioned in paragraph (c) (5) (vii) and (viii) or (d) (4), shall accept delivery of reserved combed yarns unless such yarns shall be put into process by him within 30 days after actual receipt thereof by him at his plant or at any warehouse or other place of storage for his account or are required by him for immediate delivery to others who shall put them into process after actual receipt thereof by him at his plant or at any warehouse or other place of storage for his account.

(6) No producer, regardless of whether he has heretofore engaged in the business of selling combed cotton yarns, or not,

shall refuse to accept and fill, to the extent of his production of reserved combed yarns, a purchase order therefor of the kind specified in paragraph (d) (1), unless:

(i) The person placing the same is unable or unwilling to meet the established prices and terms therefor; or

(ii) The producer shall have already sold all of his reserved combed yarns to be produced in the delivery period required by the said purchase order to another person for a use permitted in the said paragraph (d) (1); or

(iii) The producer will require all his unsold reserved combed yarns for use himself as permitted in paragraph (d) (1), prior to the availability of further production thereof by himself; or

(iv) The purchase order is for combed cotton yarn in counts or in put-ups which the producer, in view of his commitments under paragraph (d) (6) (ii) and (iii) above, is not capable of producing, due to the limitations of his available machinery and equipment and the proposed purchaser is unable or unwilling to supply the necessary equipment or machinery;

Provided, however, That nothing in this order shall excuse any person producing combed cotton fabrics from the requirements of complying with the provisions of Priorities Regulation No. 1 with respect to the compulsory acceptance and filling of defense or other preference rated orders in accordance with the preference ratings assigned thereto; but any person with whom an order is placed for fabrics for a use permitted in paragraph (d) (1) hereof may, if his own supply of reserved combed yarns is not available, in whole or in part, for any of the reasons set forth in paragraphs (d) (6) (ii), (iii) and (iv) above, place a purchase order with any other producer for the necessary combed cotton yarns required over and above his own reserved combed yarns, to be filled out of such other producer's reserved yarns. Such other producer shall accept and fill such purchase order subject to paragraphs (d) (6) (i), (ii), (iii) and (iv).

(e) *Restrictions on the sale or delivery of the residual supply of combed cotton yarns and on fabrics woven therefrom.* No producer shall make any discriminatory cuts in sales or deliveries of non-reserved coarse or medium combed cotton yarns in counts which the producer continues to make, or fabrics woven therefrom, between former customers desiring to purchase the same, and who purchased such yarns or fabrics in the year 1941 and heretofore in 1942, notwithstanding the provisions of any contracts to which he may be a party, or between such former customers and his own use of such yarns or fabrics, except to the extent necessary to make his required deliveries upon purchase orders for such yarns or fabrics carrying preference ratings.

(f) *Appeal.* Any person affected by this order who considers that compliance therewith would work an exceptional and unreasonable hardship upon him, or that it would result in a degree of unemployment which would be unreasonably disproportionate compared with the amount of combed cotton yarn con-

served, or that compliance with this order would disrupt or impair a program of conversion from nondefense to defense work, may appeal to the War Production Board by letter or telegram, Reference M-155, setting forth the pertinent facts and the reason he considers he is entitled to relief. The Director General for Operations may thereupon take such action as he deems appropriate.

(g) *Records.* All persons affected by this order shall keep and preserve for not less than two years accurate and complete records concerning inventories, production and sales.

(h) *Reports.* All persons affected by this order shall execute and file with the War Production Board such reports and questionnaires as may be required by said Board from time to time, but no reports other than the notifications required by paragraph (d) hereof, shall be filed until forms therefor shall have been prescribed.

(i) *Communications to the War Production Board.* All communications concerning this order, or any reports required to be filed hereunder, shall unless otherwise directed, be in writing and be addressed to: War Production Board, Washington, D. C. Reference M-155.

In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

PART 1256—PLATINUM

[Interpretation 2 of Conservation Order M-162]

The following official interpretation is hereby issued by the Director General for Operations with respect to the meaning of the term "assemble" as such term is defined and used in General Conservation Order M-162 (§ 1256.1):

Subparagraph (b) (11) of General Conservation Order M-162 states: "The term 'assemble' shall not be deemed to include the putting together of an article after delivery to a sales outlet or consumer in knock-down form pursuant to an established custom * * *". Some question has arisen as to whether or not this exception permits a processor after January 1, 1943, to assemble

findings which he has purchased from other processors. It has been the custom of the trade for findings manufacturers to deliver to manufacturers of completed jewelry findings which will then be assembled from time to time, as the need arises, by the manufacturer of the completed jewelry.

The assembly of findings in the case described comes within the meaning of the term "assemble" as such term is used in the order and is prohibited after January 1, 1943. The quoted exception applies only to a case where an article of completed jewelry, for convenience in packing and shipment, is customarily delivered to a sales outlet in knock-down or unassembled form. The distinguishing points of the exception are that the various parts being shipped together are all designed for assembly into a single completed article, that convenience in packing and shipping requires shipment of the article in unassembled form, and that shipment of the particular article in such unassembled form is an established custom in the trade.

PART 1388—DEFENSE-RENTAL AREAS

[MRE 62]

HOUSING ACCOMMODATION OTHER THAN
HOTELS AND ROOMING HOUSES

CAPE CHARLES DEFENSE RENTAL AREA

In the judgment of the Administrator, rents for housing accommodations within the Cape Charles Defense-Rental Area, as designated in the designation and rent declaration issued by the Administrator on October 5, 1942, as amended, have not been reduced and stabilized by State or local regulation, or otherwise, in accordance with the recommendations set forth in the said designation and rent declaration.

It is the judgment of the Administrator that by April 1, 1941, defense activities had not yet resulted in increases in rents for housing accommodations within the Cape Charles Defense-Rental Area inconsistent with the purposes of the Emergency Price Control Act of 1942. The Administrator has therefore ascertained and given due consideration to the rents prevailing for housing accommodations within the Cape Charles Defense-Rental Area on or about March 1, 1942. The Administrator has made adjustments for such relevant factors as he

has determined and deemed to be of general applicability in respect of such housing accommodations, including increases or decreases in property taxes and other costs.

In the judgment of the Administrator, the maximum rents established by this maximum rent regulation for housing accommodations within the Cape Charles Defense-Rental Area will be generally fair and equitable and will effectuate the purposes of the Emergency Price Control Act of 1942.

Therefore, under the authority vested in the Administrator by the Act, this Maximum Rent Regulation No. 62 is hereby issued.

AUTHORITY: §§ 1388.881 to 1388.894, inclusive, issued under Pub. Law 421, 77th Cong.

§ 1388.881 Scope of regulation. (a) This Maximum Rent Regulation No. 62 applies to all housing accommodations within the Cape Charles Defense-Rental Area (referred to hereinafter in this maximum rent regulation as the "defense-rental area"), as designated in the Designation and Rent Declaration No. 31 (§§ 1388.1341 to 1388.1345, inclusive)¹ issued by the Administrator on October 5, 1942, as amended, except as provided in paragraph (b) of this section.

(b) This maximum rent regulation does not apply to the following:

(1) Housing accommodations situated on a farm and occupied by a tenant who is engaged for a substantial portion of his time in farming operations thereon;

(2) Dwelling space occupied by domestic servants, caretakers, managers, or other employees to whom the space is provided as part of their compensation and who are employed for the purpose of rendering services in connection with the premises of which the dwelling space is a part.

(3) Rooms or other housing accommodations within hotels or rooming houses, or housing accommodations which have been, with the consent of the Administrator, brought under the control of the maximum rent regulation for Hotels and Rooming Houses pursuant to the provisions of that regulation: *Provided*, That this maximum rent regulation does apply to entire structures or premises though used as hotels or rooming houses.

(4) Housing accommodations rented to the United States acting by the National Housing Agency: *Provided, however*, That this maximum rent regulation does apply to a sublease or other subrenting of such accommodations or any part thereof.

(c) The provisions of any lease or other rental agreement shall remain in force pursuant to the terms thereof, except insofar as those provisions are inconsistent with this maximum rent regulation.

(d) An agreement by the tenant to waive the benefit of any provision of this maximum rent regulation is void. A tenant shall not be entitled by reason of this maximum rent regulation to refuse to pay or to recover any portion of any rents due or paid for use or occupancy

prior to the effective date of this maximum rent regulation.

§ 1388.882 Prohibition against higher than maximum rents. (a) Regardless of any contract, agreement, lease or other obligation heretofore or hereafter entered into, no person shall demand or receive any rent for use or occupancy on and after the effective date of this maximum rent regulation of any housing accommodations within the defense-rental area higher than the maximum rents provided by this maximum rent regulation; and no person shall offer, solicit, attempt, or agree to do any of the foregoing. Lower rents than those provided by this maximum rent regulation may be demanded or received.

(b) Notwithstanding any other provision of this maximum rent regulation, where housing accommodations are heated with fuel oil the landlord of such accommodations may as hereinafter provided enter into an agreement with the tenant providing for payment by the tenant of part or all of the cost of changing the heating unit to use some fuel other than oil or of installing a new heating unit using some fuel other than oil. Prior to making such agreement the landlord shall in writing report the terms of the proposed agreement to the area rent office. The landlord may enter into the agreement either upon its approval by the Administrator or, unless the Administrator has disapproved the proposed agreement within 5 days after the filing of such report, upon the expiration of such 5-day period.

(c) Where a lease of housing accommodations was entered into prior to the effective date of this maximum rent regulation and the tenant as a part of such lease or in connection therewith was granted an option to buy the housing accommodations which were the subject of the lease, with the further provision that some or all of the payments made under the lease should be credited toward the purchase price in the event such option is exercised, the landlord, notwithstanding any other provision of this maximum rent regulation, may be authorized to receive payments made by the tenant in accordance with the provisions of such lease and in excess of the maximum rent for such housing accommodations. Such authority may be secured only by a written request of the tenant to the area rent office and shall be granted by order of the Administrator if he finds that such payments in excess of the maximum rent will not be inconsistent with the purposes of the Act or this maximum rent regulation and would not be likely to result in the circumvention or evasion thereof. After entry of such order the landlord shall be authorized to demand, receive and retain payments provided by the lease in excess of the maximum rent for periods commencing on or after the effective date of this maximum rent regulation. After entry of such order, the provisions of the lease may be enforced in accordance with law, notwithstanding any other provision of this maximum rent regulation: *Provided, however*, That if at the termina-

tion of the lease the tenant shall not exercise the option to buy, the landlord may thereafter remove or evict the tenant only in accordance with the provisions of § 1388.886 of this maximum rent regulation. Nothing in this paragraph shall be construed to authorize the landlord to demand or receive payments in excess of the maximum rent in the absence of an order of the Administrator as herein provided. Where a lease of housing accommodations has been entered into on or after the effective date of this maximum rent regulation, and the tenant as a part of such lease or in connection therewith has been granted an option to buy the housing accommodations which are the subject of the lease, the landlord, prior to the exercise by the tenant of the option to buy, shall not demand or receive payments in excess of the maximum rent, whether or not such lease allocates some portion or portions of the periodic payments therein provided as payments on or for the option to buy.

§ 1388.883 Minimum services, furniture, furnishings and equipment. Except as set forth in § 1388.885 (b), every landlord shall, as a minimum, provide with housing accommodations the same essential services, furniture, furnishings and equipment as those provided on the date determining the maximum rent, and as to other services, furniture, furnishings and equipment not substantially less than those provided on such date: *Provided, however*, That where fuel oil is used to supply heat or hot water for housing accommodations, and the landlord provided heat or hot water on the date determining the maximum rent, the heat and hot water which the landlord is required to supply shall not be in excess of the amount which he can supply under any statute, regulation or order of the United States or any agency thereof which rations or limits the use of fuel oil.

§ 1388.884 Maximum rents. Maximum rents (unless and until changed by the Administrator as provided in § 1388.885) shall be:

(a) For housing accommodations rented on March 1, 1942, the rent for such accommodations on that date.

(b) For housing accommodations not rented on March 1, 1942, but rented at any time during the two months ending on that date, the last rent for such accommodations during that two-month period.

(c) For housing accommodations not rented on March 1, 1942 nor during the two months ending on that date, but rented prior to the effective date of this maximum rent regulation, the first rent for such accommodations after March 1, 1942. The Administrator may order a decrease in the maximum rent as provided in § 1388.885 (c).

(d) For (1) newly constructed housing accommodations without priority rating first rented after March 1, 1942 and before the effective date of this maximum rent regulation, or (2) housing accommodations changed between these dates so as to result in an increase or

¹ 7 F.R. 7942.

decrease of the number of dwelling units in such housing accommodations, or (3) housing accommodations changed between those dates from unfurnished to fully furnished, or from fully furnished to unfurnished, or (4) housing accommodations substantially changed between those dates by a major capital improvement as distinguished from ordinary repair, replacement and maintenance, the first rent for such accommodations after such construction or change: *Provided, however,* That where such first rent was fixed by a lease which was in force at the time of a major capital improvement, the maximum rent shall be the first rent after termination of such lease. The Administrator may order a decrease in the maximum rent as provided in § 1388.885 (c).

(e) For (1) newly constructed housing accommodations without priority rating first rented on or after the effective date of this maximum rent regulation, or (2) housing accommodations changed on or after such effective date so as to result in an increase or decrease of the number of dwelling units in such housing accommodations, or (3) housing accommodations not rented at any time between January 1, 1942 and such effective date, the first rent for such accommodations after the change or the effective date, as the case may be. Within 30 days after so renting the landlord shall register the accommodations as provided in § 1388.887. The Administrator may order a decrease in the maximum rent as provided in § 1388.885 (c).

(f) For housing accommodations constructed with priority rating from the United States or any agency thereof for which the rent has been heretofore or is hereafter approved by the United States or any agency thereof, the rent so approved, but in no event more than the rent on March 1, 1942, or, if the accommodations were not rented on that date, more than the first rent after that date.

(g) For housing accommodations constructed by the United States or any agency thereof, or by a State of the United States or any of its political subdivisions, or any agency of the State or any of its political subdivisions, and owned by any of the foregoing, the rent generally prevailing in the Defense-Rental Area for comparable housing accommodations on March 1, 1942, as determined by the owner of such accommodations: *Provided, however,* That any corporation formed under the laws of a State shall not be considered an agency of the United States within the meaning of this paragraph. The Administrator may order a decrease in the maximum rent as provided in § 1388.885 (c).

(h) For housing accommodations rented to either Army or Navy personnel, including civilian employees of the War and Navy Departments, for which the rent is fixed by the national rent schedule of the War or Navy Department, the rents established on the effective date of this maximum rent regulation by such rent schedule. The Administrator may order an increase in such rents, if he

finds that such increase is not inconsistent with the purposes of the Act or this maximum rent regulation.

§ 1388.885 *Adjustments and other determinations.* In the circumstances enumerated in this section, the Administrator may issue an order changing the maximum rents otherwise allowable or the minimum services required. In those cases involving a major capital improvement, an increase or decrease in the furniture, furnishings or equipment, an increase or decrease of services or a deterioration, the adjustment in the maximum rent shall be the amount the Administrator finds would have been on March 1, 1942, the difference in the rental value of the housing accommodations by reason of such change: *Provided, however,* That no adjustment shall be ordered where it appears that the rent on the date determining the maximum rent was fixed in contemplation of and so as to reflect such change. In all other cases, except those under paragraphs (a) (7) and (c) (6) of this section, the adjustment shall be on the basis of the rent which the Administrator finds was generally prevailing in the defense-rental area for comparable housing accommodations on March 1, 1942. In cases involving construction due consideration shall be given to increased costs of construction, if any, since March 1, 1942. In cases under paragraphs (a) (7) and (c) (6) of this section the adjustment shall be on the basis of the rents which the Administrator finds were generally prevailing in the defense-rental area for comparable housing accommodations during the year ending on March 1, 1942.

(a) Any landlord may file a petition for adjustment to increase the maximum rent otherwise allowable, only on the grounds that:

(1) There has been on or after the effective date of this maximum rent regulation a substantial change in the housing accommodations by a major capital improvement as distinguished from ordinary repair, replacement and maintenance.

(2) There was, on or prior to March 1, 1942, a substantial change in the housing accommodations by a major capital improvement as distinguished from ordinary repair, replacement and maintenance, and the rent on March 1, 1942 was fixed by a lease or other rental agreement which was in force at the time of such change.

(3) There has been a substantial increase in the services, furniture, furnishings or equipment provided with the housing accommodations since the date or order determining its maximum rent. No increase in the maximum rent shall be ordered on the ground set forth in this paragraph (a) (3) unless the increase in services, furniture, furnishings, or equipment occurred with the consent of the tenant or while the accommodations were vacant: *Provided,* That an adjustment may be ordered, although the tenant refuses to consent to the increase in services, furniture, furnishings or equipment, if the Administrator finds that such increase (1) is reasonably re-

quired for the operation of a multiple dwelling structure or other structure of which the accommodations are a part or (1) is necessary for the preservation or maintenance of the accommodations.

(4) The rent on the date determining the maximum rent was materially affected by the blood, personal or other special relationship between the landlord and the tenant and as a result was substantially lower than the rent generally prevailing in the Defense-Rental Area for comparable housing accommodations on March 1, 1942: *Provided,* That no adjustment under this subparagraph increasing the maximum rent shall be made effective with respect to any accommodations regularly rented to employees of the landlord while the accommodations are rented to an employee, and no petition for such an adjustment will be entertained until the accommodations have been or are about to be rented to one other than an employee.

(5) There was in force on March 1, 1942, a written lease, for a term commencing on or prior to March 1, 1941, requiring a rent substantially lower than the rent generally prevailing in the defense-rental area for comparable housing accommodations on March 1, 1942; or the housing accommodations were not rented on March 1, 1942, but were during the two months ending on that date and the last rent for such accommodations during that two-month period was fixed by a written lease, for a term commencing on or prior to March 1, 1941, requiring a rent substantially lower than the rent generally prevailing in the Defense-Rental Area for comparable housing accommodations on March 1, 1942.

(6) The rent on the date determining the maximum rent was established by a lease or other rental agreement which provided for a substantially higher rent at other periods during the term of such lease or agreement.

(7) The rent on the date determining the maximum rent was substantially lower than at other times of year by reason of seasonal demand for such housing accommodations. In such cases the Administrator's order may if he deems it advisable provide for different maximum rents for different periods of the calendar year.

(b) (1) If, on the effective date of this maximum rent regulation, the services provided for housing accommodations are less than the minimum services required by § 1388.883, the landlord shall either restore and maintain such minimum services or, within 30 days after such effective date, file a petition requesting approval of the decreased services. If, on such effective date, the furniture, furnishings or equipment provided with housing accommodations are less than the minimum required by § 1388.883, the landlord shall, within 30 days after such date, file a written report showing the decrease in furniture, furnishings or equipment.

(2) Except as above provided, the landlord shall, until the accommodations become vacant, maintain the minimum services, furniture, furnishings and

equipment unless and until he has filed a petition to decrease the services, furniture, furnishings or equipment and an order permitting a decrease has been entered thereon; however, if it is impossible to provide the minimum services, furniture, furnishings or equipment he shall file a petition within 10 days after the change occurs. When the accommodations become vacant the landlord may, on renting to a new tenant, decrease the services, furniture, furnishings or equipment below the minimum; within 10 days after so renting the landlord shall file a written report showing such decrease.

(3) The order on any petition under this paragraph may require an appropriate adjustment in the maximum rent; and any maximum rent for which a report is required by this paragraph may be decreased in accordance with the provisions of § 1388.885 (c) (3). If the landlord fails to file the petition or report required by this paragraph within the time specified, or decreases the services, furniture, furnishings or equipment without an order authorizing such decrease where such order is required, the rent received by the landlord for any rental period commencing on or after such decrease or the effective date of this maximum rent regulation, whichever is the later, shall be received subject to refund to the tenant of any amount of the maximum rent which may later be fixed by any order decreasing the maximum rent on account of such decrease in services, furniture, furnishings or equipment. In such case, any order decreasing the maximum rent shall be effective to decrease such rent from the beginning of the first rental period after the decrease in services, furniture, furnishings or equipment or after the effective date of this maximum rent regulation, whichever is the later. The foregoing provisions and any refund thereunder do not affect any civil or criminal liability provided by the Act for failure to comply with any requirement of this paragraph.

(c) The Administrator at any time, on his own initiative or on application of the tenant may order a decrease of the maximum rent otherwise allowable, only on the grounds that:

(1) The maximum rent for housing accommodations under paragraph (c), (d), (e), or (g), of § 1388.884 is higher than the rent generally prevailing in the defense-rental area for comparable housing accommodations on March 1, 1942.

(2) There has been a substantial deterioration of the housing accommodations other than ordinary wear and tear since the date or order determining its maximum rent.

(3) There has been a decrease in the minimum services, furniture, furnishings or equipment required by § 1388.883 since the date or order determining the maximum rent.

(4) The rent on the date determining the maximum rent was materially affected by the blood, personal or other special relationship between the landlord and the tenant and as a result was sub-

stantially higher than the rent generally prevailing in the defense-rental area for comparable housing accommodations on March 1, 1942.

(5) The rent on the date determining the maximum rent was established by a lease or other rental agreement which provided for a substantially lower rent at other periods during the term of such lease or agreement.

(6) The rent on the date determining the maximum rent was substantially higher than at other times of year by reason of seasonal demand for such housing accommodations. In such cases the Administrator's order may if he deems it advisable provide for different maximum rents for different periods of the calendar year.

(d) If the rent on the date determining the maximum rent or any other fact necessary to the determination of the maximum rent, is in dispute between the landlord and the tenant, or is in doubt, or is not known, the Administrator on petition of the landlord filed within 30 days after the effective date of this maximum rent regulation, or at any time on his own initiative, may enter an order fixing the maximum rent by determining such fact; or if the Administrator is unable to ascertain such fact he shall enter the order on the basis of the rent which he finds was generally prevailing in the defense-rental area for comparable housing accommodations on March 1, 1942.

(e) Where, at the expiration or other termination of an underlying lease or other rental agreement, housing accommodations or a predominant part thereof are occupied by one or more subtenants or other persons occupying under a rental agreement with the tenant the landlord may rent the entire premises for use by similar occupancy for a rent not in excess of the aggregate maximum rents of the separate dwelling units, or may rent the separate dwelling units for rents not in excess of the maximum rents applicable to such units.

Where housing accommodations or a predominant part thereof are occupied by one or more subtenants or other persons occupying under a rental agreement with the tenant, the tenant may petition the Administrator for leave to exercise any right he would have except for this maximum rent regulation to sell his underlying lease or other rental agreement. The Administrator may grant such petition if he finds that the sale will not result, and that sales of such character would not be likely to result, in the circumvention or evasion of the Act or this maximum rent regulation. He may require that the sale be made on such terms as he deems necessary to prevent such circumvention or evasion.

(f) Where a petition is filed by a landlord on one of the grounds set out in paragraph (a) of this section, the Administrator may enter an interim order increasing the maximum rent until further order, subject to refund by the landlord to the tenant of any amount received in excess of the maximum rent

established by final order upon such petition. The receipt by the landlord of any increased rent authorized by such interim order shall constitute an agreement by the landlord with the tenant to refund to the tenant any amount received in excess of the maximum rent established by final order. The landlord shall make such refund either by repayment in cash or, where the tenant remains in occupancy after the effective date of the final order, by deduction from the next installment of rent, or both.

(g) No adjustment in the maximum rent shall be ordered on the ground that the landlord, since the date or order determining the maximum rent, has, as a part of or in connection with a lease of housing accommodations, granted the tenant an option to buy the accommodations which are the subject of the lease. Where a lease of housing accommodations was in force on the date determining the maximum rent, and the landlord had on that date, as a part of or in connection with such lease, granted the tenant an option to buy the accommodations which are the subject of the lease, the Administrator may, on or after the termination of such lease, on his own initiative or on application of the tenant, enter an order fixing the maximum rent on the basis of the rents which the Administrator finds were generally prevailing in the defense-rental area for comparable housing accommodations not subject to an option to buy on March 1, 1942.

§ 1388.886 *Restrictions on removal of tenant.* (a) So long as the tenant continues to pay the rent to which the landlord is entitled, no tenant shall be removed from any housing accommodations, by action to evict or to recover possession, by exclusion from possession, or otherwise, nor shall any person attempt such removal or exclusion from possession, notwithstanding that such tenant has no lease or that his lease or other rental agreement has expired or otherwise terminated, and regardless of any contract, lease, agreement or obligation heretofore or hereafter entered into which provides for entry of judgment upon the tenant's confession for breach of the covenants thereof or which otherwise provides contrary hereto, unless:

(1) The tenant, who had a written lease or other written rental agreement, has refused upon demand of the landlord to execute a written extension or renewal thereof for a further term of like duration but not in excess of one year but otherwise on the same terms and conditions as the previous lease or agreement except insofar as such terms and conditions are inconsistent with this maximum rent regulation, or

(2) The tenant has unreasonably refused the landlord access to the housing accommodations for the purpose of inspection or of showing the accommodations to a prospective purchaser, mortgagee or prospective mortgagee, or other person having a legitimate interest therein: *Provided, however,* That such refusal shall not be ground for removal

or eviction if such inspection or showing of the accommodations is contrary to the provisions of the tenant's lease or other rental agreement; or

(3) The tenant (i) has violated a substantial obligation of his tenancy, other than an obligation to pay rent, and has continued, or failed to cure, such violation after written notice by the landlord that the violation cease, or (ii) is committing or permitting a nuisance or is using or permitting a use of the housing accommodations for an immoral or illegal purpose; or

(4) The tenant's lease or other rental agreement has expired or otherwise terminated, and at the time of termination the housing accommodations or a predominant part thereof are occupied by one or more subtenants or other persons who occupied under a rental agreement with the tenant; or

(5) The landlord seeks in good faith to recover possession for the immediate purpose of demolishing the housing accommodations or of substantially altering or remodeling it in a manner which cannot practically be done with the tenant in occupancy and the plans for such alteration or remodeling have been approved by the proper authorities, if such approval is required by local law; or

(6) The landlord owned, or acquired an enforceable right to buy or the right to possession of the housing accommodations prior to the effective date of this maximum rent regulation, and seeks in good faith to recover possession of such accommodations for immediate use and occupancy as a dwelling for himself. If a tenant has been removed or evicted under this paragraph (a) (6) from housing accommodations, the landlord shall file a written report on a form provided therefor before renting the accommodations or any part thereof during a period of six months after such removal or eviction.

(b) (1) No tenant shall be removed or evicted on grounds other than those stated above unless, on petition of the landlord, the Administrator certifies that the landlord may pursue his remedies in accordance with the requirements of the local law. The Administrator shall so certify if the landlord establishes that removals or evictions of the character proposed are not inconsistent with the purposes of the Act or this maximum rent regulation and would not be likely to result in the circumvention or evasion thereof.

(2) Removal or eviction of a tenant for occupancy by a purchaser who has acquired his rights in the housing accommodations on or after the effective date of this maximum rent regulation, is inconsistent with the purposes of the Act and this maximum rent regulation and would be likely to result in the circumvention or evasion thereof, unless (i) the payment or payments of principal made by the purchaser, excluding any payments made from funds borrowed for the purpose of making such principal payments, aggregate 33 $\frac{1}{3}$ % or more of the purchase price, and (ii) a period of three months has elapsed after the issuance of a certificate by the Administrator

as hereinafter provided. For the purposes of this paragraph (b) (2), the payments of principal may be made by the purchaser conditionally or in escrow to the end that they shall be returned to the purchaser in the event the Administrator denies a petition for a certificate. If the Administrator finds that the required payments of principal have been made, he shall, on petition of either the vendor or purchaser, issue a certificate authorizing the purchaser to pursue his remedies for removal or eviction of the tenant in accordance with the requirements of the local law at the expiration of three months after the date of issuance of such certificate. In no other case shall the Administrator issue a certificate for occupancy by a purchaser who has acquired his rights in the housing accommodations on or after the effective date of this maximum rent regulation, unless he finds that the vendor has or had a substantial necessity requiring the sale and that a reasonable sale or disposition of the accommodations could not be made without removal or eviction of the tenant, or unless he finds that other special hardship would result; under such circumstances the payment by the purchaser of 33 $\frac{1}{3}$ % of the purchase price shall not be a condition to the issuance of a certificate, and the certificate shall authorize the vendor or purchaser to pursue his remedies for removal or eviction of the tenant in accordance with the requirements of the local law.

(c) (1) The provisions of this section do not apply to a subtenant or other person who occupied under a rental agreement with the tenant, where removal or eviction of the subtenant or other such occupant is sought by the landlord of the tenant, unless under the local law there is a tenancy relationship between the landlord and the subtenant or other such occupant.

(2) The provisions of this section shall not apply to housing accommodations rented to either Army or Navy personnel, including civilian employees of the War and Navy Departments, for which the rent is fixed by the national rent schedule of the War or Navy Department.

(3) The provisions of this section shall not apply to an occupant of a furnished room or rooms not constituting an apartment, located within the residence occupied by the landlord or his immediate family, where such landlord rents to not more than two occupants within such residence.

(d) (1) Every notice to a tenant to vacate or surrender possession of housing accommodations shall state the ground under this section upon which the landlord relies for removal or eviction of the tenant. A written copy of such notice shall be given to the area rent office within 24 hours after the notice is given to the tenant.

No tenant shall be removed or evicted from housing accommodations, by court process or otherwise, unless, at least ten days prior to the time specified for surrender of possession and to the commencement of any action for removal or eviction, the landlord has given written notices of the proposed removal or evic-

tion to the tenant and to the area rent office, stating the ground under this section upon which such removal or eviction is sought and specifying the time when the tenant is required to surrender possession.

Where the ground for removal or eviction of a tenant is non-payment of rent, every notice under this paragraph (d) (1) shall state the rent for the housing accommodations, the amount of rent due and the rental period or periods for which such rent is due. The provisions of this paragraph (d) (1) shall not apply where a certificate has been issued by the Administrator pursuant to the provisions of paragraph (b) of this section.

(2) At the time of commencing any action to remove or evict a tenant, including an action based upon non-payment of rent, the landlord shall give written notice thereof to the area rent office stating the title of the case, the number of the case where that is possible, the court in which it is filed, the name and address of the tenant, and the ground under this section on which removal or eviction is sought.

(e) No provision of this section shall be construed to authorize the removal of a tenant unless such removal is authorized under the local law.

§ 1388.887 *Registration.* Within 45 days after the effective date of this maximum rent regulation, or within 30 days after the property is first rented, whichever date is the later, every landlord of housing accommodations rented or offered for rent shall file in triplicate a written statement on the form provided therefor to be known as a registration statement. The statement shall identify each dwelling unit and specify the maximum rent provided by this maximum rent regulation for such dwelling unit and shall contain such other information as the Administrator shall require. The original shall remain on file with the Administrator and he shall cause one copy to be delivered to the tenant and one copy stamped to indicate that it is a correct copy of the original, to be returned to the landlord. In any subsequent change of tenancy the landlord shall exhibit to the new tenant his stamped copy of the registration statement, and shall obtain the tenant's signature and the date thereof, on the back of such statement. Within five days after renting to a new tenant, the landlord shall file a notice on the form provided therefor, on which he shall obtain the tenant's signature, stating that there has been a change in tenancy, that the stamped copy of the registration statement has been exhibited to the new tenant and that the rent for such accommodations is in conformity therewith.

No payment of rent need be made unless the landlord tenders a receipt for the amount to be paid.

When the maximum rent is changed by order of the Administrator, the landlord shall deliver his stamped copy of the registration statement to the Area Rent Office for appropriate action reflecting such change.

The foregoing provisions of this section shall not apply to housing accommodations under § 1388.884 (g). The owner of such housing accommodations shall file a schedule or schedules, setting out the maximum rents for all such accommodations in the defense-rental area and containing such other information as the Administrator shall require. A copy of such schedule or schedules shall be posted by the owner in a place where it will be available for inspection by the tenants of such housing accommodations.

The provisions of this section shall not apply to housing accommodations rented to either Army or Navy personnel, including any civilian employees of the War and Navy Departments, for which the rent is fixed by the national rent schedule of the War or Navy Department.

§ 1388.888 *Inspection.* Any person who rents or offers for rent or acts as a broker or agent for the rental of housing accommodations and any tenant shall permit such inspection of the accommodations by the Administrator as he may, from time to time, require.

§ 1388.889 *Evasion.* The maximum rents and other requirements provided in this Maximum Rent Regulation No. 62 shall not be evaded, either directly or indirectly, in connection with the renting or leasing or the transfer of a lease of housing accommodations, by way of absolute or conditional sale, sale with purchase money or other form of mortgage, or sale with option to repurchase, or by modification of the practices relating to payment of commissions or other charges or by modification of the services furnished with housing accommodations, or otherwise.

§ 1388.890 *Enforcement.* Persons violating any provision of this Maximum Rent Regulation 62 are subject to criminal penalties, civil enforcement actions and suits for treble damages as provided for by the Act.

§ 1388.891 *Procedure.* All registration statements, reports and notices provided for by this maximum rent regulation shall be filed with the area rent office. All landlord's petitions and tenant's applications shall be filed with such office in accordance with Procedural Regulation No. 3 (§§ 1300.201 to 1300.247, inclusive).²

§ 1388.892 *Petitions for amendment.* Persons seeking any amendment of general applicability to any provision of this maximum rent regulation may file petitions therefor in accordance with Procedural Regulation No. 3 (§§ 1300.241 to 1300.247, inclusive).

PART 1388—DEFENSE-RENTAL AREAS

[MRR 63 A]

HOTELS AND ROOMING HOUSES

CAPE CHARLES DEFENSE-RENTAL AREA

In the judgment of the Administrator, rents for housing accommodations within the Cape Charles Defense-Rental Area, as designated in the designation and rent declaration issued by the Administrator on October 5, 1942, as amended, have not been reduced and stabilized by State or local regulation, or otherwise, in accordance with the recommendations set forth in the said designation and rent declaration.

It is the judgment of the Administrator that by April 1, 1941, defense activities had not yet resulted in increase in rents for housing accommodations within the Cape Charles Defense-Rental Area inconsistent with the purposes of the Emergency Price Control Act of 1942. The Administrator has therefore ascertained and given due consideration to the rents prevailing for housing accommodations within the Cape Charles Defense-Rental Area on or about March 1, 1942. The Administrator has made adjustments for such relevant factors as he has determined and deemed to be of general applicability in respect of such housing accommodations, including increases or decreases in property taxes and other costs.

In the judgment of the Administrator, the maximum rents established by this maximum rent regulation for rooms in hotels and rooming houses within the Cape Charles Defense-Rental Area will be generally fair and equitable and will effectuate the purposes of the Emergency Price Control Act of 1942.

Therefore, under the authority vested in the Administrator by the Act, this Maximum Rent Regulation No. 63A is hereby issued.

AUTHORITY: §§ 1388.931 to 1388.944, inclusive, issued under Pub. Law 421, 77th Cong.

§ 1388.931 *Scope of regulation.* (a) This Maximum Rent Regulation No. 63A applies to all rooms in hotels and rooming houses within the Cape Charles Defense-Rental Area (referred to hereinafter in this maximum rent regulation as the "defense-rental area"), as designated in the Designation and Rent Dec-

laration No. 31 (§§ 1388.1341 to 1388.1345, inclusive)* issued by the Administrator on October 5, 1942, as amended, except as provided in paragraph (b) of this section.

(b) This maximum rent regulation does not apply to the following:

(1) Rooms situated on a farm and occupied by a tenant who is engaged for a substantial portion of his time in farming operations thereon;

(2) Rooms occupied by domestic servants, caretakers, managers, or other employees to whom the rooms are provided as part of their compensation and who are employed for the purpose of rendering services in connection with the premises of which the rooms are a part;

(3) Rooms in hospitals, or rooms of charitable or educational institutions used in carrying out their charitable or educational purposes;

(4) Entire structures or premises used as hotels or rooming houses, as distinguished from the rooms within such hotels or rooming houses.

(c) The provisions of any lease or other rental agreement shall remain in force pursuant to the terms thereof, except insofar as those provisions are inconsistent with this maximum rent regulation.

(d) An agreement by the tenant to waive the benefit of any provision of this maximum rent regulation is void. A tenant shall not be entitled by reason of this maximum rent regulation to refuse to pay or to recover any portion of any rents due or paid for use or occupancy prior to the effective date of this maximum rent regulation.

(e) Where a building or establishment which does not come within the definitions of a hotel or rooming house contains one or more furnished rooms or other furnished housing accommodations rented on a daily, weekly or monthly basis, the landlord may, with the consent of the Administrator, elect to bring all housing accommodations within such building or establishment under the control of this maximum rent regulation. A landlord who so elects shall file a registration statement under this maximum rent regulation for all such housing accommodations, accompanied by a written request to the Administrator to consent to such election.

If the Administrator finds that the provisions of this maximum rent regulation establishing maximum rents are better adapted to the rental practices for such building or establishment than the provisions of this maximum rent regulation for housing accommodations other than hotels and rooming houses, he shall consent to the landlord's election. Upon such consent, all housing accommodations within such building or establishment which are or hereafter may be rented or offered for rent shall become subject to the provisions of this maximum rent regulation, and shall be considered rooms within a rooming house for the purposes of the provisions relating to eviction.

* 7 F.R. 7942.

The landlord may at any time, with the consent of the Administrator, revoke his election, and thereby bring under the control of the maximum rent regulation for housing accommodations other than hotels and rooming houses all housing accommodations previously brought under the maximum rent regulation by such election. He shall make such revocation by filing a registration statement or statements under the maximum rent regulation for housing accommodations other than hotels and rooming houses, including in such registration statement or statements all housing accommodations brought under this maximum rent regulation by such election. Such registration statement or statements shall be accompanied by a written request to the Administrator to consent to such revocation. The Administrator may defer action on such request if he has taken or is about to take action to decrease the maximum rents of any housing accommodations within such building or establishment. If the Administrator finds that the revocation so requested will not result in substantial increases in the maximum rents of housing accommodations affected by such revocation, he shall give such consent. Upon such consent, all housing accommodations affected by such revocation shall become subject to the provisions of the maximum rent regulation for housing accommodations other than hotels and rooming houses.

§ 1388.932 *Prohibition.* (a) Regardless of any contract, agreement, lease or other obligation heretofore or hereafter entered into no person shall demand or receive any rent for use or occupancy on and after the effective date of this maximum rent regulation of any room in a hotel or rooming house within the defense-rental area higher than the maximum rents provided by this maximum rent regulation; and no person shall offer, solicit, attempt, or agree to do any of the foregoing. Lower rents than those provided by this maximum rent regulation may be demanded or received.

(b) No tenant shall be required to change his term of occupancy if that will result in the payment of a higher amount per day than the maximum rent established for his present term of occupancy. Where, on June 15, 1942, or between that date and the effective date of this maximum rent regulation, a room was regularly rented or offered for rent for a weekly or monthly term of occupancy, the landlord shall continue to offer the room for rent for that term of occupancy, unless he offers another term of occupancy for a rent which results in the payment of an amount no higher per day.

§ 1388.933 *Minimum services, furniture, furnishings and equipment.* Except as set forth in § 1388.935 (b), every landlord shall, as a minimum, provide with a room the same essential services, furniture, furnishings and equipment as those provided on the date or during the thirty-day period determining the maximum rent, and as to other services, furniture, furnishings and equipment not

substantially less than those provided on such date or during such period: *Provided, however,* That where fuel oil is used to supply heat or hot water for a room, and the landlord provided heat or hot water on the date or during the thirty-day period determining the maximum rent, the heat and hot water which the landlord is required to supply shall not be in excess of the amount which he can supply under any statute, regulation or order of the United States or any agency thereof which rations or limits the use of fuel oil.

§ 1388.934 *Maximum rents.* This section establishes separate maximum rents for different terms of occupancy (daily, weekly, or monthly) and numbers of occupants of a particular room. Maximum rents for rooms in a hotel or rooming house (unless and until changed by the Administrator as provided in § 1388.935) shall be:

(a) For a room rented or regularly offered for rent during the thirty days ending on March 1, 1942, the highest rent for each term or number of occupants for which the room was rented during that thirty-day period, or, if the room was not rented or was not rented for a particular term or number of occupants during that period, the rent for each term or number of occupants for which it was regularly offered during such period.

(b) For a room neither rented nor regularly offered for rent during the thirty days ending on March 1, 1942, the highest rent for each term or number of occupants for which the room was rented during the thirty days commencing when it was first offered for rent after March 1, 1942; or, if the room was not rented or was not rented for a particular term or number of occupants during that period, the rent for each term or number of occupants for which it was regularly offered during such period.

(c) For a room rented for a particular term or number of occupants for which no maximum rent is established under paragraphs (a) or (b) of this section the first rent for the room after March 1, 1942, for that term and number of occupants, but not more than the maximum rent for similar rooms for the same term and number of occupants in the same hotel or rooming house.

(d) For a room constructed by the United States or any agency thereof, or by a State of the United States or any of its political subdivisions, or any agency of the State or any of its political subdivisions, and owned by any of the foregoing, the rent generally prevailing in the defense-rental area for comparable rooms on March 1, 1942, as determined by the owner of such rooms: *Provided, however,* That any corporation formed under the laws of a State shall not be considered an agency of the United States within the meaning of this paragraph. The Administrator may order a decrease in the maximum rent as provided in § 1388.935 (c) (1).

(e) For a room with which meals were provided during the thirty-day period determining the maximum rent without

separate charge therefor, the rent apportioned by the landlord from the total charge for the room and meals. The landlord's apportionment shall be fair and reasonable and shall be reported in the registration statement for such room. The Administrator at any time on his own initiative or on application of the tenant may by order decrease the maximum rent established by such apportionment, if he finds that the apportionment was unfair or unreasonable.

Every landlord who provides meals with accommodations shall make separate charges for the two. No landlord shall require the taking of meals as a condition of renting any room unless the room was rented or offered for rent on that basis on June 15, 1942.

(f) For a room rented to either Army or Navy personnel, including civilian employees of the War and Navy Departments, for which the rent is fixed by the national-rent schedule of the War or Navy Department, the rents established on the effective date of this maximum rent regulation by such rent schedule. The Administrator may order an increase in such rents, if he finds that such increase is not inconsistent with the purposes of the Act or this maximum rent regulation.

§ 1888.935 *Adjustments and other determinations.* In the circumstances enumerated in this section, the Administrator may issue an order changing the maximum rents otherwise allowable or the minimum services required. Except in cases under paragraphs (a) (7) and (c) (4) of this section, every adjustment of a maximum rent shall be on the basis of the rent which the Administrator finds was generally prevailing in the defense-rental area for comparable rooms on March 1, 1942: *Provided, however,* That no maximum rent shall be increased because of a major capital improvement or an increase in services, furniture, furnishings or equipment, by more than the amount which the Administrator finds would have been on March 1, 1942, the difference in the rental value of the accommodations by reason of such improvement or increase: *And provided, further,* That no adjustment shall be ordered because of a major capital improvement, an increase or decrease in services, furniture, furnishings or equipment, or a deterioration, where it appears that the rent during the thirty-day period determining the maximum rent was fixed in contemplation of and so as to reflect such change. In cases involving construction due consideration shall be given to increased costs of construction, if any, since March 1, 1942. In cases under paragraphs (a) (7), and (c) (4) of this section the adjustment shall be on the basis of the rents which the Administrator finds were generally prevailing in the defense-rental area for comparable rooms during the year ending on March 1, 1942.

(a) Any landlord may file a petition for adjustment to increase the maximum rent otherwise allowable, only on the grounds that:

(1) There has been, since the thirty-day period or the other determining the maximum rent for the room, a substantial change in the room by a major capital improvement as distinguished from ordinary repair, replacement and maintenance.

(2) There was, on or prior to March 1, 1942, a substantial change in the room by a major capital improvement as distinguished from ordinary repair, replacement and maintenance, and the rent during the thirty-day period ending on March 1, 1942, was fixed by a lease or other rental agreement which was in force at the time of such change.

(3) There has been a substantial increase in the services, furniture, furnishings or equipment provided with the room since the thirty-day period or the order determining its maximum rent.

(4) The rent during the thirty-day period determining the maximum rent was materially affected by the blood, personal or other special relationship between the landlord and the tenant, or by an allowance or discount to a tenant of a class of persons to whom the landlord regularly offered such an allowance or discount, and as a result was substantially lower than the rent generally prevailing in the Defense-Rental Area for comparable rooms on March 1, 1942.

(5) There was in force on March 1, 1942, a written lease, for a term commencing on or prior to March 1, 1941, requiring a rent substantially lower than the rent generally prevailing in the defense-rental area for comparable rooms on March 1, 1942.

(6) The rent during the thirty-day period determining the maximum rent was established by a lease or other rental agreement which provided for a substantially higher rent at other periods during the term of such lease or agreement.

(7) The rent during the thirty-day period determining the maximum rent for the room was substantially lower than at other times of year by reason of seasonal demand for such room. In such cases the Administrator's order may if he deems it advisable provide for different maximum rents for different periods of the calendar year.

(b) (1) If, on the effective date of this maximum rent regulation, the services provided for a room are less than the minimum services required by § 1388.933, the landlord shall either restore and maintain such minimum services or, within 30 days after such effective date, file a petition requesting approval of the decreased services. If, on such effective date, the furniture, furnishings or equipment provided with a room are less than the minimum required by § 1388.933, the landlord shall, within 30 days after such date, file a written report showing the decrease in furniture, furnishings or equipment.

(2) Except as above provided, the landlord shall, until the room becomes vacant, maintain the minimum services, furniture, furnishings and equipment unless and until he has filed a petition to decrease the services, furniture, furnishings or equipment and an order permitting a decrease has been entered

thereon; however, if it is impossible to provide the minimum services, furniture, furnishings or equipment he shall file a petition within 10 days after the change occurs. When the room becomes vacant the landlord may, on renting to a new tenant, decrease the services, furniture, furnishings or equipment below the minimum; within 10 days after so renting the landlord shall file a written report showing such decrease.

(3) The order on any petition under this paragraph may require an appropriate adjustment in the maximum rent; and any maximum rent for which a report is required by this paragraph may be decreased in accordance with the provisions of § 1388.935 (c) (3). If the landlord fails to file the petition or report required by this paragraph within the time specified, or decreases the services, furniture, furnishings or equipment without an order authorizing such decrease where such order is required, the rent received by the landlord for any rental period commencing on or after such decrease or the effective date of this maximum rent regulation, whichever is the later, shall be received subject to refund to the tenant of any amount in excess of the maximum rent which may later be fixed by any order decreasing the maximum rent on account of such decrease in services, furniture, furnishings or equipment. In such case, any order decreasing the maximum rent shall be effective to decrease such rent from the beginning of the first rental period after the decrease in services, furniture, furnishings or equipment or after the effective date of this maximum rent regulation, whichever is the later. The foregoing provisions and any refund thereunder do not affect any civil or criminal liability provided by the Act for failure to comply with any requirement of this paragraph.

(c) The Administrator at any time, on his own initiative or on application of the tenant, may order a decrease of the maximum rent otherwise allowable, only on the grounds that:

(1) The maximum rent for the room is higher than the rent generally prevailing in the defense-rental area for comparable rooms on March 1, 1942.

(2) There has been a substantial deterioration of the room other than ordinary wear and tear since the date or order determining its maximum rent.

(3) There has been a decrease in the minimum services, furniture, furnishings or equipment required by § 1388.933 since the date or order determining the maximum rent.

(4) The rent on the date determining the maximum rent for the room was substantially higher than at other times of year by reason of seasonal demand for such room. In such cases the Administrator's order may if he deems it advisable provide for different maximum rents for different periods of the calendar year.

(d) If the rent on the date determining the maximum rent, or any other fact necessary to the determination of the maximum rent, is in dispute between the landlord and the tenant, or is in doubt, or is not known, the Administrator on petition of the landlord filed within 30 days after the effective date of this maximum rent regulation, or at any time on his own initiative, may enter an order fixing the maximum rent by determining such fact; or if the Administrator is unable to ascertain such fact he shall enter the order on the basis of the rent which he finds was generally prevailing in the defense-rental area for comparable rooms on March 1, 1942.

§ 1388.936 *Restrictions on removal of tenant.* (a) So long as the tenant continues to pay the rent to which the landlord is entitled, no tenant of a room within a hotel or rooming house shall be removed from such room, by action to evict or to recover possession, by exclusion from possession, or otherwise, nor shall any person attempt such removal or exclusion from possession, notwithstanding that such tenant has no lease or that his lease or other rental agreement has expired or otherwise terminated unless:

(1) The tenant, who had a written lease or other written rental agreement, has refused upon demand of the landlord to execute a written extension or renewal thereof for a further term of like duration but not in excess of one year but otherwise on the same terms and conditions as the previous lease or agreement except insofar as such terms and conditions are inconsistent with this maximum rent regulation; or

(2) The tenant has unreasonably refused the landlord access to the room for the purpose of inspection or of showing the room to a prospective purchaser, mortgagee or prospective mortgagee, or other person having a legitimate interest therein: *Provided, however,* That such refusal shall not be ground for removal or eviction if such inspection or showing of the room is contrary to the provisions of the tenant's lease or other rental agreement; or

(3) The tenant (i) has violated a substantial obligation of his tenancy, other than an obligation to pay rent, and has continued, or failed to cure such violation after written notice by the landlord that the violation cease, or (ii) is committing or permitting a nuisance or is using or permitting a use of the room for an immoral or illegal purpose; or

(4) The landlord seeks in good faith to recover possession for the immediate purpose of demolishing the room or of substantially altering or remodeling it in a manner which cannot practicably be done with the tenant in occupancy and the plans for such alteration or remodeling have been approved by the proper authorities, if such approval is required by local law; or

(5) The landlord seeks in good faith not to offer the room for rent. If a tenant has been removed or evicted from a room under this paragraph (a) (5), the landlord shall file a written report on a form provided therefor before renting the room during a period of 6 months after such removal or eviction.

(b) No tenant shall be removed or evicted on grounds other than those stated above unless, on petition of the landlord, the Administrator certifies that the landlord may pursue his remedies in accordance with the requirements of the local law. The Administrator shall so certify if the landlord establishes that removals or evictions of the character proposed are not inconsistent with the purposes of the Act or this maximum rent regulation and would not be likely to result in the circumvention or evasion thereof.

(c) At the time of commencing any action to remove or evict a tenant (except an action based on non-payment of a rent not in excess of the maximum rent) the landlord shall give written notice thereof to the area rent office stating the title and number of the case, the court in which it is filed, the name and address of the tenant and the grounds on which eviction is sought.

(d) The provisions of this section do not apply to:

(1) A subtenant or other person who occupied under a rental agreement with the tenant where removal or eviction of the subtenant or other such occupant is sought by the landlord of the tenant, unless under the local law there is a tenancy relationship between the landlord and the subtenant or other such occupant; or

(2) A tenant occupying a room within a hotel on a daily or weekly basis; or a tenant occupying on a daily basis a room within a rooming house which has heretofore usually been rented on a daily basis.

(3) Rooms rented to either Army or Navy personnel, including civilian employees of the War and Navy Departments, for which the rent is fixed by the national rent schedule of the War or Navy Department.

No provision of this section shall be construed to authorize the removal of a tenant unless such removal is authorized under the local law.

(4) An occupant of a furnished room or rooms not constituting an apartment, located within the residence occupied by the landlord or his immediate family, where such landlord rents to not more than two occupants within such residence.

§ 1388.937 *Registration and records.* (a) Within 45 days after the effective date of this maximum rent regulation every landlord of a room rented or offered for rent shall file a written statement on the form provided therefor, containing such information as the Ad-

ministrator shall require, to be known as a registration statement. Any maximum rent established after the effective date of this maximum rent regulation under paragraphs (b) or (c) of § 1388.934 shall be reported either on the first registration statement or on a statement filed within 5 days after such rent is established.

(b) Within 45 days after the effective date of this maximum rent regulation, every landlord shall post and thereafter keep posted conspicuously in each room rented or offered for rent a card or sign plainly stating the maximum rent or rents for all terms of occupancy and for all numbers of occupants for which the room is rented or offered for rent. Where the taking of meals by the tenant or prospective tenant is a condition of renting such room, the card or sign shall so state. Should the maximum rent or rents for the room be changed by order of the Administrator the landlord shall alter the card or sign so that it states the changed rent or rents.

The foregoing provisions of this paragraph shall not apply to rooms under § 1388.934 (d). The owner of such rooms shall post a copy of the registration statement in a place where it will be available for inspection by the tenants of such rooms.

(c) No payment of rent need be made unless the landlord tenders a receipt for the amount to be paid.

(d) The provisions of this section shall not apply to rooms rented to either Army or Navy personnel, including civilian employees of the War and Navy Departments, for which the rent is fixed by the national rent schedule of the War or Navy Department.

(e) Every landlord of a room rented or offered for rent shall preserve, and make available for examination by the Administrator, all his existing records showing or relating to (1) the rent for each term and number of occupants for which such room was rented or regularly offered for rent during the thirty-day period determining the maximum rent for such room and (2) the rent on any date determining a maximum rent for such room for a particular term and number of occupants under § 1388.934 (c).

Every landlord of an establishment containing more than 20 rooms rented or offered for rent shall keep, preserve, and make available for examination by the Administrator, records showing the rents received for each room, the particular term and number of occupants for which such rents were charged, and the name and permanent address of each occupant; every other landlord shall keep, preserve, and make available for examination by the Administrator, records of the same kind as he has customarily kept relating to the rents received for rooms.

§ 1388.938 *Inspection.* Any person who rents or offers for rent or acts as a broker or agent for the rental of a room

and any tenant shall permit such inspection of the room by the Administrator as he may from time to time require.

§ 1388.939 *Evasion.* The maximum rents and other requirements provided in this maximum rent regulation shall not be evaded, either directly or indirectly in connection with the renting or leasing or the transfer of a lease of a room, by requiring the tenant to pay or obligate himself for membership or other fees, or by modification of the practices relating to payment of commissions or other charges, or by modification of the services furnished with the room, or otherwise.

§ 1388.940 *Enforcement.* Persons violating any provision of this maximum rent regulation are subject to criminal penalties, civil enforcement actions and suits for treble damages as provided for by the Act.

§ 1388.941 *Procedure.* All registration statements, reports, and notices provided for by this maximum rent regulation shall be filed with the area rent office. All landlord's petitions and tenant's applications shall be filed with such office in accordance with Procedural Regulation No. 3 (§§ 1300.201 to 1300.247, inclusive).²

§ 1388.942 *Petitions for amendment.* Persons seeking any amendment of general applicability to any provision of this maximum rent regulation may file petitions therefor in accordance with Procedural Regulation No. 3 (§§ 1300.201 to 1300.247, inclusive).

PART 1351—FOOD AND FOOD PRODUCTS

[MPR 292]

SALES OF CITRUS FRUITS BY PACKERS,
BROKERS, AUCTION MARKETS, TERMINAL
SELLERS AND INTERMEDIATE SELLERS

In the judgment of the Price Administrator, it is necessary and proper in order to effectuate the purposes of the Emergency Price Control Act of 1942, as amended, and Executive Order No. 9250, that maximum prices be established for the sale of citrus fruits by packers, brokers, auction markets, terminal sellers and intermediate sellers.

The maximum prices established by this regulation are, in the judgment of the Price Administrator, generally fair and equitable and will effectuate the purposes of the Emergency Price Control Act of 1942, as amended, and Executive Order No. 9250 and will promote equitable distribution of citrus fruits through normal channels of trade.

A statement of the considerations involved in the issuance of this regulation has been issued simultaneously herewith and filed with the Division of the Federal Register.*

Therefore, under the authority vested in the Price Administrator by the Emergency Price Control Act of 1942, as amended, and Executive Order No. 9250, Maximum Price Regulation No. 292 is hereby issued.

AUTHORITY: §§ 1351.1401 to 1351.1416, inclusive, issued under Pub. Laws 421 and 729, 77th Cong.; E.O. 9250, 7 F.R. 7871.

§ 1351.1401 *Prohibition against dealing in citrus fruits above maximum prices.* (a) On and after January 11, 1943, regardless of any contract or other obligation, no seller subject to the provisions of this regulation shall sell or deliver any citrus fruits at a price higher than the maximum price established by this regulation for such seller.

(b) No person in the course of trade or business shall buy or receive any citrus fruits from a seller subject to the provisions of this regulation at a price higher than the maximum price established by this regulation for such seller; and

(c) No seller subject to this regulation or other person shall agree, offer, solicit or attempt to do any of the foregoing.

§ 1351.1402 *Sellers subject to the provisions of this Maximum Price Regulation No. 292.* (a) This regulation applies to the following sellers, as defined herein, of citrus fruits and such sellers shall be and they are subject to the provisions of this regulation: (1) Packers, (2) auction markets, (3) brokers, (4) terminal sellers, and (5) intermediate sellers.

*Copies may be obtained from the Office of Price Administration.

§ 1351.1403 *Definition of citrus fruits and general instructions.*—(a) *Meaning of citrus fruit.* "Citrus fruit" or "citrus fruits" when used in this regulation means any citrus fruit or fruits for which maximum prices are established by this regulation and any citrus fruit or fruits for which maximum prices may be established by amendment to this regulation.

(b) *Application of this regulation.* All provisions of this regulation shall apply on and after the effective date of this regulation to citrus fruits for which maximum prices are established herein and all provisions of this regulation shall apply to any citrus fruits for which maximum prices are established by amendment to this regulation, on and after the date such amendment becomes effective, unless otherwise specified in such amendment.

(c) *Separate maximum prices for separate items and units.* Any person subject to the provisions of this regulation shall calculate maximum prices separately for each item of citrus fruit and for each unit of each item, for each area and season shown for such item in § 1351.1416, Appendix A, of this regulation.

(d) *Freight.* Freight to be used in calculating any base price or maximum price pursuant to this regulation shall include actual charges for icing or refrigeration and shall mean freight by common carrier or contract carrier. In the event that the citrus fruit is transported by other means, freight shall be computed at the lowest available common carrier or contract carrier rate. Freight shall not include unloading or local trucking.

(e) *Fractions of a cent.* Any maximum price calculated for any citrus fruit under this regulation which contains a fraction of a cent shall be reduced to the nearest lower cent if the fraction is less than one-half cent and shall be increased to the nearest higher cent if the fraction is one-half cent or more.

(f) *Statement of intent and purposes.* The following statement is made in order to aid persons subject to this regulation to comply with the intent and purpose of this regulation:

(1) Maximum prices established by this regulation for intermediate sellers are calculated from base prices as established herein. Such base prices may or may not be the same as the actual prices paid. This regulation, in the provisions requiring notification of a base price, intends that the base price should be reported, and not the actual price.

(2) The base price to be used by an intermediate seller who purchases from a packer, broker, auction market or terminal seller shall be the base price reported to him by his supplier, unless

the intermediate seller must transport the merchandise to his own customary receiving point which is not within local hauling distance. If such hauling is necessary, the intermediate seller shall compute a new base price, which shall be the base price reported to him by his supplier plus freight to his own customary receiving point, not including loading, unloading or local trucking. That new base price then becomes his base price and also the base price to be reported by him when he sells to other intermediate sellers.

(3) It is the purpose of this regulation to permit handling and resale of citrus fruits by any number of intermediate sellers but not to permit such intermediate sellers to add successive mark-ups at the full margin allowed. All such intermediate sellers must sell within the limits of the maximum price which is established by a margin added to the base price regardless of the number of transactions. The intermediate seller who sells to the retailer, commercial, industrial or institutional user may not exceed the price reached by adding the mark-up to the base price and not to his cost.

§ 1351.1404 *Definition and maximum prices of packers, brokers, auction markets and terminal sellers.* (a) For the purposes of this regulation:

(1) A "packer" is a person who grades, sizes, packs, whether or not washed or waxed, or prepares citrus fruits for shipment to market.

(2) A "broker" is a person who acts as the packer's agent in the sale of citrus fruits and who does not warehouse, storage, or customarily distribute the citrus fruits.

(3) An "auction market" is a market to which citrus fruits are delivered and sold at auction for the account of the packer and which market charges a fee for such services.

(4) A "terminal seller" is a person who buys citrus fruits from a packer and sells them in the same or substantially the same units in which he purchased them and who does not warehouse or storage and does not customarily sell in less than carload lots.

(b) The maximum price for direct sales of citrus fruits sold by a packer, f. o. b. packing house, shall be as set forth in this section and in § 1351.1416, Appendix A, of this regulation.

(c) The maximum price for direct sales of citrus fruits by a packer, on a delivered basis, shall be the packer's maximum price, f. o. b. packing house, plus freight to the point of delivery.

(d) The maximum price for sales of citrus fruits through a broker shall be the packer's maximum price for direct sales multiplied by 1.015. If the sale is made f. o. b. packing house, the packer's maximum price for direct sales, f. o. b.

packing house, shall be used in such computation. If the sale is made on a delivered basis, the packer's maximum price for direct sales at the point of delivery shall be used in such computation.

(e) The maximum price for sales of citrus fruits at an auction market shall be the packer's maximum price for direct sales, delivered at the market, plus the usual auction charge or fee.

(f) The maximum price for sales of citrus fruits by a terminal seller shall be the packer's maximum price for direct sales, delivered at the terminal market, multiplied by 1.015.

(g) Every sale of citrus fruits by a packer, broker, auction market or terminal seller, to an intermediate seller, shall be accompanied by a notification in writing to the intermediate seller, showing the maximum price permitted for such sale, which price shall be called the "base price" in such notice. The "base price" so reported shall be the maximum price determined under the foregoing paragraphs of this section, whether or not such maximum price was paid, except that in the event of a direct sale by a packer, or a sale by a packer through a broker, on an f. o. b. packing house basis, the "base price" so reported shall be the maximum price for such sale on a delivered basis at the purchaser's customary receiving point.

(h) Each packer, broker, auction market and terminal seller shall make and preserve for examination by the Office of Price Administration, for so long as the Emergency Price Control Act of 1942, as amended, shall remain in effect, such records as he or it customarily kept relating to the prices charged for each item of citrus fruits after the effective date of this regulation.

§ 1351.1405 *Definition and maximum prices of intermediate sellers.* (a) For the purposes of this regulation, the term "intermediate sellers" means any wholesale sellers, jobbers or any other persons who take title and purchase for the purpose of reselling and who customarily make sales to other wholesalers, retailers, or industrial, institutional or commercial users, except that the term "intermediate sellers" shall not include packers, brokers, auction markets, terminal sellers or retailers as defined in this regulation. "Intermediate sellers" shall include commission merchants who receive citrus fruits on consignment and sell in the same or similar manner as other wholesalers and such commission merchants shall come within the appropriate class of intermediate sellers set forth in this section according to the type of distributive service rendered.

(b) Intermediate sellers shall be divided into the following classes:

(1) *Class 1: Retailer-owned cooperative wholesaler.* A retailer-owned co-

operative wholesaler is either a non-profit organization or a corporation of which 51% or more of the stock is owned by its retailer customers and which distributes citrus fruits for resale.

(2) *Class 2: Cash-and-carry wholesalers.* A cash-and-carry wholesaler is a wholesaler not in Class 1 who distributes citrus fruits for resale or to commercial, industrial or institutional users and who does not customarily deliver to purchasers.

(3) *Class 3: Service wholesalers.* A service wholesaler is a wholesaler not in Class 1 who distributes citrus fruits for resale or to commercial, industrial or institutional users and who customarily delivers to purchasers.

(c) The "base price" of any intermediate seller who purchases from a packer or broker, shall be the "base price" furnished to him by his supplier. The "base price" of any intermediate seller who purchases from an auction market or terminal seller shall be the "base price" of his supplier, except that if his supplier is not within local hauling distance of his customary receiving point, the intermediate seller shall compute a new "base price" by adding to that "base price" the freight to his customary receiving point. If he resells to another intermediate seller, he shall give such purchaser notice in writing of his "base price", which shall be the "base price" reported to him by his supplier or his newly computed "base price", as the case may be. The "base price" of a commission merchant making consignment sales shall be the packer's maximum price for direct sales, delivered at the commission merchant's customary receiving point.

(d) The "base price" of any intermediate seller who purchases from an intermediate seller shall be the same "base price" reported to him by his supplier. In the event that he resells to another intermediate seller he shall give such purchaser notice in writing of such "base price".

(e) The intermediate seller shall calculate his maximum price for each item of citrus fruit for each calendar week as follows:

(1) He shall first determine his proper class under paragraph (b) of this section.

(2) He shall next determine the "largest single purchase" made by him during the preceding calendar week of the citrus fruit for which he is calculating his maximum price. The "largest single purchase" means the greatest quantity of the item for which he is determining a maximum price, purchased in one lot, and which was delivered to his customary receiving point during the preceding calendar week. The "preceding calendar week" is the calendar week preceding the week for which he is calculating his maximum price.

(3) He shall next obtain his base price for his "largest single purchase" during the preceding calendar week. In the event that he made two or more purchases of the quantity which would be his "largest single purchase", he shall use as his base price the average of the base prices for such purchases.

(4) He shall then compute his maximum prices as follows:

(i) A commission merchant in Class 1 or Class 2, or any intermediate seller in Class 1 or Class 2 who buys from a packer, broker, auction market or terminal seller, shall multiply his base price by 1.095.

(ii) An intermediate seller in Class 1 or Class 2, who buys from another intermediate seller, shall multiply his base price by 1.20.

(iii) A commission merchant in Class 3, or any intermediate seller in Class 3 who buys from a packer, broker, auction market or terminal seller, shall multiply his base price by 1.21.

(iv) An intermediate seller in Class 3 who buys from another intermediate seller, shall multiply his base price by 1.32.

(5) The resulting figure in each case shall be the maximum price of the intermediate seller for the calendar week for the item of citrus fruit being priced.

(6) In the event that the intermediate seller received no deliveries of the item being priced, during the preceding calendar week, but made sales of the item during the preceding calendar week, his maximum price remains unchanged from his maximum price of the preceding calendar week. In the event that he received no deliveries and made no sales of the item during the preceding calendar week, he shall calculate his maximum price for the item in the same manner as set forth in this section except that he shall use the base price of the first lot of the item delivered to him during the calendar week for which he is computing a maximum price and the maximum price so calculated shall continue to be his maximum price for the remainder of the calendar week.

(f) No intermediate seller may change his customary allowance, discounts and price differentials for different classes of purchasers, unless such change results in a lower price.

(g) Every intermediate seller selling citrus fruits shall:

(1) Make and preserve for examination by the Office of Price Administration for so long as the Emergency Price Control Act of 1942, as amended, remains in effect, records of the same kind as he has customarily kept relating to the prices which he charges for each item of citrus fruits after the effective date of this regulation and, in addition, records showing as precisely as possible, the basis upon which he determined maximum prices for each item.

[MPR 26, Amendment 10]

DOUGLAS FIR AND OTHER WEST COAST LUMBER

A statement of the considerations involved in the issuance of this amendment has been issued simultaneously herewith and has been filed with the Division of the Federal Register.*

Sections 1381.53 and 1381.58 (a) (3) are amended, and a new subparagraph (4) is added to § 1381.62 (d) as set forth below:

*Copies may be obtained from the Office of Price Administration.

17 F.R. 4573, 5180, 5360, 6168, 6388, 6424, 7285, 7942, 8384, 8877, 8948.

§ 1381.53 *Adjustable pricing.* A price may not be made adjustable to a maximum price which will be in effect at some time after delivery of the lumber has been completed, but the price may be made adjustable to the maximum price in effect at the time of delivery.

§ 1381.58 *Definitions.* (a) * * *

(3) "Mill" means a manufacturing plant, concentration yard, or other establishment which processes into lumber by sawing, or planing at least 50 percent of the volume of such logs or lumber so purchased or received by it. The term mill also includes any Douglas fir plywood plant that manufactures from any percentage of its logs or cores of logs the items of lumber covered by this regulation.

(4) When a truck haul precedes rail shipment, as when a mill located away from a railhead hauls lumber by truck to the railhead, no addition may be made for the truck haul. However, in the following three cases a mill may apply for special permission to make an addition:

(i) Where the mill was located away from rail connections because it specialized in water-borne lumber, and where shortage of shipping has forced it to operate by rail;

(ii) Where the mill prior to the shortage of tires and gasoline, shipped lumber to the particular final destination, principally by all-truck haul, and now wishes to convert to truck-and-rail haul to save tires and gasoline;

(iii) Where a mill's rail connection has been abandoned since September 5, 1941.

The application should be made by letter to the Lumber Branch of the Office of Price Administration, Washington, D. C., and may be acted upon by letter. The addition may not be made on quotations or sales until permission has been received.

PART 1370—ELECTRIC APPLIANCES

[MPR 294]

USED HOUSEHOLD VACUUM CLEANERS AND ATTACHMENTS FOR USED HOUSEHOLD VACUUM CLEANERS

In the judgment of the Price Administrator the prices for the sale and rental of used vacuum cleaners and for attachments for used vacuum cleaners have risen to an extent and in a manner inconsistent with the purpose of the Emergency Price Control Act of 1942. The Price Administrator has ascertained and given due consideration to the prices for the sale and rental of used vacuum cleaners and for attachments for used household vacuum cleaners (less than one-half horsepower) prevailing between October 1 and October 15, 1941, and has made adjustments for such relevant factors as he has determined and deemed to be of general applicability. So far as practicable, the Price Administrator has advised and consulted with representative members of the industry which will be affected by this regulation.

In the judgment of the Price Administrator the maximum prices established by this regulation are and will be generally fair and equitable and will effectuate the purposes of said Act. A statement of the considerations involved in the issuance of this regulation has been issued simultaneously herewith and has been filed with the Division of the Federal Register.* Therefore under the authority vested in the Price Administrator by the Emergency Price Control Act

*Copies may be obtained from the Office of Price Administration.

§ 1370.72 *Less than maximum prices.* Lower prices than those established by Maximum Price Regulation No. 294 may be charged, demanded, paid, or offered.

§ 1370.73 *Evade.* (a) The price limitations set forth in this Maximum Price Regulation No. 294 shall not be evaded, whether by direct or indirect methods, in connection with an offer, solicitation, agreement, sale, rental, delivery, purchase or receipt of or relating to used household vacuum cleaners or attachments for used household vacuum cleaners, alone or in conjunction with any other commodity or by way of commission, services, transportation, or other charge or discount, premium, or other privilege, or by tying agreement, or other trade understanding, or otherwise.

The seller shall guarantee the efficient operation of the rebuilt vacuum cleaner at the time of delivery, and shall agree to replace without charge for labor or materials any part which is found to be defective during the one year period. Pick up or delivery expense and defects caused by normal wear or accidents are excluded from this guarantee. Specific

authorization must be obtained from the Office of Price Administration for the establishment of the maximum retail price for any rebuilt vacuum cleaner sold without a guarantee.

§ 1370.78 *Requirements for rebuilt vacuum cleaners.* (a) Before a vacuum cleaner shall be sold as "rebuilt", and subsequent to any previous use, the following requirements shall have been met:

(11) When reassembled all motor bearings and other bearings shall have been repacked with new grease or oil as the type of bearing requires.

(12) Electrical insulation—all cleaners shall have been capable of withstanding without breakdown for a period of 30 seconds the application of a 900 volt 60-cycle alternating potential between all current carrying parts and any non-current carrying metal parts, at the maximum operating temperature reached in normal use.

However, the seller must comply with the provisions of the following paragraphs, which are identical, except for appropriate changes in dates and terminology, with the sections of the General Maximum Price Regulation indicated in parentheses. PART 1382—HARDWOOD LUMBER

[Rev. MPR 97]

SOUTHERN HARDWOOD LUMBER

The title and preamble are amended and §§ 1382.101 to 1382.113, inclusive, are renumbered and amended to read as set forth herein:

In the judgment of the Price Administrator, the prices of Southern hardwood lumber have risen to an extent and in a manner inconsistent with the purposes of the Emergency Price Control Act of 1942. The Price Administrator has ascertained and given due consideration to the prices of Southern hardwood lumber prevailing between October 1 and October 15, 1941, and has made adjustments for such relevant factors as he has determined and deemed to be of general applicability. So far as practicable, the Price Administrator has advised and consulted with representative members of the industry which will be affected by this regulation.

In the judgment of the Price Administrator, the maximum prices established by this regulation are and will be generally fair and equitable and will effectuate the purposes of said Act. A statement of the considerations involved in the issuance of this regulation has been issued simultaneously herewith and has been filed with the Division of the Federal Register.*

Therefore, under the authority vested in the Price Administrator by the Emergency Price Control Act of 1942 as amended, and Executive Order No. 9250, Revised Maximum Price Regulation No. 97—Southern Hardwood Lumber, is hereby issued.

AUTHORITY: §§ 1382.101 to 1382.113, inclusive, issued under Pub. Laws 421 and 729, 77th Cong., E.O. 9250, 7 F.R. 7871.

*Copies may be obtained from the Office of Price Administration.

§ 1382.101 *Sales of Southern hardwood lumber at higher than maximum prices prohibited.* (a) On and after January 7, 1943, regardless of any contract or other obligation, no person shall sell or deliver, and no person shall buy or receive in the course of trade or business, any Southern hardwood lumber for direct-mill shipment at prices higher than the maximum prices fixed by this regulation, and no person shall agree, offer or attempt to do any of these things. The maximum f.o.b. mill prices are set forth in Appendix A.

(b) Prices lower than the maximum prices may, of course, be charged and paid.

— § 1382.102 *To what transactions, products, and persons this Regulation applies—*(a) *What transactions are covered—*(1) *Direct-mill shipments.* This ceiling applies to all shipments originating at a mill, no matter who the seller is, and no matter whether he usually is known as a mill, wholesaler, retailer or anything else. It does not apply to sales out of distribution yard stock. A shipment is regarded as originating at a mill if the lumber reaches the purchaser without ever becoming an integral part of the stock of a distribution yard. A sale is considered a sale out of distribution yard stock only if the lumber was a part of regular yard stock at the time the sale was made.

(2) *How to tell a mill from a distribution yard—*(i) *General tests.* The term "mill", as used here, covers what are known in the trade as sawmills, planing mills and concentration yards. Three types of establishments are described below: the first, (a), a typical sawmill or planing mill; the second, (b), a typical concentration yard; and the third, (c), a typical distribution yard. An establishment which resembles a typical sawmill or planing mill or a typical concentration yard more than it does a typical distribution yard is considered a mill; and one which resembles a typical distribution yard more than it does a typical sawmill or planing mill or a typical concentration yard is considered a distribution yard.

(a) A "typical sawmill or planing mill" is an establishment which is chiefly engaged in manufacturing lumber from logs or rough lumber by sawing or planing; which is located in or near a lumber producing area; which makes and sells chiefly Southern hardwood or softwood lumber.

(b) A "typical concentration yard" is an establishment which concentrates and prepares lumber for commercial shipment; which keeps in stock mostly Southern hardwood lumber; which has

its lumber brought in chiefly in rough green form by truck from small local sawmills and sells chiefly for rail shipment; and which has been located at its particular site to be near the lumber producing area.

(c) A "typical distribution yard" is a wholesale or retail lumber yard which gets lumber from mills or other yards; unloads, sorts, stores, and recells or redistributes it; which regularly maintains a varied stock of lumber from different regions; which gets its lumber mostly by rail and sells mostly for truck shipment; which is equipped to make quick deliveries of many different items of lumber; and which has been located at its particular site in order to be near a lumber consuming area.

(ii) *New yards.* In order to prevent violation of this regulation by unnecessarily routing through yards, the Office of Price Administration will not recognize distribution yards set up after January 1, 1943, unless the new yard writes to the Office of Price Administration, Washington, D. C., and proves that it satisfies the requirements of the definition and that the purpose is not to get around this regulation by means of unnecessary yard business. Until approval is received, the new yard cannot consider itself a distribution yard for the purpose of this regulation.

(iii) *Retail type sales excepted.* A "retail type" direct-mill sale is not subject to this regulation. A "retail type" direct-mill sale means a sale of not more than 2,000 feet of lumber in which the purchaser requests delivery to a point not more than 20 miles from the mill at which the shipment originates. It includes only sales of lumber to contractors or consumers for use in construction, remodeling, repair, maintenance, fabrication, or remanufacture, and it does not include sales for resale in substantially the same form.

(b) *What products are covered.* (1) This regulation covers all Southern hardwood lumber, whether the grades, sizes and specifications are specifically named in the price tables in Appendix A or not. All grade terms have the meaning given in the "Rules for the Measurement and Inspection of Hardwood Lumber" issued by the National Hardwood Lumber Association, effective January 1, 1942.

(2) This regulation covers all lumber produced from the following botanical species, and processed into lumber at mills located in the Southern hardwood region: sap sweet gum and red sweet gum (*Liquidambar styraciflua*), tupelo (*Nyssa aquatica*), black gum (*Nyssa sylvatica*), tough ash (*Fraxinus americana*), yellow poplar (*Liriodendron*

tulipifera), beech (*Fagus americana*), sycamore (*Platanus occidentalis*), soft maple (*Acer rubrum*); and the botanical species included in the genera of red oak and white oak (*Quercus*), magnolia (*Magnolia*), elm (*Ulmus*), cottonwood (*Populus*), willow (*Salix*), hickory (*Celtis*), hickory (*Hicoria*), basswood (*Tilia*), and ash (*Fraxinus*).

(3) The Southern hardwood area is described by exact boundary lines in Appendix B.

(4) Some of the things which this regulation does not cover are: glued stock, moulding, risers, step treads, thresholds, hand rails, bevel and drop siding, flooring, switch, croses and minetics, mine material, small dimension stock, and lath.

(c) *What persons are covered.* Any person who makes the kind of sale or purchase covered by this regulation is subject to it. The term "person" includes: an individual, corporation, partnership, association, or any other organized group; their legal successors or representatives; the United States, or any government, or any of its political subdivisions; or any agency of any of the foregoing.

§ 1382.103 *How to figure delivered prices; and mixed car charges—*(a) *Transportation addition.* The transportation charges set forth below may be added to the maximum f. o. b. mill prices set forth in Appendix A.

(1) *Common or contract carrier.* When shipment is by common or contract carrier, the following rules govern:

(i) When estimated weights are used, the rate times the estimated weight is the proper transportation charge. Estimated weights may be used only if they have been filed with the Office of Price Administration, Washington, D. C. The weights must be the weights used by the seller during the period October 1 to October 15, 1941. The estimated weight must be the weight for the exact kind of lumber actually shipped; for example, green weights may not be used if dry lumber is shipped. The transportation charge may be evened out to the nearest quarter-dollar per M.

(ii) When estimated weights are not used, the amount added for transportation must not be more than the amount actually paid to the common or contract carrier, evened out to the nearest quarter-dollar per M.

(2) *Private truck.* When shipment is by truck owned or controlled by the seller, the amount added for transportation may not be more than the actual cost to the seller of delivery by truck; and, no matter what the actual cost is, the amount added may not be more than the railroad charge at the carload rate

for the most similar haul. However, if this railroad charge is less than \$1.50, and if the actual cost of delivery is more than \$1.50, a transportation charge of \$1.50 may be made.

(3) *Trucking to railhead.* When a truck haul precedes rail shipment, as when a mill located away from a railhead hauls lumber by truck to the railhead, no addition may be made for the truck haul. However, in the following three cases a mill may apply for special permission to make an addition:

(i) Where the mill was located away from rail connections because it specialized in water-borne lumber, and where shortage of shipping has forced it to operate by rail;

(ii) Where the mill prior to the shortage of tires and gasoline shipped lumber to the particular final destination principally by all-truck haul, and now wishes to convert to truck-and-rail haul to save tires and gasoline;

(iii) Where a mill's rail connection has been abandoned since September 5, 1941.

The application should be made by letter to the Lumber Branch of the Office of Price Administration, Washington, D. C. The addition may not be made on quotations or sales until permission has been received.

(4) *Truck delivery after rail haul.* When truck delivery follows a rail haul, the actual cost of truck delivery may be added.

(5) *All-truck haul.* When an all-truck haul ends in delivery to the job site, no special addition may be made above the charges provided in subparagraphs (1) and (2) of this paragraph, since in this case delivery to the job site involves no extra expense.

(b) *Mixed cars.* The following additions per M may be made where the purchaser (or purchasers, in the case of a pool car) orders an item consisting of one species, thickness and grade, in the following quantities:

Quantity ordered:	Addition per M
3,000 to 4,000 ft.....	\$1.00
2,000 to 2,999 ft.....	2.00
1,000 to 1,999 ft.....	2.50
999 ft. and less.....	3.00

§ 1382.104 *What the invoice must contain—(a) General.* Because of the large number of possible additions to the basic f. o. b. mill prices, it is necessary that some of them be separately shown on the invoice. Otherwise the purchaser and the Office of Price Administration could not tell in many cases whether a price which appeared to be above the ceiling was proper or not.

Failure to invoice properly is just as much a violation of this regulation as charging an excessive price.

(b) *Basic price.* All invoices must contain a sufficiently complete description

of the lumber to show whether the price is proper or not. Any working, specification, quantity, or extra which affects the maximum price must be mentioned in the description. The amount added for these does not have to be separately shown, except in a few special cases which are specifically mentioned later.

(c) *Transportation charges.* In delivered sales, the invoice must contain the:

- (1) Point of origin of shipment,
- (2) Destination.

(3) Rail or truck rate (or, if shipment is by private truck, the amount added for transportation),

(4) The words "Direct-Mill Shipment."

(d) *Delivery, and custom kiln drying charges.* Any separate charge which the seller is permitted to make for the following must be separately shown on the invoice:

(1) Truck delivery after rail haul;

(2) Custom kiln drying: The invoice of the custom kiln must be attached to the lumber invoice of the seller.

§ 1382.105 *Prohibited practices—(a) General.* Any practice which is a device to get the effect of a higher-than-ceiling price without actually raising the price is as much a violation of this regulation as an outright over-ceiling price. This applies to devices making use of commissions, services, transportation arrangements, premiums, special privileges, tying-in agreements, trade understandings and the like.

(b) *Specific practices.* The following are among the specific practices prohibited:

(1) Getting the effect of a higher price by changing credit practices from what they were in October 1941. This includes decreasing credit periods, or making greater charges for extension of credit. In any case, on sales made through the Office of the Chief of Engineers, War Department, terms of 30 days net may be used. In all cases, if the sale is on cash terms, the maximum price must be reduced by the same amount as the sale price would have been reduced for similar cash terms on October 1, 1941. For example, if the maximum price without cash discount is \$40.00, and if in sales of this item on October 1, 1941 to purchasers of a certain class, the seller reduced sales prices 2 per cent for cash within 10 days, the ceiling cash price in sales to purchasers of this class is \$39.20.

(2) Refusing, without good reason, to ship except in small quantities, or in specified or restricted random lengths, or under other circumstances which bring the seller an extra return.

(3) Refusing, without good reason, to ship lumber in standard grades and in grade-rule range widths and lengths.

(4) Grading as a special grade lumber which normally is graded by the seller as a standard grade; or wrongly grading or invoicing lumber in any other way.

(5) Refusing to sell on an f. o. b. mill basis, and insisting on selling on a delivered basis.

(6) Unnecessarily routing lumber through a distribution yard.

(7) Quoting a gross price above the maximum price, even if accompanied by a discount, the effect of which is to bring the net price below the maximum.

(c) *Waiver of moisture content.* Under this regulation lumber is either green, partially dry, or dry. If it does not actually meet this regulation's moisture-content requirements for dry lumber, it cannot be sold at the dry price, even if the moisture requirement is waived.

(d) *Purchasing commissions.* No purchasing commission based on the quantity or value of lumber purchased may be charged or paid, if the commission plus the purchase price is an amount over the maximum price.

(e) *Combination grades.* Lumber sold on combination or special inspection grades, for which no maximum price has been established in this regulation, such as log run, mill run, or No. 1 Common and Better, may not be sold at above the maximum price for the lowest grade actually included in the special inspection grade. For example, the maximum price for No. 2 Common and Better is that set for No. 2 Common. Of course, the amount of the different grades included can be quoted and invoiced separately at the individual prices for those grades.

(f) *Adjustable pricing.* A price may not be made adjustable to a maximum price which will be in effect at some time after delivery of the lumber has been completed. But the price may be adjustable to the maximum price in effect at the time of delivery.

§ 1382.106 *Grades, specifications and extras not specifically priced.* (a) Southern hardwood lumber, sold on special grades or specifications, or with special services or other extras not specifically mentioned in Appendix A, is nevertheless subject to this regulation. The maximum price is a price which bears the October 1941 relation to the most comparable standard item. The seller should find his price difference between the special item and this most comparable standard item in October 1941 or the first month before that in which he had sales of both items, or if this is impossible, the price differential he would have used. This difference is then added to or subtracted from the maximum price of the comparable standard grade, and the result is the maximum price for the special grade.

This price must be reported to the Office of Price Administration, Washington, D. C., on OPA Form 197:3, given in paragraph (c) below. It may be ordered reduced, if it is found excessive. But if the price is not disapproved within 30 days of the receipt of the report, it is approved.

(b) A seller using this pricing section can go ahead with delivery of the lumber and collection of the price he has computed or requested. But he must tell the buyer that the price is subject to revision within the thirty-day period, and, if the price is ordered reduced, must refund any excess over the final approved price.

(c) OPA Form 197:3 is as follows:

(d) Existing authorizations. (1) Any reports filed prior to January 7, 1943, with the Office of Price Administration under any of the former special grade provisions of Maximum Price Regulation 97 shall be considered as reports filed under paragraph (c) just above.

(2) Maximum prices for special grades or items, other than No. 1 construction boards approved before January 7, 1943, by the Office of Price Administration shall continue in effect as the maximum prices for these special grades or items produced at the mill which obtained the approval. With respect to these special grades or items, the producing mill need not file the report required in paragraph (c) of this section.

§ 1382.107 Petitions for adjustment and amendment—(a) Government contracts. (1) The term "government contract" is here used to include any contract with the United States or any of its agencies, or with the Government or any governmental agency of any country whose defense the President deems vital to the defense of the United States under the terms of the Act of March 11, 1941, entitled "An Act to promote the defense of the United States". It also includes any subcontract under this kind of contract.

(2) Any person who has made or intends to make a "government contract" and who thinks that a maximum price in this Regulation is impeding or threatens to impede production of lumber which is essential to the war program and which is or will be the subject of the contract, may file an application for adjustment in accordance with Procedural Regulation No. 6.¹

(3) As soon as the application is filed, deliveries and payments may be made at the requested price, subject to refund if that requested price is disapproved or lowered. The seller must tell the buyer that the delivery is made subject to this refund.

(b) Petitions for amendment. Any person seeking an amendment of any provision of this regulation, may file a

petition for amendment in accordance with the provisions of Revised Procedural Regulation No. 1,² issued by the Office of Price Administration.

§ 1382.108 Records and reports—(a) Records. All sellers of Southern hardwood lumber must keep records which will show a complete description of the item of lumber sold, the name and address of the buyer, the date of the sale and the price. Buyers must keep similar records, including the name and address of the seller. These records must be kept for any month in which the seller or buyer sold or bought \$500.00 worth or more of Southern hardwood lumber. They must be kept for two years, for inspection by the Office of Price Administration. Any records which the Office of Price Administration later requires must also be kept.

(b) Reports. Any reports that the Office of Price Administration requires must be submitted.

§ 1382.109 Enforcement and licensing. (a) Persons violating any provision of this regulation are subject to the criminal penalties, civil enforcement actions, suits for treble damages, and proceedings for revocation of licenses provided for by the Emergency Price Control Act of 1942.

(b) Persons who have evidence of any violation of this regulation or of any other regulation or order issued by the Office of Price Administration are urged to communicate with the nearest field, state, or regional office of the Office of Price Administration or its principal office in Washington, D. C.

(c) War procurement agencies and their contracting or paying finance officers are not subject to any liability, civil or criminal, imposed by this regulation. "War procurement agencies" include the War Department, the Navy Department, the United States Maritime Commission and the Lend-Lease Section in the Procurement Division of the Treasury Department, or any of their agencies.

(d) All sellers of Southern hardwood lumber under this regulation, except mills, have been licensed by Supplementary Order 18.³ This order, in brief, provides that a license is necessary, except for mills, to make sales under this regulation. A license is automatically granted to all sellers making these sales. It is not necessary to apply specially for

¹ 7 F.R. 2361.
² 7 F.R. 7240.

³ 7 F.R. 5087, 5664.

the license, but a registration may later be required. The Emergency Price Control Act of 1942 and Supplementary Order 18 tell the circumstances under which licenses may be suspended. The license cannot be transferred.

§ 1382.110 *Relation to other regulations—(a) General Maximum Price Regulation.* Any sale or delivery covered by Revised Maximum Price Regulation 97 is not subject to the General Maximum Price Regulation.

(b) *Revised Maximum Export Price Regulation.* The maximum price for export sales of Southern hardwood lumber is governed by the Revised Maximum Export Price Regulation.

§ 1382.111 *Effective date.* (a) This regulation (§§ 1382.101 to 1382.113, inclusive) shall become effective January 7, 1943.

(b) If lumber has been received before January 7, 1943, by a carrier, other than one owned or controlled by the seller, for shipment to a buyer, that shipment is not subject to this regulation. It remains subject to the terms of any regulation, whether the General Maximum Price Regulation or earlier version of this regulation, which covered it at the time the lumber was turned over to the carrier.

§ 1382.112 *Appendix A: Maximum prices for Southern hardwood lumber in standard or near-standard grades—(a) Application of Appendix A.* Appendix A applies to all Southern hardwood lumber of the species and grades named, when sold on grade-rule-range widths and lengths, or widths and lengths substantially the same as grade-rule-range widths and lengths, or on specified average widths or specified average lengths which are substantially run-of-the-log.

(b) *Basic maximum prices.* The maximum f. o. b. mill price for 1,000 feet of Southern hardwood lumber in a rough air-dried condition shall be as follows:

The following have been certified as "tough ash specialty establishments":

PART 1365—HOUSEHOLD FURNITURE

[Revised MPR 213]

COIL AND FLAT BEDSPRINGS WITH NON-STEEL FRAMES

The preamble is amended and §§ 1365.51 to 1365.74, inclusive are renumbered and amended to read as set forth below:

The purpose of this Revised Maximum Price Regulation No. 213 is to set specific maximum prices for coil and flat bedsprings with non-steel frames at manufacturing, wholesale and retail levels. It is necessary to revise Maximum Price Regulation 213 to include the new models of coil and flat bedsprings with non-steel frames which will be made in accordance with War Production Board Order L-49, as amended August 4, 1942, Amendment 2 limiting the amount of steel that may be contained in any bedspring. The Price Administrator has ascertained and given due consideration to the prices and the trade practices prevailing in the industry between October 1 and October 15, 1941, and has made adjustments for such relevant factors as he has determined and deemed to be of general applicability. So far as practicable, the Price Administrator has advised and consulted with representative members of the industry which will be affected by this regulation.

In the judgment of the Price Administrator, the maximum prices established by this revised regulation are and will be generally fair and equitable and will effectuate the purposes of the Emergency Price Control Act of 1942. A statement of the considerations involved in the issuance of this revised regulation has been issued simultaneously herewith and has been filed with the Division of the Federal Register.*

Therefore, under the authority vested in the Price Administrator by the Emergency Price Control Act of 1942, as amended, Executive Order No. 9250, and in accordance with Revised Procedural Regulation No. 1, issued by the Office of Price Administration, Revised Maximum

81 coil bedspring	3	7
88 coil bedspring	5	6
90 coil bedspring	4	7

(o) The specifications set forth in this section are for the full size 4'6" bedspring. Other widths are to conform to above specifications except for the number of coils, weight of wire, and number of steel bands which may vary in the same proportions as such specifications of the manufacturers' most comparable bedspring with a steel frame of any other width customarily varied from the specifications of the 4'6" size during the most recent period of production, provided such specifications conform to orders of the War Production Board.

(p) "Stabilizer" means a device fastened to and connecting the border frame to the base frame in a manner adequately to prevent sway.

(q) "Hardware and accessories" means any metal appurtenance attached to or used in the assembly of the bedspring, such as nails, screws, platform tops, stabilizers, etc., but does not include wire which is part of the bedspring proper.

§ 1365.58 **Permitted variations of specifications.** (a) If a manufacturer is unable to manufacture a bedspring fulfilling all of the requirements of a class of bedspring as set forth in § 1365.57, then upon specific authorization in writing by the Office of Price Administration any manufacturer may, at his option, vary the specifications of the classes of bedsprings from those set forth in § 1365.57 of this Revised Maximum Price Regulation No. 213 in the following ways by:

(1) Substituting a different gauge of wire which is of equivalent serviceability.

(2) Substituting a wood frame of different design or construction which is of equivalent strength and serviceability.

(3) Changing the number of coils without reducing the serviceability of the bedspring.

(4) Substituting a different type of spring fabric which is of equivalent strength and serviceability.

(b) The maximum price for a bedspring manufactured with all of the specifications of a class of bedspring set forth in § 1365.57, except for variations in specifications permitted in paragraph (a) shall be the price set forth in § 1365.53 for that class of bedspring, provided that such altered bedspring does not cost less than a bedspring fulfilling all of the requirements of that class of bedspring as set forth in § 1365.57. If such altered bedspring costs less then it shall be priced according to provisions of § 1365.61.

(c) Prior to manufacturing a bedspring for sale as a class of bedspring set forth in § 1365.57 with the variations of specifications set forth in paragraph (a) hereof, the manufacturer shall file with the Office of Price Administration, Washington, D. C., a statement setting forth (1) the specifications of the bedspring in which the substitution is being made, (2) the reason for the necessity of such substitution, (3) an explanation of why such a substitution does not decrease the serviceability of such bedspring, (4) a detailed cost breakdown of the direct labor and material for the proposed substitute bedspring and for the bedspring with specifications listed

in § 1365.57. Upon receipts by the manufacturer of authorization in writing from the Office of Price Administration, such manufacturer, and each subsequent purchaser may sell, offer to sell, or deliver the altered bedspring at a price no higher than the price established in this Revised Maximum Price Regulation No. 213 for sales of bedsprings of the class from which the altered bedspring differs only as the result of variations of specifications herein authorized.

§ 1365.59 **Maximum prices for sales at retail.** (a) The maximum cash prices for sale at retail of the following classes of coil and flat bedsprings with non-steel frames shall be the prices listed in the paragraph below:

(b) Carrying charges and credit terms for sales at retail of the classes of coil bedsprings listed in paragraph (a) hereof shall be no less favorable to the purchaser than those which such seller had in effect during March 1942 for the most comparable bedsprings to the extent that such terms are not in conflict with any law, regulation or order of the United States Government or agency thereof.

§ 1365.60 **Additions to basic maximum retail prices.** There may be added to the basic maximum cash prices of Class A, B, C, D, coil bedsprings with non-steel frames set forth in paragraph (a) of § 1365.59 of this Revised Maximum Price Regulation No. 213, \$1.75 for a full platform top, \$1.00 for a partial platform top and \$.25 per pair for stabilizers.

§ 1365.61 **Maximum prices for the sale of coil and flat bedsprings with non-steel**

frames other than those established under §§ 1365.53, 1365.54 and 1365.58.

(a) The maximum price for a coil or flat bedspring with a non-steel frame which does not comply with the specifications for any class of bedspring set forth in § 1365.57 of the Revised Maximum Price Regulation No. 213, and for which the manufacturer has filed no application under § 1365.58 of this Revised Maximum Price Regulation No. 213 shall be a price in line with those established under such sections specifically authorized by order of the Office of Price Administration.

(b) Prior to the first delivery or to first offering such bedspring for sale, the manufacturer shall submit to the Office of Price Administration, Washington, D. C., a report applying for specific authorization of the maximum price. The report shall contain a description in detail of the article (including the manufacturing process), a statement of the facts which make it necessary to price the article under this section and the proposed maximum f. o. b. factory, delivered and warehouse prices with a detailed explanation of their computation. The manufacturer shall also propose maximum prices for persons selling at wholesale and persons selling at retail in line with the differentials established in this Revised Maximum Price Regulation No. 213 for the classes of coil bedspring with wood frames listed in § 1365.53 (a) hereof. On the basis of this application, the Office of Price Administration may authorize by order maximum prices for sales by the manufacturer, for sales at wholesale, and sales at retail of such bedspring. After receipt of the authorization, the manufacturer may sell the bedspring if, by a communication in writing at the time of or prior to his first invoice to a person purchasing for the purpose of resale, he informs each purchaser of the provisions of the authorization which establishes the maximum prices of such bedspring, and if such manufacturer complies with the requirements of § 1365.62 of this Revised Maximum Price Regulation No. 213.

§ 1365.62 *Retail price labels.* (a) Before the delivery of any coil or flat bedspring with a non-steel frame, the manufacturer must attach securely to such bedspring so that it is clearly visible a durable tag containing in easily readable lettering the statement in the following form:

The Office of Price Administration has established a retail ceiling price of \$----- (inserting correct figure) for this bedspring. Lower prices may be charged. This tag may not be removed until after delivery to the consumer.

(b) No sale, offer for sale, or delivery at retail of a coil or flat bedspring with a wood frame may be made unless the tag specified in paragraph (a) containing the correct retail ceiling price is attached to such spring.

§ 1365.63 *Evasion.* The provisions of this Revised Maximum Price Regulation No. 213 shall not be evaded either by direct or indirect methods in connection with the manufacturing or sale of a coil

or flat bedspring with a non-steel frame or in connection with an offer, solicitation, agreement, or sale of any such bedspring, or in conjunction with any other commodity or by way of commission, service, transportation, or other charge or discount, premium, or other privilege, or by tying agreement, or trade understanding, or by any other means.

§ 1365.64 *Records.* (a) Every manufacturer and person selling at wholesale a coil or flat bedspring with a non-steel frame after September 7, 1942, shall keep for inspection by the Office of Price Administration complete and accurate records of each sale of such bedspring, name and address of the buyer, name, number or other designation, and the price received for each such bedspring, quantity sold, and discounts, and allowances of any nature given.

(b) Every person selling at retail a bedspring for which, upon sale by that person, maximum prices are established by this Revised Maximum Price Regulation No. 213, shall keep, and make available for examination by the Office of Price Administration, records of all bedsprings sold of the same kind as he has customarily kept relating to the prices which he charged for bedsprings.

§ 1365.65 *Reports.* On or before September 7, 1942, every manufacturer and person selling at wholesale offering to sell a coil Class A, B, C, D bedspring with a non-steel frame shall file with the Office of Price Administration in Washington, D. C., a statement giving specifications and the f. o. b. factory and delivered maximum price of such article, showing all allowances, discounts, charges and other differentials in effect at the time of filing of such statement. Every manufacturer and person selling at wholesale shall file on the 10th day of any month thereafter, a similar statement of any coil or flat bedspring with a non-steel frame which was first manufactured and offered for sale during the preceding calendar month.

§ 1365.66 *Sales slips and receipts.* (a) Any seller of bedsprings who has customarily given a purchaser a flat or coil bedspring with steel frames a sales slip, receipt, or similar evidence of purchase shall continue to do so to purchasers of flat or coil bedsprings with non-steel frames. Upon request from a purchaser any seller of a flat or coil bedspring with a non-steel frame, regardless of previous custom, shall give the purchaser a receipt showing the date, the name and address of the seller, the name of such bedspring sold, and the price received for it.

§ 1365.67 *Enforcement.* Persons violating any provisions of this Revised Maximum Price Regulation No. 213 are subject to the criminal penalties, civil enforcement actions, and suits for treble damages provided by the Emergency Price Control Act of 1942 as amended and proceedings for the suspension of licenses.

A statement of the considerations involved in the issuance of this amendment has been issued simultaneously herewith and filed with the Division of the Federal Register.* In the judgment of the Price Administrator, the maximum prices established by this Amendment No. 4 to Revised Price Schedule No. 38 are and will be generally fair and equitable and will effectuate the purposes of the Emergency Price Control Act of 1942, as amended. So far as practicable, the Price Administrator has advised and consulted with members of the industry which will be affected by this amendment.

§ 1335.401 *Prohibition against sales of glycerine above maximum prices.* On and after January 8, 1943, regardless of any contract, agreement, or lease or other obligation:

(a) No person shall sell, deliver, or transfer any glycerine, as herein defined, at higher prices than the maximum prices set forth in Appendix A (§ 1335.414) of this amendment.

(c) No person shall agree, offer, solicit or attempt to do any of the foregoing.

§ 1335.402 *Less than maximum prices.* Lower prices than those established by this Amendment No. 4 to Revised Price Schedule No. 38 may be charged, demanded, paid or offered.

§ 1335.403 *Export sales.* The maximum price at which a person may export glycerine shall be determined in accordance with the provisions of the General Maximum Export Price Regulation,² issued by the Office of Price Administration.

§ 1335.405 *Federal and state taxes.* Any tax upon, or incident to, the sale or delivery of glycerine, imposed by any statute of the United States or statute or ordinance of any state or subdivision thereof, shall be treated as follows in determining the seller's maximum price for such commodity and in preparing the records of such seller with respect thereto:

(a) As to a tax in effect during the year 1941

(1) If the seller paid such tax, or if the tax was paid by any prior vendor, irrespective of whether the amount thereof was separately stated and collected from the seller, but the seller did not customarily state and collect separately from the purchase price during the year 1941 the amount of the tax paid by him or tax reimbursement collected from him by his vendor, the seller may not collect such amount in addition to the maximum price, and in such case shall include such amount in determining the maximum price under this Amendment No. 4 to Revised Price Schedule No. 38.

(2) In all other cases, if, at the time the seller determines his maximum price, the statute or ordinance imposing such tax does not prohibit the seller from stating and collecting the tax separately from the purchase price, and the seller does state it separately, the seller may collect, in addition to the maximum price, the amount of the tax actually paid by him or an amount or tax paid by any prior vendor and separately stated and collected from the seller by the vendor from whom he purchased, and in such case the seller shall not include such amount in determining the maximum price under this Amendment No. 4 to Revised Price Schedule No. 38.

§ 1335.406 *Adjustable pricing.* Any person may offer or agree to adjust or fix prices to and at prices not in excess of the maximum prices in effect at the time of delivery. In appropriate situations where a petition for amendment requires extended consideration, the Price Administrator may, upon application, grant permission to agree to adjust prices upon deliveries made during the pendency of the petition in accordance with the disposition of the petition.

§ 1335.407 *Petitions for amendment.* Any person seeking an amendment of any provision of this Amendment No. 4 to Revised Price Schedule No. 38 may file a petition for amendment in accordance with the provisions of Revised Procedural Regulation No. 1³ issued by the Office of Price Administration.

§ 1335.408 *Licensing.* The provisions of Supplementary Order No. 11 (§ 1305.-15)⁴ licensing distributors of chemicals and drugs, shall be applicable to every

distributor of glycerine for which maximum prices are established by this Amendment No. 4 to Revised Price Schedule No. 38. The term "distributor" shall have the meaning given it by such Supplementary Order No. 11.

§ 1335.409 *Evasion.* Price limitations set forth in this Amendment No. 4 to Revised Price Schedule No. 38 shall not be evaded whether by direct or indirect methods, in connection with any offer, solicitation, agreement, sale, delivery, purchase or receipt of, or relating to glycerine, alone or in conjunction with any other commodity or by way of commission, service, transportation, or other charge, or discount, premium, or other privilege, or other trade understanding, or otherwise.

§ 1335.410 *Enforcement.* (a) Persons violating any provision of this Amendment No. 4 to Revised Price Schedule No. 38 are subject to the criminal penalties, civil enforcement actions, license suspension proceedings and suits for treble damages provided for by the Emergency Price Control Act of 1942.

§ 1335.411 *Records and reports.* (a) Every person making sales of glycerine after January 7, 1943 shall keep for inspection by the Office of Price Administration for so long as the Emergency Price Control Act of 1942, as amended, remains in effect, complete and accurate records of each purchase or sale, showing the date thereof, the name and address of the buyer and the seller, the price contracted for or received and the quantity of each type and grade of such glycerine purchased or sold.

(b) Such persons shall submit such reports to the Office of Price Administration and shall keep such other records in addition to or in place of the records required in paragraph (a) of this section as the Office of Price Administration may from time to time require.

[MPR 296]

FLOUR FROM WHEAT, SEMOLINA AND FARINA
SOLD BY MILLERS AND BLENDERS

In the judgment of the Price Administrator, it is necessary and proper, in order to effectuate the purposes of the Emergency Price Control Act of 1942, as amended, and Executive Order No. 9250, that the maximum prices established by Maximum Price Regulation No. 280 for flour from wheat be revised, and set forth in a separate regulation. The following regulation sets forth more definite maximum prices for flour from wheat in the various sections of the United States, and supersedes Maximum Price Regulation No. 280 as to flour sold by millers and blenders. It also establishes maximum prices for farina and semolina sold by millers and blenders.

The Price Administrator has ascertained and given due consideration to the prices of flour from wheat, semolina and farina prevailing between January 1, 1942 and September 15, 1942, and has made adjustments for such relevant factors as he has determined and deemed to be of general applicability. The maximum prices established by this regulation are in the judgment of the Price Administrator generally fair and equitable and will effectuate the purposes of the Emergency Price Control Act of 1942, as amended, and Executive Order No.

*Copies may be obtained from the Office of Price Administration.

9250. A statement of the considerations involved in the issuance of this regulation has been issued simultaneously herewith and filed with the Division of the Federal Register.*

The maximum prices established herein for flour from wheat, semolina and farina are not below prices which will reflect to the growers prices for their product equal to the highest of the prices required by the provisions of the Emergency Price Control Act of 1942, as amended, and by Executive Order No. 9250, after making appropriate deductions from parity prices for payments made under the Soil Conservation and Domestic Allotment Act, as amended, parity payments made under the Agricultural Adjustment of 1938, as amended, and other governmental subsidies.

Therefore, under the authority vested in the Price Administrator by the Emergency Price Control Act of 1942, as amended, and Executive Order No. 9250, Maximum Price Regulation No. 296 is hereby issued.

§ 1351.1651 *Maximum prices for flour from wheat, semolina and farina.* On and after January 4, 1943, regardless of any contract, agreement or other obligation, no miller or blender shall sell or deliver, or agree, offer, solicit, or attempt to sell or deliver, and no person shall buy or receive from a miller or blender, flour from wheat, semolina or farina at prices higher than the maximum prices permitted by Appendix A hereof (§ 1351.1666). The maximum prices shall include duties, brokerage, commissions, insurance, handling charges and all other charges and shall not be increased by any charges for the extension of credit.

§ 1351.1652 *Less than maximum prices.* Lower prices than those set forth in Appendix A (§ 1351.1666) may be charged, demanded, paid or offered.

§ 1351.1653 *Adjustable pricing.* Nothing in this Maximum Price Regulation No. 296 shall be construed to prohibit the making of a contract to sell flour from wheat, semolina or farina at a price not to exceed the maximum price at the time of delivery or supply. Where a petition for amendment has been filed which requires extended consideration, the Price Administrator may, upon application, grant permission to agree to adjust prices upon deliveries made during the pendency of the petition in accordance with the disposition of the petition.

§ 1351.1654 *Evasion.* The price limitations set forth in Maximum Price Regulation No. 296 shall not be evaded by direct or indirect methods in connection with an offer, solicitation, agreement, sale, delivery, purchase, or receipt of or relating to flour from wheat, semolina or farina, alone or in connection with any other commodity, or by way of commission, service, transportation, or other charge, or discount, premium or other privilege, or by tying agreement or other trade understanding, or otherwise.

§ 1351.1655 *Documents and reports.*

(a) Every person covered by this Maximum Price Regulation No. 296 making a sale or purchase of flour from wheat, semolina or farina in the course of trade or business on or after January 4, 1943, shall keep for inspection by the Office of Price Administration for as long as the Emergency Price Control Act of 1942, as amended, remains in effect, complete and accurate records and documents of such sales and purchases including the date thereof, name of the seller and purchaser, price paid or received, buyer's receiving point and the quantity of flour from wheat, semolina or farina, sold or purchased: *Provided*, That in the case of sales of five barrels or less the seller and purchaser shall keep only such rec-

ords as they customarily kept as of the effective date of this regulation.

(b) Persons affected by Maximum Price Regulation No. 296 shall submit such records to the Office of Price Administration as it may from time to time require.

§ 1351.1656 *Carrying charges.* No contract for the sale of flour from wheat, semolina or farina shall provide for higher carrying charges than at the rate of $\frac{1}{8}$ of a cent per barrel per day for each day's delay in shipment beyond 60 days from the date of the contract of sale or beyond the delivery date specified under such contract, whichever is later, which is caused by the failure of the buyer to furnish shipping instructions (and necessary containers, if sale is made on a bulk basis) in accordance with the specifications of the contract of sale.

§ 1351.1657 *Enforcement.* (a) Persons violating any provisions of Maximum Price Regulation No. 296 are subject to the criminal penalties, civil enforcement actions, license suspension proceedings, and suits for treble damages provided for by the Emergency Price Control Act of 1942, as amended.

It shall not be treated as a tax for which a charge may be made in addition to the basic price.

§ 1351.1659 *Exempt sales.* This Maximum Price Regulation No. 296 shall not apply to sales, deliveries or transfers of flour from wheat, semolina or farina to

the United States, or any agency thereof: *Provided,* That the seller has purchased an equivalent amount of wheat from the United States or any agency thereof at prices computed as 100 percent of parity by the United States Department of Agriculture.

XII. *Maximum prices for export sales.* The maximum prices for export sales shall be determined in accordance with the provisions of the Maximum Export Price Regulation issued by the Office of Price Administration.

XIII. *Maximum prices at non-rail points.* In those areas where maximum prices are determined hereunder by adding a rail charge to a basic price, if a buyer's receiving point is located more than 10 miles from the nearest railroad siding, an amount may be added to the applicable maximum carload price at the railroad siding nearest to the buyer's receiving point, equal to the difference between the charge at the lowest common carrier rate for the transportation of an equivalent quantity of flour from wheat, semolina or farina from such railroad siding to the buyer's receiving point and the charge at the lowest common carrier rate for the transportation of this same quantity a distance of 10 miles from such siding. For the purposes of this section, the distance along the shortest and most direct vehicle highway route shall be used in calculating the distance from the nearest railroad siding to the buyer's receiving point.

XIV. *Selection by the buyer of his receiving point.* Nothing in the foregoing provisions of this Maximum Price Regulation No. 236 shall be construed to prohibit any person from purchasing and receiving delivery of flour from wheat, semolina and farina at any point within the several states of the United States or the District of Columbia at the maximum price at that point as computed under the applicable provisions of Appendix A, and shipping from such point to any other point at his own expense, although the price paid at the first point plus transportation to the second point may exceed the maximum price at the second point computed under the applicable provisions of Appendix A; *Provided,* That if the flour from wheat, semolina or farina is reworked, the maximum prices for such rework shall be as heretofore provided in this regulation.

XV. *Maximum prices for sales by persons other than millers and blenders.* Maximum prices for sales of flour by persons other than millers and blenders are to be determined in accordance with the provisions of Maximum Price Regulation No. 237, in the case of wholesalers and jobbers as defined therein and in accordance with the provisions of Maximum Price Regulation No. 233 in the case of retailers as defined therein.

PART 1413—SOFTWOOD LUMBER PRODUCTS

[MPR 293]

STOCK MILLWORK

In the judgment of the Price Administrator, the maximum prices established by this regulation are and will be generally fair and equitable and will effectuate the purposes of the Emergency Price Control Act of 1942, as amended, and Executive Order No. 9250. A statement of the considerations involved in the issuance of this regulation has been issued simultaneously herewith and has been filed with the Division of the Federal Register.*

AUTHORITY: §§ 1413.51 to 1413.75, inclusive, issued under Pub. Laws 421 and 723, 77th Cong.; E.O. 8250, 7 P.R. 7871.

§ 1413.51 *Sales of stock millwork at higher than maximum prices prohibited.*

(a) On and after January 8, 1943, regardless of any contract or obligation, no person shall sell or deliver, and no person shall buy or receive in the course of trade or business, any stock millwork for direct mill shipment at prices higher than the maximum prices fixed by this Maximum Price Regulation 293, and no person shall agree, offer or attempt to do any of these things.

(b) If, upon the purchase of stock millwork, the buyer gets from the seller a written statement that to the best of

his knowledge the price does not exceed the maximum price fixed by this regulation, and if the buyer has no reason to doubt the truth of the statement, the buyer shall be deemed to have complied with this section.

(c) Prices lower than the maximum prices may, of course, be charged or paid.

§ 1413.52 *To what products, transactions, and persons this regulation applies—(a) Products covered by the regulation.* This Maximum Price Regulation 293 covers woodwork items referred to in the Appendices of the regulation when such items are made either wholly or in large part with lumber cut from the following woods: Ponderosa pine (*Pinus ponderosa*), Idaho pine (*Pinus monticola*), Sugar pine (*Pinus lambertina*), and Northern or Northeastern pine (*Pinus strobus*).

The Appendices of this regulation mention the titles of several millwork and glass lists. These publications are more fully described as follows:

(1) "Standard Woodwork Lists, Catalogue No. 40" means the document with that title corrected to March 1, 1941, published by the Pinney Printing Company, Clinton, Iowa.

(2) "Standard Pine Frames, Catalogue No. 8-A" means the document with that title published by the Pinney Printing Company, Clinton, Iowa.

(3) "Design Book No. 25" means the document with that title published by the Universal Catalogue Bureau, Dubuque, Iowa.

(4) "Jobber's 'A' Light Glass List of August 15, 1938" means the document with that title copyrighted by the National Glass Distributors' Association.

(b) *Transactions covered by the regulation—(1) Meaning of the term "direct-mill sale".* A "direct-mill sale" of millwork is a sale in which the shipment of millwork originates at a millwork factory (a plant which manufactures millwork) or a factory warehouse (a warehouse which is physically next to a mill and which is not operated as a sales agency separate from the mill sales agency), no matter who the seller is, and no matter whether he usually is known as a manufacturer, jobber, wholesaler, distributor, retailer, or anything else. A shipment is regarded as originating at a mill if the millwork reaches the purchaser without ever becoming an integral part of the stock of a distribution warehouse or plant. For example, a shipment which originates at a mill and which is temporarily stored in a distribution warehouse, but which is not placed in the regular stock of that warehouse for purposes of resale or redistribution, is a direct-mill sale.

(2) *Direct-mill sales covered by the regulation.* The following sales are covered by this regulation:

(i) Any direct-mill sale of 15,000 pounds or more of stock millwork which moves by rail to one or more places.

(ii) Any direct-mill sale of 12,000 pounds or more of stock millwork which moves by truck to a single place.

(c) *Persons covered by the regulation.* Any person who sells or purchases (in the course of trade or business) stock millwork is subject to this regulation. The term "person" includes: an individual, corporation, partnership, association, or any other organized group of persons, or their legal successors, or representatives; the United States, or any government, or any of its political subdivisions; or any agency of the foregoing.

§ 1413.53 *Maximum prices for carload sales of millwork.* (a) The maximum prices for carload sales of stock millwork are set out in Appendices A to E (§§ 1413.64 to 1413.68, inclusive), and Appendices G to K (§§ 1413.70 to 1413.74, inclusive). These ceiling prices are stated as f. o. b. mill prices with full freight allowed. This means that where shipment is by rail the seller must allow the buyer all rail charges (including taxes on the charges) which are paid by the buyer. Where shipment is by truck the seller must allow the buyer all trucking charges (including taxes on the charges) which are paid by the buyer. If the seller pays for the transportation he does not have to allow any freight.

(b) A sale takes the carload ceiling price if the total weight of the millwork (both stock and special) sold is 30,000 pounds or more. A sale which is a carload under this test takes the carload ceiling price even though the millwork is shipped by truck.

§ 1413.54 *Maximum prices for less-than-carload sales—(a) Maximum prices f. o. b. mill.* The maximum f. o. b. mill price (no freight allowed) for a less-than-carload sale (any sale which is not a carload sale), of stock millwork shall be the price figured as follows:

(1) Take the maximum price (established by this Maximum Price Regulation 293) which would govern the sale if it were a carload sale;

(2) Add 5 percent of that price;

(3) Deduct freight on the weight of the shipment at the carload rate from the mill to the buyer.

(b) *Maximum delivered prices.* If the less-than-carload sale of millwork is on a delivered price basis, the seller may add to the ceiling price the actual transportation charge paid or incurred by him in making delivery from the mill to the buyer. This means that if delivery is by common or contract carrier the actual amount paid to the carrier may be added to the ceiling price. If delivery is by truck owned or controlled by the seller, the amount added for delivery may not

be more than the actual cost to the seller of delivery by truck. This "actual cost" may not be higher than the overall average trucking charge for a similar delivery, arrived at as of the 6-month period ending July 31, 1942.

(c) *Example of how to compute the ceiling price for a less-than-carload sale.* An example of the correct application of this section is as follows: The buyer has ordered 400 doors, specifications: 2'-6" x 6'-8", 1 3/8", 5 x P, No. 1 Ponderosa pine; and 200 windows, specifications: 8 1/2" x 14", 1 3/8", 12 lights, glazed, SSB, to be delivered by rail to a siding in Washington, D. C., which is in Zone 3. Shipment is made direct from a mill, and the sale is made on an f. o. b. mill price basis (actual freight to be paid by purchaser).

Ceiling price of the doors if the sale had been a carload sale (\$7.50 (list), 5 1/2% (minimum discount) x 400 (number of doors))	\$1,425.00
Crating (40 bundles at \$.95 per bundle)	38.00
Ceiling price of the windows if the sale had been a carload sale (\$6.50 (list), 6% (minimum discount) x 200 (number of windows))	442.00
Face crating (no extra charge)	0.00
Item I (total of above figures)	\$1,905.00
Add: Item II (5 percent of this total)	95.25
	\$2,000.25
Deduct: Item III (deduct freight on 16,800 pounds at carload rate of 5¢)	84.00
	\$1,916.25

Maximum f. o. b. mill price

§ 1413.55 *Addition for storage in transit.* When a distribution warehouse or yard sells millwork that it does not already have in stock, and then, instead of shipping it directly from the mill to the buyer, stores it in its warehouse or yard and delivers it, in quantities less than the total order, to the buyer as he calls for it, the distributor may shorten the applicable basic discount two points on so much of the millwork as is actually stored. (Note that the sale is still a direct mill sale.)

This addition may not be made when the distributor merely reloads millwork at the warehouse or yard, or handles and stores it no more than is necessary in a normal case where the distributor receives a mill shipment, reloads it, and delivers it to the buyer. Nor may this addition be made if the millwork is stored at the job site since this is not storage in transit.

§ 1413.56 *Charges for special cars and bracing.* (a) No addition to the maximum prices may be made for pool car, community car or stop-over car shipments, except that in the case of stop-

over car shipments by rail, the seller may require the purchaser to pay stop-over charges made by the railroad. If the millwork shipped in any one of these combination cars weighs 30,000 pounds or more, it takes the carload ceiling prices.

(b) Where bracing is required to permit partial unloading of a railroad car, a charge not to exceed \$3.50 may be made for one brace and \$2.50 for each additional brace.

§ 1413.57 *What the invoice must contain*—(a) *General*. Because the ceiling price depends upon a number of different factors, it is necessary that each of the factors which affects the maximum price be separately shown on the invoice. Otherwise, the purchaser and the Office of Price Administration could not tell in many cases whether a price which appeared to be above the ceiling was legal or not.

Failure to invoice properly is just as much a violation of this regulation as charging an excessive price.

(b) *Basic price*. All invoices must contain a sufficiently complete description of the millwork to show whether the price is proper or not. Any specification or extra which affects the maximum price must be mentioned in the description. The amount added for extras does not have to be separately shown, except in a few special cases which are specifically mentioned later in this section.

(c) *Type of sale*. The invoice must show whether the sale is a direct-mill sale and whether it is a carload sale or less-than-carload sale.

(d) *Destination of shipment*. The invoice must show the place to which shipment of the millwork was made.

(e) *Storage-in-transit: Bracing*. Any separate charge which the seller is permitted to make for storage-in-transit, or for bracing to permit partial unloading, must be shown separately on the invoice.

§ 1413.58 *Prohibited practices*—(a) *General*. Any practice which is a device to get the effect of a higher-than-ceiling price without actually raising the dollars-and-cents price is as much a violation of this Maximum Price Regulation 293 as an outright over-ceiling price. This applies to devices making use of commissions, services, transportation arrangements, premiums, special privileges, tying-agreements, trade understandings, and the like.

(b) *Specific prohibited practices*. The following are among the specific practices prohibited:

(1) Getting the effect of a higher price by changing credit practices or cash discounts from what they were on October 1, 1941. This includes reducing the cash discount period, decreasing credit periods, or making greater charges for extension of credit. In any case, on sales made through the Office

of the Chief of Engineers, War Department, terms of 30 days net may be used. In all cases, if the sale is on cash terms, the maximum price must be reduced by the same amount as the sale price would have been reduced for similar cash terms on October 1, 1941. For example, if the maximum price without cash discount is \$10.00, and if in sales of this item on October 1, 1941, to purchasers of a certain class the seller reduced sales prices 2 percent for cash within 10 days, the ceiling cash price in sales to purchasers of this class is \$9.80. For purposes of this paragraph, no discount over 2 percent is considered a cash discount.

(2) Unnecessarily routing stock millwork through a distribution warehouse or plant.

(3) Shipping millwork to the purchaser in less-than-carload quantities where the buyer would like to have, and the seller is in a position to ship, carload quantities of millwork.

(4) Charging a purchasing commission based on quantity or value of millwork purchased, if the commission plus the purchase price is higher than the maximum price permitted by this regulation.

(c) *Adjustable pricing*. A price may not be made adjustable to a maximum price which will be in effect sometime after delivery of the millwork has been completed. The price may be adjustable to the maximum price in effect at the time of delivery.

§ 1413.59 *Applications for adjustment and petitions for amendment*—(a) *Government contracts*. (1) The term "government contracts" is here used to include any contract with the United States or any of its agencies, or with the government or any governmental agency of any country whose defense the President deems vital to the defense of the United States under the terms of the Act of March 11, 1941, entitled, "An Act to Promote the Defense of the United States." It also includes any subcontract under this kind of contract.

(2) Any person who has made or intends to make a "government contract" and who thinks that the maximum price established in this Maximum Price Regulation 293 is impeding or threatens to impede production of stock millwork which is essential to the war program and which is or will be the subject of the contract, may file an application for adjustment in accordance with Procedural Regulation No. 6, issued by the Office of Price Administration.

(b) *Petitions for amendment*. Any person seeking an amendment of any provision of this regulation may file a petition for amendment in accordance with the provisions of Revised Procedural Regulation No. 1,¹ issued by the Office of Price Administration.

¹ 7 FR. 8961.

§ 1413.60 *Records and reports*—(a) *Records*. All sellers must keep records which will show a complete description of the items of stock millwork sold, the name and address of the buyer, the date of sale, and the price. Buyers must keep similar records, including the name and address of the seller. These records must be kept for any month in which the seller or buyer sold or bought \$200 or more of stock millwork in transactions which are covered by this Maximum Price Regulation 293. They must be kept for two years, for inspection by the Office of Price Administration. Any records which the Office of Price Administration later requires must also be kept.

(b) *Reports*. Any reports that the Office of Price Administration has required in the past, or requires from time to time, must be submitted.

§ 1413.61 *Enforcement and licenses*. (a) Persons violating any provision of this Maximum Price Regulation 293 are subject to the criminal penalties, civil enforcement actions, suits for treble damages, and proceedings for suspension of licenses provided for by the Emergency Price Control Act of 1942.

(b) Persons who have evidence of any violation of this regulation or of any other regulation or order issued by the Office of Price Administration are urged to communicate with the nearest field, state or regional office of the Office of Price Administration or its principal office in Washington, D. C.

(c) War Procurement Agencies and their contracting or paying finance officers are not subject to any liability, civil or criminal, imposed by this regulation. Persons who make sales covered by this regulation to War Procurement Agencies are, however, subject to all the liabilities imposed by this regulation. "War Procurement Agencies" include the War Department, the Navy Department, the United States Maritime Commission, and the Lend-Lease Section in the Procurement Division of the Treasury Department, or any of their agencies.

(d) All sellers under this regulation, except mills, are licensed by Supplementary Order 18.² This order, in brief, provides that a license is necessary, except for mills, to make sales under this regulation. A license is automatically granted to all sellers making these sales. It is not necessary to apply specially for the license, but a registration may later be required. The Emergency Price Control Act of 1942 and Supplementary Order 18 tell the circumstances under which licenses may be suspended. The license cannot be transferred.

GENERAL PROVISIONS

§ 6.300 *Purpose of regulations.* The regulations contained in this subpart are promulgated to insure the safety of all vessels in port while anchored or while moored to docks, piers, wharves or other waterfront facilities. Nothing contained in this subpart shall be construed to repeal the provisions of the regulations relating to Explosives or Other Dangerous Articles On Shipboard, promulgated April 9, 1941, as amended (46 C.F.R. Part 146), or the Regulations Relating to Tank Vessels, as amended (46 C.F.R. Parts 30-38 incl.), or any other existing laws or regulations for the safeguarding of vessels not inconsistent herewith.

§ 6.301 *Powers of captains of the port; special circumstances.* The regulations contained in this subpart shall be considered as providing the minimum requirements for the security of vessels. Captains of the port are authorized to issue orders not inconsistent with such regulations, as they may determine to be necessitated by special circumstances for the safeguarding of individual vessels, docks, piers, wharves or other waterfront facilities.

§ 6.302 *Distribution of regulations.* Copies of the regulations contained in this subpart are available for distribution by the captain of the port to masters, owners of vessels, piers, terminals and other waterfront facilities, guards and all other interested parties.

§ 6.303 *Primary responsibility.* Nothing contained in the regulations in this subpart shall be construed as relieving the masters, owners, operators and agents of vessels, docks, piers, wharves or other waterfront facilities from their primary responsibility for the security of such vessels, docks, piers, wharves or waterfront facilities.

§ 6.304 *Vessels subject to this subpart.* The regulations contained in this subpart shall apply to all vessels, foreign or domestic, except where otherwise specifically provided.

§ 6.305 *Ports at which regulations apply.* The regulations contained in this subpart shall apply to vessels, docks, piers, wharves, and other waterfront facilities in the ports of the continental United States, Alaska, Territory of Hawaii, Puerto Rico and Virgin Islands.

§ 6.306 *"Disabled" vessels.* Vessels, regardless of tonnage and whether self propelled or not and whether having cargo aboard or not, which have suffered such extensive damage to their hulls or machinery as to place them in imminent peril of further damage or loss shall be considered as "disabled" vessels. Disabled vessels are not subject to the regulations contained in this subpart, but such casualties shall be reported immediately to the captain of the port who will issue special instructions to safeguard them.

§ 6.307 *Effect of local or unusual conditions.* If the captain of the port shall find that the facilities, conditions or services necessary for the protection of vessels pursuant to any provision of this subpart are not available, he may waive compliance with the specific provision involved to the extent which he deems necessary. In case of emergency circumstances causing imminent danger to any vessel, nothing in the regulations contained in this subpart shall be construed as preventing the senior ship officer aboard such vessel from pursuing the most effective action in his judgment for the safety of the vessel.

SABOTAGE

§ 6.315 *Reporting of sabotage.* Evidence of sabotage or subversive activity involving any vessel, dock, pier, wharf, or other waterfront facility shall be reported immediately to the Federal Bureau of Investigation and the captain of the port, or to their respective representatives.

§ 6.316 *Precautions against sabotage.* The master, owner, and operator of a vessel shall take all necessary precautions to protect the vessel, cargo and personnel from sabotage.

MANNING OF VESSELS

§ 6.320 *Vessels "out of service".* For purposes of manning, vessels complying with all of the following requirements shall be considered as vessels "out of service":

(a) All persons, other than the crew, who have been or are to be transported have been removed from the vessel.

(b) All cargo has been removed from the vessel.

(c) Fires under main and auxiliary boilers have been extinguished and main engines have been shut down.

(d) The prior approval of the captain of the port has been obtained.

§ 6.321 *Additional requirements or waiver.* Nothing in the manning schedule which follows is to be construed as preventing the master or the captain of the port from requiring additional men,

or all hands, to be on board and on active duty in time of extraordinary emergency or to prevent the captain of the port, at the request of the master, from waiving compliance with these manning requirements when, in his discretion, this may be done consistently with the safety of the vessel and the port.

§ 6.322 *Manning of vessels in port.* Vessels subject to the regulations contained in this subpart when anchored or when moored to a dock, pier, wharf, or other waterfront facility, shall have no fewer than the following number and kind of officers and men on board and subject to duty as may be required by the master:

(a) Self propelled vessels of 1000 gross tons or over except when "out of service": A crew of officers and men equivalent to the regular deck and engine room sea watches not including day men.

(b) Self propelled vessels of 1000 gross tons or over when "out of service": Guards shall be provided in lieu of crew as set forth in the regulations under "Guarding", and in addition thereto one licensed officer shall be aboard except when the vessel is in a shipyard. The captain of the port may waive the requirement for the licensed officer if he shall find that the vessel is secure without his presence aboard. When vessels are seasonally "out of service" the captain of the port shall determine the number of guards to be used.

(c) Vessels regardless of tonnage having explosives as cargo on board shall be manned in accordance with the requirements of the captain of the port.

§ 6.323 *Relief crews.* Any or all of the duty required of the ship's officers and men under the regulations contained in this subpart may be performed by relief officers and men holding the necessary licenses and certificates.

§ 6.324 *Officers and men on duty to be on alert.* Where the regulations contained in this subpart require the presence of officers on vessels which are not "out of service," efficient continuous watches shall be maintained by them both day and night. The night relieving officers shall remain actually on watch and make tours of the decks, superstructures, cargo spaces where cargo is being worked, boiler rooms, engine rooms and machinery spaces at irregular but sufficiently frequent intervals to inform themselves on conditions. Officers shall maintain necessary supervision and direct the work of the men on duty under them in order that a state of alert shall prevail.

GUARDING OF VESSELS

§ 6.330 *Kinds of guards.* Guards for vessels shall be of the following kinds:

(a) "Ship guards." Ship guards shall perform service at the ship's gangways or roving service throughout the ship.

(b) "Cargo guards." Cargo guards shall perform service in cargo spaces during the time general cargo of certain kinds is being worked.

(c) "Fire guards." Fire guards shall perform service when repairs to the vessel create special fire hazards.

§ 6.331 *When guards shall be used.* On all vessels guards shall be employed in accordance with the following schedule in addition to the crew requirements set forth under the section on manning:

(a) "Ship guards." Ship guards shall be required as follows:

(1) Self propelled vessels of from 2000 to 5000 gross tons, shall, when moored to a dock, pier, wharf or other waterfront facility maintain a guard continuously on duty at each gangway.

(2) Self propelled vessels of over 5000 gross tons, shall, when moored to a dock, pier, wharf or other waterfront facility, maintain a guard continuously on duty at each gangway and in addition thereto a guard continuously on roving duty.

(3) Self propelled passenger vessels of over 5000 gross tons shall, when moored to a dock, pier, wharf or other waterfront facility, maintain a guard continuously on watch at each gangway, a guard continuously on roving duty throughout the vessel and, in addition thereto, sufficient roving guards to patrol all parts of the vessel accessible to passengers and crew, at intervals of not over 20 minutes. The watchmen now required on such vessels at sea may serve as roving guards in port.

(b) "Cargo guards." On all vessels, regardless of tonnage and whether self propelled or not, cargo guards shall be maintained continuously on watch in each cargo space when working cargo consisting of explosives, or other dangerous articles as defined in regulations (46 C. F. R. Part 146) except inflammable or combustible liquid cargo in bulk. The captain of the port may require cargo guards for any vessel whenever he shall find, in his discretion, that such guards are necessary for the security of the vessel or the port.

(c) "Fire guards." On self propelled vessels of 1000 gross tons or over when under repair a fire guard shall be maintained in each compartment or place in which there is in use portable apparatus such as for welding, burning, and riveting, or in which sparks or sufficient heat to cause combustion may be transmitted if such space or adjacent spaces contain combustible materials likely to become ignited, from the time such work is started until after it is completed.

§ 6.332 *How guards are provided.* The master, vessel owner, operator, and agent shall provide all guards required by the regulations contained in this subpart except where such guards are provided by military authority.

§ 6.333 *Those who may be guards.* Any of the following classes of persons may serve as guards:

(a) Members of the Military or Naval forces of the United States when approved by proper authority.

(b) Members of any of the Militarized Plant Guard Forces.

SECURITY OF VESSELS IN PORT

§ 6.355 *Readiness of engines.* Steam vessels of 1000 gross tons or over, when moored to a dock, pier, wharf, or other water-front facility, or when at anchor, shall maintain steam pressure on at least one main boiler sufficient to provide steam for main engines and essential auxiliaries to maintain them in a state of readiness unless the vessel is "out of service" or unless its safety or necessary repairs, as determined by the master and chief engineer or their representatives, require otherwise. In the absence of ship's power and in the cleaning of the fire sides of boilers the following procedure shall be followed:

(a) In all cases where any vessel is without power to operate its fire pumps, its fire system shall be connected to the shore fire system, if available, by fire hose and, weather permitting, pressure shall be maintained on the ship's fire system from shore.

(b) In all cases where the vessel is without electric power its switchboard shall be connected to a source of shore electric power, if available, to maintain the ship's lighting system.

(c) Manually cleaning the fire side of any boiler having fires under it, is prohibited on vessels at docks, piers, or wharves, when working dangerous cargo or when gas-freeing tanks.

§ 6.356 *Maintenance of mobility of vessels.* No self propelled vessel of 1,000 gross tons or over when moored to a dock, pier, wharf, or other waterfront facility or when at anchor shall be without means of propulsion for over 24 hours except when loading liquid inflammable cargo in bulk unless the approval of the captain of the port has first been obtained. The captain of the port shall be notified when such vessels have been returned to a status of mobility.

§ 6.357 *Maintenance of boiler fires on tank vessels.* In the case of tank ves-

sels, regardless of tonnage, when moored to a dock, pier, wharf or other waterfront facility when loading liquid inflammable cargo of Grades A, B or C in bulk, it shall be determined whether fires shall be maintained under boilers by the following procedure: Upon arrival at the loading terminal the master and terminal superintendent or their representatives shall consult as to the safest procedure to follow, consideration being given to the over-all security of the vessel and the terminal, the availability of shore steam, water and electric power, the state of the weather and the practice of the terminal. In each instance the decision reached shall be entered in the deck log book of the vessel.

§ 6.358 *Tending of mooring lines.* At all times when vessels are moored to docks, piers, wharves, or other waterfront facilities, care shall be taken to assure that all mooring lines are hove taut to prevent surging. Fire axes shall be kept conveniently at hand, forward and aft, to be used on the ship or passed to the dock for cutting hawsers in case of emergency.

§ 6.359 *Emergency towing hawsers.* At all times when vessels of 1000 gross tons or over are moored to docks, piers or wharves they shall have available on deck, fore and aft, hawsers capable of being used for emergency towing. The eye of such hawsers shall be extended beyond and outboard of the chock about five feet and ready to run and the ship's end shall be stopped off on the bits to permit reasonable scope of hawser for towing. A heaving line made up and secured to the rail by rope yarn shall be bent to the eye of each hawser.

§ 6.360 *Use of anchors at dock.* Anchors of vessels shall not be dropped, hove out or remain out when the vessel is at a dock, pier or wharf unless there is power available for the windlass and unless there is good reason for having them out.

§ 6.362 *Fires on tank vessels.* Tank vessels when loading Grade A, B or C cargo in bulk shall have no fires or open flames on deck or in any compartment which is located on, facing, open, and adjacent to that part of the deck on which cargo hose is connected.

(a) On tank ships, ventilator cowls looking onto the after well deck shall be trimmed away from the cargo hose during cargo transfer operations.

(b) On tank ships, air ports looking onto the after well deck shall be closed and dogged during cargo transfer operations.

(c) On all ships, air ports in spaces not used as living accommodations shall be closed and dogged except during such time as these spaces are being worked in. Air ports through the ship's hull in way of docks shall be closed and dogged

by the occupant of the space before he leaves the ship.

(d) Cargo ports shall be closed and secured when not in use. When opened, and providing a means of entrance to the ship they shall be guarded.

§ 6.364 *Lighting.* All vessels of 1000 gross tons or over when moored to a dock, pier or wharf and all vessels alongside them shall, during the hours of darkness, be lighted with incandescent electric lights in accordance with the following requirements except when such lighting, as determined by the captain of the port, may be undesirable. All portable lights shall be of substantial construction and on tank vessels shall be fitted with vapor-proof globes. All portable electric wiring shall be of substantial construction and designed for portable use and in good condition. The length of portable wiring shall be kept at a minimum consistent with the lighting problem and as little portable wiring as possible shall be run over the main deck. All lighting shall be shaded or so arranged that it does not interfere with nearby navigation and, to the extent possible, it shall be so directed as to keep the positions of guards in shadow.

(a) The dock: the dock shall be lighted in way of the gangway and where such lighting is not available from shore it shall be lighted from the ship.

(b) The ship's main deck: The ship's main deck shall be lighted with the ship's permanent deck lighting system.

(c) The offshore side: Lighting of the ship's offshore side shall be sufficient to detect the approach of small boats. It may be accomplished by lights over the ship's side or by lights across the slip.

(d) Over the stern: A light shall be dropped down over the stern to illuminate the area around the propeller and rudder.

(e) For barges alongside: The deck of barges and the top of house lighters alongside the ship shall be lighted either by these vessels or from the ship.

(f) Cargo hatches: The hatches and other cargo spaces when working general cargo shall be lighted by one or more lights in each space as may be required.

(g) Alleyways: The ship's alleyways shall be lighted at night and as may be required during the daytime.

§ 6.365 *Compliance with blackout regulations.* All vessels, regardless of tonnage, when moored to a dock, pier, wharf, or other waterfront facility, or when at anchor, shall comply with blackout and dim out regulations issued by competent authority.

§ 6.366 *Vessels alongside.* No vessel of any kind shall be permitted to come alongside and no vessel shall be permitted to remain alongside after its business with the ship has been concluded, except with the permission of the senior deck officer on duty.

§ 6.367 *Ship's keys.* Ship's keys properly tagged, shall be readily accessible to the deck and engineer officers on duty.

§ 6.368 *Removal and disposal of refuse.* Trash and rubbish which will float shall not be taken to sea for disposal but

shall be removed from the ship at sufficiently frequent intervals to prevent a fire hazard. Garbage, except that which may be prohibited ashore by the provisions of any laws or regulations, shall be placed in covered metal containers and removed as required. Under no circumstances shall galley or boiler ashes be put over the side in port.

CARGO HANDLING

§ 6.375 *Transfer of cargo.* Cargo spaces shall not be opened, until the cargo is ready to be worked or to perform necessary work in such spaces. When the work is completed the cargo spaces shall be closed and secured. To prevent unlawful access to the ship, save-alls, cargo nets, stagings and side ladders, other than gangways shall be removed or triced up, meal time excepted, as soon as the working of the cargo is concluded.

PERSONNEL

§ 6.380 *Responsibility for compliance by crew and others.* The master, owner, operator, and agent of the vessel shall require strict compliance by the members of the crew, guards, and others with the regulations contained in this subpart and shall instruct them therein. Violations of the regulations contained in this subpart shall be reported to the captain of the port.

§ 6.381 *Return to ship in emergency.* When officers and men are ashore and a state of emergency is announced in the port, they shall endeavor to proceed with all possible speed to their ship.

§ 6.382 *Discussion of ship's business.* Officers, crew members, and others shall not discuss ship's business or inform anyone of any anticipated movement of the vessel except as required in the line of duty and then only with persons having proper credentials. Ship's business shall not be discussed within the hearing of those not officially involved.

§ 6.383 *Possession of binoculars and telescopes.* Binoculars and telescopes on vessels shall be in the possession of the master, officers, and lookouts only.

§ 6.384 *Sailing time.* In no case shall a sailing time be posted or announced and every effort shall be made to keep information in relation thereto and to the future movements of the vessel secret.

§ 6.385 *Provision for smoking.* The master shall post a notice in a conspicuous place stating where smoking shall and shall not be permitted aboard. In no case shall smoking be permitted:

(a) On weather decks when moored to a dock, pier, wharf, or other waterfront facility.

(b) When loading or discharging explosives.

(c) In cargo spaces.

(d) When gas freeing ship's tanks or when loading Grade A, B or C liquid inflammable cargo in bulk, except that the master may permit smoking in lounge and mess rooms, in fire rooms when boiler fires are lighted, and in engine rooms when machinery is in operation.

INSPECTION INSTRUCTION AND DRILLS

§ 6.395 *Inspection.* The following inspections shall be required:

(a) (1) Inspection of dock on arrival: Upon arrival at the dock the master shall designate officers to inspect its facilities for furnishing fire fighting assistance, fresh water, steam, electricity and flood lighting. Inquiry shall be made of the terminal superintendent with regard to the immediate and continuous availability of these services. The dock shall also be inspected with reference to moorings, the availability of fire apparatus, guard and pass service and the location of fire alarm boxes and telephones. All of this information shall be given to the master and deck officer on duty.

(2) The chief engineer or an assistant engineer shall be responsible for connecting the shore fire hydrant to the ship's fire line, including the furnishing of hose adapters where required, and for seeing that water under sufficient pressure is available from shore when the ship's fire pumps are not available for this purpose. Weather permitting, fire hose so connected shall be tested under pressure for flow.

(b) Inspection during daylight: At least twice during each four hours, the deck and engine officers on watch shall make a general inspection of their departments. At frequent intervals steam and gas fire smothering apparatus and fire fighting, rescue and life saving apparatus shall be examined to determine its condition and readiness for use.

(c) Sundown inspection: Prior to sundown the deck officer on watch shall make a general inspection of the moorings, and the offshore side of the vessel including the security of barges and lighters permitted to remain alongside for the night.

(d) Inspection during night: At least twice during each four hours the deck and engine officers on watch shall make a general inspection of their departments paying particular attention to spaces which are unoccupied but cannot be locked, to the lighting system, to the deck, and to conditions at the stern of the vessel.

(e) Inspection of cargo spaces: Prior to the loading of general cargo, the mate or deck officer on watch shall make a thorough inspection of the cargo spaces involved assuring himself that they have been properly cleaned, that no unnecessary inflammable or combustible materials remain, and that the lighting is safely arranged. He shall also inspect the cargo handling gear and be present when the longshoremen start work. He shall remain continuously in touch with the working of cargo and when the loading or discharging is completed he shall make a final inspection with the stevedore foreman and be present when the cargo space is closed and secured. During all of the time dangerous cargo is being worked, he shall keep in touch with the Coast Guard detail, cargo guards, and stevedore foremen.

(f) Inspection prior to departure: Prior to departure the ship shall be inspected by officers of the deck and engine departments. In addition to the

testing of steering gear, telegraphs and whistle, the running lights and telephones shall be operated. All locked spaces, storerooms, living accommodations, life boats and cargo spaces not secured for sea shall be inspected. Hatches, doors, and other means of access to all buoyancy spaces not required to be entered shall be properly secured. Watertight doors shall be closed unless frequent passage through them requires otherwise.

§ 6.396 *Instruction*. The master and chief engineer or others whom they may designate shall instruct the crew with regard to ship security. This instruction shall include the regulations contained in this subpart, professional subjects, the use of life saving and fire fighting apparatus, and first aid.

§ 6.397 *Drills*. Instruction shall be supplemented by special drills, blackout drills at night, and air raid drills. Drills ordered by local authorities shall be observed unless otherwise authorized by the captain of the port. In all such drills every attempt shall be made to reproduce, within safe limits, the actual emergency situation.

§ 6.398 *Separability*. If any provision of the regulations contained in this part or the application of such provision to any person, vessel or circumstances shall be held invalid, the validity of the remainder of the regulations contained in this part and the applicability of such provision to other persons, vessels, or circumstances shall not be affected thereby.

[Docket No. A-1732]

WILLIAMS COAL CO.

ORDER GRANTING RELIEF

In the matter of the petition of Williams Coal Company, District No. 9 for relief with respect to the effective minimum price pertaining to a limited tonnage of 8 M x O carbon coal.

On November 3, 1942 the Williams Coal Company, a code member in District No. 9, filed a petition pursuant to section 4 II (d) of the Bituminous Coal Act of 1937, with this Division, requesting permission to sell 12 cars of 8 M x O carbon coal, produced by the said Williams Coal Company at its Williams Mine, Mine Index No. 87, which were on track on October 24, 1942, at the time when Louisville and Nashville Railroad reduced the car rating of petitioner, at a price less than the minimum price and also requested that such relief be effective as of October 24, 1942. The petitioner states that notwithstanding strenuous and continuous effort to sell the 8 M x O carbon coal at the mine price of \$1.20 to 90 cents per net ton (depending on the market area), it was able to move only 5 cars of such carbon coal from October 1 to October 24, 1942. Petitioner further states that it had unloaded on the ground as much of this carbon coal as its facilities permitted, and that on October 24, 1942, it had on hand 13 cars of 8 M x O carbon coal which it was unable to dispose of at the established minimum prices for such coal. Petitioner states that it received an offer of 70 cents per ton f. o. b. mine for 12 of the 13 cars of carbon coal on track for storage for future use in a plant engaged in war production.

In view of the above circumstances, it appears that a reasonable showing of necessity has been made for the granting of relief in the manner hereinafter set forth; and

No petitions of intervention having been filed with the Division in the above-entitled matter; and

The following action being deemed necessary in order to effectuate the purposes of the Act;

Now, therefore, it is ordered. That the petition of the Williams Coal Company in the above-entitled matter is granted and permission is given to petitioner to dispose of the 12 cars of 8 M x O carbon coal, produced by the Williams Mine, Mine Index No. 87, in District No. 9, which were on track on October 24, 1942, at the time when Louisville and Nashville Railroad reduced the car rating of petitioner at a price not less than 70 cents per net ton;

It is further ordered. That the relief granted herein be retroactive to October 24, 1942;

It is further ordered. That the petitioner shall notify the Division and file a report indicating the name and address of the purchaser or purchasers and the price or prices at which the 12 cars of coal were sold within thirty (30) days of the date of this order.

Dated: December 31, 1942.

Pursuant to part 807 of the regulations adopted under section 6 of the Act of July 2, 1940, as amended, the Chief of the Trade Intelligence Division of the Export Control Branch, Office of Exports, charged the F & B Manufacturing Company, Automotive Export Association, Inc., W. The appellants filed a written answer to the charges above set out.

Casa Corona, Bucareli #55, Mexico City, Mexico; Sr. Benito Singer, Continental Automotriz, Correjidora #142, Mexico City, Mexico; and Srs. Productos Casco, 4 a Milan #44, Mexico City, Mexico.

Upon consideration of the record, findings of fact, and recommendation in the matter, the Acting Chief, Export Control Branch of the Office of Exports of the Board of Economic Warfare denied to appellants and any person, association, or organization acting on behalf of, or for their account, the privilege of obtaining individual export license and the use of any general or unlimited export license from the United States until January 16, 1943. Said appellants acknowledged receipt of a copy of said order as of December 5, 1942, and within ten days thereof duly filed a written appeal to the Assistant Director in Charge of the Office of Exports. The undersigned Assistant Director has considered the record in this matter and has concluded that the facts and conclusions of the Compliance Commissioner are supported by the record.

Now therefore, *It is determined and ordered*, That the order of the Acting Chief, Export Control Branch of the Office of Exports, denying to appellants and any person, association or organization acting on behalf of or for the account of the, the privilege of obtaining individual export licenses and the use of any general or unlimited license for any exportation whatsoever from the United States until January 16, 1943, is affirmed.

OFFICE OF PRICE ADMINISTRATION.

[Suspension Order 185]

FABER OIL COMPANY

ORDER RESTRICTING TRANSACTIONS

Faber Oil Company, a Massachusetts corporation, hereinafter called respondent, was duly served with a notice of charges of violations of Ration Order No. 5A, Gasoline Rationing Regulations, issued by the Office of Price Administration. Pursuant to the notice, a hearing upon the charges was held in Boston, Massachusetts, on November 2, 1942. There appeared a representative of the Office of Price Administration and respondent. The evidence pertaining to the charges was presented before an authorized presiding officer. The matter having been considered by the Deputy Administrator in Charge of Rationing, it is hereby determined that:

(a) Respondent is a dealer in gasoline and operates a gasoline filling station at 233 Winter Street, Haverhill, Massachusetts:

(b) Respondent has violated Ration Order No. 5A, Gasoline Rationing Regulations, (§ 1394.1503) in that on various occasions between July 22, 1942, and August 27, 1942, respondent transferred gasoline to consumers and into the fuel tanks of their motor vehicles and accepted in exchange for such transfers 15 Class A, No. 2 coupons; 4 Class A, No. 3 coupons; and 1 Class A, No. 4 coupon.

No. 2—21

Because of the great scarcity and critical importance of gasoline in Massachusetts respondent's violations of Ration Order No. 5A, Gasoline Rationing Regulations, have resulted in the diversion of gasoline from military and essential civilian uses into non-essential uses, in a manner contrary to the public interest and detrimental to the national war effort. It appears to the Deputy Administrator in Charge of Rationing that further violations by respondent are likely unless appropriate administrative action is taken. *It is therefore ordered:*

(c) During the period in which this Suspension Order No. 185 shall be in effect, respondent shall not sell, transfer, or deliver any gasoline to any consumer.

(d) Any terms used in this Suspension Order No. 185 that are defined in Ration Order No. 5A, Gasoline Rationing Regulations, shall have the meaning therein given them.

(e) This Suspension Order No. 185 shall become effective 12:01 a. m. January 6, 1943, and unless sooner terminated, shall expire 12:01 a. m. January 16, 1943.

[Suspension Order 183]

CHRISTINE DODSON

ORDER RESTRICTING TRANSACTIONS

Christine Dodson, doing business as Dodson Service Station, 400 Auburn Avenue, Atlanta, Georgia, hereinafter called respondent, was duly served with a notice of charges of violations of Ration Order No. 5A, Gasoline Rationing Regulations, issued by the Office of Price Administration. Pursuant to the notice, a hearing upon the charges was held in Atlanta, Georgia, on November 9, 1942. There appeared a representative of the Office of Price Administration and respondent. The evidence pertaining to the charges was presented before an authorized presiding officer. The matter having been considered by the Deputy Administrator in Charge of Rationing,

It is hereby determined that:

(a) Respondent is a dealer in gasoline and operates a filling station at 400 Auburn Avenue, Atlanta, Georgia.

(b) Respondent has violated Ration Order No. 5A, Gasoline Rationing Regulations, (§ 1394.1502), in that, on numerous occasions between July 2, 1942, and September 22, 1942, respondent transferred gasoline to consumers and into the fuel tanks of motor vehicles and accepted in exchange therefor one hundred twenty-three (123) Class A, No. 2 gasoline ration coupons.

Because of the great scarcity and critical importance of gasoline in Georgia,

respondent's violations of Ration Order No. 5A, Gasoline Rationing Regulations, have resulted in the diversion of gasoline from military and essential civilian uses into non-essential uses, in a manner contrary to the public interest and detrimental to the national war effort. It appears to the Deputy Administrator in Charge of Rationing that further violations by respondent are likely unless appropriate administrative action is taken.

It is therefore ordered:

(c) During the period in which this Suspension Order No. 183 shall be in effect,

(1) Respondent shall not in any manner, directly or indirectly, sell, transfer or deliver gasoline to any person.

(2) Respondent shall not accept any deliveries or transfers of, or in any manner directly or indirectly receive from any source any gasoline for resale.

(3) No person, firm, or corporation shall deliver, or in any manner directly or indirectly transfer any gasoline to respondent for resale.

(d) Any terms used in this Suspension Order No. 183, that are defined in Ration Order No. 5A, Gasoline Rationing Regulations, shall have the meaning therein given them.

(e) This Suspension Order No. 183 shall become effective 12:01 a. m. January 7, 1943, and unless sooner terminated shall expire 12:01 a. m. January 22, 1943.

(Pub. Law 421, 77th Cong.; Sec. 2 (a) of Pub. Law 671, 76th Cong.; as amended by Pub. Law 89, 77th Cong. and by Pub. Law 507, 77th Cong.; E.O. No. 9125 (7 F.R. 2719); W.P.B. THE NORTH AMERICAN COMPANY

NOTICE OF FILING AND ORDER FOR HEARING

At a regular session of the Securities and Exchange Commission held at its office in the City of Philadelphia, Pa., on the 28th day of December 1942.

Notice is hereby given that a declaration or application (or both) has been filed with the Commission, pursuant to the Public Utility Holding Company Act of 1935, by The North American Company, a registered holding company. All interested persons are referred to said application-declaration, which is on file in the office of this Commission, for a statement of the transactions therein proposed, which are summarized as follows:

The North American Company proposes to acquire approximately 12,500 shares of capital stock of The Detroit Edison Company, a public utility company, on one or both of the following bases: (1) By purchases on the New York Stock Exchange from time to time prior to February 11, 1943 in accordance with such limitations as to price as this Commission may by order prescribe, (2) by purchases off the market prior to Feb-

ruary 11, 1943 at prices not to exceed the closing prices on the New York Stock Exchange (or the average between the bid and ask prices if no sales have been consummated) on the business day immediately preceding the date of any such purchase.

The applicant states that it desires to acquire the shares of stock in order that it may have sufficient shares, together with shares presently held by it, to pay a further quarterly dividend on the applicant's common stock payable in shares of The Detroit Edison Company stock on or about April 1, 1943, at the rate heretofore in effect.

The applicant has hitherto declared seven consecutive quarterly dividends on its common stock payable in shares of The Detroit Edison Company stock at the rate of one share of The Detroit Edison Company stock for each 50 shares of the applicant's common stock. The balance of The Detroit Edison Company stock which will be held after December 30, 1942 will be approximately 143,500 shares and the applicant will require approximately 156,000 shares to pay its next quarterly dividend at the previous rate. The payment of the next quarterly dividend at such rate will eliminate substantially all of the applicant's direct holdings in the Detroit Edison Company in addition to applicant's direct holdings of the Detroit Edison Company stock, North American Utilities Securities Corporation (all of the preferred stock and 80.6% of the common stock of which is owned by the applicant) owns beneficially 5,000 shares.

It appearing to the Commission that it is appropriate and in the public interest and the interest of investors and consumers that a hearing be held with respect to said matters, that said declaration shall not become effective nor said application be granted except pursuant to further order of this Commission;

It is ordered, That a hearing on such matters under the applicable provisions of said Act and Rules of the Commission thereunder be held on January 6, 1943 at 10:00 a. m., E. W. T., in such room in the offices of the Securities and Exchange Commission, 18th and Locust Streets, Philadelphia, Pennsylvania, as the hearing room clerk in Room 318 will at that time advise. At such hearing, cause shall be shown why such declaration or application (or both) shall become effective or shall be granted. Notice is hereby given of said hearing to the above named declarant and applicant and to all interested persons, said notice to be given to declarant and applicant by registered mail and to all other persons by publication in the FEDERAL REGISTER.

It is further ordered, That Richard Townsend, or any other officer or officers of the Commission designated by it for that purpose, shall preside at the hearings in such matter. The officer so designated to preside at any such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of said Act and to a trial examiner under the Commission's Rules of Practice.

It is further ordered, That, without limiting the scope of issues presented by said declaration or application (or both) otherwise to be considered in this proceeding, particular attention will be directed at the hearing to the following matters and questions:

(1) Whether the proposed transactions are appropriate and in the public interest and the interest of investors;

(2) The propriety of the proposed acquisition;

(3) What limitations, if any, as to price should be prescribed as appropriate in the public interest or the interest of investors;

(4) Whether the applicant should be directed to acquire the shares of North American Utilities Securities Corporation; and

(5) Whether it is necessary or appropriate to impose terms or conditions in the public interest or for the protection of investors.

By the Commission.

OGDEN CORPORATION

NOTICE REGARDING FILING OF AMENDMENT

At a regular session of the Securities and Exchange Commission held at its office in the City of Philadelphia, Pa., on the 29th day of December, 1942.

Notice is hereby given that an amendment to a declaration or application has been filed with the Commission under the Public Utility Holding Company Act of 1935 by Ogden Corporation ("Ogden"), a registered holding company;

Notice is further given that any interested person may, not later than January 5, 1943 at 10:00 a. m. E. W. T., request the Commission in writing that a hearing be held on such matter, stating the reasons for such request and the nature of his interest, or may request that he be notified if the Commission should order a hearing thereon. At any time thereafter such application, as filed or as amended, may become effective or may be granted, as provided in Rule U-23 of the Rules and Regulations promulgated pursuant to said Act, or the Commission may exempt such transaction as provided in Rules U-20 (a) and U-100 thereof. Any such request should be addressed: Secretary, Securities and Exchange Commission, Philadelphia, Pennsylvania.

All interested persons are referred to said amendment to the original application which is now on file in the office of said Commission for a statement of the transactions therein proposed, which are summarized as follows:

By order dated March 6, 1942, this Commission, after a public hearing, granted an application filed by The Laclede Gas Light Company ("Laclede"), a subsidiary of Ogden, for exemption from the provisions of section 6 (a) of the Act regarding offers proposed to be made by it to the holders of its outstanding and unpledged Refunding and Extension Mortgage, 5% Gold Bonds, dated 1904 ("1904 Bonds"), in the principal

amount of \$10,000,000, to extend such bonds to April 1, 1945. The Commission also granted, subject to certain conditions, an application of Ogden regarding the acquisition by it of such portion of those bonds of Laclede not extended by other holders thereof. Jurisdiction was reserved by the Commission in said order with respect to (1) its proposal to borrow not in excess of \$2,250,000 for the purpose of purchasing the said bonds, and (2) its proposal to resell such bonds as might be acquired by it.

By order dated July 27, 1942, this Commission, after a public hearing, granted an application filed by Ogden and its subsidiary company, Laclede, requesting approval of the sale to The Equitable Life Assurance Society of the United States of \$1,998,000, principal amount of the Laclede 1904 Bonds, and such additional bonds as Ogden might acquire through July 28, 1942, the aggregate principal amount not to exceed \$2,500,000. The Commission exempted such sale from the provisions of Rule U-50 promulgated under the Act, and thereafter Ogden sold to said insurance company \$2,011,000, principal amount of 1904 Bonds, as extended, on July 28, 1942.

Since July 28, 1942, Ogden, pursuant to its commitment to acquire 1904 Bonds, which commitment was extended to and terminated on November 24, 1942, has purchased an additional \$176,000, principal amount of said 1904 Bonds. Ogden now proposes to sell to The Equitable Life Assurance Society of the United States the principal amount of \$176,000 of said 1904 Bonds, as extended, at the price of 99% of the principal amount thereof, plus accrued interest thereon from October 1, 1942 to the date of sale and delivery. The amendment also requests an exemption from Rule U-50 of the Rules and Regulations promulgated under the Act, with respect to the proposed sale of said bonds.

By the Commission.

A. F. BERNSTEIN AND Co.

PROCEEDINGS AND ORDER REVOKING REGISTRATION AS BROKER AND DEALER

At a regular session of the Securities and Exchange Commission held at its office in the City of Philadelphia, Pennsylvania on the 29th day of December, A. D. 1942.

In the matter of Arthur F. Bernstein, doing business as A. F. Bernstein and Co., 1221 Northern Life Tower Building, Seattle, Washington.

1. Arthur F. Bernstein, doing business as A. F. Bernstein and Co., a sole proprietorship, hereinafter referred to as registrant, is registered as a broker and dealer pursuant to section 15 of the Securities Exchange Act of 1934.

2. On October 21, 1942, we instituted proceedings under section 15 (b) of the Act to determine whether the registration of the above registrant should be revoked. The order for proceedings stated that information had been reported to the Commission by its staff which, if true, tended to show that registrant had willfully violated the anti-fraud provisions of section 17 (a) of the Securities Act of 1933, section 15 (c) (1) of the Securities Exchange Act of 1934 and paragraphs (a) and (b) of Rule X-15C1-2 promulgated pursuant thereto. The information reported to the Commission, outlined in the order for hearing, indicated in substance that:

A. In September, 1939, registrant obtained an option from the Portland Mortgage Company to purchase an idle winery plant, located in South Tacoma, Washington.

B. In October, 1939, the registrant, together with two individuals (hereinafter referred to as his "associates"), participated in arrangements to purchase the aforementioned plant.

C. On December 2, 1939, the registrant and a third party (not an associate) entered into a contract with said Portland Mortgage Company for the purchase of the aforementioned winery for the sum of \$24,000 and made a down payment of \$2,500.00, such payment being furnished by said third party.

D. In January, 1940, registrant and his associates caused Associated Wineries, Inc. to be organized to take over the winery plant mentioned above. On January 18, 1940, the corporation contracted to pay the registrant and the third party mentioned in paragraph C, \$31,500 for the winery or \$7,500.00 more than the sum registrant and said third party had contracted to pay.

E. Also in January, 1940, registrant and his associates caused the corporation to issue stock in such a manner that they became the beneficial owners of substantially all of the shares issued.

F. Registrant was in control of the corporation at all times and participated actively with his associates in the management thereof.

G. From February, 1940, to May, 1941, inclusive, registrant and his associates caused the corporation to sell its preferred and common stock to various persons. In making the sales and inducing the purchase of said securities, one of the registrant's associates and salesmen employed by the corporation made one or more of the following false representations to each of the purchasers:

(1) Associated Wineries, Inc., owned a winery plant in South Tacoma against which there was only a small indebtedness;

(2) Associated Wineries, Inc., had raised amounts varying from \$45,000 to \$60,000 for operation of the plant;

(3) The proceeds from the sale of the stock were to be used for putting the plant into operation;

(4) Associated Wineries, Inc., had berries already in cold storage awaiting the completion of the financing necessary to put the plant into operation;

(5) Henry A. Kyer, President of the Associated Wineries, Inc., had a substantial interest and investment in said company;

(6) Even if Associated Wineries, Inc., never began to operate as a winery its stock would be worth \$1.05 on the basis of the assets of the company.

H. During the period from February, 1940, to May, 1941, the corporation realized approximately \$20,700 from the sale of its stock and from other miscellaneous sources. Of this sum, registrant and his associates received \$14,029.70 in payments on the contract of purchase and for salaries and expenses;

I. To the date hereof, the corporation has not started operation of its winery plant;

J. Registrant effected transactions hereinabove mentioned in paragraph G otherwise than on a national securities exchange;

K. Registrant used the mails and instrumentalities of transportation and communication in interstate commerce in effecting the transactions and inducing the purchase of the securities hereinabove described in paragraph G.

3. On November 10, 1942, registrant submitted to the trial examiner an "answer and consent" to revocation in which he acknowledged receipt and service of adequate notice of these proceedings and waived his opportunity for hearing. In said "answer and consent" registrant further admitted the existence of the cause of action set forth above and consented to the entry of an order revoking his registration as a broker and dealer.

4. On the basis of the foregoing, we find that registrant has willfully violated section 17 (a) of the Securities Act of 1933, section 15 (c) (1) of the Securities Exchange Act of 1934 and paragraphs (a) and (b) of Rule X-15C1-2 promulgated pursuant thereto; and that it is in the public interest to revoke registrant's registration as a broker and dealer. Accordingly,

It is ordered, Pursuant to section 15 (b) of the Securities Exchange Act of 1934, that the registration as a broker and dealer of Arthur F. Bernstein, doing business as A. F. Bernstein and Co., be and it hereby is revoked.

By the Commission (Chairman Purcell and Commissioners Healy, Burke, and O'Brien), Commissioner Pike being absent and not participating.

COLUMBIA GAS & ELECTRIC CORP.
MEMORANDUM OPINION AND ORDER

At a regular session of the Securities and Exchange Commission held at its office in the City of Philadelphia, Pennsylvania on the 30th day of December 1942.

Appearances: William R. Nowlin and David Unterberg, for the Public Utilities Division, Securities and Exchange Commission; Frederick S. Beebe, of Cravath, de Gersdorff, Swain & Wood, New York City, for Columbia Gas & Electric Corporation.

Columbia Gas & Electric Corporation, (hereinafter referred to as Columbia Gas), a registered holding company, and a subsidiary of The United Corporation, also a registered holding company, has filed an application for an extension to December 31, 1943, of the date, December 31, 1942, on which the balances remaining in its accounts designated "Special Capital Surplus" and "Surplus Prior to January 1, 1938" must be restored to its common capital stock account.

A public hearing on the application has been held after appropriate notice.

The application arises by reason of provisions in the findings and opinion (4 SEC 406) an order (Holding Company Act Release No. 1417) of the Com-

mission permitting a declaration by Columbia Gas to become effective regarding the reduction of its common capital stock account from \$194,349,005.62 to \$12,304,282, so as to create a "Special Capital Surplus" of \$182,044,723.62 and freezing for certain specified purposes the balance in its surplus account as of December 31, 1937 in the amount of \$13,261,609.45 in an account designated "Surplus Prior to January 1, 1938". Our order contained, among other things, a condition that:

(3a) * * * unless the time be extended by application to this Commission and order thereon, balances remaining in "Special Capital Surplus" and "Surplus Prior to January 1, 1938" on December 31, 1942 shall be restored to common capital stock account as of the date last mentioned.

The purpose, as stated by applicant, for the creation of the special surplus accounts was (a) to free future earnings for dividends, and (b) to make provision for correcting or eliminating any debatable items in applicant's investment account and in an amount adequate to absorb the various adjustments which applicant might be required or might decide to make in its accounts, including a reduction of the figures appearing on its books for its investment in each subsidiary as of December 31, 1937.

Certain adjustments and deductions of the nature proposed have been made to the surplus accounts, leaving balances remaining as at October 31, 1942 of \$104,482,575.71 in "Special Capital Surplus" and \$944,096.08 in "Surplus Prior to January 1, 1938".

As to such remaining balances applicant states that the determination of the original cost of the fixed assets of its subsidiary companies is a necessary prerequisite to a final decision as to the amounts remaining in "Special Capital Surplus" and "Surplus Prior to January 1, 1938" accounts which are to be restored to the common capital stock account. Applicant further states that although the original cost studies of its subsidiaries have been diligently pressed and the subsidiary companies have at the peak of their respective studies employed over 750 men, unexpected delays and inability to obtain qualified help have hindered the completion of all the original cost studies. Nine such studies, however, have been completed and filed with regulatory bodies for review. In one instance (Cincinnati Gas & Electric Company) the regulatory body has made a field examination of the original cost report and conferences have been held regarding corrections and adjustments to be made in the property accounts of that company. Applicant estimates that most of the remaining cost studies will be finished by the middle of 1943 and contemplates the completion of all of the cost studies by the end of 1943.

Having considered the record, we have concluded that it is not detrimental to the public interest or to the interest of investors or consumers to grant the requested extension, with the express understanding that nothing herein contained is to be construed as a waiver or

modification of any of the other terms and conditions contained in our Order of January 25, 1939 entered in this matter, and, *It is so ordered.*

By the Commission.

Secretary.

FEDERAL WATER AND GAS CORP. ET AL.

NOTICE OF FILING AND ORDER FOR HEARING,
ETC.

At a regular session of the Securities and Exchange Commission held at its office in the City of Philadelphia, Pa. on the 31st day of December 1942.

In the matter of Federal Water and Gas Corporation and subsidiary companies, File No. 54-66; Federal Water and Gas Corporation and subsidiary companies, Respondents, File No. 59-61; and New York Water Service Corporation and Federal Water and Gas Corporation, File No. 59-35.

Notice of filing and order for hearing on plan filed pursuant to section 11 (e); notice of and order for hearing pursuant to sections 11 (b) (1), 11 (b) (2), 15 (f), and 20 (a) of the Public Utility Holding Company Act of 1935 and order consolidating proceedings.

I

Notice is hereby given that Federal Water and Gas Corporation, a registered holding company, has filed an application pursuant to section 11 (e) of the Public Utility Holding Company Act of 1935 for approval of a plan, the purpose of which is to effect compliance by Federal Water and Gas Corporation and its subsidiaries with the provisions of sections 11 (b) (1) and 11 (b) (2) of said Act. The plan provides for the disposition by Federal of all of its interests in subsidiary companies and its subsequent elimination either by dissolution or by merger with an appropriate company. All interested persons are referred to said plan which is on file at the office of this Commission for a statement of the transactions therein proposed which are summarized as follows:

(a) Federal proposes to sell sufficient assets to provide funds to retire its 5½% Debentures, Series due 1954, presently outstanding in an amount of approximately \$4,600,000. In this connection a contract has already been entered into covering the sale of the preferred and common stocks owned by Federal of Union Water Service Company for \$1,200,000 and in addition Federal is presently negotiating for the sale of its interests in Ohio Water Service Corporation and West Virginia Water Service Corporation.

(b) Federal proposes to sell to Southern Natural Gas Company, a subsidiary of Federal which is also a registered holding company, its investments in Chattanooga Gas Company and Mississippi Public Service Company, and also

proposes to sell the Mississippi properties of Peoples Water and Gas Company to the Southern Natural Gas Company system.

(c) Thereafter, upon payment of its outstanding debentures and the sales described in (b) above, Federal will, in partial liquidation, distribute to its stockholders the share of stock of Southern Natural Gas Company of which it is then possessed.

(d) Federal also proposes to dispose of its interest in Scranton-Spring Brook Water Service Company, Pennsylvania Water Service Company, The Winton Water Company, New York Water Service Corporation, Peoples Water and Gas Company, Alabama Water Service Company, and the subsidiary companies thereof: *Provided, however, That disposition by way of sale of securities of Pennsylvania Water Service Company, Scranton-Spring Brook Water Service Company, Peoples Water and Gas Company, and New York Water Service Corporation shall not be effected except after recapitalization of such companies.*

(e) With respect to the recapitalization of New York Water Service Corporation, Federal Water and Gas Corporation and New York Water Service Corporation will consent to the entry of an order requiring them to take such steps as the Commission shall find necessary to change the capital structure of New York Water Service Corporation so as to provide a fair and equitable distribution of voting power among security holders of such company, the common stock of such company held by Federal to be accorded no recognition in such recapitalization. Notwithstanding the above, it is, however, the intention of Federal Water and Gas Corporation and New York Water Service Corporation to sell the properties constituting the New York Water Service Corporation system from time to time as favorable opportunities are presented.

(f) In the event that the assets of Scranton-Spring Brook Water Service Company and Peoples Water and Gas Company are not disposed of by sale, it is proposed that such companies be recapitalized and that consent will be given to the entry of an order by the Commission requiring such recapitalization.

(g) Following the distribution to security holders of the stock of Southern Natural Gas Company owned by Federal, Federal will dispose of its assets, not theretofore sold, through sale wherever feasible and will distribute the proceeds thereof to security holders, or where disposition by sale is not advisable will distribute securities in kind to its stockholders. Federal will thereupon be eliminated either by dissolution or merger with an appropriate company.

II

The Commission having examined, pursuant to sections 11 (a), 18 (a), and 18 (b) of the Public Utility Holding Company Act of 1935 (the "Act"), the corporate structure of Federal Water and Gas Corporation, a registered holding company, and its subsidiary companies,

the relationship among companies of said holding company system, the character of the interests thereof and the properties owned or controlled thereby, to determine the extent to which the corporate structure of such holding company system and the companies therein may be simplified, unnecessary complexities therein eliminated, voting power fairly and equitably distributed among the holders of securities thereof, and the properties and business of such system should be confined to those necessary or appropriate to the operations of an integrated public utility system or systems under the standards of section 11 (b) of the Act; and said examination having disclosed data establishing or tending to establish the following:

18. For the years 1937 through 1941 (and since at least 1934) the Federal income tax returns of Scranton contain deductions for depreciation which are substantially greater than the provisions for retirements and replacements of property on its books during such years.

19. Unless and until preferred stock dividends of either series of preferred stock are in arrears for four quarterly periods, the entire voting control of Scranton is vested in the common stock, each share of which is entitled to one vote.

20. As a result of dividend arrears, the preferred stock of Scranton now has

The reserve for retirements and replacements represented 9.8% of gross property.

13. As of December 31, 1941, the percentage of long term debt to consolidated net property was 63.0%; the percentage of the total of long term debt, the Special Loan from Federal, and preferred stock, including arrears, to consolidated net property was 92.3%.

14. The gross book value of the water and gas properties of Scranton, as reflected on its books at date of acquisition, March 20, 1928, was approximately \$17,000,000 in excess of the amounts at which such properties were carried in the accounts of the predecessor companies. The amounts at which the property, plant, and equipment of such predecessor companies were shown on their books reflected an upward revaluation recorded since January 1, 1915 by a predecessor, Spring-Brook Water Supply Company, by which fixed capital was written up by \$3,500,944 and the reserve for depreciation was decreased by \$511,417. The contra credit was to surplus.

15. The gross book value of the properties at date of acquisition was \$2,932,962 in excess of cost to the company, which amount was credited to the reserve for retirements and replacements.

16. Estimates of the original cost of the gas utility properties owned directly by Scranton, as of December 31, 1940 and as furnished by it to the Pennsylvania Public Utility Commission, indicate that the book carrying value of approximately \$6,500,000 of such properties, as of December 31, 1941, exceeds the estimated original cost of approximately \$4,480,000 (including net addition in 1941) by more than \$1,900,000.

17. The operating revenues, gross income before fixed charges, net income, preferred dividend requirements, and the balance for common stock, of Scranton, on a consolidated basis for each of the years from 1937 through 1941, were as follows:

41.4% of the voting power, and the common stock has 58.6% of the voting power.

IV

21. Peoples Water and Gas Company, a subsidiary of Federal, is a corporation organized under the laws of Delaware. All of the outstanding common stock of Peoples is owned by Federal. In addition, Federal owned, as of December 31, 1941, \$400,000 principal amount out of a total outstanding long term indebtedness of \$3,047,000 and 2,427 shares of preferred stock out of a total of 6,997 shares outstanding.

22. Peoples operates natural gas distribution properties in Mississippi, man-

manufactured gas production and distribution properties in southern Florida, and water properties in Oregon. The natural gas distribution properties in Mississippi purchase their entire natural gas requirements from Southern Natural Gas Company, an associate company in the Federal holding company system.

It, therefore, tentatively appearing to the Commission, on the basis of the allegations hereinbefore set forth, that the holding company system of Federal Water and Gas Corporation is not confined in its operations to those of a single integrated public utility system, within the meaning of the Act, or to those of a single integrated public utility system together with such additional integrated public utility systems as meet the requirements of section 11 (b) (1) and such other businesses as can be retained under the standards of section 11 (b), and that proceedings should be instituted under section 11 (b) (1) with respect to the Federal Water and Gas Corporation holding company system; and

It further appearing to the Commission, on the basis of the allegations hereinbefore set forth, that proceedings should be instituted under sections 11 (b) (2), 15 (f), and 20 (a) of the Act with respect to Scranton-Spring Brook Water Service Company and Peoples Water and Gas Company to determine whether and what steps should be required to be taken by each of such companies pursuant to the provisions of said sections;

Wherefore it is ordered, That Federal Water and Gas Corporation and each of its subsidiary companies hereinbefore named and included herein, all of which are hereby made Respondents in these proceedings, shall file with the Secretary of this Commission, on or before January 11, 1943, joint or several answers in the form prescribed by Rule U-25, admitting, denying, or otherwise explaining their respective positions as to each of the allegations set forth in paragraphs 1 through 29 hereof.

VI

It appearing to the Commission that it is appropriate in the public interest and in the interest of investors and consumers that a hearing be held with respect to the plan filed by Federal Water

and Gas Corporation and subsidiary companies pursuant to section 11 (e),

It further appearing to the Commission that the proceedings instituted by it herein under sections 11 (b) (1), 11 (b) (2), 15 (f), and 20 (a) of the Act, the proceedings in respect of the plan filed by Federal Water and Gas Corporation pursuant to section 11 (e) of the Act and the proceedings heretofore instituted by the Commission directed to New York Water Service Corporation and Federal Water and Gas Corporation, pursuant to section 11 (b) (2) of the Act (File No. 59-35) involve common questions of law and fact and should be consolidated.

It further is ordered, That such proceedings be, and the same hereby are, consolidated.

VII

It is further ordered, That hearings on such matters, under the applicable provisions of the Act and the Rules of the Commission thereunder, be held on the 18th day of January, 1943, at 10:00 a. m. at the offices of the Securities and Exchange Commission, 18th and Locust Streets, Philadelphia, Pennsylvania. On such day, the hearing-room clerk in Room 318 will advise as to the room in which such hearing will be held.

It is further ordered, That Willis N. Monty, or any other officer or officers designated by the Commission to preside at such hearing, shall exercise all powers granted to the Commission under section 18 (c) of the Act and to a trial examiner under the Commission's Rules of Practice.

It is further ordered, That:

1. At the outset of said hearings, evidence will be adduced for the purpose of determining:

(a) Whether the allegations set forth in paragraphs (1) to (29) hereof are true and accurate;

(b) Whether an order should be entered requiring the divestment by Federal of all interests held by it, directly or indirectly, in the businesses conducted and properties owned by Union Water Service Company, Ohio Water Service Company, West Virginia Water Service Company, Pennsylvania Water Service Company, Scranton-Spring Brook Water Service Company, and New York Water Service Corporation, and all subsidiaries of such companies; *Provided*, That in the

case of Scranton-Spring Brook Water Service Company and New York Water Service Corporation such divestment shall not be effected through the sale of securities owned by Federal prior to the recapitalization of such companies in such manner as to provide for a fair and equitable distribution of voting power among security holders thereof.

(c) Whether an order should be entered requiring the divestment by Federal of its interests in the water properties in Alabama owned by Alabama Water Service Company and the water properties in Oregon and the gas properties in Florida owned by Peoples Water and Gas Company; *Provided*, That in the case of the properties presently owned by Peoples Water and Gas Company such divestment shall not be effected through the sale of securities owned by Federal prior to the recapitalization of such company in such manner as to provide for a fair and equitable distribution of voting power among security holders thereof.

(d) Whether the continued existence of Pennsylvania Water Service Company and the sixty-three inactive subsidiaries of Scranton-Spring Brook Water Service Company referred to in paragraph (5) hereof are not an unnecessary corporate complexity in the Federal holding company system and whether such companies should be eliminated;

(e) Whether an order should be entered requiring the recapitalization of Scranton-Spring Brook Water Service Company so as to provide a fair and equitable distribution of voting power among security holders of such company;

(f) Whether an order should be entered requiring the recapitalization of Peoples Water and Gas Company so as to provide a fair and equitable distribution of voting power among security holders of such company;

(g) Whether an order should be entered requiring recapitalization of New York Water Service Company so as to provide a fair and equitable distribution of voting power among security holders of such company, the common stock, of such company to be accorded no recognition in such recapitalization;

(h) Whether the plan filed by Federal Water and Gas Corporation and subsidiaries pursuant to section 11 (e) of the Act is necessary to effectuate the provisions of section 11 (b) of the Act, and is fair and equitable to the persons affected thereby.

2. At subsequent hearings, further evidence will be adduced for the purpose of determining:

(a) Whether the gas properties of Alabama Gas Company, Alabama Natural Gas Corporation, Huntsville Gas Company, Mississippi Public Service Company, Peoples Water and Gas Company, and Chattanooga Gas Company constitute more than a single integrated public utility system and systems additional thereto, control of which may be retained by Federal under section 11 (b) (1) of the Act;

(b) Whether the natural gas distribution properties located in Alabama and Mississippi constitute the principal or single integrated public utility system of

Federal or such principal system and such additional integrated public utility systems as are retainable under section 11 (b) (1);

(c) Whether, under the terms of section 11 (b) (1) and especially clauses (A) and (C) thereof, Federal can retain any interest in the electric utility assets of Alabama Water Service Company located in Alabama;

(d) Whether, under section 11 (b) (1) and especially clauses (A) and (C) thereof, Federal can retain any interest in the gas utility property located in Chattanooga, Tenn.; and in its manufactured gas utility properties located in Alabama;

(e) Whether the businesses conducted by Southern Natural Gas Company and its non-utility subsidiaries are reasonably incidental or economically necessary or appropriate to the operations of any of the gas utility systems operated by the companies named in paragraph 2 (a) above;

(f) Whether the continued existence of Federal is not an unnecessary corporate complexity in the Federal holding company system and whether such company should be eliminated;

(g) What further action may be required by Federal and its subsidiaries to effect complete compliance with section 11 (b) of the Act;

(h) Whether any of the acquisitions of securities or utility assets contemplated by the plan filed by Federal Water and Gas Corporation and subsidiary companies pursuant to the provisions of section 11 (e) of the Act will be detrimental to the carrying out of the provisions of section 11 of said Act and whether such acquisitions will serve the public interest by tending toward the economical and efficient development of an integrated public utility system.

It is further ordered, That all parties and persons permitted to participate in the proceeding directed toward New York Water Service Corporation and Federal Water and Gas Corporation under section 11 (b) (2) (File No. 59-35) shall be and hereby are given the same rights with respect to the present consolidated proceedings.

It is further ordered, That any other person desiring to be heard in connection with these proceedings or proposing to intervene herein shall file with the Secretary of the Commission, on or before the 14th day of January, 1943, his request or application therefor, as provided by Rule XVII of the Rules of Practice of the Commission.

It is further ordered, That jurisdiction be and hereby is reserved to separate, either in whole or in part, or for disposition in whole or in part, any of the issues or questions which may arise in these proceedings and to take such other action as may appear conducive to an orderly, prompt, and economic disposition of the matters involved.

It is further ordered, That the Secretary of the Commission shall serve notice of the hearing aforesaid by mailing a copy of this order to Federal and its various subsidiaries, the Public Utility Commissions of the states of Alabama, Louisiana, New Jersey, New York, Ohio, Oregon, Pennsylvania, Tennessee, Texas,

MACGILLIVRAY AND Co.

FINDINGS AND ORDER REVOKING REGISTRATION AS BROKER AND DEALER

At a regular session of the Securities and Exchange Commission held at its office in the City of Philadelphia, Pa., on the 29th day of December, A. D. 1942.

In the matter of Duncan John MacGillivray, Jr., doing business as MacGillivray and Company, 303 Radio Central Building, Spokane, Washington.

1. Duncan John MacGillivray, Jr., doing business as MacGillivray and Company, a sole proprietorship, hereinafter referred to as registrant, is registered with this Commission as a broker and dealer pursuant to section 15 of the Securities Exchange Act of 1934.

2. On October 20, 1942, we instituted proceedings under section 15 (b) of the Act to determine whether registrant's registration as a broker and dealer should be revoked. The order for proceedings stated that information had been reported to the Commission by its staff, which, if true, tended to show that registrant had willfully violated the provisions of section 17 (a) of the Securities Act of 1933, section 15 (c) (1) of the Securities Exchange Act of 1934, and paragraphs (a) and (b) of Rule X-15-C-1-2 promulgated pursuant thereto. The order recited that information had been reported to the Commission to the effect that:

A. During the period from approximately January 1, 1941, to approximately April 1942, registrant sold stock of the Mohawk Mining Company to various persons. In making and inducing such

sales, registrant represented to such persons that:

(1) Only a small amount of Mohawk Mining stock was available, when in fact, registrant had available at that time 50,000 shares of said stock and access to at least 35,000 additional shares;

(2) The price of Mohawk Mining Company stock would double within sixty to ninety days, when in fact, registrant had no reasonable basis for believing that the price of said stock would double within sixty to ninety days;

(3) Registrant had inside information concerning sensational news which, when released, would increase the price of said company's stock, when in fact, registrant had no such information.

B. During the period mentioned in paragraph A hereof, registrant, while engaged in the sale of Mohawk Mining Company stock, induced the purchasers thereof, by the representations which he made, to believe that the market price for such stock was advancing, but omitted to state to such persons that the advancing price was arbitrarily determined and fixed by said registrant and that there was no independent market for such stock.

C. During the period mentioned in paragraph A hereof, registrant, while engaged in the sale of Mohawk Mining Company stock represented to the purchasers thereof that the price at which he was offering said stock was the market price in Spokane, Washington, but omitted to state to such purchasers that said market price was made, created and controlled by him.

D. Registrant effected the transactions hereinabove mentioned in paragraphs A, B and C otherwise than on a national securities exchange.

E. Registrant used the mails and the instruments of interstate commerce in effecting the transactions and inducing the purchases and making the sales hereinabove described in paragraphs A, B and C.

3. A hearing was held before a trial examiner on November 10, 1942, at which time an "answer and consent" to revocation was submitted, in which registrant acknowledged receipt and service of adequate notice of these proceedings and waived his opportunity for hearing. In said "answer and consent" registrant further admitted and acknowledged, for the purpose of this proceeding only, the existence of the cause of action set forth above and consented to the entry of an order revoking his registration as a broker and dealer pursuant to section 15 (b) of the Act.

4. On the basis of the foregoing, we find that registrant has willfully violated section 17 (a) of the Securities Act of 1933, section 15 (c) (1) of the Securities Exchange Act of 1934, and paragraphs (a) and (b) of Rule X-15C1-2 promulgated pursuant thereto; and that it is in the public interest to revoke registrant's registration as a broker and dealer. Accordingly,

It is ordered, Pursuant to section 15 (b) of the Securities Exchange Act of 1934, that the registration as a broker and dealer of Duncan John MacGillivray, Jr.,

doing business as McGillivray and Company, be and it hereby is revoked.

By the Commission (Chairman Purcell and Commissioners Healy, Burke, and O'Brien), Commissioner Pike being absent and not participating.
