Our forefathers declared the independence of our Nation “with a firm reliance on the protection of divine Providence.” In that reliance, they set forth the conviction that all men are created equal and endowed by their Creator with unalienable rights to life, liberty, and the pursuit of happiness.

More than a century and three-quarters after our Nation was dedicated to that proposition, it may truly be reaffirmed that “We are a religious people whose institutions presuppose a Supreme Being.” Conscious of the religious character of our people, the Congress of the United States by a joint resolution of April 17, 1952, provided that “The President shall set aside and proclaim a suitable day each year, other than a Sunday, as a National Day of Prayer, on which the people of the United States may turn to God in prayer and meditation, at churches, in groups, and as individuals.”

NOW, THEREFORE, I, JOHN F. KENNEDY, President of the United States of America, do set aside and proclaim Wednesday, the sixteenth day of October 1963, as the National Day of Prayer.

On this day, let us acknowledge anew our reliance upon the divine Providence which guided our founding fathers. Let each of us, according to his own custom and his own faith, give thanks to his Creator for the divine assistance which has nurtured the noble ideals in which this Nation was conceived.

Most especially, let us humbly acknowledge that we have not yet succeeded in obtaining for all of our people the blessings of liberty to which all are entitled. On this day, in this year, as we concede these shortcomings, let each of us pray that through our failures we may derive the wisdom, the courage, and the strength to secure for every one of our citizens the full measure of dignity, freedom, and brotherhood for which all men are qualified by their common fatherhood under God.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the Seal of the United States of America to be affixed.

DONE at the City of Washington this eighth day of October in the year of our Lord nineteen hundred and sixty-three, and of [seal] the Independence of the United States of America the one hundred and eighty-eighth.

Dean Rusk,

Memorandum of October 10, 1963

[GOVERNMENT PATENT POLICY]

Memorandum for the Heads of Executive Departments and Agencies

Over the years, through Executive and Legislative actions, a variety of practices has developed within the Executive Branch affecting the disposition of rights to inventions made under contracts with outside organizations. It is not feasible to have complete uniformity of practice throughout the Government in view of the differing missions and statutory responsibilities of the several departments and agencies engaged in research and development. Nevertheless, there is need for greater consistency in agency practices in order to further the governmental and public interests in promoting the utilization of federally financed inventions and to avoid difficulties caused by different approaches by the agencies when dealing with the same class of organizations in comparable patent situations.

From the extensive and fruitful national discussions of government patent practices, significant common ground has come into view. First, a single presumption of ownership does not provide a satisfactory basis for government-wide policy on the allocation of rights to inventions. Another common ground of understanding is that the Government has a responsibility to foster the fullest exploitation of the inventions for the public benefit.

Attached for your guidance is a statement of government patent policy, which I have approved, identifying common objectives and criteria and setting forth the minimum rights that government agencies should acquire with regard to inventions made under their grants and contracts. This statement of policy seeks to protect the public interest by encouraging the Government to acquire the principal rights to inventions in situations where the nature of the work to be undertaken or the Government's past investment in the field of work favors full public access to resulting inventions. On the other hand, the policy recognizes that the public interest might also be served by accord exclusive commercial rights to the contractor in situations where the contractor has an established non-governmental commercial position and where there is greater likelihood that the invention would be worked and put into civilian use than would be the case if the invention were made more freely available.

Wherever the contractor retains more than a non-exclusive license, the policy would guard against failure to practice the invention by requiring that the contractor take effective steps within three years after the patent issues to bring the invention to the point of practical application or to make it available for licensing on reasonable terms. The Government would also have the right to insist on the granting of a license to others to the extent that the invention is required for public use by governmental regulations or to fulfill a health need, irrespective of the purpose of the contract.

The attached statement of policy will be reviewed after a reasonable period of trial in the light of the facts and experience accumulated. Accordingly, there should be continuing efforts to monitor, record, and evaluate the practices of the agencies pursuant to the policy guidelines.

This memorandum and the statement of policy shall be published in the FEDERAL REGISTER.

JOHN F. KENNEDY

STATEMENT OF GOVERNMENT PATENT POLICY

BASIC CONSIDERATIONS

A. The government expends large sums for the conduct of research and development which results in a considerable number of inventions and discoveries.

B. The inventions in scientific and technological fields resulting from work performed under government contracts constitute a valuable national resource.
C. The use and practice of these inventions and discoveries should stimulate inventors, meet the needs of the government, recognize the equities of the contractor, and serve the public interest.

D. The public interest in a dynamic and efficient economy requires efforts to be made to encourage the expeditious development and civilian use of these inventions. Both the need for incentives to draw forth private initiatives to this end, and the need to promote healthy competition in industry must be weighed in the disposition of patent rights under government contracts. Where exclusive rights are acquired by the contractor, he remains subject to the provisions of the antitrust laws.

E. The public interest is also served by sharing of benefits of government-financed research and development with foreign countries to a degree consistent with our international programs and with the objectives of U.S. foreign policy.

F. There is growing importance attaching to the acquisition of foreign patent rights in furtherance of the interests of U.S. industry and the government.

G. The prudent administration of government research and development calls for a government-wide policy on the disposition of inventions made under government contracts reflecting common principles and objectives, to the extent consistent with the missions of the respective agencies. The policy must recognize the need for flexibility to accommodate special situations.

**POLICY**

Section 1. The following basic policy is established for all government agencies with respect to inventions or discoveries made in the course of or under any contract of any government agency, subject to specific statutes governing the disposition of patent rights of certain government agencies.

(a) Where

(1) a principal purpose of the contract is to create, develop or improve products, processes, or methods which are intended for commercial use (or which are otherwise intended to be made available for use) by the general public at home or abroad, or which will be required for such use by governmental regulations; or

(2) a principal purpose of the contract is for exploration into fields which directly concern the public health or public welfare; or

(3) the contract is in a field of science or technology in which there has been little significant experience outside of work funded by the government, or where the government has been the principal developer of the field, and the acquisition of exclusive rights at the time of contracting might confer on the contractor a preferred or dominant position; or

(4) the services of the contractor are

(i) for the operation of a government-owned research or production facility; or

(ii) for coordinating and directing the work of others,

the government shall normally acquire or reserve the right to acquire the principal or exclusive rights throughout the world in and to any inventions made in the course of or under the contract. In exceptional circumstances the contractor may acquire greater rights than a non-exclusive license at the time of contracting, where the head of the department or agency certifies that such action will best serve the public interest. Greater rights may also be acquired by the contractor after the invention has been identified, where the invention when made in the course of or under the contract is not a primary object of the contract, provided the acquisition of such greater rights is consistent with the intent of this Section 1(a) and is a necessary incentive to call forth private risk capital and expense to bring the invention to the point of practical application.
(b) In other situations, where the purpose of the contract is to build upon existing knowledge or technology to develop information, products, processes, or methods for use by the government, and the work called for by the contract is in a field of technology in which the contractor has acquired technical competence (demonstrated by factors such as know-how, experience, and patent position) directly related to an area in which the contractor has an established nongovernmental commercial position, the contractor shall normally acquire the principal or exclusive rights throughout the world in and to any resulting inventions, subject to the government acquiring at least an irrevocable non-exclusive royalty free license throughout the world for governmental purposes.

(c) Where the commercial interests of the contractor are not sufficiently established to be covered by the criteria specified in Section 1(b), above, the determination of rights shall be made by the agency after the invention has been identified, in a manner deemed most likely to serve the public interest as expressed in this policy statement, taking particularly into account the intentions of the contractor to bring the invention to the point of commercial application and the guidelines of Section 1(a) hereof, provided that the agency may prescribe by regulation special situations where the public interest in the availability of the inventions would best be served by permitting the contractor to acquire at the time of contracting greater rights than a non-exclusive license. In any case the government shall acquire at least a non-exclusive royalty free license throughout the world for governmental purposes.

(d) In the situation specified in Sections 1(b) and 1(c), when two or more potential contractors are judged to have presented proposals of equivalent merit, willingness to grant the government principal or exclusive rights in resulting inventions will be an additional factor in the evaluation of the proposals.

(e) Where the principal or exclusive (except as against the government) rights in an invention remain in the contractor, he should agree to provide written reports at reasonable intervals, when requested by the government, on the commercial use that is being made or is intended to be made of inventions made under government contracts.

(f) Where the principal or exclusive (except as against the government) rights in an invention remain in the contractor, unless the contractor, his licensee, or his assignee has taken effective steps within three years after a patent issues on the invention to bring the invention to the point of practical application or has made the invention available for licensing royalty free or on terms that are reasonable in the circumstances, or can show cause why he should retain the principal or exclusive rights for a further period of time, the government shall have the right to require the granting of a license to an applicant on a non-exclusive royalty free basis.

(g) Where the principal or exclusive (except as against the government) rights to an invention are acquired by the contractor, the government shall have the right to require the granting of a license to an applicant royalty free or on terms that are reasonable in the circumstances to the extent that the invention is required for public use by governmental regulations or as may be necessary to fulfill health needs, or for other public purposes stipulated in the contract.

(h) Where the government may acquire the principal rights and does not elect to secure a patent in a foreign country, the contractor may file and retain the principal or exclusive foreign rights subject to retention by the government of at least a royalty free license for governmental purposes and on behalf of any foreign government pursuant to any existing or future treaty or agreement with the United States.

Sec. 2. Government-owned patents shall be made available and the technological advances covered thereby brought into being in the shortest time possible through dedication or licensing and shall be listed in official government publications or otherwise.
The Federal Council for Science and Technology in consultation with the Department of Justice shall prepare at least annually a report concerning the effectiveness of this policy, including recommendations for revision or modification as necessary in light of the practices and determinations of the agencies in the disposition of patent rights under their contracts. A patent advisory panel is to be established under the Federal Council for Science and Technology to

(a) develop by mutual consultation and coordination with the agencies common guidelines for the implementation of this policy, consistent with existing statutes, and to provide over-all guidance as to disposition of inventions and patents in which the government has any right or interest; and

(b) encourage the acquisition of data by government agencies on the disposition of patent rights to inventions resulting from federally-financed research and development and on the use and practice of such inventions, to serve as basis for policy review and development; and

(c) make recommendations for advancing the use and exploitation of government-owned domestic and foreign patents.

Sec. 4. Definitions: As used in this policy statement, the stated terms in singular and plural are defined as follows for the purposes hereof:

(a) Government agency—includes any Executive department, independent commission, board, office, agency, administration, authority, or other government establishment of the Executive Branch of the Government of the United States of America.

(b) "Invention" or "Invention or discovery"—includes any art, machine, manufacture, design, or composition of matter, or any new and useful improvement thereof, or any variety of plant, which is or may be patentable under the Patent Laws of the United States of America or any foreign country.

(c) Contractor—means any individual, partnership, public or private corporation, association, institution, or other entity which is a party to the contract.

(d) Contract—means any actual or proposed contract, agreement, grant, or other arrangement, or sub-contract entered into with or for the benefit of the government where a purpose of the contract is the conduct of experimental, developmental, or research work.

(e) "Made"—when used in relation to any invention or discovery means the conception or first actual reduction to practice of such invention in the course of or under the contract.

(f) Governmental purpose—means the right of the Government of the United States (including any agency thereof, state, or municipal government) to practice and have practiced (made or have made, used or have used, sold or have sold) throughout the world by or on behalf of the Government of the United States.

(g) "To the point of practical application"—means to manufacture in the case of a composition or product, to practice in the case of a process, or to operate in the case of a machine and under such conditions as to establish that the invention is being worked and that its benefits are reasonably accessible to the public.
Title 5—Administrative Personnel

Chapter 1—Civil Service Commission

Reorganization and Revision of Chapter

In the Federal Register for September 14, 1963, the Civil Service Commission published its new regulations to become effective November 15, 1963, superseding the corresponding old regulations on that date. Complete background information appears in the explanatory statement published with those regulations.

Among other things, this explanatory statement indicated that with minor exceptions the new regulations did not include regulations to replace the current pay and leave regulations and, accordingly, all of Part 25 except the appeals provisions of § 25.416; all of Part 30; and all of Part 27 except § 27.1 would remain in effect on November 15, 1963. However, the explanatory statement also indicated that new pay and leave regulations to replace these parts would be issued at a later date and given a correspondingly later effective date.

These new regulations, consisting of New Parts 530, 531, 534, 539, 550, 610, and 630, are set out below. They become effective December 15, 1963, superseding the corresponding old regulations, i.e., those described in the preceding paragraph, on that date.

One change in the new pay and leave regulations appears to warrant comment. Appendix A to Part 30, Annual and Sick Leave Regulations (list of officers to whom the Annual and Sick Leave Act of 1951, as amended, does not apply) is not being published with the new regulations. This list is included in the Commission's Federal Personnel Manual Supplement 990-3, and any changes in the list that are approved by the Chairman of the Civil Service Commission under authority of paragraph 2 of Executive Order 10540 will be made in that supplement. In addition, these changes will be published as notices in the Federal Register.

The new regulations do not reflect any changes in the current pay and leave regulations that were published in the Federal Register after September 18, 1963. Those changes will be published in the near future as amendments of the new regulations. Any other changes in these regulations that are to be effective before December 15, 1963, will be published in the Federal Register in both the current and new form. Thus, the new pay and leave regulations that are effective December 15, 1963 consist of:

1. The regulations as set out below.
2. Amendments of these regulations which reflect amendments of the current regulations between September 19, 1963 and October 12, 1963; and:

3. Any other amendments of these new regulations which are published in the Federal Register after October 12, and before December 15, 1963.

§ 550.111 Authorization of overtime pay.

(a) Overtime work means each hour of work in excess of 40 hours in an administrative workweek that is:

(b) Absence on leave. An employee is entitled to a night pay differential for a period of paid leave only when the total amount of that leave in a pay period, including both night and day hours, is less than 8 hours.

(c) Relation to overtime and holiday pay. Night pay differential is in addition to overtime or holiday compensation payable under this subpart and it is not included in the rate of basic compensation used to compute the overtime or holiday compensation. An employee earns the same amount of night pay differential during a night overtime period, whether he is paid in money or granted compensatory time off for the overtime work.

(d) Temporary assignment to different tour of duty. An employee is entitled to a night pay differential for nightwork performed when he is assigned temporarily to a tour of duty other than his own.

§ 550.131 Authorization of pay for holiday work.

(b) An employee is entitled to compensation for overtime work on a holiday at the same rate as for overtime work on other days.

§ 550.141 Authorization of premium pay on an annual basis.

An agency may pay premium pay on an annual basis, instead of the premium pay prescribed in this subpart for regularly scheduled overtime, night, and holiday work, to an employee in a position requiring him regularly to remain at, or within the confines of, his station during longer than ordinary periods of duty, a substantial part of which consists of remaining in a standby status rather than performing work. Premium pay under this section is determined as an appropriate percentage, not in excess of 25 percent, of such part of the employee's rate of basic compensation as does not exceed the minimum rate of basic compensation for grade GS-9.

§ 550.142 General restrictions.

An agency may pay premium pay under § 550.141 only if that premium pay, or a prejudicial part appropriate to reflect the full cycle of the employee's duties and the full range of conditions in his position, would be:

(a) More than the premium pay which would otherwise be payable under this subpart for the hours of actual work customarily required in his position, excluding standby time during which he performs no work; and
§ 550.143 Bases for determining positions for which premium pay under § 550.141 is authorized.

(a) The requirement for the type of position referred to in § 550.141 that an employee regularly remain at, or within the confines of, his station must meet all the following conditions:

(1) A position with a tour of duty of 40 hours a week or more is authorized.

(2) A position with a tour of duty of 30 or more hours a week is authorized.

(3) If certain hours of the tour of duty are regularly devoted to actual work and others are spent in a standby status, that part of the tour of duty devoted to standing by is at least 25 percent of the entire tour of duty.

(b) An employee has a basic workweek requiring full-time performance of actual work and is required, in addition, to remain on standby duty during all daylight hours each day, or for 12 hours each day, or for 24 hours each day, with the employee living at his station during the period of his assignment to his tour, and with a schedule of: 5 days a week—5 percent, unless 25 or more hours of actual work is cutomarily required, in which event—10 percent; 72 hours a week—5 percent, unless 30 or more hours of actual work is cutomarily required, in which event—20 percent; 84 hours or more a week—25 percent.

§ 550.144 Rates of premium pay payable under § 550.141.

(a) An agency may pay the premium pay on an annual basis referred to in § 550.141, to an employee who meets the requirements of that section, at one of the following percentages of such part of the employee's rate of basic compensation as does not exceed the minimum rate of basic compensation for grade GS-9:

(1) A position with a tour of duty of the 24 hours on duty, 24 hours off duty type and with a schedule of: 60 hours a week—5 percent, unless 25 or more hours of actual work is cutomarily required, in which event—10 percent; 72 hours a week—5 percent, unless 30 or more hours of actual work is cutomarily required, in which event—20 percent; 84 hours or more a week—25 percent.

(2) A position with a tour of duty requiring the employee to remain on duty during all daylight hours each day, or for 12 hours each day, or for 24 hours each day, with the employee living at his station during the period of his assignment to his tour, and with a schedule of: 5 days a week—5 percent, unless 25 or more hours of actual work is cutomarily required, in which event—10 percent; 6 days a week—15 percent, unless 30 or more hours of actual work is cutomarily required, in which event 20 percent; 7 days a week—25 percent.

(3) A position in which the employee has a basic workweek requiring full-time performance of actual work, and is required, in addition, to remain on standby duty; 14 to 18 hours a week on regular workdays, or 19 to 27 hours a week on nonworkdays, or extending into a nonworkday in continuation of a period of duty within the basic workweek—15 percent; 19 to 27 hours a week on regular workdays, or extending into a nonworkday in continuation of a period of duty within the basic workweek—20 percent; 28 or more hours a week on regular workdays, or extending into a nonwork day in continuation of a period of duty within the basic workweek—25 percent; 7 to 9 hours on one or more of his regular weekly nonworkdays—15 percent; 10 to 13 hours on one or more of his regular weekly nonworkdays—15 percent; 14 or more hours on one or more of his regular weekly nonworkdays—25 percent.

(b) An employee is eligible for premium pay on an annual basis under § 550.141, but none of the percentages in paragraph (a) of this section is applicable, or unusual conditions are present, and the employee's work is irregularly recurring based over a substantial period of time, generally at least a few months. The requirement must not be occasional, irregular, or for a brief period.

(1) In quarters provided by an agency, which are not the employee's ordinary living quarters, and which are specifically provided for use of personnel required to remain by at his post to perform his regularly assigned duties if the necessity arises.

(2) In quarters provided by an agency, which are not the employee's ordinary living quarters, and which are specifically provided for use of personnel required to stand by at his post to perform his regularly assigned duties if the necessity arises.

The words "at, or within the confines of, his station" in § 550.141 mean:

(1) A position with a tour of duty of a substantial part of which is on an annual basis.

(2) A position with a tour of duty which is on a substantially recurrent basis and which is regularly assigned duties if the necessity arises.

(3) An employee's remaining at his station must be definite and the employee must be officially ordered to remain at his station. The employee's remaining at his station must not be merely voluntary, desirable, or result of geographic isolation, or solely because the employee lives on the grounds.

The employee's whereabouts and activities are restricted and the extent to which the employee's whereabouts and activities are restricted during standby periods; the extent to which the assignment is made more or less permanent; the number of hours of duty beyond 40 a week; and any other pertinent conditions.

§ 550.152 General restrictions.

An agency may pay premium pay under § 550.151 only if that premium pay, over a period appropriate to reflect the full cycle of the employee's duties and the full range of conditions in his position, would be less than the premium pay which would otherwise be payable under this subpart for the hours of duty required in his position, exclusive of regular overtime work.

§ 550.153 Bases for determining positions for which premium pay of 15 percent under § 550.151 is authorized.

(a) The requirement in § 550.151 that a position be one in which the hours of duty cannot be controlled administratively is inherent in the nature of such a position. A typical example of a position which meets this requirement is that of an investigator of criminal activities whose hours of duty are governed by what criminals do and when they do...
of a full daily tour of duty. This differs from a situation in which an employee has the option of taking work home or doing it at the office; or doing it in continuation of his regular hours of duty or later in the same work week. This determination shall be based on consideration of available records of the hours of irregular or occasional overtime work required in the past and any other information bearing on the number of hours of duty which may reasonably be expected to be required in the future.

Determining the rate of premium pay applicable by the Commission under §550.144 or §550.154 which is applicable to each employee compensated under §550.141 or §550.161; or, if no rate fixed under §550.144 or §550.154 is considered applicable, proposing a rate of premium pay on an annual basis to the Commission.

Reviewing determinations under paragraphs (b), (c), (d) and (e) of this section at appropriate intervals, and discontinuing payments or revising rates of premium pay on an annual basis in each instance when that action is necessary to meet the requirements of sections 401(1) or section 401(2) of the act and this subpart.

§550.162 Payment provisions.

(a) Except as otherwise provided in this section, an employee's premium pay on an annual basis under §550.141 or §550.161 begins on the date that he enters on duty in the position concerned for purposes of basic compensation, and ceases on the date that he ceases to be paid basic compensation in the position.

(b) When an employee is in a position in which conditions warranting premium pay on an annual basis under §550.141 or §550.161 exist only during a certain period of the year, such as during a given season, an agency may pay the employee premium pay on an annual basis only during the period he is subject to these conditions.

An agency may continue to pay an employee premium pay on an annual basis under §550.141 or §550.161:

(1) For a period of not more than 10 consecutive prescribed workdays on a temporary assignment to a formally approved program for advanced training.

(2) For an aggregate period of not more than 60 prescribed workdays on temporary assignment.

An agency may not continue to pay an employee premium pay on an annual basis under this paragraph for more than 60 workdays in a calendar year.

(d) When an employee is not entitled to premium pay on an annual basis under §550.141 or §550.161, he is entitled to be paid for overtime, night and holiday work in accordance with other sections of this subpart.

(e) An agency shall continue to pay an employee premium pay on an annual basis.
basis under § 550.141 or § 550.151 while he is on leave with pay during a period in which premium pay on an annual basis is payable under paragraphs (a), (b), and (c) of this section.

§ 550.165 Relationship to other payments.

(a) An employee receiving premium pay on an annual basis under § 550.141 may not receive premium pay for regular or occasional overtime work at night or on a holiday under any other section of this subpart. An agency shall pay the employee in accordance with §§ 550.113 and 550.114 for irregular or occasional overtime work in excess of his weekly tour of duty.

(b) An employee receiving premium pay on an annual basis under § 550.151 may not receive premium pay for irregular or occasional overtime work or work at night or on a holiday under any other section of this subpart. An agency shall pay the employee in accordance with the Act and this subpart.

§ 550.164 Construction and computation of existing aggregate rates.

(a) Pursuant to section 208(b) of the act of September 1, 1964 (68 Stat. 1111), nothing in this subpart relating to the payment of premium pay on an annual basis may be construed to decrease the existing aggregate rate of compensation of an employee on the rolls of an agency immediately before the date section 401 of the act is made applicable to him by administrative action.

(b) When it is necessary to determine an employee's existing aggregate rate of compensation (referred to in this section as existing aggregate rate), an agency shall determine it on the basis of the earnings the employee would have received over an appropriate period (generally 1 year) if his tour of duty immediately before the date section 401 of the act is made applicable to him had remained the same. In making this determination, basic compensation and premium pay for overtime, night, and holiday work are included in the earnings the employee would have received. Premium pay for irregular or occasional overtime work may be included only if it was of a significant amount in the past and the conditions which required it are expected to continue.

(c) An agency shall recompute an employee's rate of compensation based on premium pay on an annual basis when he receives subsequent increases in his rate of basic compensation in order to determine whether or not the employee should continue to receive an existing aggregate rate or be paid premium pay on an annual basis.

(d) Except as otherwise provided by statute, an agency may not use subsequent increases in an employee's rate of basic compensation to redetermine or increase the employee's existing aggregate rate. However, these increases shall be used for other pay purposes, such as the computation of retirement deductions and annuities, payment of overseas allowances and post-differentials, and determination of the highest previous premium pay rate under Part 531 of this chapter.

(e) When an agency elects to pay an employee premium pay on an annual basis, he is entitled to continue to receive hourly premium pay properly payable under titles II and III of the act until his base pay plus premium pay on an annual basis equals or exceeds his existing aggregate rate. When this occurs, the agency shall pay the employee his base pay plus premium pay on an annual basis.

(f) Except when terminated under paragraph (e) of this section, an agency shall continue to pay an employee an existing aggregate rate so long as:

1. He remains in a position to which § 550.141, § 550.151, or § 550.162(c) is applicable;
2. His tour of duty does not decrease in length; and
3. He continues to perform equivalent night, holiday, and irregular or occasional overtime work.

(g) If an employee who is entitled to an existing aggregate rate moves from one position to another in the same agency, both of which are within the scope of section 401 of the Act, he is entitled to be paid an existing aggregate rate in the new position such as he would have received had he occupied that position when the agency elected to make section 401 of the Act applicable to it.

(b) Part-time employees; hourly postal and field service employees. Hours in a pay status in excess of an agency's basic working hours in a pay period are disregarded in computing the leave earnings of a part-time employee, except that an hourly employee in the field service of the Post Office Department earns leave to the annual maximum in accordance with his actual number of hours in a pay status.

§ 630.203 Pay periods other than biweekly.

An employee paid on other than a biweekly pay period basis earns leave on a pro rata basis for a full pay period.

(c) An employee who transfers to a position under a different leave system to which he can transfer only a part of his annual leave is entitled to a recredit of the untransferred annual leave if he returns to the leave system under which it was earned, without a break in service of more than 52 continuous calendar weeks.

(d) An employee who transfers to a position (other than a position excepted from the act under section 202(b)(1) (B), (C), (H), or (I)) to which he cannot transfer annual leave as the result of a refund under the Lump Sum Leave Payment Act, as amended, or is recredited under a different leave system as the result of a refund under the Lump Sum Leave Payment Act, as amended, 7 calendar days of annual leave are deemed equal to 5 workdays of annual leave.

Reestablishment of leave account after military service.

When an employee leaves his civilian position to enter the military service, the agency shall certify his leave account for credit or charge. When the employee is:

(a) Restored in accordance with a right of reemployment from active military duty or hospitalization continuing thereafter as provided by law, or in accordance with the mandatory provisions of a statute, Executive order, or regulation; or

(b) Reemployed in a position under the act not more than 3 years after his separation from active military duty or hospitalization:

§ 630.603 Computation of service abroad.

For the purpose of this subpart, service abroad:

(a) Begins on the date of the employee's arrival at a post of duty outside the United States, or on the date of his entrance on duty when recruited abroad;

(b) When an employee moves between different home leave-earning rates during a month of service abroad, or when a change in the differentials during a month of service abroad results in a different home leave-earning rate, the agency shall credit the employee with the amount of home leave for the month at the rate to which he was entitled before the change in his home leave-earning rate.

§ 630.606 Grant of home leave.

(a) Entitlement. Except as otherwise authorized by statute, an employee is entitled to home leave only when he has completed a basic service period of 24 months of continuous service abroad. This further substantial period of service abroad may not be less than the tour of duty prescribed for the employee's post of assignment, except when the agency determines that an earlier grant of home leave is warranted in an individual case.

(d) Charging of home leave. The minimum charge for home leave is 1 day and additional charges are in multiples thereof.

(e) Refund for home leave. An employee indebted for home leave used by him when he fails to return to service abroad after the period of home leave, or after the completion of an assignment in the United States. However, a refund for this indebtedness is not required when (1) the employee has completed not less than 6 months' service in an assignment in the United States following the period of home leave; (2) the agency determines that the employee's failure to return was due to compelling personal reasons of a humanitarian or compassionate nature, such as may involve physical or mental health or circumstances over which the employee has no control; or (3) the agency which granted the home leave determines that it is in the public interest not to return the employee to his overseas assignment.

§ 630.607 Transfer and recredit of home leave.

SUBCHAPTER C—Airport Regulations

PART 507—Airworthiness Directives

Grumman Model G-159 Series Aircraft

Pursuant to the authority delegated to me by the Administrator (25 F.R. 6489), an airworthiness directive was adopted on September 18, 1963, and made effective immediately because of the safety emergency involved as to all known United States operators of Grumman Model G-159 Series aircraft. The directive requires inspection and modification of the main landing gear retract cylinder attachment fittings.

Since it was found that immediate corrective action was required in the interest of safety, notice and public procedure thereon were impracticable and contrary to the public interest and good cause existed for making the airworthiness directive effective immediately as to all known U.S. operators of Grumman Model G-159 Series aircraft by individual telegrams dated September 18, 1963. These conditions still exist and the airworthiness directive is hereby published in the Federal Register as an amendment to § 507.10(a) of Part 507 (14 CFR Part 507), to make it effective as to all persons.

Grumman applies to all Model G-159 aircraft.

Compliance required as indicated.

Because of cracks found on the main landing gear retract cylinder attachment fitting PN N 169 WM 002-2 and -3, accomplish the following:

(a) Within 10 hours' time in service, after the effective date of this AD, and before each flight thereafter, conduct a visual inspection for cracks in the vicinity of the aft end of the retract cylinder attachment fitting.

(b) Within 10 hours' time in service, after the effective date of this AD, unless already accomplished, modify and inspect the attachment fitting in accordance with the provisions of Grumman Customer Bulletin No. 172 dated September 6, 1963, with the exception of the time period specified therein, or equivalent approved by the Chief, Engineering and Manufacturing Branch, FAA Eastern Region.

Another cracked fittings before further flight with a fitting at the same part number or an FAA approved equivalent, except that one flight may be made in accordance with the provisions of G.A.B., P.A. 1.79 for the purpose of obtaining these replacements.

This amendment shall become effective upon publication in the Federal Register for all persons except those to whom it was made effective immediately by telegram dated September 18, 1963.

§ 130.3 New drugs for investigational use: exemption from section 505(a).

(a) * * *

(2) * * *

Provided, however, That where a new drug limited to investigational use is proposed for shipment to a foreign country and the circumstances are such that the submission of the “Notice of Claimed Investigational Exemption for a New Drug” (Form FD 1571) is not feasible, the Commissioner may authorize the shipment of the drug if he receives, through the U.S. Department of State, a formal request to allow such shipment from the government of the country to which the drug is proposed to be shipped. This request should specify that said government has adequate information about the drug and the proposed use and is satisfied that the drug may legally be used by the intended consignee in that country.

2. Section 130.3(f) is amended by adding a new subparagraph (4), reading as follows:

(4) The exemption allowed in this paragraph shall not apply to any new drug intended for in vitro use in the regular course of diagnosing or treating disease, including antibacterial sensitivity discs impregnated with any new drug or drugs, which discs are intended for use or drugs, which discs are intended for in vitro use in the regular course of diagnosing or treating disease, including antibacterial sensitivity discs impregnated with any new drug or drugs, which discs are intended for use in determining susceptibility of microorganisms to the new drug or drugs.

Notice and public procedure are not necessary prerequisites to the issuance of the amendments made by this order, and I so find, since they are merely interpretative in nature and are intended to supplement existing regulations.

Effective date. This order shall be effective on the date of its publication in the Federal Register.

Dated: October 8, 1963.

Commissioner of Food and Drugs.

CARROTS GROWN IN SOUTH TEXAS
Proposed Amendment to Rules and Regulations

Notice is hereby given that the Secretary of Agriculture is considering the approval of an amendment to the existing rules and regulations, as hereinafter set forth, which was recommended by the South Texas Carrot Committee, established pursuant to Marketing Agreement
§ 970.120 Policy.

(a) Whenever shipments of carrots for special purposes pursuant to § 970.53, are released in whole or in part from regulations issued under § 970.52 the committee may require information and evidence on the manner, methods and timing of such shipments as safeguards against the entry of such carrots in trade channels other than those for which intended. Such information and evidence shall include requirements set forth below with respect to Certificates of Privilege.

(b) Unless carrots packed, but not grown, in the production area are handled in accordance with regulations issued pursuant to § 970.52 they must be handled as a distinct entity and the committee must require information and evidence on the origin, quantity and methods of handling to ensure that such carrots are not commingled with or identified as carrots grown in the production area. Such information and evidence may include requirements set forth below with respect to Certificates of Privilege.

§ 970.121 Qualification.

Before handling carrots for special purposes or carrots packed but not grown within the area, which do not meet regulations issued pursuant to § 970.52 a handler when required by such regulations must qualify with the committee to handle such shipments. To qualify he must (a) apply for and receive the Certificate of Privilege indicating his intent to so handle carrots, (b) agree to comply with reporting and other requirements set forth in §§ 970.120 to 970.125, inclusive, with respect to such shipments and (c) receive approval of the committee or its duly authorized agents to so handle carrots. Such approval will be based upon evidence furnished in the application for Certificate of Privilege and other information available to the committee.

§ 970.122 Application.

(a) Applications for a Certificate of Privilege shall be made on forms furnished by the committee. Each application may contain, but need not be limited to, the name and address of the handler; the quantity, grade, size, and quality of the carrots to be shipped; the mode of transportation; the consignee; the destination; the purpose for which the carrots are to be used; and certification to the United States Department of Agriculture and to the committee as to the truthfulness of the information shown therein, and any other appropriate information or documents deemed necessary by the committee or its duly authorized agents for the purposes stated in § 970.120.

(b) The committee may require each handler making shipments of carrots for export to include with his application a copy of the Export Permit issued to such handler by the Department of Commerce, and it may require the Exporter to submit a copy of the Shippers Export Declaration Form No. 7825-V applicable to such shipments.

(c) Each handler of carrots packed but not grown within the production area shall:

1. Provide adequate evidence of production in other than the production area. Such evidence may include certification of origin of shipment, quantity and carrier by the Federal or Federal State Inspection Service at point of origin, or such other evidence deemed by the committee to be necessary evidence.

2. Maintain physical separation and identification of out-of-production area carrots from South Texas carrots throughout receipt, packing, or other processing for market. Such requirements for maintaining out-of-production area carrots and South Texas carrots at the same time in the same packing facility.

3. Identify out-of-production carrots when packed and labeled as to the State or area where grown by labeling or other appropriate means of identification on the containers and packages, and by certification by the Federal State Inspection Service that the other than production area carrots are handled without commingling with production area carrots.

§ 970.123 Approval.

The committee or its duly authorized agents shall give prompt consideration to each application for a Certificate of Privilege. Approval of an application, based upon the determination as to whether the information contained therein and other information available to the committee supports approval, shall be evidenced by the issuance of a Certificate of Privilege to the applicant. Each certificate shall cover a specified period and, relative to special purpose shipments, it shall specify consignees and quantities of carrots to be sold or transported for the purpose declared.

§ 970.124 Reports.

Each handler of carrots shipping under Certificates of Privilege shall supply the committee with reports as requested by the committee, or its duly authorized agents, showing the name and address of the shipper; the car or truck identification; the loading point; destination; consignee, the inspection certificate number when inspection is required; and any other information deemed necessary by the committee.

§ 970.125 Disqualification.

The committee from time to time may conduct surveys of handling of carrots requiring Certificates of Privilege to determine whether handlers are complying with the requirements and regulations applicable to such certificates. Whenever the committee finds that the handler or consignee is failing to comply with the requirements and regulations applicable to handling of carrots requiring such certificates, a Certificate or Certificates of Privilege issued such handler may be rescinded and subsequent certificates denied. Such disqualification shall apply to, and not exceed, a reasonable period of time as determined by the committee, but in no event shall it extend beyond the date of the succeeding fiscal period. Any handler who has a Certificate rescinded or denied may appeal to the committee in writing for reconsideration of his disqualification.

Supplemental Notice of Proposed Rulemaking

The Board, by publication in 28 F.R. 9889 and by circulation of a Notice of Proposed Rulemaking, EDR-60, PSDR-...
PROPOSED RULE MAKING

7, dated September 11, 1963, gave notice that it had undertaken consideration amendments to Part 288 of its Economic Regulations and Part 389 of its Policy Statements which would, among other matters, revise the minimum rates and minimum utilization of aircraft requirements for short-notice MATS charters in foreign and overseas transportation, and between the 48 contiguous states, on the one hand, and Alaska and Hawaii, on the other hand.

Certain air carriers which may be substantially affected by the amendments have requested that further time be allowed for compilation of additional economic data and preparation of adequate comments in light thereof. The undersigned finds that good cause has been shown for an extension of time for receipt of comments, and an additional two weeks will be allowed.

Accordingly, pursuant to authority delegated under section 73C of Public Notice No. PN-15, dated July 3, 1963, the undersigned hereby extends the date for submitting comments on the proposed amendments to Parts 288 and 389 until October 28, 1963. FEDERAL AVIATION AGENCY

14 CFR Part 71 [New]

[Airspace Docket No. 63-SW-40]

CONTROL ZONE AND TRANSITION AREA

Proposed Alteration and Designation

Notice is hereby given that the Federal Aviation Agency (FAA) is considering amendments to Part 71 (New) of the Federal Aviation Regulations, the substance of which is stated below.

The following controlled airspace is presently designated in the Palacios, Tex., terminal area:

1. The Palacios control zone is designated as that airspace within a 5-mile radius of Palacios Municipal Airport and within 10 miles each side of the Palacios VOR 305° and 125° True radials, extending from the 5-mile radius zone to 10 miles northwest of the VOR.

2. The Houston, Tex., control area extension is designated, in part, as that airspace bounded by a line extending from latitude 29°37'30" N., longitude 94°00'00" W., thence southwest 3-nautical mile radius of the Houston VOR and the floor of the portion of the Houston control area extension which coincides with the proposed transition area would automatically assume a floor coincident with the floor of the transition area.

The floors of the airways which traverse the transition area proposed herein and the floor of the portion of the Houston control area extension which coincides with the proposed transition area would automatically assume a floor coincident with the floor of the transition area.

Certain minor revisions to prescribed instrument procedures would accompany the actions proposed herein, but operational complexities would not be increased nor would aircraft performance characteristics or established landing minimums be adversely affected.

Specific details of the proposed procedures and minimum instrument flight rules altitudes that would be required may be examined by contacting the Chief, Airspace Utilization Branch, Air Traffic Division, Southwest Region, Federal Aviation Agency, P.O. Box 1669, Fort Worth, Texas 76101.

All communications received within forty-five days after publication of this notice in the Federal Register will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Agency officials may be made by contacting the Regional Air Traffic Division Chief, or the Chief, Airspace Utilization Division, Federal Aviation Agency, Washington, D.C., 20553.

The official Docket will be available for examination by interested persons at the Docket Section, Federal Aviation Agency, Room A-103, 111 New York Avenue NW., Washington, D.C., 20553.

An informal docket will also be available for examination at the office of the Regional Air Traffic Division Chief.

This amendment is proposed under section 307(a) of the Federal Aviation Act of 1958 (49 Stat. 749; 49 U.S.C. 1349).

Issued in Washington, D.C., on October 7, 1963.

MICHAEL J. BURNS, Acting Chief, Airspace Utilization Division.

[Vickers Viscount Models 745D AND 810 SERIES AIRCRAFT

Proposed Airworthiness Directives

The Federal Aviation Agency has under consideration a proposal to amend Part 507 of the Regulations of the Administrator to include an airworthiness directive for Vickers Viscount Models 745D and 810 Series aircraft. There have been several instances of failure of the fuselage leading edge frame and associated floor beam in the region of the top leading edge fittings and also in the leading edge trim fittings and their mating socket fittings which are attached to the inner wing leading edge member. To correct this unsafe condition, this AD requires inspection and repair, reinforcement, or replacement of any parts found cracked.

Interested persons are invited to participate in the making of the proposed rule by submitting such data, views or arguments as they may desire. Communications should identify the regulatory docket number and be sub-

cations received on or before No-

vember 15, 1983, will be considered
by the Administrator before tak-
ing action upon the proposed
rule. The proposals contained
in this notice may be changed in
the light of comments received.
All comments sub-
mited will be both be-

come public after the closing date for comments, in the Rules Docket for examina-
tion by interested persons.

This amendment is proposed under the
authority of sections 313(a), 601 and
603 of the Federal Aviation Act of 1958
(72 Stat. 752, 775, 776; 49 U.S.C. 1354(a),
1421, 1423).

In consideration of the foregoing, it
is proposed to amend § 507.10(a) of Part
507 (14 CFR Part 507), by adding the
following airworthiness directive:

Vickers. Applies to all Vickers Models
740D aircraft.

Compliance required as indicated.

Fatigue failures have occurred in the fuse-

lage leading edge and associated struc-
ture. To preclude further failures accom-
plish the following:

(a) Fuselage frame:

(1) Within 1070 landings after the effective
date of this AD on aircraft with which
have achieved 8,000 landings, unless already
accomplished within the last 500 land-
gs, conduct initial visual inspection for cracks
in accordance with the applicable Vi-
ckers Preliminary Airworthiness Directives
not referenced herein. Accomplish repair in (2) or (3) as
applicable, before further flight if the inspection
indicates one of the following:

(1) Cracks in the frame joint pressings or
in the floor beam or in the floor beam joint
plates—either in the flanges or running to-
wards the flanges or in the heat line of
the flange.

(2) Model 745D cracked frame joint press-
ings must be repaired/reinforced per Mod-
dification D.3059, or any alternative scheme
which has been approved by the Chief,
Aircraft Certification Division, Europe, and
Middle East Area.

(3) Model 745D aircraft. Figure 2
PTL 100 Issue 2 illustrates a temporary re-
pair scheme, applicable only where unac-
ceptable cracks, confined to the areas indi-
cated in Figure 1 of the referenced PTL are
present. Unacceptable cracks, outside those
areas must be repaired/reinforced in accord-
ance with Mod. FG. 228 part (b). Any alter-
native scheme which has been approved by
the Chief, Aircraft Certification Division,
Europe, Africa and Middle East Area
may be used.

(4) Subsequent to the initial inspection,
per (1), and to reinforce the structures if the
following repetitive inspections of the frame
structure are accomplished at the periods indicated.

(a) Within every 700 landings:

(1) Where no cracks are present.

(b) Where any acceptable single crack not
greater in length than 1.5 inches is present.

(c) Where VTO/700 or any other tem-
porary repair scheme approved by the aircraft
manufacturer, Chief, Aircraft Cer-
tification Division, Europe, Africa and
Middle East Area, has been incorporated.

(11) After one overhaul period not later
than 12,000 flying hours: After rein-
forcement of the frame structure by incor-
poration of Mod. FG. 228 part (b) or Mod. FG.
1928 part (b) for 810, or any alternative

reinforcement approved by the aircraft
manufacturer, or by the Chief, Aircraft Cer-
tification Division, Europe, Africa and
Middle East Area. (Continental Air Lines Reprint/
Reinforcement Scheme 753—5079 has been ap-
proved by the administrator for aircraft
repaired/reinforced prior to the effective
date of this AD).

(b) Inspect the split and socket and
attachment bolts:

(1) From effective date of this AD within
1,000 landings on aircraft which have already
accumulated 12,000 landings or within 2,000 land-
gings on aircraft which have accumulated
between 12,000 and 13,000 landings, unless already
accomplished, conduct initial visual
inspection of the split and socket
fittings for cracks and the associated attach-
ment bolts for damage. In accordance with
the applicable PTL referenced herein.

Cracked fittings or damaged bolts must be
replaced before further flight. Initial in-
spection of replacement fittings with new
original type fittings need not be conducted
until these fittings have accumulated 8,000
landings.

(2) Subsequent to the Initial
inspection in (b)(1) conduct repetitive inspections
within every 2,000 landings until Mod.
D.3072 (for 745D) Mod. FG. 1928 part (a)
for 810, and (2) all modified fittings at routine overhaul periods not later
than 12,000 hours’ time in service.

(3) Modified fittings shall be used in pairs.
Single modified fittings may be used to
replace unserviceable unmodified items.

(c) Upon request of the operator, an FAA
maintenance inspector, subject to prior ap-
proval of the Chief, Aircraft Certifi-
cation Division, Europe, Africa and Middle East
Area, may adjust the repetitive inspection in-
tervals specified in this AD to permit com-
pliance at an established inspection period of
the operator if the request contains sub-
stantiating data to justify the increase for
such operator.

It will be necessary for the operator to main-
tain a record of landings in order to
ascertain compliance with this AD. If past
records are unavailable, the number of land-
gings prior to the effective date of this AD
may be estimated by substituting one land-
ing for each hour in service prior to the effec-
tive date of this AD.

(Vickers-Armstrongs PTL 242 Issue 2 (700 Series) and Modifications D.3059 and D.3072
for 745D aircraft, PTL 1928 (800/810 Series) and Modification FG. 1928 for 810
Series aircraft cover this subject.)

the proposed rule. The proposals con-
tained in this notice may be changed in
the light of comments received. All
comments submitted will be both be-

This amendment is proposed under the
authority of sections 313(a), 601 and
603 of the Federal Aviation Act of 1958
(72 Stat. 752, 775, 776; 49 U.S.C. 1354(a),

In consideration of the foregoing, it
is proposed to amend § 507.10(a) of Part
507 (14 CFR Part 507), by adding the
following airworthiness directive:

Vickers. Applies to all Vickers Model
810 Series aircraft.

Compliance required as indicated.

Fatigue failures have been reported on
flap beams in the areas shown in Figures 4
and 5 of Vickers Preliminary Technical
Letter No. 107 Issue 2 (800/810 Series).
To preclude further failures accomplish the fol-

lowing on Nos. 1 and 4 flap units:

(a) Within 200 landings after the effec-
tive date of this AD, on aircraft which have
accumulated 10,000 or less landings,
considerably accumulated within the past 600
landings, conduct dye penetrant or FAA
approved equivalent inspection for cracks
in accordance with PTL 107 Issue 2. If no
cracks are found, reinspect at intervals not
exceeding 1,500 landings until the aircraft
accumulates between 10,000 and 11,000 land-
gings during which time the airplane must
be retested. Thereafter, the aircraft
must be retested at intervals not ex-
ceeding 1,500 landings until 12,000
landings are accumulated at which time
either of the following or FAA
approved equivalent inspection is incorpo-
rated:

(1) Modification FG. 1946, or

(2) The repair/reinforcing scheme defined in
the referenced PTL.

Within 60 landings after the effec-
tive date of this AD on aircraft which have
accumulated over 10,000 landings, unless already
accomplished within the past 600 landings,
conduct the inspection of (a). If no cracks
are found, reinspect at intervals not
exceeding 600 landings until reinforcing
scheme (a) (1) or (a) (2), or FAA approved
equivalent, has been incorporated. Incor-
poration of the reinforcing scheme within 2,000
landings after the effective date of this AD.

(c) Cracked flap beams are considered
acceptable for a further 500 landings pro-
vided that the cracks are within the limits
specified in "Definition of Serviceability" par-
agraph 3 of the referenced PTL and pro-
vided that the area is reinforced in
accordance with (a) within every 100 landings to
ensure that no crack propagation has oc-
curred. Incorporation of the reinforcing
scheme (1) or (a) (2), or FAA approved
equivalent, as follows:

(1) Within 10 landings from the time of
the crack detection for aircraft with unac-
ceptable cracks, and within 10 landings
for aircraft with cracks that are found to
propagate in length.
(2) On or before the completion of 500 landings from the time of crack detection for aircraft with acceptable cracks.

(d) After incorporating the modification of (a) (1) or (a) (2), or FAA approved equivalent, the special inspection of this AD may be discontinued.

It will be necessary for the operator to maintain a record of landings in order to ascertain compliance with this AD. If past records are unavailable, the number of landings prior to the effective date of this AD may be estimated by substituting one landing for each hour in service prior to the effective date of this AD.

FEDERAL AVIATION AGENCY
[OE Docket No. 65-BA-14]
MONONGAHELA POWER CO.
Determination of Hazard to Air Navigation

The Federal Aviation Agency has circulated the following proposal for aeronautical comment and has conducted a study (1-0E-3215) to determine its effect upon the safe and efficient utilization of navigable airspace.

The Monongahela Power Company, Fairmont, West Virginia, proposes to construct a 450-foot extension of its existing electric distribution line near Lewis Field, Buckhannon, West Virginia, aligned in a north/south direction near latitude 38°59'25", longitude 80°16'-30" W. The proposed extension would consist of three additional utility poles, all thirty feet above ground, but having top elevations of 1,456 feet MSL, 1,455 feet MSL and 1,454 feet MSL respectively, and all would be connected by

JOINT CONFERENCE 3-1 OF THE INTERNATIONAL AIR TRANSPORT ASSOCIATION
Order Relating to Specific Commodity Rates

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 8th day of October 1963.

Agreement adopted by Joint Conference 3-1 of the International Air Transport Association relating to specific commodity rates; Docket No. 13777, Agreement C.A.B. 17004, R-10.

There has been filed with the Board, pursuant to section 415(a) of the Federal Aviation Act of 1958 (the Act) and Part 201 of the Board's Economic Regulations, an agreement between various air carriers, foreign air carriers, and other carriers embodied in the resolutions of Joint Conference 3-1 of the International Air Transport Association (IATA), and adopted pursuant to the provisions of Resolution 590 (Commodity Rates Board).

The agreement, adopted pursuant to unprotested notice to the carriers and promulgated in IATA memorandum JT31/Rates 289, cancels the following specific commodity rates:

ITEM 1095—FAR, LIVV, IDENF

From— To— Rate in cost per Minimum
Kilograms

Bangkok New York 468 100

The Board, acting pursuant to sections 102, 204(a), and 412 of the Act, does not find the subject agreement to be adverse to the public interest or in violation of the Act.

Accordingly, it is ordered, That Agreement C.A.B. 17004, R-10, be approved.

The Board may, upon consideration of any such statements filed, modify or rescind its action hereon by subsequent order.

This order will be published in the Federal Register.

By the Civil Aeronautics Board.

[SEAL] HAROLD R. SANDERSON, Secretary.

[FR Doc. 63-10942; Filed, Oct. 11, 1963; 8:47 a.m.]
The aeronautical study disclosed that the proposed structure would be located approximately 260 feet west of the west end of the only runway at Lewis Field. The extension to the existing electric line would be in proximity to such aircraft operations. Lewis Field is the only airport serving the Buckhannon area and has 6 based aircraft, one of which is a multi-engine airplane.

Based upon the aeronautical study, it is the finding of the Agency that the proposed structure would have a substantial adverse effect upon aeronautical operations at Lewis Field.

Therefore, pursuant to the authority delegated to me by the Administrator (§ 77.37 [New]), it is found that the proposed structure would have a substantial adverse effect upon the safe and efficient utilization of the navigable airspace; and it is hereby determined that the proposed structure would be a hazard to air navigation.

This determination is effective and will become final 30 days after the date of issuance unless an appeal is filed under § 77.39 [New] (27 F.R. 10525). If the appeal is denied, the determination will then become final as of the date of denial or 30 days after the issuance of the determination, whichever is later.

Issued in Washington, D.C., on October 7, 1963.

[E.O. Docket No. 53-SW-6]

TOMMY MOORE, INC.

Determination of Hazard to Air Navigation

The Federal Aviation Agency has circularized the following proposal for aeronautical comment and has conducted a study (SW-OE-4827) to determine its effect upon the safe and efficient utilization of navigable airspace.

Tommy Moore, Inc., Fort Worth, Texas, proposes to construct a radio antenna structure in Dallas, Texas, at latitude 32°48'41" N., longitude 96°53'40" W. The overall height of the structure would be 906 feet above mean sea level (500 feet above ground).

At the proposed location and height, the proposed structure would be approximately four miles southwest of Dallas Love Field and two and one-fourth miles west/southwest of the Dallas Non-Directional Radio Beacon. It would exceed the standards for determining hazards to air navigation in § 77.23 (a) (2) of the Federal Aviation regulations by 300 feet since the site would be located within a control zone and a Federal airway.

The aeronautical study disclosed that the structure would be located in proximity to routes used extensively by aircraft operating in accordance with the Visual Flight Rules and with special VFR procedures authorized for flights in the Dallas-Fort Worth, Texas, area. If the proposed structure were erected, it would be necessary to change special VFR procedures which presently authorize VFR operations between Love Field and the airport at flight altitudes of 1,100 feet AMSL during daylight hours and 1,500 feet AMSL during night hours. The special VFR procedures allow aircraft to operate during daylight without the flightaltitudes prescribed for normal VFR flight. The purpose of such special procedures is to expedite air traffic movement in a high density terminal area where it can be accomplished without sacrificing safety. The affected minimum altitudes would require adjustment upward to 1,600 feet and 2,000 feet, respectively, thus derogating the effectiveness of the special VFR procedures.

VFR traffic operating in the immediate vicinity of the construction site, but not authorized to use the special VFR procedures, would also be affected if the proposed structure were erected. Since the construction site is located in a congested area, pilots not authorized to use the special VFR procedures would be required to fly at least 1,000 feet above the top of the structure when operating within a horizontal radius of 2,000 feet from the structure. Unlike the VFR procedures, the special VFR procedures, however, these flights could still use minimum altitudes comparable to those presently in effect in the general area by making a slight adjustment of route to avoid the site of the structure.

The aeronautical study also disclosed that the construction of the proposed structure would have the following adverse effects upon instrument flight rules operations in the Dallas terminal area:

1. Require cancellation of the 400-1 straight-in minima for Love Field ADF-2 standard instrument approach procedure.

2. Require cancellation of the 400-1 straight-in minima for Love Field Runway 36 radar surveillance approach procedure.

3. Require a restriction of 1,200 feet minimum altitude for instrument approach to Love Field Runway 36, a restriction which would result in excessive rates of descent for aircraft making instrument approach to the runway.

The Agency study disclosed that a substantial number of aeronautical operations would be adversely affected if the IFR procedures were cancelled or amended for the purpose of accommodating the proposed structure. The Agency records reveal a total of 262,982 aircraft operations during calendar year 1962 of which 96,101 were instrument approaches including 10,283 instrument approaches.

Based upon the aeronautical study, it is the finding of the Agency that the proposed structure would derogate the use of existing IFR and special VFR procedures in the Dallas terminal area to such an extent that they could not be safely used by aircraft. To change the affected procedures and minimum flight altitudes for the purpose of accommodating the proposed structure would have an adverse effect upon aircraft operating in the Dallas terminal area since they would be denied the use of the lower-altitudes and landing minimums they are now using.

Therefore, pursuant to the authority delegated to me by the Administrator (§ 77.37 [New]), it is found that the proposed structure would have a substantial adverse effect upon the safe and efficient utilization of the navigable airspace; and it is hereby determined that the proposed structure would be a hazard to air navigation.

This determination is effective and will become final 30 days after the date of issuance unless an appeal is filed under § 77.39 [New] (27 F.R. 10525). If the appeal is denied, the determination will then become final as of the date of denial or 30 days after the issuance of the determination, whichever is later.

Issued in Washington, D.C., on October 7, 1963.

JOSEPH VIVARI, Acting Chief, Obstruction Evaluation Branch.

Notice is hereby given that the following described agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916 (39 Stat. 733, 75 Stat. 793; 46 U.S.C. 814) Agreement No. T-29, between Canton Railroad Company (Canton) and Sea-Land Service, Inc. (Sea-Land), provides for a five year lease of certain pier and terminal property adjacent to Canton’s Pier 10 at Baltimore, Maryland. The premises are to be used for the receiving, delivering, handling and storing of cargo to and from vessels, and the parking or storing of tractors, trailers, chassis including those of Sea-Land’s agents, used in trucking cargo to or from vessels. In consideration of Sea-Land shall pay an annual rental of $135,000, and such rental shall be in lieu of all charges customarily assessed by Canton
for dockage, wharfage, top wharfage, wharf damages, storage, service assignment, freight transfer service charge, service and facility charge, and all other charges governing the docking of vessels and the storing, transferring and handling of cargo. Canton is permitted to use a certain portion of the leased premises and adjacent berthing area to dock and service vessels other than those of Sea-Land provided that such use does not interfere with Sea-Land's operations. As consideration therefore, Canton shall pay Sea-Land all dockage charges assessed against vessels berthed at such facility.

Agreement No. T-32, between Maryland Port Authority (MPA) and Baltimore & Ohio Railroad (Railroad), provides for a 40 year lease of certain terminal property and facilities at Locust Point, Baltimore, Maryland, to be operated by MPA as a marine terminal at an annual rental of $1.00. MPA has certain options to purchase the facilities during the initial term of the lease and if no option is exercised, the lease will be automatically renewed for an additional 40 years. To expedite $8,987,000 for modernization and construction during the first five years of occupancy. Railroad will have the exclusive right to provide rail service to and from the facilities and agrees to pay terminal service charges and loading and unloading charges as set forth in MPA's Terminal and Service Tariff No. 1. MPA reserves the right to amend their tariff but only upon thirty (30) days prior notice to and after consultation with the Railroad. MPA agrees that the terminal service charge will be assessed without discrimination against all types of transport and that its charges to the Railroad will be no greater than like charges assessed against other rail carriers at other facilities operated by the MPA. Railroad retains the right to operate Pier 7 (Grain Pier) at its own expense and for its own account under terms and conditions set forth in the agreement.

Interested parties may inspect the agreements and obtain copies thereof at the Bureau of Domestic Regulation, Federal Maritime Commission, Washington, D.C., or may inspect a copy of the same at the offices of the District Managers of the Commission in New York, N.Y., New Orleans, La., and San Francisco, Calif., and may submit to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, within 20 days after publication of this notice in the Federal Register, written statements with reference to the agreements and their position in respect to approval, disapproval, or modification, together with a request for hearing, should a hearing be desired.

By order of the Federal Maritime Commission.

PACIFIC POWER AND LIGHT CO.

Notice of Application

OCTOBER 7, 1963.

Take notice that on September 27, 1963 Pacific Power & Light Company (Applicant), a corporation organized under the laws of the State of Maine and doing business in the States of Oregon, Wyoming, Washington, California, Montana and Idaho, with its principal business office at Portland, Oregon, filed an application with the Federal Power Commission pursuant to section 204 of the Federal Power Act seeking an order authorizing the issuance of not to exceed 723,854 shares of its Common Stock with a par value of $3.25 per share. Applicant proposes to offer the aforesaid Common Stock initially on a pro rata basis to holders of record of Applicant's presently outstanding Common Stock on the rights offering record date (presently expected to be October 30, 1963) in the ratio of one share of additional Common Stock for each twenty shares then held. The price of the additional shares will be determined by Applicant's Board of Directors shortly before the proposed offering date, at an approximate discount. Each common stockholder of record will receive a transferable subscription warrant expressed in terms of rights (equal to the number of shares of the Company's Common Stock held of record by the stockholder on the record date) which will have a life of not less than twenty years. Where the number of rights evidenced by a warrant is not evenly divisible by 20 or is less than 20, then the holder will be entitled to subscribe for one full share with the number of rights which exceeds a multiple of twenty or is less than 20. Applicant will not accept subscriptions for fractional shares. Any shares of the additional Common Stock not subscribed for by warrant holders pursuant to the aforesaid subscription offer will be sold by Applicant to underwriters at the same price at which the shares are to be sold to Applicant's stockholders. The underwriters' compensation for commitments to purchase any unsubscribed shares is to be fixed by competitive bidding.

Applicant states that the net proceeds of the additional shares of Common Stock will be applied to the payment of notes then outstanding under an existing credit agreement which will amount to approximately $5,000,000 upon completion of the financing and the balance together with internally generated funds and funds borrowed under its existing credit agreement and future credit agreements (Docket E-7129) will be used to finance the company's 1963 construction program.

The company's construction expenditures for 1963 are expected to be $27,975,000 has been expended through August 31, 1963.
