highlights

"THE FEDERAL REGISTER—WHAT IT IS AND HOW TO USE IT"

The free weekly workshops on how to use the FEDERAL REGISTER will resume on Wednesday, March 2, 1977, in Room 9409, 1100 L Street N.W., Washington, D.C. These free sessions begin at 9:00 a.m. and end at approximately 11:30 a.m. Each session will cover the following:
1. Brief history of the FEDERAL REGISTER.
2. Difference between legislation and regulations.
4. Elements of a typical FEDERAL REGISTER document.
5. Introduction to the finding aids.
RESERVATIONS REQUIRED: DEAN L. SMITH, 202-523-5282

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. 1). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The Federal Register will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the Federal Register.

List of Public Laws

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's List of Public Laws.
Title 3—The President
CORRECTION
PROCLAMATION 4486

National Poison Prevention Week, 1977

In the heading for Proclamation 4486, appearing at page 9153 in the Federal Register issue of February 15, 1977, a typographical error resulted in an incorrect reference to Proclamation 4481. The correct number of the proclamation entitled "National Poison Prevention Week, 1977" is 4486.
This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to und codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1501.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 7—Agriculture

SUBTITLE A—OFFICE OF THE SECRETARY OF AGRICULTURE

[Amend No. 14]

PART 6—IMPORT QUOTAS AND FEES

Subpart—Section 22 Import Quotas

Transfer of Licensing Authority and Increase in Monetary Limitations on Exceptions From Licensing Requirements

AGENCY: Foreign Agricultural Service

ACTION: Final Rule

SUMMARY: Import Regulation 1, Revision 5, as amended (7 CFR 8.20-8.33) is further amended to reflect the transfer of functions of the licensing authority from Chief, Import Branch to the Director, Dairy, Livestock and Poultry Division, Foreign Agricultural Service, and to incorporate the provisions of Presidential Proclamation 4482 of January 19, 1977, providing for an increase in the monetary limitation of $10 to $25 on the value of articles excepted from licensing requirements when imported for certain uses under Section 25 Import Quotas.

The action taken hereon, which involves foreign affairs functions of the United States, should be made effective as soon as possible in order that the provisions of the regulations will conform with the change made by Proclamation 4482. It is hereby found and determined that compliance with the notice and effective date provision of 5 U.S.C. 553 is impractical and contrary to the public interest and that this amendment shall become effective as set forth below.

The Subpart, Section 22 Import Quotas of Part 6, Subtitle A of Title 7, is amended as follows:

1. The term "Chief, Import Branch" is changed to "Director, Dairy, Livestock and Poultry Division" wherever it appears in this subpart and appendix 1.

2. Section 6.21 is amended by revising paragraph (d) to read as follows:

§ 6.21 Definitions.

(d) "Licensing Authority" means the Director, Dairy, Livestock and Poultry Division, Foreign Agricultural Service, U.S. Department of Agriculture and any other employee of the Department designated in writing as Acting Director in the absence of the Director.

3. Section 6.23 is amended by revising paragraph (b) to read as follows:

§ 6.23 Exceptions.

(b) Articles with an aggregate value not over $25 in any shipment, if imported as samples for taking orders, for the personal use of the importer, or for research.

Effective date: February 16, 1977.

For further information contact:

Issued at Washington, D.C.

DAVID L. HUME, Administrator,
Foreign Agricultural Service.

CHAPTER 1—AGRICULTURAL MARKETING SERVICE (STANDARDS, INSPECTIONS, MARKETING PRACTICES), DEPARTMENT OF AGRICULTURE

PART 26—GRAIN STANDARDS

The United States Grain Standards Act, (82 Stat. 761, 7 U.S.C. 71 et seq.), as amended by an Act of October 21, 1976 (Pub. L. 94-582, 90 Stat. 2867), provides for official U.S. standards to designate the quality of grain for use by producers, merchandisers, and consumers in the domestic and export marketing of grain. The Act provides for an official grading service upon request and payment by the applicant of a fee to cover the cost of the service.

Pursuant to section 4 of the Act (7 U.S.C. 75), a notice concerning proposed U.S. Standards for Triticale (7 CFR 26.651 et seq.) was published in the Federal Register (41 FR 3829) on September 15, 1976, according to the administrative procedure provisions of section 553 of Title 5, United States Code.

Statement of considerations. Approximately 800 reprints of the notice were sent to interested groups in the grain industry. Interested persons were given until October 31, 1976, to submit data, views, or recommendations concerning the proposed U.S. Standards for Triticale. Six written comments were received in response to the notice. The principal points considered with regard to the proposed U.S. Standards for Triticale are set forth below:

1. Five commenters supported the adoption and promulgation of the proposed standards for triticale, indicating that the use of grade standards will assist substantially in the marketing of this grain. Standards will provide a reference point from which improvements in agronomic and end-use characteristics can be made. It will facilitate the export of triticale by providing buyer and seller with a common language for use in making marketing decisions. It has also been stated that the availability of U.S. grade standards will permit Texas producers, for example, to have triticale accepted by State licensed warehouses.

2. One commenter opposed the adoption of the proposed standards for triticale on grounds that market outlets for the crop have not been established. Historically, developed and grain characteristics are subject to change. Most producers of triticale assure a market for their crop before planting. Moreover, the rate of market development is directly associated with the increases in the acreage planted to the crop. Changes in the characteristics of triticale are expected as improved varieties are released. Consequently, grain standards have been amended to reflect such improvements in kernel quality.

After consideration of all written comments and other information available to the Department, official grade standards for triticale are hereby established and promulgated as follows:

Subpart—United States Standards for Triticale

TEMS DEFINED

Sec. 26.651 Definition of triticale.
26.652 Definition of other terms.

PRINCIPLES GOVERNING THE APPLICATION OF THE STANDARDS

26.653 Basis of determination.
26.654 Temporary modifications in equipment and procedures.
26.655 Percentages.

GRADES, GRADE REQUIREMENTS, AND GRADE DESIGNATIONS

26.656 Grades and grade requirements for triticale.
26.657 Grade designations.

SPECIAL GRADES, SPECIAL GRADE REQUIREMENTS, AND SPECIAL GRADE DESIGNATIONS

26.658 Special grades and special grade requirements.
26.659 Special grade designations.

AUTHORITY: Sec. 4, United States Grain Standards, as amended (7 U.S.C. 75).

Subpart—United States Standards for Triticale

1 Including matters within the responsibility of the Federal Grain Inspection Service.

Compliance with the provisions of these standards does not excuse failure to comply with the provisons of the Federal Food, Drug, and Cosmetic Act, or other Federal laws.
§ 26.651 Definition of triticale.

Grain which, before the removal of dockage, consists of 50 percent or more of triticale and may contain not more than 10 percent of other grains for which standards have been established under the United States Grain Standards Act and which, after the removal of dockage, contains not more than 2 percent or more of whole kernels of triticale.

§ 26.652 Definitions of other terms.

For the purposes of these standards, the following terms shall have the meanings stated below:

(a) Damaged kernels (total). Kernels, pieces of triticale kernels, and other grains that are badly ground-damaged, badly weather-damaged, diseased, frost-damaged, heat-damaged, insect-bored, mold-damaged, sprout-damaged, or otherwise materially discolored, shrunken and damaged as determined in the Grain Inspection Manual. Kernels that are materially discolored, shriveled, and small pieces other than triticale shall be stated to the nearest tenth of a pound.

(b) Defects (total). Damaged kernels, foreign material, and shrunken and broken kernels of the type typically referred to in the triticale standards are the defects provided in the standards. Distinctly low quality. Triticale which is obviously inferior in quality because it contains foreign substances or because it is in an unusual state or condition, and which cannot be properly graded by use of the other grading factors prescribed in the Grain Inspection Manual. Also, undeveloped, shriveled, and small pieces of triticale kernels removed in properly separating the material other than triticale and which cannot be recovered by properly rescouring or reclaining. (See also § 26.655 and 26.657.) For the purpose of this paragraph, "approved device" shall include the Fairbanks-Morse or Ohaus Test Weight Per Bushel Apparatus and any other equipment that is approved by the Administrator as giving equivalent results.

(c) Distinctly low quality. Triticale which is obviously inferior in quality because it contains foreign substances or because it is in an unusual state or condition, and which cannot be properly graded by use of the other grading factors prescribed in the Grain Inspection Manual.

(d) Dockage. All matter other than triticale which can be removed readily from a test portion of the original sample by use of an approved device in accordance with procedures prescribed in the Grain Inspection Manual. Also, undeveloped, shriveled, and small pieces of triticale kernels removed in properly separating the material other than triticale and which cannot be recovered by properly rescouring or reclaining. (See also §§ 26.655 and 26.657.) For the purpose of this paragraph, "approved device" shall include the Fairbanks-Morse or Ohaus Test Weight Per Bushel Apparatus and any other equipment that is approved by the Administrator as giving equivalent results.

(e) Foreign material (total). All matter other than triticale which remains in the sample after the removal of dockage and shrunken and broken kernels.

(f) Heat-damaged kernels. Kernels, pieces of triticale kernels, and other grains that are materially discolored, shrunken and damaged as determined in the Grain Inspection Manual.

(g) Moisture. Water content in triticale as determined by an approved device in accordance with procedures prescribed in the Equipment Manual. For the purpose of this paragraph, "approved device" shall include the Morse or Ohaus Test Weight Per Bushel Apparatus and any other equipment that is approved by the Administrator as giving equivalent results.

(h) Other grains. Barley, corn, cultivated buckwheat, einkorn, emmer, flaxseed, guar, hull-less barley, nongrain sorghum, oats, Polish wheat, popcorn, poulard wheat, rice, rye, sallifower, sorghum, soybeans, spelt, sunflower, sweet corn, wheat, and wild oats.

(i) Shrunked and broken kernels. All matter which can be removed from a test portion of the original sample by use of an approved device in accordance with procedures prescribed in the Grain Inspection Manual. All matter that is visibly damaged, or which cannot be properly graded by use of the other grading factors prescribed in the Grain Inspection Manual. Also, undeveloped, shriveled, and small pieces of triticale kernels removed in properly separating the material other than triticale and which cannot be recovered by properly rescouring or reclaining.

(j) Steven. A metal sieve 0.032 inch thick with oblong perforations 0.004 inch by 0.076 (3%) inch.

(k) Stones. Concreted earthy or mineral matter and other substances of similar hardness that do not disintegrate readily in water.

(l) Test weight per bushel. The weight per Winchester bushel (2,150.42 cubic inch capacity) as determined on a dockage-free test portion of the original sample using an approved device in accordance with instructions in the Grain Inspection Manual. For the purpose of this paragraph, "approved device" shall include the Fairbanks-Morse or Ohaus Test Weight Per Bushel Apparatus and any other equipment that is approved by the Administrator as giving equivalent results.

PRINCIPLES GOVERNING THE APPLICATION OF THE STANDARDS

§ 26.653 Basis of determination.

(a) Distinctly low quality. The determination of distinctly low quality shall be made by the basis of a roentgen as a whole at the time of sampling when a condition exists that may not appear in the representative sample and/or the sample as a whole.

(b) Certain quality determinations. Each determination of rodent pellets, bird droppings, other animal filth, broken glass, castor beans, crotalaria seeds, dockage, garlic, live weevils or other insects injurious to stored grain, moisture, odor, temperature, an unknown foreign substance, and a commonly recognized harmful or toxic substance shall be upon the basis of the sample as a whole.

§ 26.654 Temporary modifications in equipment and procedures.

The equipment and procedures referred to in the triticale standards are applicable to triticale produced and harvested under normal environmental conditions. Abnormal environmental conditions during the production and harvesting of triticale may require minor temporary modifications in the equipment or procedures to obtain results expected under normal conditions. When these adjustments are necessary, Federal Grain Inspection Service Field Offices, official inspection agencies, and interested parties in the grain trade will be notified promptly in writing of the modification. Adjustments in interpretations (i.e., identity, quality, and condition) are excluded and shall not be made.

§ 26.655 Percentages.

(a) Percentages shall be determined on the basis of weight and shall be rounded off as follows:

(1) When the figure to be rounded is followed by a figure greater than 5, round to the next higher figure; e.g., state 0.46 as 0.5.

(2) When the figure to be rounded is followed by a figure less than 5, retain the figure; e.g., state 0.54 as 0.5.

(3) When the figure to be rounded is even and it is followed by the figure 5, retain the same figure. When the figure to be rounded is odd and it is followed by the figure 5, round the figure to the next higher number; e.g., state 0.45 as 0.5; state 0.55 as 0.6.

(b) Percentages shall be stated in whole and tenth percent at the time of sampling, tenth percent, except when determining the identity of triticale and the percentage of dockage and ergot. The percentage when determining the identity of triticale shall be stated to the nearest whole percent. The percentage of dockage when equal to one-half percent or more shall be stated in terms of half percent, whole percent, or whole and half percent, as the case may be, with other fractions disregarded as shown in the following examples: Dockage ranging from 0.5 to 0.9 percent shall be expressed as 0.6 percent; from 1.0 to 1.4 percent as 1.0 percent, from 1.5 to 1.9 percent as 1.5 percent, etc. The percentage of ergot shall be stated to the nearest hundredth percent.

§ 26.656 Grades, grade requirements, and grade designations.

(See also § 26.658.)
§ 26.657 Grade designations.

The grade designations for triticale shall include in the following order: (a) The letters "U.S."
(b) the number of the grade or the words "Sample grade";
(c) the words "triticale";
(d) each applicable special grade(s) established and determined as follows:

(f) Does not meet the requirements for the grades U.S. Nos. 2, 3,
(e) Garlicky triticale.
(d) A product of distinctly low quality.
(c) Light garlicky triticale.
(b) Garlicky triticale.
(a) A product of distinctly low quality.

§ 26.658 Special grades and special grade requirements.

A special grade, when applicable, is supplemented under § 26.656. Such special grades are established and determined as follows:

(a) Ergoty triticale. Triticale which contains more than 0.10 percent ergot.
(b) Light garlicky triticale. Triticale which contains in a 1,000-gram portion more than six green garlic bulblets, or an equivalent quantity of dry or partly dry bulblets.
(c) Garlicky triticale. Triticale which contains in a 1,000-gram portion more than six green garlic bulblets or an equivalent quantity of dry or partly dry bulblets.
(d) Light smutty triticale. Triticale which has an unmistakable odor of smut, or which contains in a 250-gram portion smut balls, portions of smut balls, or spores of smut in excess of a quantity equal to 30 smut balls of average size.
(e) Smutty triticale. Triticale which contains in a 250-gram portion smut balls, portions of smut balls, or spores of smut in excess of a quantity equal to 30 smut balls of average size.
(f) Weevily triticale. Triticale which is infested with live weevils or other insects injurious to stored grain. As applied to triticale, the meaning of the term "infested" is set forth in the Grain Inspection Manual.

§ 26.659 Special grade designations.

Special grade designations shall be made in addition to all other information prescribed in § 26.657. The grade designation for ergoty, light garlicky, garlicky, light smutty, smutty, and weevily triticale shall include in the order listed, following the word Triticale, the word(s) Ergoty, "Light garlicky," Garlicky, "Light smutty," Smutty, and "Weevily." Effective date: The United States Grain Standards Act, as amended, requires that public notice be given 30 days before standards are established and that no standards shall become effective less than 1 year after promulgation thereof, unless, in the judgment of the Administrator, the public health, interest, or safety require that they become effective sooner.

The new standards should become effective on May 1, 1977, before the beginning of harvest so that the 1977 crop can be marketed under official United States standards in order to minimize possible disruption of normal marketing procedures. Members of the industry have reviewed the proposal, and there are no objections to such an effective date. Some industry members have asked that standards be made effective as soon as practicable. Furthermore, it does not appear that a waiting period beyond this date would make additional relevant information available to the Department on this matter.

Accordingly, it is deemed to be in the public interest to make these standards effective in less than one calendar year after promulgation; therefore, the standards shall become effective May 1, 1977.

DONALD E. WILKINSON, Interim Administrator.

[FR Doc. 77-4823 Filed 2-15-77; 8:45 am]

PART 211—MANDATORY PETROLEUM ALLOCATION REGULATIONS

Title 10—Energy

CHAPTER II—FEDERAL ENERGY ADMINISTRATION

PART 211—MANDATORY PETROLEUM ALLOCATION REGULATIONS

Adoption of Special Rule No. 8 for Subpart C

On January 20, 1977, the Federal Energy Administration ("FEA") issued a notice of proposed rulemaking and public hearing (42 FR 5352 January 28, 1977) proposing the adoption of Special Rule No. 8 (the "Special Rule") for Subpart C of 10 CFR Part 211. The Special Rule as proposed provided for the extension of entitlement benefits to imports of No. 2 heating oil into PAD Districts I through IV in the months of February and March 1977. Written comments on the proposal were invited through February 7, 1977, and a public hearing was held on that date.

This proposal was prompted by the extremely high level of demand for home heating oil in the North Central and Northeast regions caused by the continuing unusually severe weather. As pointed out in the proposal, FEA believed that the extension of entitlement benefits to imports of No. 2 heating oil would alleviate potentially severe supply problems by inducing increased importation of that product.

The Special Rule was proposed provided for issuance of entitlements for imports of No. 2 heating oil in the period February through March 1977. The Special Rule was promulgated in Federal Register on February 10, 1977, effective immediately.

DONALD E. WILKINSON, Interim Administrator.

[FR Doc. 77-4823 Filed 2-15-77; 8:45 am]

PART 25—GRAIN STANDARDS

United States Standards for Wheat

In FR Doc. 76-18786 appearing on page 26570 in the Federal Register of June 23, 1976, paragraph (b) of § 26.303 appearing on page 26573 is corrected in the first line of that paragraph by changing "Certain Sample grade factors" to read "Certain quality determinations." Also, in the third line of that same paragraph the words "broken glass" should be added immediately following the words "animal filth" and immediately before the words "castor beans."

DONALD E. WILKINSON, Interim Administrator.
In addition to requesting oral and written comments on the proposed Special Rule, FEA specifically requested comments on: (1) Whether imports in the month of April 1977 should also be eligible for entitlement benefits; (2) how FEA can be assured that these entitlement benefits will be passed through to consumers in the form of current price reductions, starting with appropriate billing adjustments effective from February 1, 1977; (3) whether middle distillates, such as No. 2-D diesel, kerosene, and No. 1 oils should also be eligible for import entitlements; and (4) whether adoption of the proposal with regard to No. 2 heating oil would permit domestic refiners in converting their production to yield more motor gasoline to increase gasoline stocks to normal levels prior to the high demand summer driving season.

Forty-two written comments were received in response to the notice of proposed rulemaking. FEA also has received written and oral comments in connection with its FR 4255 January 25, 1977 providing for public hearings in Minneapolis, Minnesota, and Boston, Massachusetts, with respect to the current price levels and the adequacy of middle distillates in the North Central and Northeastern regions. These comments were also considered in FEA's determination in this proposal.

The public hearing on this proposal was held on February 9, and 17 persons, including members of Congress and representatives of all segments of the petroleum industry, presented oral comments at the hearing. Although representatives of certain of the larger integrated refining companies that do not market substantial volumes of heating oil in the East Coast opposed the proposal, most other parties, including a representative of marketers of heating oil in the Midwest, supported adoption of the proposal. Persons in favor of the proposal point out that it would move the current disincentives to contract for additional volumes of imports, in that firms would be assured that their imported product would be competitive with those of domestic refiners. These additional imports, it is pointed out, would moderate what is now a very tight supply situation for No. 2 heating oil in the Northeastern states and in certain areas an actual shortage of No. 1 fuel oil or kerosene, thus insuring that adequate product was available. As to current supply levels, it was felt that, although primary stocks of No. 2 heating oil are lower than normal, no overall shortage of this product exists at this time. However, distribution problems, specifically the difficulties and increased costs of moving product inland, due to the cold weather have caused supply disruptions. As to the effects on consumer prices, testimony indicated that a large portion, if not all, of any entitlement benefits granted would flow through to consumers, although a few firms would be competitive first that the distribution costs are much higher this winter than in a normal winter second that the spot prices on the world market have risen in response to this increase in demand for middle distillates. FEA's belief in this regard is that the entitlement benefits will be passed through, although import prices will probably continue to reflect increased world demand.

ADOPTION OF THE SPECIAL RULE

Based on its analysis of the material submitted in the public hearing and in written comments, FEA has determined to adopt Special Rule No. 8 essentially as proposed, but with provision for a fixed per barrel entitlement value of $2.10 (for five cents per gallon) and providing also for coverage of imports of No. 1 heating oil (kerosene). FEA believes that adoption of the Special Rule is necessary to insure adequate supplies of heating oil, particularly to consumers in the Northeast region.

ENTITLEMENT VALUE

In providing for a fixed entitlement value of five cents per gallon, FEA recognized the concerns expressed in comments that the projected $1.56 per barrel benefit that is comparable to the maximum level of increased imports, in that the differential in the domestic and import prices is currently in the neighborhood of six cents per gallon. In addition, persons commenting pointed out correctly that the concept of a cost differential in favor of domestic refiners was not an appropriate consideration where the regulatory action of short duration is attempting to encourage imports to address a temporary potentially emergency supply situation. FEA provided for a fixed dollar amount so that importers would be certain of the amounts to be received for their imports and so that the passthrough of these amounts would be facilitated.

PRODUCTS COVERED

FEA has also determined to make imports of No. 1 heating oil and kerosene eligible for entitlement issuances, since the increased heating oil consumed in the more Northern parts of the Northeast region is accounted for either by No. 1 heating oil or kerosene.

PERIOD FOR ELIGIBLE IMPORTS

PEA has determined that the months for which imports should be eligible for entitlement issuance are February and March 1977, as proposed. FEA believes that provision for imports in months other than February and March would not serve at this time to increase supplies of heating oil available during this heating season. Imports for January have already been landed, and the award of entitlement benefits for these imports would not provide incentives for importations. FEA also concluded that such a provision might very well bring about lower consumer prices in certain cases. But, at the same time, coverage of January imports would reward certain firms and would penalize other firms' competitive position. FEA also concluded from the public hearing and comments that coverage of April imports would not be necessary to assure adequate supplies for the remainder of this heating season.

PASSTHROUGH OF ENTITLEMENT BENEFITS TO CONSUMERS

FEA is particularly concerned that entitlement benefits deriving from the Special Rule be passed through to consumers. The adoption of a fixed entitlement value of five cents per gallon is intended to facilitate the passthrough of such benefits, by removing any uncertainty concerning the ultimate value of the entitlement benefit that accures upon the importation of the product. Had the entitlement value been specified as a percentage of the applicable per barrel crude oil entitlement for the month in which the import took place, the exact value of the entitlement could not have been ascertainned during the month in which the import took place, since the per barrel entitlement value for crude oil is not calculated until after actual pricing data for the month in question have been reported to FEA.

With the additional supplies of imported product which should become available under this Special Rule at prices that are comparable to the world market have risen in response to the inflationary impact of the Special Rule benefit, there is reasonable basis for any appropriate remedial regulatory action should it occur, FEA will begin immediately to monitor on a weekly basis the cost of No. 2 heating oil to all firms currently being surveyed as part of the middle distillate price monitoring system adopted by FEA on September 15, 1976. It is anticipated that this weekly cost surveys will disclose the impact of the entitlement benefits of this Special Rule on the cost of the product of the firms that import No. 2 heating oil during February and March. A comparison of each firm's current costs, and prices for No. 2 oils with and prices of the same firms in the months immediately preceding the availability of entitlement benefits, should provide a means to monitor on a current basis the extent to which entitlement benefits are passed through to consumers. If, based upon these contemporaneous data, it appears that entitlement benefits are not being passed through, FEA will take appropriate remedial action.

It is important to note in regard to consumer prices that the reduced cost of imports under this Special Rule will probably not result in any overall price reduction of only any necessary. The Special Rule should serve to prevent price increases that would otherwise have resulted in the Northeast region. This does in fact occur, and to provide a basis for any appropriate remedial regulatory action should it not occur, FEA will immediately to monitor on a weekly basis the cost of No. 2 heating oil to all firms currently being surveyed as part of the middle distillate price monitoring system adopted by FEA on September 15, 1976. It is anticipated that this weekly cost surveys will disclose the impact of the entitlement benefits of this Special Rule on the cost of the product of the firms that import No. 2 heating oil during February and March. A comparison of each firm's current costs, and prices for No. 2 oils with and prices of the same firms in the months immediately preceding the availability of entitlement benefits, should provide a means to monitor on a current basis the extent to which entitlement benefits are passed through to consumers. If, based upon these contemporaneous data, it appears that entitlement benefits are not being passed through, FEA will take appropriate remedial action.
Compensation received by an interstate pipeline pursuant to section 4 in excess of the amount such pipeline would have charged its local distribution companies in proportion to their share of any natural gas not delivered together with credits necessary to make whole the other company which replaced such natural gas with higher cost gas such as synthetic natural gas as prescribed in section 4(f) (2) (B) of the Act may not be accounted for under the Commission’s existing FGA regulations (18 CFR 154.38 (d) (1)), which establish accounting and rate adjustment procedures on a pro-rate, systemic basis.

In order to reflect passage of the Emergency Natural Gas Act of 1977, the Commission finds that accounting and billing procedures with which the Federal Power Commission is consistent with the Commission and provisions of the Act, should be established, as hereinafter ordered under the Natural Gas Act, 15 U.S.C. 717 et seq. The Commission finds that good cause exists to waive the prior notice requirements of the Administrative Procedure Act, 5 U.S.C. 553, to reflect the Emergency Natural Gas Act of 1977.

The Commission orders: (A) Compensation reflected in an authorization of the Administrator to be received by interstate pipelines for transportation service pursuant to section 4 or 6 of the Act shall be recorded in account No. 858. Compensation reflected in an authorization of the Administrator to be received by interstate pipelines for deliveries made pursuant to section 4 of the Act shall be recorded in account No. 839. Compensation reflected in an authorization of the Administrator to be paid by interstate pipelines for purchases for natural gas producers pursuant to section 6 of the Act shall be recorded in account Nos. 858, 800, 801, and 872, as appropriate. Compensation reflected in an authorization of the Administrator to be paid by interstate pipelines for purchases for natural gas producers pursuant to section 6 of the Act shall be recorded in account No. 839. Compensation reflected in an authorization of the Administrator to be paid by interstate pipelines for purchases for natural gas producers shall be recorded in account Nos. 858, 801, and 872, as appropriate. Compensation reflected in an authorization of the Administrator to be paid by interstate pipelines for purchases for local distribution companies shall be recorded in account No. 803.

Title 18—Conservation of Power and Water Resources

CHAPTER 1—FEDERAL POWER COMMISSION

SUBCHAPTER H—REGULATIONS UNDER THE EMERGENCY NATURAL GAS ACT OF 1977

[Docket No. RM 77–70]

PART 295—EMERGENCY REGULATIONS

Order Establishing Accounting and Billing Procedures for Interstate Natural Gas Pipelines

February 6, 1977.

On February 2, 1977, the President signed into law the Emergency Natural Gas Act of 1977, Section 4 of the Act authorizes the President to order emergency deliveries and transportation of natural gas to deal with existing or imminent shortages. Section 6 of the Act provides authorization for short-term emergency purchases of natural gas by inter alia, interstate pipelines from producers, local distribution companies or other persons. The President has designated the Chairman of the Federal Power Commission as the administrator of the Act.

Sections 4(f) (1) and (2) of the Act provide as follows:

(f) (1) If the parties to any order issued under subsection (a) fail to agree upon the terms of compensation for deliveries (which may include compensation in kind) for emergency purchases, the Administrator shall, by supplemental order, prescribe the amount of compensation (which may include compensation in kind), and that portion thereof cannot practicably be compensated in kind, the President shall calculate the amount of compensation for delivery of natural gas, based upon the amount required to make the interstate pipeline deliver such natural gas and its local distribution companies shall be credited in proportion to their share of such natural gas deliveries or purchases.

(f) (2) If, for the purpose of a supplemental order pursuant to paragraph (1), the party making emergency deliveries pursuant to subsection (a) indicates a preference for compensation in kind, the President shall direct that compensation in kind be provided by August 1, 1977, to the maximum extent practicable.

(b) If the President determines pursuant to paragraph (a) that any portion thereof cannot practically be compensated in kind, the President shall calculate the amount of compensation for deliveries of natural gas, based upon the amount required to make the interstate pipeline deliver such natural gas and its local distribution companies shall be credited in proportion to their share of such natural gas deliveries or purchases.

Orders pursuant to section 4 of the Act shall be recorded in account No. 803. Compensation reflected in an authorization of the Administrator to be paid by interstate pipelines for purchases for natural gas producers pursuant to section 6 of the Act shall be recorded in account Nos. 858, 800, 801, and 872, as appropriate. Compensation reflected in an authorization of the Administrator to be paid by interstate pipelines for purchases for local distribution companies shall be recorded in account No. 839. Compensation reflected in an authorization of the Administrator to be paid by interstate pipelines for purchases for local distribution companies shall be recorded in account No. 803.

In consideration of the foregoing, Part 211, Chapter II of Title 10, Code of Federal Regulations, is amended as set forth below, effective immediately.

DAVID G. WILSON, Acting General Counsel.

The appendix to Subpart C of Part 211 is amended by the addition of a Special Rule No. 2 as follows:

SPECIAL RULE No. 2

1. Scope. This Special Rule provides, for the months February and March 1977, for the issuance of entitlements under § 211.67 with respect to Imports of No. 1 heating oil and No. 2 heating oil into PAD Districts I through IV.

2. Entitlement issuance for certain mid-Atlantic imports. (a) For purposes of subparagraph (3) of the paragraph applicable to imports of No. 1 heating oil and No. 2 heating oil pursuant to paragraph 4 of the Order Establishing Accounting and Billing Procedures for Interstate Natural Gas Pipelines, 30 FR 23183; E.O. 11790, 39 FR 23183; E.O. 11903, 41 FR 36661.)

(b) The entitlement value issuable under paragraph (a) above shall be equal to two dollars and ten cents ($2.10) per barrel.

(c) For purposes of this Special Rule, No. 1 heating oil means No. 1 heating oil as defined in Part 212 of this chapter and includes kerosene as defined in § 212.31.

3. Reporting requirements. The reporting requirements set forth in paragraph (j) of § 211.69 shall apply with respect to eligible firms’ imports of No. 1 heating oil and No. 2 heating oil in the months February and March 1977.

4. Provisions of Subpart C. The provisions of Subpart C of Part 211 shall remain in full force and effect except as expressly modified by the provisions of this Special Rule.

[FB Doc 77–4768 Filed 2–11–77:9:26 am]
companies or other persons pursuant to section 6 of the Act shall be recorded in account No. 804. In all cases the amounts paid or received shall be clearly identified as amounts paid or received pursuant to the Emergency Natural Gas Act of 1977. (B) Interstate pipelines paying compensation under section 4 or 6 of the Act shall include in their monthly bills a separate charge calculated to recover the amounts of such payments from their distributor customers in proportion to each customer's share of natural gas deliveries or purchases associated with such payments. For purposes of billing, such amounts will be included in each monthly billing; for purposes of recovery the amounts net of any compensation under (C) below will be paid the following month to enable the distributor customers to generate the necessary funds. (C) Interstate pipelines receiving compensation for deliveries of their own gas under section 4 of the Act shall include in their monthly bills a separate credit to distribute to their customers the amount of compensation received in excess of the pipeline's own gas delivered. The credit will be substituted for any credit previously allowed, and in cases of other than seasonal pipeline operations will be otherwise charged. The billing credit shall be calculated in a manner designed (1) to make whole any customer which replaced natural gas delivered with higher cost gas such as synthetic gas as prescribed in section 4(c), (2) of the emergency act, and (2) to distribute total net excess compensation to customers in proportion to their share of any natural gas not delivered as a result of the transaction giving rise to the compensation.

(D) Compensation received by interstate pipelines for transportation services pursuant to section 4 of the Act, less actual out of pocket expenses incurred in rendering the service, shall be credited to the deferred purchased gas account No. 191.

(E) A statement of monthly charges and credits under the terms of paragraphs (B) and (C) above, together with the supporting workpapers (including volumes, revenues or charges associated with each transaction, and the basis for such revenues or charges), shall be mailed on the date of billing to the Commission and each of the pipeline's jurisdictional customers and interested state regulatory commissions. The Commission recognizes that under Pub. L. 95-2, the Secretary shall cause prompt publication of this order in the FEDERAL REGISTER, and each of the pipeline's jurisdictional customers and interested state regulatory commissions. The Commission and each of the pipeline's jurisdictional customers and interested state regulatory commissions. The Commission and each of the pipeline's jurisdictional customers and interested state regulatory commissions.

(F) The procedures established herein shall be effective upon the issuance of this order.

(G) The Secretary shall cause prompt publication of this order in the Federal Register. By the Commission.

KENNETH F. FLUMA, Secretary.

Title 31—Money and Finance: Treasury

PART 701—DEPARTMENT OF THE NAVY

CHAPTER VI—DEPARTMENT OF THE NAVY

PART 701—AVAILABILITY OF DEPARTMENT OF THE NAVY RECORDS AND PUBLICATION OF DEPARTMENT OF THE NAVY DOCUMENTS AFFECTING THE PUBLIC

Additional Privacy Act Exemptions

On page 51849 of the Federal Register of November 24, 1976, notice of proposed rule-making was published proposing to add Subpart G of Part 701 of 32 CFR (41 FR 55061, November 17, 1976), entitled "Privacy Act Exemption," by adding two exemptions under 5 U.S.C. 552a. The first amendment to Subpart G of Part 701 adds a new paragraph (1) to § 701.123 which exempts portions of a Navy system of records entitled "White House Support Program." The second amendment to Subpart G of Part 701 adds a new paragraph (2) to § 701.124 which exempts portions of a Marine Corps system of records entitled "Personnel Security Eligibility and Access Information System." Interested persons were given until December 31, 1976, to submit written views, comments, and arguments regarding the proposed amendments to Subpart G of Part 701. The December 31 submission deadline has since passed, and no written views, comments, or arguments have been received. Therefore, pursuant to the authority of the Privacy Act of 1974, Pub. L. 93-579, 5 U.S.C. 552a, the proposed amendments are adopted without change.

Accordingly, there is established in Subpart G of Part 701 of 32 CFR a new paragraph (1) to § 701.123 and a new paragraph (g) to § 701.124 as follows:

§ 701.123 Exemptions of specific Navy records systems.

(1) Office of the Secretary.

(1) ID—N 31596, WHISP.

SYSNAME—White House Support Program.

EXEMPTION—Portions of this system of records are exempt from the following subsections of 5 U.S.C. 552a (c) (3), (d), (e) (1), (e) (4) (G) through (1), and (f). AUTHORITY—5 U.S.C. 552a(k) (1), (2), (3), and (5).

REASONS—Exempted portions of this system may contain information which has been properly classified under Executive Order 11652, and which is required to be kept secret in the interest of national defense or foreign policy. Exempted portions of this system may also contain information considered relevant and necessary to make a determination as to qualifications, eligibility, or suitability for access to classified information, and which was obtained by providing an express or implied promise to the source that his identity would not be revealed to the subject of the record. Exempted portions of this system may also contain information collected and maintained in connection with providing protective services to the President and other individuals protected pursuant to 18 U.S.C. 3056. Exempted portions of this system may also contain investigative records compiled for law-enforcement purposes, the disclosure of which could reveal the identity of sources who provided information under an express or implied promise of confidentiality, compromise investigative techniques and procedures, jeopardize the life or physical safety of law-enforcement personnel, or otherwise interfere with enforcement proceedings or adjudications.

§ 701.124 Exemptions for specific Marine Corps record systems.

(g) ID—MIN 00001.

SYSNAME—Personnel Security Eligibility and Access Information System.

EXEMPTION—Portions of this system of records are exempt from the following subsections of 5 U.S.C. 552a (c) (3), (d), (e) (1), (e) (4) (G) through (1), and (f).

AUTHORITY—5 U.S.C. 552a(k) (2), (3), and (5), as applicable.

REASONS—Exempt portions of this system contain information that has

FEDERAL REGISTER, VOL. 42, NO. 32—WEDNESDAY, FEBRUARY 16, 1977
been properly classified under Executive Order 11652, and that is required to be kept secret in the interest of national security or foreign policy.

Exempt portions of this system also contain information considered relevant and necessary to make a determination as to qualifications, eligibility, or suitability for federal civilian employment, military service, or special contracts, or access to classified, compartmented, or otherwise sensitive information, and was obtained by providing an expressed or implied assurance to the source that his identity would not be revealed to the subject of the record.

Exempted portions of this system further contain information that identifies sources who confidentiality must be protected to ensure that the privacy and physical safety of these witnesses and informants are protected.

JOHN S. JENKINS,
Captain, JAGC, U.S. Navy, Assistant Judge Advocate General (Civil Law).

Title 47—Telecommunication
CHAPTER III—FEDERAL COMMUNICATIONS COMMISSION
[Docket No. 28012; RM-4440; RM-2761; RM-4672]

PART 73—RADIO BROADCAST SERVICES
FM Broadcast Stations in Saegertown, Pennsylvania; Carpinteria, California; Two Harbors, Minnesota; Grass Valley, California; Change Made in Table of Assignments

1. The Commission here considers a “Request for Reconsideration” submitted by Israel Sinofsky which asks for reconsideration of the Report and Order in Docket No. 28012 in which a request to assign Channel 269A to Carpinteria, California, was denied. Classic Broadcasting Corporation filed comments in which it urged the Commission to reconsider and assign Channel 269A to Carpinteria.

2. The Carpinteria portion of this proceeding was initiated after the Commission received a “Petition for Rule Making” filed by Israel Sinofsky (petitioner) which sought the assignment of Channel 269A to Carpinteria as a First FM assignment to the community. No oppositions were filed. Thereafter, the Commission issued a Notice of Proposed Rule Making seeking comments on the proposal. The Commission failed to receive comments from petitioner and, consistent with our policy and procedures set forth in the Appendix to the Notice reaffirmed in the Report and Order from making the assignment to Carpinteria in the absence of an expression of continuing interest. Upon receipt of the Report and Order, petitioner corresponded with the Commission, stating he never received a copy of the Notice and therefore could not have known to file comments. Petitioner states that, upon discovery of the Notice, he filed a statement with the Commission reiterating his continuing interest and intent to apply for the channel assigned. The Commission’s records do not show that this statement has been received.

3. We believe, that the public interest would be served by the assignment of Channel 269A to Carpinteria. Such an assignment would provide the community an opportunity to obtain its first full-time local aural broadcast service. In view of the petitioner’s failure to receive a copy of the Commission’s Notice and our failure to receive petitioner’s statement which was mailed to the Commission, we believe the requisite expression of interest and intent has been provided and that a reversal of our earlier denial of the petition is warranted. We will thereupon assign Channel 269A to Carpinteria, California, as proposed.

4. The Mexican Government has given its concurrence to the proposed assignment at Carpinteria, California.

5. Accordingly, it is ordered, That effective March 25, 1977, the FM Table of Assignments (§ 73.202(b) of the Commission’s Rules) is amended as to the named community to read as follows:

City Channel No. Carpinteria, California 269A

6. It is further ordered, That the Petition for Reconsideration filed by Israel Sinofsky is granted.

7. Authority for the actions taken herein is found in Sections 4(1), 5(2)(a), 5(2)(b), 303(p) and (r), and 307(b) of Communications Act of 1934, as amended, and Section 0.281 of the Commission’s Rules.

8. It is further ordered, That this proceeding is terminated.

FR Doc.77-4905 Filed 2-15-77; 8:45 am

[Docket No. 28005, RM-2269]

PART 73—RADIO BROADCAST SERVICES
Report and Order

The Commission has under consideration its Notice of Proposed Rule Making, adopted September 2, 1976, 41 FR 39330, inviting comments on a proposal to assign Channel 276A to Anchorage, Alaska, to be used there as a reserved channel for noncommercial educational purposes. This proceeding was instituted on the basis of a petition filed by the Alaska Educational Broadcasting Commission, since re-named Alaska Public Broadcasting Commission (“APBC”), seeking to obtain broadcast authority for the University of Alaska, and is also the center of commerce for the entire state. The principal industries are petroleum production, transportation, construction, manufacturing and mining. Anchorage presently receives commercial aural service from four FM facilities and seven AM stations. The Commission is presently considering an application which preceded one of a fifth FM station in Anchorage.

APBC reaffirms its intent to apply (through a related entity functioning under its aegis) for Channel 276A and, upon receipt of a grant, it will activate the facility.

Channel 276A can be assigned to Anchorage without disturbing any existing assignments and in compliance with the minimum mileage separation requirements. Preclosure would occur on Channels 275, 276A and 277. However, only one community with a population of less than 1,500 is affected. That community, Palmer, Alaska, has three alternate channels available for assignment.

We are of the opinion that public interest would be served by assigning Channel 276A to Anchorage, Alaska. It would be reserved as Anchorage’s first noncommercial educational FM channel. An educational station operating on this channel could provide a needed educational service to this area.

In view of the foregoing, It is ordered, That effective March 25, 1977, § 73.202(b) of the Commission’s Rules, as regarding Anchorage, Alaska, is amended as follows:

City Channel No.
Anchorage, Alaska 263, 267, 271, 276A, 280A, 283A.

7. Authority for the action taken herein is contained in sections 4(1), 5(2)(a), 303(p) and (r), and 307(b) of the Communications Act of 1934, as amended, and Section 0.281 of the Commission’s Rules.

8. It is further ordered, That this proceeding is terminated.

FR Doc.77-4910 Filed 2-15-77; 8:45 am

21970 U.S. Census.

3The applicant, Christian Voice of Alaska, seeks to obtain broadcast authority for the University of Alaska, and is also the center of commerce for the entire state. The principal industries are petroleum production, transportation, construction, manufacturing and mining. Anchorage presently receives commercial aural service from four FM facilities and five AM stations. The Commission is presently considering an application which preceded one of a fifth FM station in Anchorage.

Title 50—Wildlife and Fisheries

CHAPTER I—U.S. FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 32—HUNTING

White River National Wildlife Refuge

The following special regulation is issued and is effective on February 16, 1977.

§ 32.22 Special regulations: Upland game: for individual wildlife refuge areas. ARKANSAS

WHITE RIVER NATIONAL WILDLIFE REFUGE

Public hunting of wild turkey on the White River National Wildlife Refuge, DeWitt, Arkansas, is permitted only on the area designated by signs as open to hunting. This open area is delineated on a map available at the refuge headquarters and from the Regional Director, 17 Executive Park Drive, N.E., Atlanta, Georgia 30339. Hunting shall be in accordance with all State and Federal regulations subject to the following conditions:

(1) Species permitted to be taken: wild turkey.

(2) Open season: Five separate 2-day hunts will be held as follows: April 1–2, 8–9, 15–16, 22–23, 29–30, 1977.

(3) Daily bag limits: One bearded turkey; no other game may be taken.

(4) Methods of hunting: Shotguns only.

(F) Hunting hours are from daylight until sunset. Hunters may not return to the woods with firearms after their turkey is bagged.

(8) All turkey must be checked out at official check stations.

(7) A Federal permit is required to enter the public hunting areas. Permits are not transferable.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32 and are effective through April 30, 1977.

RAY R. VAUGHN, Acting Regional Director, Fish and Wildlife Service.

Title 12—Banks and Banking

CHAPTER II—FEDERAL RESERVE SYSTEM

SUBCHAPTER A—BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

[Reg. Z; 58 FR 7164, 7167; 58 FR 10496, 10498]

PART 226—TRUTH IN LENDING

Official Staff Interpretations

In accordance with 12 CFR Part 226.1 (d), the Board is publishing the following official staff interpretations of Regulation Z, issued by a duly authorized official of the Division of Consumer Affairs. Identifying details have been deleted to the extent required to prevent a clearly unwarranted invasion of personal privacy. The Board maintains and makes available for public inspection and copying a current index providing identifying information for the public subject to certain limitations stated in 12 CFR Part 261.6.

Official staff interpretations may be reconsidered by the Board upon request of interested parties and in accordance with 12 CFR Part 226.1 (d) (2). Every request for reconsideration should clearly identify the number of the official staff interpretation in question, and should be addressed to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

These interpretations shall be effective as of February 14, 1977.

§ 226.4(a)(6). Compliance with § 226.4(a)(6) (ii) is achieved when the customer indicates by checkmark or the like together with the his/her signature, the type(s) of insurance desired, or where the customer indicates by checkmark or the like, the type(s) of insurance desired and dates the request as long as the customer renders his/her personal signature subsequent to the dealer's preparation of the request.

February 2, 1977.
This is in response to your letter of * * *, requesting an official staff interpretation of § 226.8(a) (4) which deals with the inclusion of certain types of insurance premiums from the finance charge.

Bank credit life and/or accident and health insurance are not required by either the bank you represent or any dealer with whom the bank has a financing arrangement. You indicate that such is clearly and conspicuously disclosed in writing, together with the cost of such insurance on the bank's Sale and Security Agreement. (Please note that although you indicated that a copy of the bank's agreement was enclosed with your letter, no such agreement was included.) You indicate that the relevant portion of that document reads as follows:

"Personal insurance—The following types of insurance are not required in connection with this transaction. The Buyer's desire for any such insurance must be indicated by signature below:

--- Credit life insurance
--- Accident and health insurance
Total personal insurance

Buyer's Approval: I desire each type of insurance indicated below. My signature must initial each type of insurance desired.

Date (Buyer's Signature)

You state that this authorization was originally set up in this form because the bank interprets the clause "separately signed affirmative written indication of such desire" in § 226.4(a) (6) (ii) as requiring a separately signed and dated affirmative written authorization for each type of personal insurance desired and not represent that the bank regards one signature as sufficient in providing an affirmative written indication of a customer's desire for the insurance indicated by the customer's initial. You state that the bank reads the clause "separately signed affirmative written indication of such desire" in § 226.4(a) (6) (ii) as referring to a signature separate from the customer's signature on the Sale and Security Agreement itself.

You pose the following questions with regard to § 226.4(a) (6) (ii):

1. Must the creditor obtain from the customer a "separately signed affirmative written indication of such desire" as to each type of insurance desired, or will a single dated and signed statement covering either or both types of insurance, as initialed by the customer, suffice?

2. Will compliance with § 226.4(a) (5) (ii) be achieved by separate disclosure of the cost of insurance, and separately signed affirmative written indication as to each type of insurance desired, or will a single dated and signed statement covering either or both types of insurance, as initialed by the customer, suffice?

"The unearned portion of the loan finance charge is a fraction of the loan finance charge of which the numerator is the sum of the periodic balances scheduled to follow the computational period in which prepayment occurs, and the denominator is the sum of all periodic balances under either the loan agreement or, if the balance owing resulted from a refinancing or consolidation, under the refinancing agreement or consolidation agreement." You state that the method described in the Colorado statute will yield the same result, in terms of the amount of the unearned finance charge, as will application of the Rule of 78's. You also indicate that § 2.503(1) (g) of the Final Draft of the Uniform Consumer Credit Code (1974) referred to the "sum of the balance method" as alternatively being known as the Rule of 78's.

You question whether Colorado creditors would satisfy the requirements of § 226.8(b) (7) by identifying the rebate method described in the Colorado Statute in either of the following ways:

1. As being "in accordance with the Rule of 78's";
2. As being "in accordance with the Sum of the balances method as described in § 3-310 (or 3-210 as applicable) of the Colorado Uniform Consumer Credit Code.'

Staff reads the comments to §§ 2.210 and 3.210 of the 1969 Revised Final Draft of the Uniform Consumer Credit Code as indicating that those sections present the "Rule of 78's" with respect to a sale, refinancing or consolidation of a consumer loan, as defined, in equal installments at equal intervals from the date of the sale, refinancing or consolidation to the final scheduled payment date. While staff has consistently maintained that the Rule of 78's cannot be applied routinely to obligations involving an unequal or irregular payment schedule, the Uniform Consumer Credit Code appears to have utilized the principles of the Rule of 78's in describing the method of computing rebates. Since you claim that the rebate method described in the Colorado Statute is the Rule of 78's, you do not make identical results (at least with regard to all transactions entered into prior to October 28, 1975, and all transactions subsequent thereto involving sixty-one or fewer installments) and since the requirements of § 226.8(b) (7) can be satisfied by using any commonly accepted term which describes the method of computing any rebate which the customer, the rebate method can be identified as neither the "Rule of 78's" or the "Sum of the Balances" method.

This is in reply to your letter of * * *, regarding § 226.8(b) (7) of Regulation Z and Board Interpretation § 226.818 which require disclosure of the method of computing the unearned portion of a finance charge in the event of prepayment in full of an obligation which includes precomputed finance charges.

You state that in Colorado, the method of calculating the unearned portion of the finance charge to be rebated in the event of prepayment in full of the unpaid balance of a precomputed consumer loan or consumer credit/loan transaction is dictated by the Colorado Uniform Consumer Credit Code. With regard to transactions entered into prior to October 28, 1975, as well as those entered into on or after that date which, according to the Colorado Code, are payable in sixty-one or fewer installments, the unearned portion of a precomputed finance charge in the event of prepayment in full of the unpaid balance is calculated in accordance with the following provisions of the Colorado Code:

"The unearned portion of the loan finance charge is a fraction of the loan finance charge of which the numerator is the sum of the periodic balances scheduled to follow the computational period in which prepayment occurs, and the denominator is the sum of all periodic balances under either the loan agreement or, if the balance owing resulted from a refinancing or consolidation, under the refinancing agreement or consolidation agreement."
RULES AND REGULATIONS

PART 261—RULES REGARDING AVAILABILITY OF INFORMATION

Implementation of the Amendment to the Freedom of Information Act Required by the Government in the Sunshine Act

Consistent with section 5(b) of the Government in the Sunshine Act (Pub. L. 94-409), the Board of Governors of the Federal Reserve System, hereby revises § 261.6(a) (1) of Title 12 of the Code of Federal Regulations. The amendment will revise the Board's rules with regard to exemption 3 of the Freedom of Information Act. In order to accomplish this revision, § 261.6(a) (1) is revised, effective March 12, 1977, to read as follows:

261.6 Exemptions from disclosure.

(a) * * *

(1) is specifically authorized under criteria established by an Executive order to be kept secret in the interests of national defense or foreign policy and is in fact properly classified pursuant to United States Code) provided that such statute (1) requires that the matters be withheld from the public in such a manner as to leave no discretion on the issue, or (ii) establishes particular criteria for withholding or refers to particular types of matters to be withheld;

* * *

The requirements of section 553 of Title 5 United States Code with respect to notice, public participation and deferred effective date were not followed in connection with this amendment because the amendment merely conforms the Board's rules to the language of exception (b) (3) of the Freedom of Information Act, as amended by section 5(b) of the Government in the Sunshine Act, which amendment will become effective on March 12, 1977, and thus such procedures were found to be unnecessary.

Theodore E. Allison
Secretary of the Board.

CHAPTER V—FEDERAL HOME LOAN BANK BOARD

SUBCHAPTER C—FEDERAL SAVINGS AND LOAN INSTITUTIONS

[No. 77-91]

PART 545—OPERATIONS

Service Corporations

SUMMARY

The following summary of the amendments adopted by this resolution is provided for the reader's convenience and is subject to the full explanation in the following preamble and to the specific provisions of the regulations.

I. PROPOSED REGULATION

(a) Would place on service corporations in which Federal associations may invest certain restrictions regarding (1) acquisition of unimproved real estate for the purpose of development, (2) development of such real estate, and (3) acquisition of real estate to be used for offices and related facilities of a savings and loan association which holds stock in the service corporation, or for such offices and related facilities and for rental or sale.

(b) Would set out Board policy regarding acquisition and development of unimproved real estate by service corporations of insured institutions.

(c) Would clarify that debt of a subsidiary of a service corporation must conform to debt limitations applicable to the parent corporation and would require that debt to the parent corporation be computed as debt for purposes of determining whether debt of the subsidiary exceeds such limitations.

II. DIFFERENCES FROM PROPOSAL.

(a) Restrictions regarding acquisition of real estate for development apply without regard to the total cost of the project and only when the cost to the service corporation exceeds 20 percent of its assets.

(b) Notification within 30 days after acquisition must be given to the District Director—Examinations instead of the Supervisory Agent, and in lieu of the use of prescribed forms certain prescribed information must be provided.

(c) The provision that would have required that information on specified subjects be obtained prior to acquisition is deleted.

(d) The three year maximum period for completion of development applies only after commencement of development, and a period of five years is allowed for completion following acquisition.

(e) Proposed restrictions on acquisition of real estate by a service corporation from individuals closely affiliated with a Federal association holding stock in such service corporation are deleted.

(f) The provision regarding application of service corporation debt limitations to subsidiaries of such corporations is further clarified.

(g) The proposed new policy statement regarding land acquisition and development by service corporations of insured institutions is not adopted.

The Federal Home Loan Bank Board, by Resolution No. 76-433, dated June 17, 1976, proposed to amend § 545.9-1 of the Rules and Regulations for the Federal Savings and Loan System (12 CFR 545.9-1) and Part 571 of the Rules and Regulations for Insurance of Accounts (12 CFR Part 571) for the purpose of (1) placing restrictions on certain activities of service corporations in which Federal associations may invest, (2) settling out Board policy regarding certain activities of service corporations of insured institutions, and (3) revising and clarifying debt limitations applicable to subsidiaries of service corporations. Notice of such proposed rulemaking was published in the Federal Register on June 24, 1976 (41 FR 26031-26032), with an invitation to interested persons to submit written comments by July 25, 1976.

On the basis of its consideration of all relevant material presented by interested persons and otherwise available to it, the Board deems it advisable to adopt the amendments, with modifications discussed below.

The proposed amendments would have placed certain restrictions on acquisition by a service corporation in which a Federal association may invest of unimproved real estate lots and other unimproved real estate for the purpose of prompt development and subdivision, principally for construction of housing or for resale to others for such construction, or for use as mobile home sites. Such restrictions would have been applicable whenever the total cost to purchase and develop such real estate exceeded the lesser of $1,000,000 or 20 percent of the assets of the service corporation. The final amendments apply restrictions only if the total cost to the service corporation to purchase and develop such real estate exceeds 20 percent of its assets. The final amendments thereby apply restriction solely on the basis of the amount of investment by the service corporation relative to its assets and without reference to the total size of the project.

The proposed amendments would have imposed two requirements in connection with any such acquisition exceeding such limits. First, the service corporation would have been required to notify the Board's Supervisory Agent on prescribed forms not later than 30 days after acquisition. The final amendments require that such notification be given to the District Director—Examinations and, in—
stead of requiring the use of prescribed forms, set out certain information that the notification must provide. These changes allow the service corporation greater flexibility and emphasize that this requirement is intended to facilitate examination and not to imply Board approval of any specific project.

The second requirement, that prior to any such acquisition the service corporation must obtain and maintain in its files data on specified subjects, is deleted. While the Board believes that acquisition of information of the type specified in the proposal is normally necessary for prudent land development activity, it has decided not to require at this time by regulation that it be obtained. It is noted, however, that the Board would expect to have such information available for consideration in evaluating any subsequent application which may be made to exercise salvage powers in connection with such activity.

The proposed amendments would also have required that development by such service corporations of real estate so acquired be completed within three years after acquisition, unless such period is extended by the Board upon written application. The final amendments make provision for the possibility of unavoidable delay following acquisition and prior to commencement of development by requiring completion within three years after commencement of development and no later than five years after acquisition of such real estate, unless such period is subsequently extended by the Board upon written application by the service corporation. Insertion of the word "subsequently" emphasizes the Board's determination that projects requiring a period of time for completion longer than that specified should not be undertaken. The proposed deletion from § 545.9-1(a) (4) (v) of the words "for sale or for rental" as superfluous is not adopted.

The proposed amendments would have prohibited acquisition by such service corporations of real estate to be used for offices and related facilities of a parent savings and loan association from certain individuals closely affiliated with the parent association. After publication of the proposed amendments for comment, the Board adopted new § 563.41 of the Rules and Regulations for Insurance of Accounts (12 CFR 563.41), which places restrictions on real property transactions with affiliated persons of insured institutions and their subsidiaries.

RULES AND REGULATIONS
9387

The proposed amendments clarifying that debt of each service corporation subsidiary must conform to the limitations applicable to its parent corporation and revoking the provision for exclusion of debt of a subsidiary to its parent corporation from such limitations is adopted as proposed. Additionally, the final amendments contain clarifying language emphasizing that the limitations apply to the consolidated debt of the service corporation and its subsidiaries as well as to the debt of each separate entity.

The proposed new policy statement regarding land acquisition and development by service corporations of insured institutions is not adopted.

Accordingly, the Board hereby amends § 545.9-1 of the Rules and Regulations for the Federal Savings and Loan System by revising paragraphs (a) (4) (iv), (a) (4) (v) and (b) (3) (1) (e) thereof, to read as set forth below, effective March 24, 1977.

§ 545.9-1 Service corporations.
(a) General service corporations. Subject to the provisions of this section, a Federal association which has a charter in the form of Charter N or Charter K (rev.) may invest in the capital stock, obligations, or other securities of any service corporation organized under the laws of the State, District, Commonwealth, territory, or possession in which the home office of such association is located if:

(iv) Acquisition of unimproved real estate lots, and other unimproved real estate, for the purpose of prompt development and subdivision, principally for construction of housing or for resale to others for such construction, or for use as mobile home sites. However, if the total cost for the service corporation to purchase and develop such real estate exceeds 20 percent of the assets of such service corporation, the service corporation shall notify the District Director Examinations in whose district the parent association of the service corporation is located not later than 30 days after such acquisition. Such notification shall include the name and location of the project, the number of lots or acres involved, the total projected cost of the project including dollar involvement of the service corporation, and the estimated date of completion of the project.
(b) Other service corporations. In addition to investment in a service corporation which meets the requirements of paragraph (a) of this section, a Federal association which has a charter in the form of Charter N or Charter K (rev.) may invest in the capital stock, obligations, or other securities of any service corporation organized under the laws of the State, District, Commonwealth, territory, or possession in which the home office of the association is located if:

(3) The following limitations are complied with:

(i) If less than 5 savings and loan associations (including any Federal association) hold capital stock in such corporation or one such association holds more than 49 percent of such stock, such corporation, including any subsidiary, does not incur or have outstanding at any time consolidated debt in excess of the following limitations:

(a) The debt of each subsidiary of such corporation shall also conform to the debt limitation in this paragraph (b) (3) (i).

By the Federal Home Loan Bank Board.

RONALD A. SNYDER,
Assistant Secretary.

BOARD FOR INTERNATIONAL BROADCASTING

[1 CFR Part 460]

GOVERNMENT IN THE SUNSHINE ACT

Proposed Implementation

Notice is given that the Board for International Broadcasting is considering promulgating the following rules for implementing Pub. L. 94-409 of September 13, 1976. Section 3 amends title 5, United States Code by adding after section 552a a new section 552b.

Interested persons are invited to submit written comments, suggestions or objections regarding the proposals to the Budget and Administrative Officer, Board for International Broadcasting, Suite 430, 1090 Fifteenth Street, Northwest, Washington, D.C. 20005. All relevant material received on or before March 12, 1977, will be considered. Written comments received will be available for public inspection at the above address between the hours of 9 a.m. and 5 p.m. Monday through Friday, save holidays during the mentioned 30-day period.

WALKER ROBERTS,
Executive Director.

PART 460—RULES FOR IMPLEMENTING OPEN MEETINGS WITHIN THE BOARD FOR INTERNATIONAL BROADCASTING

Sec.
460.1 General policies.
460.2 Definitions.
460.3 Requirement of open meetings.
460.4 Grounds on which meetings may be closed.
460.5 Procedures for announcing meetings.
460.6 Procedures for closing meetings.
460.7 Reconsideration of opening or closing a meeting.
460.8 Recordkeeping of closed meeting.

§ 460.1 General policies.

The Board for International Broadcasting will provide the public with the fullest practical information regarding its decisionmaking processes while protecting the rights of individuals and its abilities to carry out its responsibilities.

§ 460.2 Definitions.

The following definitions apply:

(a) The term "agency" includes any establishment in the executive branch of the government headed by a collegial body composed of two or more individual members, a majority of whom are appointed to such position by the President with the advice and consent of the Senate, and any subdivision thereof authorized to act on behalf of the agency. The Board for International Broadcasting is a government agency headed by a five-member Board, all of whom are appointed by the President with the advice and consent of the Senate, and is therefore an "agency" under these terms.

(b) The term "meeting" means the deliberation of this Board where such deliberations determine or result in the joint conduct or disposition of official Board business.

(c) The term "member" means an individual who belongs to the Board who has been appointed by the President and confirmed by the Senate.

§ 460.3 Requirement of open meetings.

Members shall not jointly conduct or dispose of agency business other than in accordance with this section. Except as provided in § 460.4 every portion of every meeting of the agency shall be open to public observation.

§ 460.4 Grounds on which meetings may be closed.

The Board shall open every portion of every meeting of the agency for public observation except where the agency determines that such portion or portions of its meeting or the disclosure of such information is likely to:

(a) Disclose matters that are:

(1) Specifically authorized under criteria established by an Executive order to be kept secret in the interests of national defense or foreign policy and

(2) In fact properly classified pursuant to such Executive Order;

(b) Relate solely to the internal personnel rules and practices of the agency;

(c) Disclose matters specifically exempted from disclosure by statute; Provided, That such statute:

(1) Requires that the matters be withheld from the public in such manner as to leave no discretion on the issue, or

(2) Establishes practical criteria for withholding or refers to particular types of matters to be withheld;

(d) Disclose trade secrets and commercial or financial information obtained from a person and privileged or confidential;

(e) Disclose accusing any person of a crime, or formally censuring any person;

(f) Disclose information of a personal nature where disclosure would constitute a clearly unwarranted invasion of personal privacy;

(g) Disclose investigatory records compiled for law enforcement purposes, or information which if written would be contained in such records, but only to the extent that the production of such records or information would:

(1) Interfere with enforcement proceedings;

(2) Deprive a person of a right to a fair trial of an impartial adjudication;

(3) Constitute an unwarranted invasion of personal privacy;

(4) Disclose the identity of a confidential source and, in the case of a record compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, confidential source, other investigative techniques and procedures, or

(5) Endanger the life or physical safety of law enforcement personnel;

(h) Disclose information the premature disclosure of which would be likely to significantly frustrate implementation of a proposed agency action. This shall not apply in any instance where the Board has already disclosed to the public the content or nature of its proposed action, or where the Board is required by law to make such disclosure on its own initiative prior to taking final Board action on such proposal;

(i) Specifically concern the Board's issuance of a subpoena, or the Board's participation in a civil action or proceeding, an action in a foreign court or international tribunal, or an arbitration, or the initiation, conduct or disposition by the Board of a particular case of formal agency adjudication pursuant to the procedures in section 554, of this title or otherwise involving a determination on the record after opportunity for a hearing.

§ 460.5 Procedures for announcing meetings.

(a) In the case of each meeting, the Board shall make public, at least one week before the meeting, the time, place, and subject matter of the meeting, whether it is to be open or closed to the public, and the name and phone number of the official designated by the Board to respond to requests for information about the meeting. Such announcement shall be made unless a majority of the Members of the Board determine by a recorded vote that the Board requires that such a meeting be called at an earlier date, in which case the Board shall make public announcement of the time, place and subject matter of such meeting and whether open or closed to the public, at the earliest practical time.

(b) Immediately following the public announcement, the Board will publish it in the Federal Register.
§ 460.6 Procedures for closing meetings.

(a) The closing of a meeting shall occur only when:

(1) A majority of the membership of the Board votes to take such action. A separate vote of the Board members shall be taken with respect to each Board meeting a portion or portions of which are proposed to be closed to the public pursuant to § 460.4, with respect to any information which is proposed to be withheld under § 460.4. A single vote may be taken with respect to a series of meetings, a portion or portions of which are proposed to be closed to the public, with respect to any information concerning such series of meetings, so long as each meeting in such series involves the same particular matter, and is scheduled to be held no more than thirty days after the initial meeting in such series. The vote of each Board member participating in such vote shall be recorded and, if so, shall be allowed to be closed to the public.

(2) Whenever any person whose interests may be directly affected by a portion of a meeting requests that the Board close such portion to the public for any of the reasons referred to in § 460.4, (f) (g), or (h), the Board, upon request of any of its Board members, shall take a recorded vote, whether to close such portion of the meeting.

(b) Within forty-five days of any vote taken, the Board shall make publicly available a written copy of such vote reflecting the vote of each member on the question and full written explanation of its action closing the portion of the meeting together with a list of all persons expected to attend the meeting and their affiliation.

(c) The Board shall announce the time, place and subject matter of the meeting at least eight (8) days before the meeting.

(d) For every closed meeting, the Executive Director of the Board shall publicly certify that, in his or her opinion, the meeting may be closed to the public and shall state each relevant exemptive provision. A copy of such certification, together with a statement from the presiding officer of the meeting setting forth the time and place of the meeting and the persons present, shall be retained by the Board.

§ 460.7 Reconsideration of opening or closing a meeting.

The time or place of a Board meeting may be changed following the public announcement. A Board member who publicly announces such change at the earliest practicable time. The subject matter of a meeting, or the determination of the agency to open or close a meeting, or portion of meeting, to the public, may be changed following the public announcement only if a majority of the Board members determines by a recorded vote that Board business so requires and that no earlier announcement of the change was possible, and the Board publicly announces such change and the vote of each member upon such change at the earliest practicable time.

§ 460.8 Recordkeeping of closed meetings.

(a) The Board shall maintain a written record of the proceedings of each meeting, or portion of a meeting, closed to the public.

(b) The Board, after review by the Executive Director shall make promptly available to the public in a place easily accessible to the public, the written record of all or any part of the time on the agenda, or any item of the testimony of any witness received at the Board meeting, except for such item or items of such discussion or testimony as the Board determines to contain information which may be withheld under § 460.4. Copies of such record, disclosing the identity of each speaker, shall be furnished to any person at the actual cost of duplication. The Board shall maintain a detailed written copy of the minutes of each meeting, or portion of a meeting, closed to the public, for a period of at least two years after such meeting, or portion of a meeting, or until the conclusion of any Board proceeding with respect to which the meeting or portion was closed, whichever occurs later.

§ 460.9 Cost Accounting Standards Board.

[4 CFR 331, 332, 351, 401, 402, 403, 404, 405, 406, 407, 408, and 409]

CONTRACT COVERAGE, MODIFIED CONTRACT COVERAGE, BASIC REQUIREMENTS AND COST ACCOUNTING STANDARDS

Modified Contract Coverage and Miscellaneous Amendments

AGENCY: Cost Accounting Standards Board.

ACTION: Proposed Rule.

SUMMARY: The proposed rule would exempt certain contractors and certain contracts from all or part of the requirements of the Cost Accounting Standards Board. All contracts of $500,000 or less would be exempt. Small business concerns which annually receive less than $10 million in contract awards would be exempt, and all other small business concerns would use only a part of the Board's requirements. Other contractors would also be eligible to use these partial requirements if the value of such awards equals less than 10 percent of the business unit's sales during the same period. The modified requirements applicable to these two categories of contractors would require compliance with Cost Accounting Standards 401 and 402. As a concomitant of this reduced coverage, the Board believes it would be appropriate to require the submission of a Disclosure Statement to all recipients of covered contracts.

The proposed Part 332 and amendments to Part 331 being published today would implement the foregoing modified Cost Accounting Standards Board requirements. Further, it proposes that small business concerns receiving awards of less than $10 million annually be exempt. Modified requirements are also proposed for other small business concerns. This modified requirement would also be available to business units receiving less than $100 million of covered contract awards if they meet the criteria. As a concomitant of this reduced coverage, the Board believes it would be appropriate to require the submission of a Disclosure Statement to all recipients of covered contracts.

The proposed Part 332 and amendments to Part 331 being published today would implement the foregoing modified Cost Accounting Standards Board requirements. Further, it proposes that small business concerns receiving awards of less than $10 million annually be exempt. Modified requirements are also proposed for other small business concerns. This modified requirement would also be available to business units receiving less than $100 million of covered contract awards if they meet the criteria. As a concomitant of this reduced coverage, the Board believes it would be appropriate to require the submission of a Disclosure Statement to all recipients of covered contracts.

Further, it proposes that small business concerns receiving awards of less than $10 million annually be exempt. Modified requirements are also proposed for other small business concerns. This modified requirement would also be available to business units receiving less than $100 million of covered contract awards if they meet the criteria. As a concomitant of this reduced coverage, the Board believes it would be appropriate to require the submission of a Disclosure Statement to all recipients of covered contracts.
PROPOSED RULES

§ 332.40 Solicitation.

Any covered contract awarded subject to this Part 332 shall have been made in conformity with the requirements of § 332.40, Solicitation Notice, of the Board's regulations.

§ 332.50 Contract clause.

Upon appropriate certification by the offeror that he is eligible and elects to use this Part, the following clause shall be inserted in any resulting contract in lieu of the clause prescribed in § 331.50 of these regulations.

DISCLOSURE AND CONSISTENCY OF COST ACCOUNTING STANDARDS CLAUSE

(a) The contractor, in connection with this contract shall:

(1) Comply with the requirements of 4 CFR, Parts 401, Consistency in Estimating, Accumulating and Reporting Costs, and 405, Consistency in Allocating Costs Incurred for the Same Purpose, in effect on the date of award of this contract.

(2) By submission of a Disclosure Statement, disclose in writing his cost accounting practices as required by regulations of the Cost Accounting Standards Board. If the contractor has notified the Cost Accounting Standards Board that a Disclosure Statement contains information that is privileged and confidential, the Disclosure Statement shall be protected and will not be released outside of the Government.

NOTE—See however, the Note set out following paragraph (d) of the Cost Accounting Standards contract clause in § 331.50 of the Board’s regulations.

(b) Follow consistently the cost accounting practices disclosed pursuant to paragraph (a)(3) above. A change to such practices may be proposed, however, by either the Government or the contractor, and the contractor agrees to negotiate with the Contracting Officer the terms and conditions under which a change may be made. After the terms and conditions under which the change is to be made have been agreed to, the change must be applied prospectively to this contract, and the Disclosure Statement must be amended accordingly. No agreement may be made under this provision that will increase costs paid by the United States.

4. Agree to an adjustment of the contract price or cost allowance, as appropriate, if he or a subcontractor fails to comply with the applicable Cost Accounting Standards or to follow any practice disclosed pursuant to subparagraph (a)(3) above and such failure results in any increased costs paid by the United States. Such adjustment shall provide for recovery of the increased costs, together with interest thereon computed at the rate determined by the Secretary of the Treasury pursuant to Public Law 89-41, 65 Stat. 67, or 7 percent per annum, whichever is less, from the time the payment by the United States was made to the time the adjustment is effected.

(b) If the parties fail to agree whether the contractor has complied with an applicable Cost Accounting Standard, rule or regulation of the Cost Accounting Standards Board and as to any cost adjustment demanded by the United States, such failure to agree shall
be a dispute concerning a question of fact within the meaning of the disputes clause of this contract.

(c) The contractor shall permit any authorized representatives of the head of the agency, of the Cost Accounting Standards Board, or of the Comptroller General of the United States to examine and make copies of any documents, paper, or records relating to compliance with the requirements of this clause.

(d) The contractor shall include in all negotiated subcontracts which he enters into the substance of this clause except paragraph (b) of this section, and shall require such inclusion in all other subcontracts of any tier, except that:

(1) If the subcontract is awarded to a business unit which pursuant to Part 331 is required to follow all Cost Accounting Standards, the clause entitled “Cost Accounting Standards” set forth in Section 351.50 of the Board’s regulations shall be inserted in lieu of this clause, or

(2) This requirement shall not apply to negotiated subcontracts in excess of $500,000 where the price negotiated is based on:

(i) Established catalog or market prices of commercial items sold in substantial quantities to the general public or

(ii) Prices set by law or regulation, or

(3) The requirement shall not apply to negotiated subcontracts otherwise exempt from the requirement to accept a Cost Accounting Standards clause by reason of § 331.30(b) of the Board’s regulation.

(e) Notwithstanding (d) above, if this is a contract with an agency which permits subcontractors to appeal final decisions of the Contracting Officer directly to the head of the agency or his duly authorized representative, then the contractor shall include the substance of paragraph (b) as well.

§ 332.60 Post-award disclosure.

Any business unit entering into a prime contract or subcontract containing the clause set forth in § 332.50 must submit an annual report to the Contracting Officer on fund expenditures in lieu of total sales. This notice extends the period for submission of the report to March 18, 1977.

DONALD E. WILKINSON,
Interim Administrator.

FEDERAL REGISTER, VOL. 42, NO. 32—WEDNESDAY, FEBRUARY 16, 1977

PART 1901—PROGRAM RELATED INSTRUCTIONS

As proposed, Subpart F of Part 1901 as revised, transferred and redesignated is set forth below.

Subpart F—Procedures for the Protection of Historical and Archeological Properties

§ 1901.251 Purpose.

The FmHA recognizes that significant scientific, prehistoric and archeological data (hereinafter referred to as "data") are an important part of our National Heritage and that appropriate measures must be taken to preserve and protect those which have value.

(b) The FmHA will consult with appropriate Federal, State, and local agencies and other organizations and individuals to assess the impact of any proposed FmHA undertaking on properties having historical or archeological significance in order to avoid or mitigate any adverse effects on the properties.

(c) The procedures in this Subpart have been developed in accordance with section 1(3) of Executive Order 11593.

§ 1901.253 Definitions.

(a) "Undertaking" means any new or continuing projects or program activities supported in whole or in part through FmHA contracts, grants, subsidies, loans, or other forms of funding assistance.

(b) "National Register" means the National Register of Historic Places, which is a register of districts, sites, buildings, structures, and objects, significant in American history, architecture, archeology, and culture maintained by the Secretary of the Interior under authority of section 201 of the Federal Historic Sites Act of 1935 and section 101(a) of the National Historic Preservation Act. The National Register is published in its entirety in the Federal Register each year in February. Addenda are published in the first Tuesday of each month.

(c) "National Register Property" means a district, site, building, structure, or object included in the National Register.

(d) "Property eligible for inclusion in the National Register" means any district, site, building, structure, or object upon which the Secretary of Interior determines is likely to meet the National Register criteria.

(e) "State Historic Preservation Officer" (SHPO) means the official within each State, or a designated representative authorized by the State at the request of the Secretary of the Interior, to act as liaison for the purpose of implementing policies of the Secretary of the Interior to improve protection and recovery of properties having historical, archeological, architectural or cultural value.

(f) "Criteria of effect" means when any condition of an undertaking causes or may cause any change, beneficial or adverse, in the scientific, historical, archeological, architectural, or cultural character of a National Register property that qualifies the property under the National Register criteria.

(g) "Historical and archeological assessment" means a determination by the FmHA State Director using the criteria of effect as a guide, as to whether a proposed undertaking may have an effect upon any properties located within the project area which are included or eligible for inclusion in the National Register.

(h) "National Register criteria" means the following criteria established by the Secretary of Interior for use in evaluating and determining the eligibility of properties for listing in the National Register: The quality of significance in American History, Architecture, Archeology, and culture is present in districts, sites, buildings, structures, and objects of State and local importance that possess integrity of location, design, setting, materials, workmanship, feeling and association with a land area.

(i) "Project area" means those geographical or legally defined areas directly under the control that are effected by the undertaking such as building sites, easements, rights-of-way, and leasehold interests.

(j) "Project area" means those geographical or legally defined areas directly under the control that are effected by the undertaking such as building sites, easements, rights-of-way, and leasehold interests.

FmHA will evaluate all undertakings for possible HA significance. This Subpart covers the following types of undertakings:

(a) Undertakings requiring a historical and archeological assessment. Although the following undertakings are presumed to involve nonfederally owned lands, they may have an effect on properties having scientific, historical, archeological, or architectural significance and therefore will require a historical and archeological assessment:

1. Loans and grants for the development of business and industry including guaranteed loans.

2. Loans and grants for multiple family housing projects of more than 25 dwelling units.

3. Loans for more than 25 family dwelling units of one-to-four families each in a designated subdivision.

4. Loans and grants in rural areas to construct, enlarge, extend, or otherwise improve:

(1) Community water, sanitary sewage, solid waste disposal, and storm waste water disposal systems.

(2) Other essential community facilities such as fire and rescue, health, safety, public buildings, schools, transportation, traffic, and law enforcement.

(3) Loans to acquire and develop grazing land for livestock of an association of members.

(4) Loans in areas designated by the Soil Conservation Service, U.S. Department of Agriculture, to conserve and develop natural resources and to contribute to economic improvement of the area.

(5) Loans to acquire and develop water and wildlife resources in small watersheds.

(6) Loans to permit Indian tribes to buy land within their reservations.

(b) Undertakings presumed not to require a historical or archeological assessment. The following undertakings are generally presumed to involve nonfederally owned lands and not to have an effect on properties of historical or archeological value and will therefore not usually require a historical or archeological assessment. However, when the State Director or County Supervisor finds or has had communication or obtains information from a recognized historical or archeological authority that a specific undertaking may have an effect on a property included or eligible for inclusion...
PROPOSED RULES

in the National Register, a historical and archaeological assessment will be made.
(1) Loans to farmers and ranchers in rural areas for the purchase, development,
and operation of farms and ranches.
(2) Loans to individual families in rural areas for the purchase, construction,
or improvement of single family residences.
(3) Loans and grants for multiple family housing and projects of not more than
25 family dwelling units.
(4) Loans in a designated housing subdivision of not more than 25 family
dwelling units of one-to-four family units each.
(5) Loans to farmers, ranchers and other rural residents to develop land,
water, and other related resources for increased production of food and other
crops, improved pastures, feed crops, water facilities for livestock, and
improved habitats for fish and wildlife.
(6) Emergency and disaster loans to farmers, ranchers and other rural resi-
dents in declared or designated areas as a result of a major or national disaster.
§ 1901.255 Historical and archaeological assessments.
(a) The FmHA official, normally the FmHA County Supervisor, who receives
a preapplication or application for loan or grant assistance on an undertaking
that may have effect on H.A. properties will, as part of the process, take the fol-
lowing actions:
(1) Carefully review the State supple-
ments issued by the State Director pur-
suant to § 1901.282(a) to determine whether there are any properties within the
project area that appear in the Na-
tional Register.
(2) Document the following:
(i) A brief narrative report of the findings and conclusions of an on-site
reconnaissance of the project area.
(ii) Any "in-house" knowledge of known or suspected H.A. sites in the
project area.
(3) Submit the information outlined in para-
graph (a) (2) of this section to the
FmHA State Director as part of the
preapplication or application.
(b) Upon receipt of the preap-
plication/application, the FmHA State Direc-
tor will, as a concurrent part of the
preapplication/application review, prepare
a historical and archeological assessment of the undertaking. In mak-
ing the assessment the State Director will consider information from the fol-
lowing sources:
(1) State and Regional Clearinghouse
comments.
(2) Information submitted by the
County Supervisor pursuant to para-
graph (a) (2) of this section.
(3) Factual comments or recom-
mendations of the State Historic Pres-
servation Officer or other responsible
Federal, State or local officials.
(4) Any other reliable information concerning properties in the project area
having H.A. significance.
(c) Upon completion of the preap-
plication or application review, the State
Director will take the following actions;
(1) When his assessment indicates
that there are properties included in the National Register that may be
affected by the proposed undertaking, he will pro-
cceed with preparing of the preap-
plication or application.
(2) When his assessment indicates
that there are properties within the
National Register that may be affected
by the proposed undertaking he will
consult with the SHPO, the applic-
ant and its representatives, and other
appropriate historical and archeological
entities to determine what measures
to avoid or mitigate any adverse effects.
(3) When his assessment indicates
that there are properties of historical or arche-
ological significance will be affected by
the proposed undertaking, he will pro-
cceed with preparing of the pro-
posed undertaking, will, as part of the process, take the fol-
lowing actions:
(i) Conduct a historical and archeo-
logical reconnaissance of the project area.
(ii) Submit the information to the SHPO.
(iii) After notification of the preappli-
cation or application, the State Direc-
tor will consider whether to proceed with the project.
(iv) When the surveys in para-
graph (c) (2) of this section result in a de-
termination by the National Park Service
request to the applicant to stop construc-
tion, such action should be taken so that
the Park Service can initiate measures
for immediate recovery within 60 days
after notification of a discovery.
(v) When the consultations in para-
graph (a) of this section do not result
in a determination by the National Park
Service to require the applicant to stop construc-
tion, such action should be taken so that
the Park Service can initiate measures
for immediate recovery within 60 days
after notification of a discovery.
(d) No survey or recovery work
shall be undertaken in a manner which
may be in violation of the laws of any
State or local jurisdiction.
§§ 1901.256–1901.258 [Reserved]
§ 1901.259 Actions to be taken when H.A.
properties are discovered during con-
struction.
(a) When properties of significant
H.A. values are discovered during construc-
tion, the State Director will immediately con-
sult with the applicant, the State His-
toric Preservation Officer and the Re-
gional Director of the National Park
Service to determine whether there is suf-
ficient factual evidence to warrant a
decision to stop construction and under-
take detailed survey and recovery.
(b) When the consultations in para-
graph (a) of this section result in a de-
termination by the National Park Service
request to the applicant to stop construc-
tion, such action should be taken so that
the Park Service can initiate measures
for immediate recovery within 60 days
after notification of a discovery.
(c) When the consultations in para-
graph (a) of this section do not result
in a determination by the National Park
Service to require the applicant to stop construc-
tion, such action should be taken so that
the Park Service can initiate measures
for immediate recovery within 60 days
after notification of a discovery.
(d) No survey or recovery work
shall be undertaken in a manner which
may be in violation of the laws of any
State or local jurisdiction.
will be taken to the extent practical to preserve, or mitigate any damage to properties having HA significance.

§ 1901.260 Coordination with other Agencies.

(a) When other Agencies are directly involved in any undertaking that requires a historical and archeological assessment, the State Director will contact the Agencies concerned to determine if a joint assessment will be prepared and whether a single lead Agency will assume primary responsibility for preparing the assessment.

(b) When a lead Agency is agreed upon other than FHWA, FHWA will provide that Agency with information about its respective areas of responsibility. Assessments will indicate Agency participation and concurrence.

(c) When FHWA program activities are planned that primarily supplement those of the Soil Conservation Service, U.S. Department of Agriculture, such as watershed work, or require conservation and development measures; and irrigation and drainage projects; the Soil Conservation Service will be designated as the lead Agency.

§ 1901.261 [Reserved]

§ 1901.262 State supplements.

(a) The State Director shall be responsible for preparing a list of all properties included in the National Register in his area of jurisdiction and issuing such list as a part of a State Supplement.

(b) State Directors may also supplement this Subpart and its exhibit as appropriate to meet State and local laws and regulations.

§§ 1901.263–1901.300 [Reserved]

EXHIBIT A—National Park Service

U.S. Department of Interior Regional Offices

Contact should be made to:
Chief, Interagency Archeological Services Division, Office of Archeological and Historic Preservation, National Park Service.

The three Regional Offices are:

Atlanta office. 730 Peachtree Street, Atlanta, GA 30309. States covered. All others East of Denver area. Attention: Mr. Wilford Rusted. Telephone: 404-528-2011.

[FR Doc.77-4828 Filed 2-15-77; 8:45 am]
segment of the petroleum industry. The method initially proposed by FEA to favor small refiners was based on the sliding scale for issuances of oil import tickets under the Oil Import Program when ticket values were in the $1 per barrel range.

The final rule adopting the entitlement program issued on November 29, 1974 (39 FR 42464, December 4, 1974) reflected FEA's further consideration of the need for a small refiner bias but concluded that, while its reference to the historical treatment afforded under the Oil Import Program was valid, the benefits proposed were insufficient to ensure the competitive viability of small refiners. Accordingly, the rule adopted contained small refiner bias provisions that related the incremental entitlement issuance amounts to the first 30,000 B/D of crude runs to the maximum economic preferences granted under the Oil Import Program with respect to the PAD District V ticket issuances.

On December 30, 1974, FEA adopted corrective amendments (39 FR 44710, December 27, 1974) to the entitlement program, which included technical changes relating to the small refiner bias provisions, since FEA had determined that the value of import tickets issuable to small refiners in PAD District V under the Oil Import Program had been incorrectly computed. These corrective amendments adjusted bias entitlement issuances to the following levels, which were applicable through March 1976, based on an 88 entitlement price:

**Value of small refiner bias prior to Apr. 1976**

<table>

On December 22, 1975, the Energy Policy and Conservation Act, Pub. L. 94–163 (the "EPAC") on an emergency basis to implement these exemption requirements of the EPCA. The special rule exempted all qualified small refiners from any purchase requirements that would otherwise have as to the first 50,000 barrels per day of their crude runs. For small refiners having run levels in excess of 50,000 barrels per day, the special rule exempted a proportion of the entitlement purchase requirements.

The special rule also contained a provision to the effect that the exemption did not apply to old oil receipts under new purchase, exchange or processing agreements. The rationale underlying this limitation is somewhat analogous to one of FEA's bases for modification of the bias proposed today, since the receipt limitation was designed to prevent shifts in old oil supplies to firms benefiting from the entitlement purchase exemption, and the resulting market distortions, as the instant proposal is intended to prevent artificial increases in processing agreements for the account of small refiners in the lower capacity ranges.

Section 551 of the EPCA generally permitted FEA to modify the small refiner purchase exemption (as was implemented by the special rule) where FEA determined that the exemption resulted in an unfair economic or competitive advantage for its beneficiaries with respect to other small refiners or otherwise seriously impaired FEA's ability to provide for the attainment of the objectives of the EPCA. FEA, however, was subject to review by both houses of Congress under the procedures set forth in section 551 of the EPCA.

On February 28, 1976 (41 FR 3931, March 4, 1976) FEA stated its initial determination of the unfair effects of the full exemption as in effect under the special rule, and proposed modifications to the exemption. As a part of that proceeding, FEA invited comments on whether the exemption should be modified in a manner so that both small refiner entitlement purchasers and sellers would receive equivalent benefits. FEA suggested that such a modification of this type could be accomplished by increasing the amount of the small refiner bias as to all small refiners, thereby keeping such refiners on the same competitive basis.

On May 12, 1976 (41 FR 20392, May 18, 1976), FEA confirmed its determination that the exemption had been so seriously impaired its ability to attain the objectives of the EPCA and was resulting in an unfair economic or competitive advantage for certain small refiners with respect to other small refiners. Accordingly, FEA modified the exemption by revoking the special rule and increased the amount of additional entitlements issuable to all small refiners under the provisions for the small refiner bias. These amendments were not subsequently disapproved by either House of Congress under the procedures provided for by the EPCA and thus became effective with respect to entitlement issuances for April 1976.

These amendments to the bias increased the entitlements issuable to all small refiners with respect to firms with volumes of crude oil runs to the following levels, which were provided in the following table shows the significant increase in crude runs for specific small refiners under the program attributable to processing agreements at other refiners:

**Crude runs, Value of bias, per barrel**

<td>$5.83</td>
</tr>
</tbody>
</table>

In adopting this upward adjustment to the bias provision FEA stated:

FEA initially adopted the small refiner bias after a significant amount of analysis and public comment on the issue when the entitlement program was instituted in late 1974. At that time FEA determined that the historical preference granted to small refiners under the oil import program as in effect in 1972 was sufficient to preserve the competitive viability of this class. However, over the first year in which the program was in effect FEA received substantial evidence that the amount of the bias may in fact not be adequate for its intended purpose. For example, a large number of small refiners have been forced to seek exception relief, in the form of additional bias amounts, to enable them to compete effectively or even in certain cases to maintain their financial viability. Due to the more restrictive exception standards for entitlement sellers as opposed to entitlement purchasers, FEA has received numerous indications that many small refiner entitlement sellers are also in need of additional bias amounts to remain competitive and financially viable. Many are pursuing their exception requests and in the first instance generally become more competitive due to increased consumer sensitivity to the higher prices.

II. RECENT INCREASES IN PROCESSING AGREEMENTS

Since the adoption of the increased bias effective for entitlement transactions for April 1976, evidence available to FEA shows that the increase in the amount of entitlements issuable under the small refiner bias at the lower crude run levels has caused a significant growth in the utilization of processing agreements for the account of small refiners (particularly those earning maximum bias entitlements) to other refiners. FEA has concluded that these arrangements are not consistent with the objectives of the current bias provisions, in that the refined products produced are not entering the distribution systems of the small refiners concerned and, more important, the bias entitlements issuable with respect to these processing arrangements do not serve to compensate for the relative inefficiencies of the smaller refiners.

The following table shows the significant increase in crude runs for specific small refiners under the program attributable to processing agreements at other refiners:
**PROPOSED RULES**

**New processing agreements for account of small refiners**

</tbody>
</table>

As shown in the above table, the increases in processing agreement volumes is in most cases within the 10,000 B/D maximum. One particularly good example of the incentives created by the bias is small refiner A above, whose crude oil runs (exclusive of processing agreements) were less than 1,000 B/D, and whose 3,000 B/D processing agreement was at an offshore domestic refiner, approximately 3,000 miles from small refiner A's refinery. The incremental bias entitlement represented by the above increases in processing agreement volumes were worth $6,066,000 for November 1976, and accounted for 12% of the total bias entitlements issued in that month.

Small refiners in the lower capacity ranges have evidently encountered few difficulties in persuading other refiners to process crude oil for their account, as shown by the increases, since the adoption of the revised bias, for the refiners listed below in their processing agreements for small refiners.

Increase in number of processing agreements (January 1976 compared to November 1976) for account of small refiners

<table>
<thead>
<tr>
<th>Refiner Number</th>
<th>B/D processed for Small refiner Number as of January 1976</th>

<td>26,200</td>
</tr>
<tr>
<td>E</td>
<td>26,200</td>
<td>26,200</td>
</tr>
</tbody>
</table>

Finally, the total number of processing agreements in effect for the account of small refiners in the lower capacity ranges has increased from 24 in January 1976 to 58 in November 1976, with the increase being concentrated heavily in the lower capacity range.

### III. PROPOSED AMENDMENTS

FEA is hereby proposing an amendment to § 211.67(e) that is intended to remove any incentives that may exist under the current regulatory provisions to enter into processing agreements with small refiners for the primary purpose of earning the benefits of bias entitlements. More generally, the proposal is intended to conform FEA's regulations in this regard more closely to the principal objective underlying the bias, i.e., compensation for the relative inefficiencies of the smaller refiners.

The proposed amendment to § 211.67(e) provides that no entitlements would be issuable under § 211.67(e)(1) with respect to any volume of a small refiner's crude runs attributable to a processing agreement with another refiner, but would not eliminate from a small refiner's bias calculations crude runs attributable to processing agreements with non-refiners. FEA believes that this latter provision is desirable to permit small refiners to compete for processing agreements with such non-refiners and would also serve as an incentive to encourage utilization of smaller refiner capacity by non-refiners. Comments are specifically invited on this proposed treatment of non-refiner processing agreements.

FEA's analysis shows that the complete elimination of bias entitlements for out-of-plant processing agreements should not impact on small refiners with processing agreements in effect in early 1976, since the April 1976 increase in the bias has more than compensated these firms for any decrease in the bias entitlements for processing agreements that they would experience if this proposal were adopted.

### PROPOSED EFFECTIVE DATE

FEA's present intent is to make the proposed changes, if adopted, effective for refiners' crude oil runs to stills in and entitlement transactions for March 1977.

### POSSIBLE ALTERNATIVE REGULATORY AMENDMENTS

In this proceeding, FEA would also like to invite public comments on a number of alternative approaches which are not as far reaching as the changes proposed.

First, FEA solicits comments on the desirability of structuring the proposed limitations on bias entitlements attributable to processing agreements by permitting bias entitlements for those agreements in effect in February 1976, since the February 28 notice of proposed rulemaking on the small refiner exemption under Special Rule No. 6 was the first public notice of the possibility of an increase in the bias.

Second, FEA could eliminate issuances of small refiner bias entitlements only as to crude runs attributable to processing agreements which, when added to the small refiner's other crude run volumes, would result in total crude runs in excess of the small refiner's capacity, or perhaps a specified portion or increment thereof.

Third, bias entitlements could be issued based on the crude oil run levels of the particular refiner actually processing the crude oil, so that, if a small refiner's plant was utilized, bias entitlements would be issuable based on that refiner's run levels. This approach would conform to that taken with respect to ticket issuances under the Oil Import Program in the early 1970's.

Finally, FEA solicits comments on the desirability of provisions to account for processing agreements entered into for the purpose of continuing product output during shutdowns due to normal maintenance, repairs or turnarounds.

### IV. WRITTEN COMMENT AND PUBLIC HEARING PROCEDURES

Written comments regarding the subject matter of this notice will be accepted and considered if filed by March 11, 1977. Comments should be submitted to Executive Communications, Room 3309, Federal Energy Administration, Box 24, the Federal Building, 12th and Pennsylvania Avenue, N.W., Washington, D.C. 20461. Comments should be identified on the outside of the envelop and on documents submitted to FEA with the designation "Processing Agreements Under Small Refiner Bias." Fifteen copies should be submitted.

A public hearing on the subject matter of this notice will be held beginning at 9:30 a.m., e.s.t., on March 10, 1977, in Room 2105, 2000 M Street, N.W., Washington, D.C., to receive comments from interested persons.

Any person who has an interest in the subject matter of this notice, or who is a representative of a group or class of persons which has such an interest, may make a written request for an opportunity to make an oral presentation. Such a request should be directed to Executive Communications.
Communications, FEA, and must be received before 4:30 p.m., e.s.t., March 3, 1977. Such a request may be hand-delivered to Room 3308, Federal Building, 12th and Pennsylvania Avenue, N.W., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., e.s.t., Monday through Friday. The person making the request shall be described as to his interest concerned, if appropriate, to state why he or she is a proper representative of a group or class of persons which has such an interest; and to give a concise summary of the proposed oral presentation and a phone number where he or she may be reached through March 8, 1977. Each person selected to be heard will be notified by FEA before 4:30 p.m., e.s.t., March 4, 1977, and must submit 50 copies of his or her statement to Allocation Regulation Development Office, FEA, Room 2214, 2000 M Street, N.W., Washington, D.C., before 4:30 p.m., e.s.t., on March 8, 1977.

FEA reserves the right to select the persons to be heard at this hearing, to schedule their presentations, and to establish the procedures governing the conduct of the hearing. Each presentation may be limited, based on the number of persons requesting to be heard.

An official will be designated to preside at the hearing. This will not be a judicial or evidentiary-type hearing. Questions may be asked only by those conducting the hearing and there will be no cross-examination of persons presenting statements. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity, if he or she so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be subject to time limitations.

Any interested person may submit questions to be asked of any person making a statement at the hearing to Executive Communications, FEA, before 4:30 p.m., e.s.t., March 7, 1977. Any person who makes an oral statement and who wishes to ask a question at the hearing may submit the question in writing to the presiding officer, FEA, or the presiding officer if the question is submitted at the hearing, will determine whether the question is relevant, and whether time limitations permit it to be presented for answer.

Any further procedural rules needed for the proper conduct of the hearing will be announced by the presiding officer.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing in accordance with the procedures stated in 10 CFR 205.9(g). FEA reserves the right to determine the confidential status of the information or data and to break it according to its determination.

The transcript of the public hearing will be available for public review at the FEA, Freedom of Information Library, Room 2107, Federal Building, 12th and Pennsylvania Avenue, N.W., Washington, D.C., between the hours of 3:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays. Any person may purchase a copy of the transcript from the reporter.

As required by section 7(c) (2) of the Federal Energy Administration Act of 1974, Pub. L. 93-275, a copy of this notice has been submitted to the Administrator of the Environmental Protection Agency for his comments concerning the impact of this proposal on the quality of the environment. The Administrator has no comments.

This proposal has been reviewed in accordance with Executive Order 11821, issued November 24, 1974, and has been determined not to be of a nature that requires an evaluation of its inflationary impact pursuant to Executive Order 11821.

In consideration of the foregoing, it is proposed to amend Part 211 of Chapter II, Title 10, Code of Federal Regulations, as set forth below.

D.G. Wilson, Acting General Counsel.

Section 211.67 is amended in subparagraph (2) of paragraph (c) to read as follows:

§ 211.67 Allocation of domestic crude oil.

(e) Small refiner bias. * * *

(2) Effective for refiners' volumes of crude oil runs to stills for March 1977, no entitlements shall be issuable under paragraph (e) (1) of this section with respect to any volume of a small refiner's crude oil runs to stills attributable to a processing agreement at the account of that small refiner with another refiner.

[F.R. Doc. 77-4811 Filed 2-11-77; 7:10:16 am]

SMALL BUSINESS
ADMINISTRATION

[13 CFR Part 115] GUARANTEE FEES

Notice is hereby given that the Small Business Administration proposes to amend Part 115 of Chapter I, Title 13, of the Code of Federal Regulations. Interested parties are hereby given until (March 18, 1977) to submit written comments to the Associate Administrator for Finance and Investment, 1441 L Street, N.W., Washington, D.C. 20416.

Section 115.7 of Proposed Rules is to be revised in order that the SBA's "guarantee fee" received from applicant contractors who are successful in obtaining the contract award will hereafter be referred to as the "contractor processing fee." The amount of the fee shall be increased from a percent rate equal to $2.00/$1,000 of the contract's face value to $5.00/$1,000 of the contract's face value. To the extent that partial bonds (those payment or performance bonds for which the penalty amount is less than 100 percent of the contract price), the contractor's processing fee shall be charged an amount equal to 50 percent of the premium charged by the surety, whichever is less.

These changes are designed to:

a. Avoid confusion in terminology as to the SBA's "guarantee fee" (payable to SBA by the surety) and the contractor's "processing fee" (payable to SBA by the contractor).

b. Provide SBA with additional revenues necessary to help offset losses sustained by the Surety Bond Guarantee Program, in compliance with the statutory requirement that the Surety Bond Guarantee Program be administered on an "economically justifiable basis." This change will enhance SBA's prospects of obtaining authority to allow the Surety Bond Guarantee Program to expand its activity level, permitting the program more fully to meet the real demand level, and to avoid further shut downs of the program when budgetary activity levels ceilings are reached.

Accordingly, it is proposed to amend Part 115, Chapter I, Title 13 of the Code of Federal Regulations as follows.

Section 115.7 (a) and (b) are revised to read:

§ 115.7 Processing fees.

(a) An applicant small business concern, being required to provide a bond for performance or payment equivalent to 100 percent of the contract price, shall pay to SBA a processing fee of 0.5 percent of the contract price upon obtaining the contract.

(b) An applicant small business concern, being required to provide a bond for performance or payment equivalent to less than 100 percent of the contract price, shall pay to SBA a processing fee of 0.5 percent of the contract price or an amount equal to 50 percent of the premium charged by the surety, whichever is less, upon obtaining the contract.

Catalog of Federal Domestic Assistance Programs No. 50.016 Surety Bond Guarantee.

Mitchell P. KobaInse, Administrator.

FEDERAL POWER COMMISSION

[18 CFR Part 141]

[Docket Nos. RM76-19, etc.]

STATEMENT OF GENERAL POLICY EXCLUDING NEW INFORMATION REQUIREMENTS FROM REGULATORY INFORMATION SYSTEMS (RIS) FORMS

Amended Proposed Rulemaking

February 3, 1977.

Notice is hereby given pursuant to the Administrative Procedure Act, 5 U.S.C. 553; sections 10, 13, 20, 202, 205, 206, 207, 204, 309, and 411 of the Federal Power Act; and Sections 313, 314, 315, 323, 324, 335, 336, 337, and 338 of the Natural Gas Act, that the Commission proposes to delete new information requirements from the proposed rules relating to FPC Form Nos. 151, notice issued June 28, 1976, Docket No. RM76-19 (41 FR 29165); 152, notice issued July 18, 1976, Docket No. RM76-27 (41 FR 31515); 154, notice issued August 27, 1976, Docket No. RM76-33 (41 FR 36182); 155, notice issued July 30, 1976, Docket No. RM76-23 (41 FR 32731); notice issued August 28, 1976, Docket No. RM76-26 (41 FR 36095); notice issued August 29, 1976, Docket No. RM76-28 (41 FR 36182); 157, notice issued June 30, 1976, Docket No. RM76-21 (41 FR 31510); 158, notice issued August 16, 1976, Docket No. RM76-23 (41 FR 37322); 159, notice issued July 7, 1976, Docket No. RM76-23 (41 FR 38264); 160, notice issued June 28, 1976, Docket No. RM76-20 (41 FR 29179); 161, notice issued July 20, 1976, Docket No. RM76-28 (41 FR 31714); 162, notice issued August 21, 1976, Docket No. RM76-24 (41 FR 39448); 163, notice issued August 13, 1976, Docket No. RM76-28 (41 FR 39420); 164, notice issued July 12, 1976, Docket No. RM76-26 (41 FR 31340).

The additional information proposed to be required by the new forms increases the reporting burden on the respondents and, in our opinion, is not necessary for the public interest at this particular time. If warranted, however, we reserve the right to request such information in the future. Because these amended proposals reduce the reporting requirements, no requests for extensions of time beyond the 30 days hereinafter provided in which to submit comments will be entertained; further, all comments shall be limited to the data proposed herein to be withdrawn, as set forth in the Appendix attached below.

Any interested person may submit to the Federal Power Commission, 255 North Capitol Street, N.E., Washington, D.C. 20426, not later than March 11, 1977, data, views and comments or suggestions in writing concerning the proposed rulemaking.

Written submissions will be placed on the Commission's public files and will be available for public inspection at the Commission's Office of Public Information, 255 North Capitol Street, N.E., Washington, D.C. 20426.

PROPOSED RULES

During regular business hours. The Commission will consider all written submissions before acting on the matters herein proposed. An original and 14 conformed copies should be filed with the Secretary of the Commission. Submissions to the Commission should indicate the name, title, mailing address, and telephone number of the person to whom communications concerning the proposal should be addressed, and whether the person filing them requests a conference with the staff of the Federal Power Commission to discuss the proposal. The staff, in its discretion, may grant or deny requests for conference prior to or subsequent to the filing of formal submittals.

The Secretary shall cause prompt publication of this notice to be made in the Federal Register.

By direction of the Commission.

KENNETH P. PUMM, Secretary.

FEDERAL REGISTER, VOL. 42, NO. 32—WEDNESDAY, FEBRUARY 16, 1977
It is the policy of the United States and of the NCER to give the public open access to the decisionmaking of the NCER to the fullest extent that is practical, consistent with the rights of individuals, and consistent with the ability of the NCER and the Government generally to carry out their responsibilities. Thus, the general rule under the Act and §1404.1 of this part is that "every portion of every meeting of the NCER will be open to public observation." Because of the need to protect the rights of citizens and the functioning of the National Institute of Education and the Government as a whole, however, there may be some exceptions. The exceptions under which portions of the NCER meetings may be closed and certain other information may be withheld are spelled out in proposed section 1404.2, which with limited and non-substantive exceptions follows the language of the Act. The NCER will be called upon to determine how these rather abstract provisions apply to specific deliberations. It will do so on a case-by-case basis, taking a separate vote for each meeting if it is considering closing any portion of the meeting. Hard-and-fast rules are not feasible here. For the guidance of the public, however, and to allow the NCER the benefit of public comment, the NCER wishes to make clear its present inclinations as to certain types of NCER deliberations.

General policy deliberations of all types will normally be open to the public and will usually take up most of any NCER meeting.

The Executive Branch of the Government has long taken the position that internal deliberations on budget matters before the President has forwarded his budget to the Congress are privileged. The NCER understands that the Office of Management and Budget (OMB) will soon provide guidance on how, if at all, the Sunshine Act affects the application of this and other deliberations of the NCER and other affected agencies. The NCER will follow the OMB guidance.

Occasionally meetings are devoted to considering particular proposed awards to institutions for use of individual investigators or groups of investigators. In most cases the NCER will close those portions of its meetings in order to protect the personal privacy of the investigators and, in at least some cases, their trade secrets and confidential commercial or financial information.

Portions of meetings in which the NCER specifically considers the personal or professional qualifications of individuals will ordinarily be closed.

NCER discussions of any NEA disputes or negotiations with grantees, contractors, other Federal agencies, or other independent parties may often be closed in order to protect personal rights and prevent frustration of the implementation of a negotiating strategy, or to forestall complication of a judicial or similar proceeding.

Again, none of these indications of present NCER inclinations represents

National Institute of Education

[45 CFR Part 1440]

NATIONAL COUNCIL ON EDUCATIONAL RESEARCH

Open Meeting Regulations
The National Council on Educational Research (NCER) is proposing the regulations set out below to implement the Government in the Sunshine Act, 5 U.S.C. 552b. The NCER invites and would appreciate written comments on the proposed regulations from anyone who is interested. Please send such comments to:

Peter Gerber, Chief, NCER Staff, 1209 19th Street, N.W., Washington, D.C. 20036.

The NCER can promise that any comment will be fully considered before promulgation of final regulations only if it receives the comments on or before March 4, 1977.

FEDERAL REGISTER, VOL. 42, NO. 32—WEDNESDAY, FEBRUARY 16, 1977
any hard-and-fast rule. Nor are the types of NCER deliberations mentioned exhaustive. Nor are the accompanying brief explanations to be taken as legal justifications for the closings. The NCER will decide whether to open or close meetings based on specific circumstances and with the advice of counsel. Explanation of the NCER action and counsel's certificate of its propriety will be provided each time any portion or portions of a particular meeting are closed. The NCER nonetheless wishes to give the public an opportunity to understand and comment on its present thinking.

These regulations, when made final, will, like the Act they implement, apply not only to the NCER, but also to its committees. Every committee of the NCER for the Act applies to a "subdivision" of an affected agency only when and if the subdivision is "authorized to act on behalf of the agency". 5 U.S.C. 551b(a) (1).

The remainder of the proposed regulations concern primarily procedural, notice, and recordkeeping requirements and are self-explanatory.

TEXT OF PROPOSED REGULATIONS

PART 1440—GOVERNMENT IN THE SUNSHINE ACT REGULATIONS

§ 1440.1 General rule.

Except as otherwise provided in these regulations, any portion of every meeting of the NCER will be open to public observation.

§ 1440.2 Grounds for closing meetings.

(a) The NCER may by record vote close any portion of any meeting if it properly determines that an open meeting:

(1) Is likely to disclose matters that are specifically authorized under criteria established by Executive Order to be kept secret in the interests of national defense or foreign policy and (ii) are in fact properly classified pursuant to any hard-and-fast rule. Nor are the internal personnel rules and practices of the National Institute of Education (NIE).

(2) Is likely to relate solely to the internal personnel rules and practices of the National Institute of Education (NIE);

(3) Is likely to disclose matters specifically exempted from disclosure by statute (other than 5 U.S.C. 552); Provided, That the statute (i) requires in such a manner as not to disclose on the issue that the matters be withheld from the public, or (ii) establishes particular criteria for withholding or refers to particular types of matters to be withhold;

(4) Is likely to disclose trade secrets and commercial or financial information obtained from a person and privileged or confidential;

(5) Is likely to involve accusing any person of a crime, or formally censuring any person;

(6) Is likely to disclose personal information where the disclosure would constitute a clearly unwarranted invasion of personal privacy; or

(7) Is likely to disclose investigatory law-enforcement records, or information which, if written, would be contained in such records, but only to the extent provided in 5 U.S.C. 552b(v) (7);

(b) The presiding officer of the meeting, and on motion of any Member, shall maintain the transcript or electronic recording of every portion of every meeting that is closed to the public for any reason regardless of the specific reason for closing the meeting.

§ 1440.3 Materials relating to closed portions of meetings.

If a portion or portions of any meeting of the NCER are closed to the public, the NCER shall maintain the transcript or electronic recording of each portion of the meeting that is closed to the public. The NCER shall maintain the transcript or electronic recording of every portion of every meeting that is closed to the public for any reason. The NCER shall maintain the transcript or electronic recording of every portion of every meeting that is closed to the public for any reason regardless of the specific reason for closing the meeting.

§ 1440.4 Opening of transcript of recording.

(a) Except as otherwise provided in this section, the transcript or electronic recording of every portion of every meeting closed to the public will promptly be made available on request to any member of the public in an easily accessible place. The NCER shall furnish to any member of the public on request copies of the transcript or electronic recording disclosing the identity of each speaker, and will charge for the copies or transcriptions no more than the actual cost of duplication or transcription.

(b) The NCER will, however, withhold the transcript or recording of the discussion of any agenda item if the Chairman of the NCER or a NCER Member designated by him determines that the discussion contains information which should be withheld under the same standards as apply for closing meetings under § 1440.2.

(c) The NCER will release any transcript or recording withheld under paragraph (b) of this section when the Chairman of the NCER or any person designated by him determines that the grounds for withholding it no longer apply.

(d) A request under paragraph (a) of this section should be directed in writing to the Chief, NCER Staff, NIE. The chief, NCER Staff, NIE, should clearly state what is requested, and should contain a promise to pay the costs of any duplication or transcription requested.

§ 1440.5 Public announcement.

(a) Except as provided in paragraph (c) and (d) of this section, the NCER will make a public announcement of each meeting at least one week before the meeting takes place. The announcement will cover: (1) The time, place, and subject matter of the meeting; (2) what portions of the meeting, if any, are to be closed to the public; and (3) the name and phone number of the official designated to respond to requests for information on the meeting.

(b) Each such announcement will be promptly made available to selected journals and other appropriate publications.

FEDERAL REGISTER, VOL. 42, NO. 32—WEDNESDAY, FEBRUARY 16, 1977
that agency business requires the meeting to be called on such short or after-the-fact notice and (2) a full announcement is made at the earliest practicable time.

(d) All or any portion of the announcement of any meeting may be omitted if the NCER by record vote determines that the announcement would disclose information which should be withheld under the same standards as apply for closing meetings under § 1440.2.

§ 1440.6 Meeting changes.

(a) The time or place of a meeting of the NCER that has been publicly announced as provided in § 1440.5 may subsequently be changed, but any such change will be publicly announced at the earliest practicable time.

(b) The subject matter of any portion of any meeting of the NCER that has been publicly announced as provided in § 1440.5 or the determination whether any portion of any meeting so publicly announced will be open or closed may subsequently be changed, but only when:

(1) The NCER determines by record vote that agency business so requires and that no earlier announcement of change was possible, and (2) the NCER publicly announces the change and the vote of each member on the change at the earliest practicable time.

§ 1440.7 Record vote.

(a) For purposes of this part of a vote of the NCER is a "record vote" if: (1) It carries by a majority of all those holding office as NCER Members at the time of the vote; (2) no proxies are counted toward the necessary majority; and (3) the individual vote of each Member present and voting is recorded.

(b) Within one day of any such record vote or any attempted record vote that fails to achieve the necessary majority under paragraph (a)(1) of this section, the NCER office will make publicly available a written record explaining the vote of each member on the question.

(c) Within one day of any record vote under which any portion or portions of a NCER meeting are to be closed to the public, the NCER office will make available a written record explaining the NCER's action and a list of all persons expected to attend the meeting, showing their affiliations.

§ 1440.8 Application to NCER Committees.

All the provisions of this part applicable to the NCER shall apply equally to the Committees of the NCER whenever the Committees are authorized to act on behalf of the NCER.

JOHN E. CORBALLY, Chairman.

FEDERAL COMMUNICATIONS COMMISSION

PROPOSED RULES

[47 CFR Part 73] [Docket No. 21109; RM-2748]

TV BROADCAST STATIONS IN MEDFORD, OREGON

Table of Assignments

In the matter of Amendment of § 73.606(b) of Table of Assignments, Television Broadcast Stations, (Medford, Oregon.)

1. Before the Commission is a Petition for Rule Making (Public Notice No. 1001, issued September 13, 1976) submitted by Southern Oregon Education Co. to reserve VHF Channel 8 at Medford, Oregon, for noncommercial educational use. No responsive comments have been received.

2. Medford presently has 3 VHF commercial stations; KOB1 on Channel 5 and KXMD-TV on Channel 10 operate commercially, and petitioner has a permit on Channel 8 for Station KSYS which is to operate as a noncommercial educational station. The community also has one unoccupied UHF noncommercial educational station, Channel 18.

3. Petitioner states in support of its request that it would be appropriate to amend the TV Table of Assignments to reflect the actual proposed use of Channel 8 at Medford, Oregon. Assuming Channel 8 is put to such use, we think it appropriate to consider reserving Channel 8 for noncommercial educational use at Medford. It would not be appropriate to make any such reservation in advance of the inauguration of service by the station by the station. Since petitioner has obtained a VHF channel rather than the uncoupled UHF noncommercial educational channel for its proposed educational programming, we also believe the status of educational Channel 18 should be reconsidered. Therefore, we would like interested parties to comment on an additional proposal deleting the reservation of Channel 18 at Medford in addition to the reserving of Channel 8 for noncommercial educational use.

4. Accordingly, it is proposed to amend, pursuant to sections 411, 303(g) and (r), and 207(b) of the Communications Act of 1934, as amended, the TV Table of Assignments, § 73.606(b) of the Commission's Rules as follows with respect to the Community listed below:

<table>
<thead>
<tr>
<th>City</th>
<th>Channel No.</th>
<th>Present</th>
<th>Proposed</th>

<td></td>
</tr>
</tbody>
</table>

5. The Commission's authority to institute rule making proceedings, showings required, cut off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

6. Interested parties may file comments on or before March 21, 1977, and reply comments on or before April 11, 1977.

FEDERAL COMMUNICATIONS COMMISSION

WALLACE E. JOHNSON, Chairman, Broadcast Bureau.

1. Pursuant to authority found in sections 411, 303(g) and (r), and 207(b) of the Communications Act of 1934, as amended, the Notice of Proposed Rule Making to which this Appendix is attached. Proposers(s) will be expected to answer whatever questions are presented in initial comments. The proponents of a proposed assignment is also expected to file comments even if it only recognizes or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

2. Showings required. Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proposers(s) will be expected to answer whatever questions are presented in initial comments. The proponents of a proposed assignment is also expected to file comments even if it only recognizes or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. Cut-off procedures. The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If filed later than or in lieu of, they will not be considered in connection with the decision in this docket.

4. Comments and reply comments; service. Pursuant to applicable procedures set out in § 1.410, and § 1.420 of
the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All comments by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b), and (c) of the Commission Rules.)

5. Number of copies. In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. Public inspection of filings. All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

[FR Doc.87-4909 Filed 2-15-77; 8:45 am]

DEPARTMENT OF COMMERCE
National Oceanic and Atmospheric Administration [50 CFR Parts 17, 222] CARIBBEAN MONK SEAL Proposed "Endangered" Species

The Director, National Marine Fisheries Service, and the Director, U.S. Fish and Wildlife Service, hereby issue a notice of proposed rulemaking that would list the Caribbean monk seal (Monachus tropicalis) as an endangered species throughout its range, pursuant to section 4 of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 et seq.) (hereinafter "Act"). This proposed rulemaking would add this seal to the List of Endangered and Threatened Wildlife found in 50 CFR 17.11 and would, reference such listing in 50 CFR 222.23. This proposed listing is based on a preliminary determination by the Director, National Marine Fisheries Service (hereinafter the "Director" and the "NMFS," respectively) that the Caribbean monk seal is an endangered species. This species was formerly found in the Gulf of Mexico and Caribbean Sea.

BACKGROUND

Section 4(a) of the Act states:

General. The Secretary shall by regulation determine whether any species is an endangered species or threatened species because of any of the following factors:

1. The present or threatened destruction, modification, or curtailment of its habitat or range;
2. Overutilization for commercial, sporting, scientific, or educational purposes;
3. Disease or predation;
4. The inadequacy of existing regulatory mechanisms; or
5. Other natural or man-made factors affecting its continued existence.

With the exception of enforcement responsibilities, the Act defines "Secretary" to mean either the Secretary of the Interior or the Secretary of Commerce (as program responsibilities are vested pursuant to the provisions of Reorganization Plan Number 4 of 1970). Most marine species, including the Caribbean monk seal, are the sole responsibility of the Secretary of Commerce. The authority of the Secretary has been delegated to the Director, NMFS.

An extensive aerial survey of the Caribbean monk seal's former habitat in the Gulf of Mexico and Caribbean Sea was conducted by Karl W. Kenyon for the Department of the Interior during March 1973. While this survey unfortunately indicates that the species is probably extinct, such assumptions were made for the Guadalupe fur seal (Arctocephalus townsendi) and the Juan Fernandez fur seal (Arctocephalus philippi) which fortunately proved untrue. In case some remnant members of the Caribbean monk seal species do exist in remote parts of its range, NMFS believes it should be listed and thereby provided protection under the Act. A paper entitled "Caribbean Monk Seal, Monachus tropicalis" (ICUN Supplementary Paper No. 39, April 1973) by Dale W. Rice, NMFS: Provided, The basis for most of the statements and facts cited below.

SUMMARY OF FACTORS AFFECTING THE SPECIES

The findings in support of the Director's proposal are summarized herein and described under each of the five criteria of section 4(a) of the Act.

1. The present or threatened destruction, modification, or curtailment of its habitat or range. The former distribution of this species encompassed shores and islands of the Caribbean Sea and Gulf of Mexico, from the Bahamas and the Florida Keys southward to the Yucatan Peninsula, southernmost part of the United States, and in the eastern Caribbean, as far as the northern Lesser Antilles. It was known to occur in Jamaican waters and on the coast of Colombia.

2. Overutilization for commercial, sporting, scientific, or educational purposes. A major factor responsible for the severe reduction or extinction of the Caribbean monk seal has been exploitation by man. These animals are sluggish, apparently unsuspicous, and not easily killed by harpoons or_hooked butches are low and sandy, which accommodate small boat landings. Thus, the Caribbean monk seal is readily approached and easily killed. Reports indicate that this species has been exceedingly scarce and indiscriminately killed since early Spanish exploration of the western hemisphere. They have been killed commercially for their hides and oil.

3. Disease or predation. The Caribbean monk seal has evolved on remote islands where they have not been subject to terrestrial predators. In the water, however, shark predation is a factor. Predation by sharks is not believed to have caused significant mortality in this species. Disease is not known to be a factor in reduction or extinction of this species.

4. The inadequacy of existing regulatory mechanisms. No United States protection other than that of the Marine Mammal Protection Act of 1972, as amended, is known to exist for the Caribbean monk seal. As indicated above, these regulations would provide protection to any remnant members of the species that may exist.

5. Other natural or man-made factors affecting its continued existence. There are no other known factors significantly affecting this species.

EFFECT OF THIS RULEMAKING

Section 9(a) of the Act sets forth a series of general prohibitions which apply to all endangered species of fish and wildlife.

With respect to any endangered species listed pursuant to section 4 of the Act, it is unlawful for any person subject to the jurisdiction of the United States to:

1. Import any such species into, or export any such species from, the United States;
2. Take any such species within the United States;
3. Take any such species upon the high seas;
4. Possess, sell, deliver, carry, transport, or ship, by any means whatsoever, any such species taken in violation of (2) or (3) above;
5. Deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever and in the course of a commercial activity, any such species;
6. Sell or offer for sale in interstate or foreign commerce any such species;
7. Violate any regulations pertaining to such species and promulgated by the Secretary pursuant to authority provided by the Act.
The term "take" means to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct.

The Act further provides certain limited exceptions to those general prohibitions. These exceptions include: a grandfather clause for species held in captivity or a controlled environment on December 28, 1973, and for commercial purposes (section 9(b) of the Act); a 1-year limited exemption to minimize undue economic hardship tied to a previous contract commitment (section 10(b) of the Act); and permits for scientific purposes or enhancement of propagation or survival of the species (section 10(a) of the Act).

In addition, NMFS regulations published in Parts 217-222 and Part 225 of Title 50 of the Code of Federal Regulations, set forth rules and procedures which apply to all endangered species under the jurisdiction of the Secretary of Commerce. These regulations provide for general provisions, civil procedures, seizure and forfeiture procedures, importation and exportation at designated ports, general and specific permit provisions; establishment of cooperation and financial assistance. In the event that the Caribbean monk seal is listed as an endangered species, these regulations would be applicable to the species.

INTERAGENCY COOPERATION

The listing herein proposed would make available the protection afforded by section 7 of the Act. That section reads as follows:

The Secretary shall, in consultation with and at the request of the States, such as may be appropriate to the effectuation and carry out the purposes of this Act by carrying out programs for the conservation of endangered species and threatened species listed pursuant to this Act and by taking such action necessary to insure that actions authorized, funded, or carried out by any Federal agency or instrumentality are not inconsistent with the purposes of this Act, after such consultation as appropriate. . . .

The listing herein proposed would make available the protection afforded by section 7 of the Act. That section reads as follows:

The Secretary shall, in consultation with and at the request of the States, such as may be appropriate to the effectuation and carry out the purposes of this Act by carrying out programs for the conservation of endangered species and threatened species listed pursuant to this Act and by taking such action necessary to insure that actions authorized, funded, or carried out by any Federal agency or instrumentality are not inconsistent with the purposes of this Act, after such consultation as appropriate. . . .

Section 7. The Secretary shall review other programs administered by him and utilize such programs in furtherance of the purposes of this Act. All other Federal departments and agencies shall, in consultation with and at the request of the Secretary, utilize their authorities in furtherance of the purposes of this Act by carrying out programs for the conservation of endangered species and threatened species listed pursuant to this Act and by taking such action necessary to insure that actions authorized, funded, or carried out by any Federal agency or instrumentality are not inconsistent with the purposes of this Act, after such consultation as appropriate.

While no "critical habitat" has been determined by NMFS for the Caribbean monk seal, the other provisions of section 7 would be applicable.

No critical habitat is presently proposed for the Caribbean monk seal. If the existence of the Caribbean monk seal can be proven, the Director may propose critical habitat in the future, as appropriate. NMFS will actively consider any and all written information, including maps, submitted on the matter of establishing the existence of the Caribbean monk seal in specific areas and delineating critical habitat for the Caribbean monk seal. The concept of critical habitat was discussed in the Federal Register on April 22, 1975 (40 FR 17764-17765).

PUBLIC COMMENTS SOUGHT

The Director intends that the rules finally adopted be as accurate and effective as possible in the conservation of any endangered species. Therefore, any written comments or suggestions from States, interested foreign countries, other concerned government agencies, the scientific community, industry, private interests, or any other interested party concerning any aspect of this proposed rulemaking are solicited. Comments are particularly sought concerning:

1. The existence of any living members of this species;
2. Biological or other relevant data concerning any threat (or the lack thereof) to the Caribbean monk seal; and
3. Additional information concerning the habitat, range, and distribution of the Caribbean monk seal.

Written comments, views, and other documents should be submitted, preferably in duplicate, to the Director, National Marine Fisheries Service, U.S. Department of Commerce, Washington, D.C. 20235. All comments and other documents received by April 18, 1977, will be considered. The Director will consider requests for a public hearing, provided such requests are received by April 4, 1977. The holding of a public hearing is at the discretion of the Director.

The Secretary has determined that the proposed designation of the Caribbean monk seal as an endangered species is not a major Federal action which would significantly affect the quality of the human environment within the meaning of the National Environmental Policy Act of 1969. Accordingly, an environmental assessment has not been prepared and an environmental impact statement on the proposed action is not required. Comments and other documents received pertaining to the proposed listing are available for public review in the Marine Mammals and Endangered Species Division, National Marine Fisheries Service, 3300 Whitehaven Street, N.W., Washington, D.C., or may be obtained by writing the Director, National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235.

JACK W. GEEHNER, Deputy Director, National Marine Fisheries Service.

LYNN A. GREENWALT, Director, Fish and Wildlife Service.

PART 17—ENDANGERED AND THREATENED WILDLIFE AND PLANTS

Accordingly, it is proposed to amend Part 17, Subchapter B of Chapter 1, Title 50 of the Code of Federal Regulations by adding to § 17.11(d) under the class entitled "Mammals" and immediately before "Seal, Hawaiian monk" the following:

§ 17.11 Endangered and threatened wildlife.

1. Mammals.

PART 222—ENDANGERED FISH OR WILDLIFE

§ 222.23 [Amended] In addition, it is proposed to amend § 222.23(a) of Subpart C, Part 222 of Chapter 17, Title 50 of the Code of Federal Regulations by adding "Caribbean monk seal (Monachus schauinslandi)" immediately before "Hawaiian monk seal (Monachus schauinslandi)" in the second sentence.

Advance Notice of Proposed Rulemaking

Correction

In FR Doc. 77-4468 appearing at page 6663, in the issue for Friday, February 11, 1977, the date in the 7th line of the first paragraph of column two is now read as "February 8, 1977" and should have read "February 8, 1977";
This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

COMMITTEE ON RULEMAKING AND PUBLIC INFORMATION

Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given of a meeting of the Committee on Rulemaking and Public Information of the Administrative Conference of the United States, to be held at 10:00 a.m., March 10, 1977 in the library of the Administrative Conference, Suite 500, 2120 L Street, N.W., Washington, D.C.

The Committee will meet to discuss the legislative control of agency rule-making project being conducted by Dean Bruner, A. C. Gormley and Professor Harold H. Bruff, and other Committee business.

Attendance is open to the interested public, but limited to the space available. Persons wishing to attend should notify this office at least two days in advance. The Committee Chairman, if he deems it appropriate, may permit members of the public to present oral statements at the meeting; any member of the public may file a written statement with the Committee before, during or after the meeting.

For further information concerning this Committee meeting, contact Emmett J. Gavin (202-254-7020). Minutes of the meeting will be available on request.

DEPARTMENT OF AGRICULTURE

Federal Grain Inspection Service

GRAIN STANDARDS

California Grain Inspection Points

Statement of considerations. Rialto and Whittier, California, are assigned to the Los Angeles Grain Exchange, El Monte, California, as designated inspection points, in accordance with the provisions of section 36.99 of the regulations (7 CFR 36.99) under the U.S. Grain Standards Act, as amended (7 U.S.C. 71 et seq.). By definition, a designated inspection point is a city, town, or other location assigned under the regulations to an official agency for the conduct of official inspections, and within which the official agency or one or more of its licensed inspectors is located (7 CFR 28.1 (b) (19)). The Los Angeles Grain Exchange has requested that the assignment of Rialto and Whittier as designated inspection points be revoked because it now believes it can provide better service to the grain trade by consolidating its inspection activities at one point.

The Los Angeles Grain Exchange has requested that its assignment of inspection points be amended in accordance with section 26.99(b) of the regulations (7 CFR 26.99(b)) to add Montebello, California, as a designated inspection point.

Notice is hereby given that the Federal Grain Inspection Service has under consideration the request from the Los Angeles Grain Exchange to revoke Rialto and Whittier, California, as designated inspection points and to add Montebello, California, as a designated inspection point under the U.S. Grain Standards Act. The Administrator closed its Rialto and Whittier offices and opened the Montebello office on December 1, 1976; therefore, the proposed amendment would become effective on an interim basis until final determination of the proposed amendments of assignment can be made.

The U.S. Grain Standards Act, as amended October 21, 1976 (Public Law 94-582) provides, in part, that a designated official inspection agency then providing official inspection services in an area, who pays fees as prescribed therein, may continue to operate in that area without a designation under the said Act, as amended on October 21, 1976. Such an agency is subject to all provisions of the said Act and regulations thereunder in effect immediately prior to the effective date (November 20, 1976) of said amendments until the designation of such agency to perform such services is granted or denied by the Administrator of the Federal Grain Inspection Service or the expiration of a period as determined by the Administrator of not more than two years. In implementing the provisions of the U.S. Grain Standards Act, as amended October 21, 1976, the Federal Grain Inspection Service is currently in the process of reviewing the designations of official inspection agencies.

Therefore, the proposed amendments of assignment are effective on an interim basis until final determination can be made. It is not a designation pursuant to the Act, as amended October 21, 1976.

Opportunity is hereby afforded all interested persons to submit written views and comments with respect to this matter to the Hearing Clerk, U.S. Department of Agriculture, Washington, D.C. 20250. All material submitted shall be in duplicate and mailed to the Hearing Clerk not later than March 18, 1977. All material submitted pursuant to this notice will be made available for public inspection at the Office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)). Consideration will be given to the views and comments so filed with the Hearing Clerk and to all other information available to the U.S. Department of Agriculture before final determination is made with respect to this matter.

DONALD E. WILKINSON, Interim Administrator.

CONSUMER PRODUCT SAFETY COMMISSION

DETERMINATION OF SAFE LEVEL OF LEAD IN PAINT

Announcement of Decision

This notice announces the decision of the Consumer Product Safety Commission under the Lead-Based Paint Poisoning Prevention Act that available scientific information is insufficient to establish that a level of lead in paint above 0.06 percent but not over 0.5 percent is safe.

BACKGROUND

In 1971 the Lead-Based Paint Poisoning Prevention Act (LBPPPA), 42 U.S.C. 4801 et seq., was enacted to help prevent the problem of lead poisoning among children caused by the ingestion of lead-based containing paints. The act defined the term lead-based paint as any paint containing more than one percent lead and directed the Secretary of Health, Education and Welfare to prohibit the use of lead-based paint in residential structures constructed or rehabilitated after January 31, 1976. The act also established grants for the detection, treatment, and elimination of lead-based paint poisoning.

In 1973 the LBPPPA was amended (Pub. L. 93-161), among other things, to direct the Chairman of the Consumer Product Safety Commission to conduct appropriate research on multiple layers of dried paint film containing lead in order to ascertain the safe level of lead in residential paint products. If the Chairman, in a report to be submitted to Congress by December 31, 1974, determined that a level of lead no greater than 0.5 percent was safe, then the definition of lead-based paint after December 31, 1974, would be paint containing more than that level of lead. If the Chairman was unable to make such a determination, the definition of lead-based paint would be paint containing...
The NAS Report also found that 0.5 percent lead in paint represents a hazard to a child with pica for paint and specifically recommended:

"that the deliberate addition of lead to paint known to be chewed by children be immediately discontinued and that a level not to exceed 0.05 percent lead in the final dried product be set for regulatory purposes." (P.S. Report, p. 10)

The recommendations of the Department of Health, Education, and Welfare, including those of the Center for Disease Control, as presented at the September 13 hearing, and in written comments to the Commission, (1) generally supported the recommendations in the NAS Report, (2) criticized the lead paint studies previously conducted by the Commission as support for establishing 0.5 percent, as being safe, and (3) urged the Commission to adopt a level below 0.5 percent. They stated that they believed the 0.06 percent level to be achievable and enforceable. In addition, a representative of the American Academy of Pediatrics, medical experts, and several consumer organizations, in support of the 0.06 percent level.

The National Paint and Coatings Association (NPCA) stated it would support a level of no less than 0.25 percent lead level primarily to achieve uniformity with certain foreign standards. Neither the NPCA nor those representing the toy industry, however, provided toxicity data in support of a determination that the suggested levels were safe. In addition, a medical consultant for NPCA expressed written comments on his concern regarding the evidence offered by NAS that 0.5 percent lead in paint represents a hazard to children; however, NPCA did not, however, present information which would support a determination that the 0.5 percent level of lead in paint is safe or that another level, greater than 0.06 percent, is safe.

In addition to comments related to the toxicity of lead-containing paint, comments and testimony were also presented on various issues related to the economic and practical effects of lowering the lead level, including the cost and need for the development and establishment of methods for analyzing the lead content of paint and the possible consequences of eliminating lead as a drier in commercial paint. Such information is relevant to the Commission's proposal of August 10, 1976, regarding the regulation under the CPSA of lead-containing paint and other articles bearing such paint. Since the principal concern under the LBPPA is with toxicity and safety of lead in paint, such comments will be considered in the context of the Commission's final regulations under the LBPPA.
under the LBPPPA, the Commission has concluded that such data and information do not support a finding that a level of lead in paint above 0.06 percent but not over 0.5 percent is safe. The Commission believes it cannot ignore the problems contained in the comments and testimony of the representatives of the National Academy of Sciences, the Center for Disease Control of the Department of Health, Education, and Welfare and others regarding the weight of the aforementioned animal studies conducted for the Commission as evidence of the safety of paint containing 0.5 percent lead. Moreover, the Commission is unaware of any other data or information sufficient to establish the safety of lead at a level over 0.06 percent. Consequently under the LBPPPA, paint manufactured after June 22, 1976, containing more than 0.06 percent lead by weight (calculated as lead metal) in the total nonvolatile content of the paint, or the equivalent measure of lead in the dried film of paint already applied, or both, will be considered "lead-based paint." It is also noted that the August 10, 1976, notice under the CPSA proposed to regulate lead-containing paint at the LBPPPA level for consumer product paints and toys, articles intended for use by children, and furniture, bearing such paint.

Environmental Considerations

In considering the other information available on the question of a safe level of lead under the LBPPPA, the Commission also had before it a preliminary draft environmental impact statement on the lead paint regulations proposed under the CPSA. This preliminary draft contained information on the manufacture of paint and explored the possible economic and environmental consequences of the proposed Commission regulations under the CPSA. Under the National Environmental Policy Act (NEPA), 42 U.S.C. 4331 et seq., agencies of the Federal Government are required to include in proposals for major Federal actions significantly affecting the quality of the human environment, a detailed statement on the environmental impact of the proposed action (42 U.S.C. 4332). As described above, the Commission's functions under the LBPPPA are twofold. The first is to determine whether a safe level of lead can be established, and the second is to take steps as necessary to prohibit the application of lead-based paint to any toy or furniture article. The first function under the LBPPPA consisted of simply an evaluation of available information to determine if it supported a finding of a safe level of lead. The Commission's function in this regard has been merely to determine that such a finding cannot be supported, thus allowing the Congressionally established definition of lead paint to become automatically effective at the 0.06 percent level. Thus, the Commission does not believe its exercise of this function constitutes a "major Federal action significantly affecting the quality of the human environment." This view is supported by the fact that the Commission and the other Federal agencies involved must undertake rulemaking and other administrative actions to implement the directives of the LBPPPA. Consequently, while the Commission considered the possible economic, social and environmental effects of its proposed CPSA rulemaking in reaching its safe level decision under the LBPPPA, no environmental impact statement has been prepared specifically on the LBPPPA decision.

The preliminary draft environmental impact statement on the proposed Commission action to regulate lead-containing paint under the CPSA has been revised and approved by the Commission for release and public comment. These comments will be considered in issuing a final impact statement. The final impact statement will be utilized in issuing the final CPSA regulation in accordance with the requirements of NEPA. Those persons interested in commenting on the draft environmental impact statement may obtain a copy from the Office of the Secretary of the Consumer Product Safety Commission, 1111 19th Street, N.W., Washington, D.C. 20207. Comments should be filed in the Office of the Secretary before the close of business, March 23, 1977. The draft statement formally became available for comment on February 4, 1977, as announced in the notice published in the Federal Register of that date (42 FR 6879) by the Council on Environmental Quality.

SAYDEE E. DUNN, Secretary, Consumer Product Safety Commission.
NOTICES

Federal agency responsible for the proposed action, the title of the action, a summary of the nature of EPA’s comments, and the source for copies of the comments as set forth in Appendix VI below.

Appendix VI below contains a listing of the names and addresses of the sources of EPA reviews and comments listed in Appendices I, III, IV, and V below.

Copies of the EPA Manual setting forth the policies and procedures for EPA’s review of agency actions may be obtained by writing the Public Information Reference Unit, Environmental Protection Agency, Room 2222, Waterside Mall SW, Washington, DC 20460, telephone 202/786-2208. Copies of the draft and final environmental impact statements referenced herein are available from the originating Federal department or agency.

REBECCA W. HAMMER, 
Director, Office of Federal Activities.

FEDERAL REGISTER, VOL. 42, NO. 32—WEDNESDAY, FEBRUARY 16, 1977
APPENDIX II.—DEFINITIONS OF CODES FOR THE GENERAL NATURE OF EPA COMMENTS

ENVIRONMENTAL IMPACT OF THE ACTION

LACK OF OBJECTION

EPA has no objections to the proposed action as described in the draft impact statement; or suggests only minor changes in the proposed action.

ENVIRONMENTAL RESERVATIONS

EPA has reservations concerning the environmental effects of certain aspects of the proposed action. EPA believes that further study of suggested alternatives or modifications is required and has asked the originating Federal agency to reassess these impacts.

ENVIRONMENTALLY UNSATISFACTORY

EPA believes that the proposed action is unsatisfactory because of its potentially harmful effect on the environment. Furthermore, the Agency believes that the potential safeguards which might be utilized may not adequately protect the environment from hazards arising from this action. The Agency recommends that alternatives to the action be analyzed further (including the possibility of no action at all).

APPENDIX III.—Final environmental impact statements for which comments were issued between Dec. 1, 1976 and Dec. 31, 1976

AIR QUALITY STANDARDS: "EMISSION OFFSET" INTERPRETIVE RULING

Location Change for Public Hearing

On January 21, 1977, the Environmental Protection Agency published at

February 16, 1977

FEDERAL REGISTER VOL. 42, NO. 32—WEDNESDAY, FEBRUARY 16, 1977

9413

A Notice of four public hearings regarding EPA's "Emission Offset" Interpretive Ruling (41 FR 15529). The first such hearing is scheduled for San Francisco, California, on February 23, 1977.

The purpose of this notice is to announce that the previously-announced location for the San Francisco hearing has been changed to another building. The date of the hearing has not been changed. The hearing will be held on February 23 in San Francisco at:

Jock Tower Hotel, California Golden Gate Room, Mezzanine Floor, Van Ness and Gary Streets.

EDWARD F. TUREK,
Acting Assistant Administrator for Air and Waste Management.

FEDERAL COMMUNICATIONS COMMISSION

[Doc/Fixed 21055, 21059, File Nos. 3404-CM-P-73, 60087-CM-P-75]

AMERICAN TELEVISION AND COMMUNICATIONS CORP. AND MICROBAND CORPORATION OF AMERICA

Construction Permits in the Multidistribution Service for a New Station at Urbana, Illinois

1. The Commission has before it the above-referenced applications of American Television and Communications Corporation (ATC), filed on November 9, 1972, and Microband Corporation of America (Microband), filed on April 25, 1975. Both applications propose Channel 1 operation in the Urbana, Illinois area, and thus are mutually exclusive and require comparative consideration. Both applications have been amended as a result of informal requests of the Commission staff for additional information, and no petitions to deny or other objections to any of the applications have been received.

2. ATC, which holds licenses in points-to-point, DPLMRS, CATV, and DAROS services, has fifteen MDS construction permit applications pending and has been granted permits for four cities, including Savannah, Georgia. Microband has thirteen licensed MDS stations and some thirty-five construction permit applications pending or granted.

3. Upon review of the captioned applications, we find that both applicants are legally, technically, financially, and otherwise qualified to provide the services with which they propose to affiliate. The hearing will be required to determine, on a comparative basis, which of these applications should be granted.

Accordingly, it is hereby ordered, that pursuant to section 309(e) of the Communications Act of 1934, as amended, and § 0.291 of the Commission's Rules, the above-captioned applications are designated for hearing, in a consolidated proceeding, at a time and place to be specified in a subsequent order, to determine, on a comparative basis, which of the above-captioned applications should be granted in order to best serve the public interest, convenience and necessity. In make such a determination, the following factors shall be considered:

(a) The relative merits of each proposal with respect to service area and efficient frequency use;
(b) The nature of the services and facilities proposed, and whether they will satisfy the service requirements known to exist or likely to exist in the Urbana, Illinois area;
(c) The anticipated quality and reliability of the service proposed, including selection of equipment, subscriber security and maintenance;
(d) The charges, regulations and conditions of the service to be rendered, and their relation to the nature, quality and costs of service; and
(e) The managerial and entrepreneurial qualifications of the applicants.

5. It is further ordered, that American Television and Communications Corporation, Microband Corporation of America, and the Chief, Commercial Carrier Bureau, ARE MADE PARTIES to this proceeding.

6. It is further ordered, that parties desiring to participate herein shall file their notices of appearance in accordance with ¶ 0.291 of the Commission's Rules.

3A/TC's application appeared on Public Notice on March 10, 1975, delayed at the request of the applicant. Accordingly, Microband's application was timely filed.

3Consideration of these factors shall be made in light of the Commission's discussion in Federal Telecommunications, et al., 55 F.P.O.2d 65 (1975).

1.221 of the Com-
1.221 of the Act similar to those presently under re-
view in Docket 6609, American Telecommunication Relay, Inc., 37 FCC 2d 751 (1975). We also imposed an accounting order upon ATC which requires it to keep accurate records of all amounts received should the suspension period terminate before a final decision is rendered and the increased rates become effective. Finally, ATC was notified that customer refunds might be warranted pending completion of the ordered investigation and hearing and a decision therein.
2. On December 23, 1976, the very day the Commission released its Memorandum Opinion and Order, Teleprompter Corporation (Teleprompter) withdrew its Petition to Suspend the January 1, 1977 effective date of the revised ATC tariff. Teleprompter had been the only one of ATC's twelve customers to protest the revised tariff schedules. Based on this new fact, ATC has filed a Petition for Reconsideration under Section 1.106 of our Rules and Regulations, 47 C.F.R. § 1.106, seeking a reduction in the duration of the suspension period from the five month statutory maximum to a period of one month. Reconsideration of no other aspect of our Memorandum Opinion and Order has been requested by ATC.
3. In support of its Petition, ATC ar-
5. Accordingly, it is ordered, That the
6. It is further ordered, That, the Sec-
new fact, ATC has filed a Petition for Reconsideration under Section 1.106 of our Rules and Regulations, 47 C.F.R. § 1.106, seeking a reduction in the duration of the suspension period from the five month statutory maximum to a period of one month. Reconsideration of no other aspect of our Memorandum Opinion and Order has been requested by ATC.
1. We have also considered an Opposition to the Petition for Reconsideration filed by the Trial Staff of the Common Carrier Bureau, and a Reply thereto filed by ATC.
clude that the grant of license to Mr. Randall would serve the public interest, convenience and necessity.

Accordingly, it is ordered, pursuant to Section 206(e) of the Communications Act of 1934, as amended, and § 1.973(b) and 0.331 of the Commission’s Rules, that the captioned application is designated for hearing, at a time and place to be specified by the Commission, and that § 1.221(c) of the Commission’s Rules, in person or by attorney, shall within 20 days of the mailing of this Order, file with the Commission in triplicate a written appearance to be heard in the captioned application, and have such appearance on an date to be fixed for hearing and to present evidence on the issues specified in this Order.

Chief Safety and Special Radio Services Bureau.

Gerald M. Zuckerbrran,
Chief, Legal, Advisory and Enforcement Division.

[FTR Doc.77-4883 Filed 2-15-77:8:45 am]

FEDERAL ENERGY ADMINISTRATION REPORTING AND RECORDKEEPING REQUIREMENTS

Expiration or Extension of Certain Forms

The Federal Energy Administration (FEA) hereby gives notice that the expiration dates applicable to thirteen reports are extended, that three forms have expired, and that three forms which have been approved for extension, are to be a licensee of the Commission. REPORTING

It is further ordered, That, the application for a new Citizens radio station license, filed on September 26, 1976, by Mr. Randall, is dismissed as defective, pursuant to §§ 1.968(c) and 0.411(b) of the Commission’s Rules, since no person may hold more than one Citizens Band station license.

It is further ordered, That, to avail himself of the opportunity to be heard, the applicant, pursuant to § 1.221(c) of the captioned application is designated this Order.

III. The following forms expire on December 31, 1976.

II. The following FEA forms expired on December 31, 1976.

MIDDLE DISTILLATE PRICES
Revision to Post-Exemption Monitoring BACKGROUND

On September 15, 1976, the FEA issued a notice specifying the details of the middle distillate price monitoring system which the FEA had decided to adopt in order to meet its commitment to assure that no unwaranted price increases would occur once controls were removed. (1) FR 41153, September 21, 1976) As part of the system, an index value was established which would project price levels that would have occurred had regulatory controls remained in effect for middle distillers, plus a flexibility factor of two cents per gallon to allow for statistical error, short-term market aberrations and factors not otherwise included in the index equation that could have affected prices under controls. The index value included factors for increases in costs of crude oil, the costs of doing business for refiners and marketers, the costs and volumes of imported distillate, and a seasonal adjustment factor.

The formula operates so that the factors for increases crude oil costs and increased costs of doing business for refiners were included with a two-month lag. The two-month lag was adopted so that these costs could be based on actual data reported to the FEA. Under continued controls, these costs could have been passed through with a one-month lag. The FEA specifically recognized the additional one-month lag problem with respect to crude oil in its September 21, 1976 notice and decided to continue to consider alternative methods for projections of actual crude oil prices with a one-month lag.

Two-Month Lag in Cost Reflection Replaced by One-Month Lag

The computation of the index value in accordance with the procedures outlined in the September 21, 1976 notice does not permit the index price to reflect OPEC price increases until the close of the second month following the month in which the index was calculated. For example, under the September 21 procedure, an increase in OPEC prices during January 1977 would not be reflected in the index price until the end of March 1977.

Except to the extent that actual increases in middle distillate prices resulting from the OPEC price increase were absorbed by the two-cent per gallon flexibility factor, the index prices assume that refiners absorb the increased costs due to the OPEC price rise for two months.

Under continued controls, on the other hand, refiners would have been required to absorb the increase for only one month before passing it through. Such a result is not consistent with the intent of the index value mechanism.

Therefore, effective February 1, 1977, the FEA has adopted a revision to the index methodology outlined in the September 21, 1976 notice. The revised procedure will reduce the two-month lag for reflecting increased crude oil costs to one month, by projecting average crude oil costs to be used in the index computation.

Revisions to Price Monitoring System

The Appendix in the September 21, 1976 notice is revised. The revised methodology changes the former crude oil costs term to reduce the two-month lag in reflecting costs to one month.

The estimated average cost of imported crude oil included in the computation of the new term (C2-1) is computed by adding to the latest actual costs of imported crude oil reported to the FEA any announced percentage increases in the price of foreign oil, based on the official Saudi Arabian price for 44° gravity crude oil, during the two-month period immediately preceding the month for which the Index is calculated.

Thus, the index price in February 5, 1977 will reflect reported and estimated costs of imported crude oil for January 1977.
NOTICES

The average refiner acquisition cost for domestic crude oil will be estimated, based on estimated changes in upper tier, lower tier, and stripper well crude oil, which will be used to adjust the latest actual computed values for price changes. The method is designed to estimate the acquisition costs reported to the FEA. Such costs are not available to FEA on a current basis. The changes in the prices of upper- and lower-tier crude oil will be equal to changes in these prices as noted in FEA's latest published schedule. The price of stripper crude oil is assumed to be equal to the same amount as imported crude oil. The percentage weights for these three costs are the latest actual figures for percentages collected by the FEA. Thus, for example, the index prices for weeks in February 1977 will reflect reported costs for upper tier crude oil in November 1977 adjusted downward by $0.20 per barrel to account for the $0.20 per barrel reduction in the upper tier ceiling price that became effective January 1, 1977, and adjusted upward to reflect the OPEC price increases announced for January, 1977.

The percentages of domestic and imported volumes of crude oil used in the computation are estimated by adjusting the latest actual percentages reported to the FEA. After actual data upon which the index computation is based become available, the projected index value will be replaced by the actual index value.

The FEA herein also adopts a change to the weekly index calculation. In accordance with the procedure outlined in the September 21, 1976, Federal Register notice, the FEA has been computing weekly index values by adding to the latest weekly or monthly index value one-fourth of the difference between the two latest monthly index values.

The intent of this method of weekly index value computation was to approximate, as accurately as possible, the values which would ultimately be obtained for the monthly index value, which is computed from actual data collected by the FEA, had such data been available on a current basis. At the end of the month, the weekly index values were replaced by the new monthly index values when the FEA had collected the actual data from which the monthly index value was computed.

The FEA has revised the weekly index value computation, by including the projection for crude costs and that information which is known at the time of the computation, and continuing its one-fourth method for the unknown components of the index.

The seasonal adjustment factor is predetermined, the crude oil costs are projected, and the import adjustment is known by about the end of the first week of the month on a sampling basis. The revision to the weekly computation that the FEA has adopted takes these three factors as predetermined for the month.

Other component factors of the index value, that is, refiner and distributor non-product costs, will continue to be extrapolated by the one-fourth method until actual data for these factors become available.

A new Appendix II is added which provides the details of the average crude oil costs computation.

DAVID G. WILSON,
Acting General Counsel,
Federal Energy Administration.

APPENDIX I

A. DETAILED FORMULAS FOR COMPUTING NATIONAL INDEX PRICES

No. 2 Heating Oil

\[ I_{t} = S_{t} \left( P_{t} - (C_{t-1} - C_{0}) + \frac{(N_{t} - N_{0})}{V_{t-1}} \right) + A \left( P_{t} - P_{t-1} \right) \]

Import adjustment

\[ + \Delta P_{t} R_{t} + \Delta R_{t} \]

Flexibility factor

\[ + 2 \text{ cents} \]

No. 2 Diesel Fuel

\[ I_{t} = S_{t} \left( P_{t} - (C_{t-1} - C_{0}) + \frac{(N_{t} - N_{0})}{V_{t-1}} \right) + A \left( P_{t} - P_{t-1} \right) \]

Import adjustment

\[ + \Delta P_{t} R_{t} + \Delta R_{t} \]

Flexibility factor

\[ + 2 \text{ cents} \]

Superscripts used in the formulas refer to time periods as follows:

- \( t \) refers to the month for which the index is being computed.
- \( t-1 \) refers to the month one month before the month for which the index is being computed (when \( t=September, t-1=August \)).
- \( t-2 \) refers to the month two months before the month for which the index is being computed (when \( t=September, t-2=July \)).
- \( J \) refers to June 1976.
- \( a \) refers to April 1976.
- \( m \) refers to May 1976.
- \( Q \) refers to the quarter in 1972 which includes June (June-August).
- \( q \) refers to the quarter in 1972 which includes the month corresponding to the month \( t \) in 1976-1977.

Subscripts used in the formulas refer to the following:

- \( h \) refers to No. 2 heating oil.
- \( r \) refers to refiners.
- \( i \) refers to imported middle distillates.
- \( d \) refers to No. 2-D diesel fuel.

\[ I_{t} = \text{National index price for No. 2 heating oil sales in month } t \]

\[ S_{t} = \text{National index price for No. 2-D diesel fuel sales in month } t \]

\[ P_{t} = \text{Multiplicative seasonal adjustment factor} \]

\[ A = \text{Seasonal factor derived from BLS No. 2 heating oil price index for the period 1960 through 1967} \]

\[ N_{t} = \text{Multilocation seasonal adjustment factor for diesel fuel sold in truck stops} \]

\[ \Delta P_{t} = \text{Weighted national average price for No. 2 heating oil sold to ultimate consumers during June 1976, determined by a statistically valid sample of sellers of No. 2 oils} \]

\[ \Delta P_{t} = \text{Weighted national average price for No. 2-D diesel fuel sold to ultimate consumers for highway use during June 1976, estimated on the basis of sales of diesel fuel in truck stops and retail service stations, which account for the majority of diesel fuel sales} \]

\[ C_{t} = \text{Average crude oil costs in cents per gallon in month } t-1 \text{ as estimated in accordance with procedures set forth in Appendix II. Crude oil cost estimates will be revised one month later with new estimates, and two months later with actual data} \]

\[ V_{t} = \text{Total volume of sales of refined products derived from refining operations, Total volume derived from refined products reported to the FEA on Form P302 adjusted for import volumes} \]

\[ b_{0} = \text{Percentage of No. 2 heating oil sales to ultimate consumers accounted for by non-refiners estimated from 1974 market share data reported to the FEA} \]

\[ b_{1} = \text{Percentage of total diesel fuel sales to ultimate consumers accounted for by non-refiners. Estimated from diesel fuel direct sales reported to the FEA on Form P302 for the period July, 1975 through April, 1976} \]
\( W_t^{\text{r}-2} = \text{Bureau of Labor Statistics wage index for Truckers and Warehousemen (SIC42), for the month } t-2. \)

\( W_t = \text{Bureau of Labor Statistics wage index for Truckers and Warehousemen (SIC42) for April 1976.} \)

\( M_j = \text{Margin for nonrefiners selling No. 2 heating oil for the period June 1976 estimated from statistically valid survey of heating oil resellers.} \)

\( M_j \) = June 1976 margin for truck stop operators and retail service stations that sell diesel fuel, estimated from Lundberg Survey, Inc. survey of truck stops and retail gasoline stations conducted for the FEA.

\( \Delta P_k = \text{Change in the weighted average cost of middle distillate imports for the months April through month } t-2 \text{ reported to the FEA on Form P-302.} \)

\( \Delta P_k = \text{Historical national proportion of middle distillate imports during the quarter in } t \text{ which includes the month corresponding to the month } t \text{ in 1976-1977.} \)

\( \Delta P_k = \text{Historic national proportion of middle distillate imports in the quarter June through August 1972.} \)

\( P_2 = \text{Average price of imports of No. 2 oils in June 1976 reported to FEA on Form P-112.} \)

\( P_2 = \text{Average price of domestic No. 2 oils in June 1976 reported to FEA on Form P-112.} \)

**D. Detailed Formula for Computing Regional Index Prices**

**No. 2 Heating Oil**

\[
I_{h,t} = S_{h,t} \left[ P_{h,t} + (C_a - C_m) + \frac{(N_{h,t}^m - N_{h,t}^a)}{W_{h,t}^{t-2}} \right] M_j^{t-2}.
\]

**Import adjustment**

\[
\Delta P^* = \Delta P^* R^* + \Delta R^* (P_1 - P_2)
\]

**Flexibility factor**

\[ +2 \text{ cents} \]

**No. 2 Diesel Fuel**

\[
I_{d,t} = S_{d,t} \left[ P_{d,t} + (C_a - C_m) + \frac{(N_{d,t}^m - N_{d,t}^a)}{W_{d,t}^{t-2}} \right] M_j^{t-2}.
\]

**Import adjustment**

\[
\Delta P^* = \Delta P^* R^* + \Delta R^* (P_1 - P_2)
\]

**Flexibility factor**

\[ +2 \text{ cents} \]

Superscripts used in the formulas refer to time periods as follows:

- \( t \) refers to the month for which the index is being computed.
- \( t-1 \) refers to the month one month before the month for which the index is being computed (when \( t=September \), \( t-1=August \)).
- \( t-2 \) refers to the month two months before the month for which the index is being computed (when \( t=September \), \( t-2=July \)).
- \( J \) refers to June 1976.
- \( Q \) refers to the quarter in 1972 which includes June (June-August).
- \( g \) refers to the quarter in 1972 which includes the month corresponding to the month \( t \) in 1976-1977.

Subscripts used in the formulas refer to the following:

- \( h \) refers to No. 2 heating oil.
- \( r \) refers to refiners.
- \( i \) refers to imported middle distillates.
- \( a \) refers to domestic middle distillates.
- \( d \) refers to No. 2-D diesel fuel.
- \( j \) refers to a particular region.

\( I_{h,t} = \text{Index price for No. 2 heating oil sales in month } t \text{ in region } j. \)

\( I_{d,t} = \text{Index price for No. 2-D diesel fuel sales in month } t \text{ in region } j. \)

\( S_{h,t} = \text{Multiplicative seasonal adjustment factor for heating oil. Seasonal factor derived from BLS No. 2 heating oil price index for the period } 1960 \text{ through } 1967. \)

\( S_{d,t} = \text{Multiplicative seasonal adjustment factor for diesel fuel sold in truck stops. Given the limited amount of available price data the FEA has not been able to identify a significant seasonal pattern for diesel fuel prices. Thus, the seasonal factor has been set at } 1.0 \text{ for all months (see Section C.2, below).} \)

\( P_{h,t} = \text{Weighted average price for No. 2 heating oil sold to ultimate consumers in region } j \text{ during June 1976, determined by a statistically valid sample of sellers to ultimate consumers of No. 2 oils.} \)

\( P_{d,t} = \text{Weighted average price for No. 2-D diesel fuel for highway use sold to ultimate consumers in region } j \text{ during June 1976, estimated on the basis of sales of diesel fuel in truck stops and retail service stations, which account for the majority of diesel fuel sales.} \)

\( C^i = \text{Average crude oil costs in cents per gallon in month } t-1 \text{ as estimated in accordance with procedures set forth in Appendix II. Crude oil cost estimates will be revised one month later with new estimates, and two months later with actual data.} \)

\( C^= \text{Unit crude oil costs in cents per gallon in May 1976, reported to the FEA on FEA Form P110.} \)

\( N_{h,t}^r = \text{Nonproduct costs for refiners during month } t-2 \text{ reported to the FEA on Form FEA P-110. These costs represent the amount of nonproduct costs that refiners can pass through under current pricing regulations.} \)
NOTICES

Projected average refiner acquisition costs:

\[ C_{t+1} = C_t + \alpha C_t + \beta K + \gamma \]

Where:

- \( C_t \) = estimated percentage of foreign crude oil purchases in month \( t-1 \), including imports into the Virgin Islands.
- \( \alpha \) = estimated percentage of purchases of domestic crude oil.
- \( \beta \) = refiner acquisition costs of imported crude oil reported to FEA for month \( t-3 \) on form P124.
- \( \gamma \) = percentage of upper tier crude oil purchased for month \( t-3 \) reported to FEA on form P124.
- \( K \) = estimated percentage increase in price of foreign crude oil during the two-month period immediately prior to the month \( t \). Until FEA collects data from which better estimates can be derived, an estimated seven percent will be used.
- \( \alpha \) = marker price for Arabian light 34° gravity crude oil as posted by Saudi Arabian government for the month \( t-3 \).
- \( \beta \) = refiner acquisition costs of domestic crude oil reported to FEA for month \( t-3 \) on form P124.
- \( \gamma \) = percentage of lower tier crude oil purchased for month \( t-3 \) reported to FEA on form P124.
- \( \delta \) = percentage of stripper crude oil purchased for month \( t-3 \) reported to FEA on form P124.
- \( \theta \) = change in price of upper tier crude oil during the two-month period from month \( t-3 \) to month \( t-1 \), as set by FEA.
- \( \phi \) = change in price of lower tier crude oil during the two-month period from month \( t-3 \) to month \( t-1 \), as set by FEA.

FEDERAL MARITIME COMMISSION

UNITED STATES LINES, INC. AND LYKES BROS. STEAMSHIP CO., INC.

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 703, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street, N.W., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California and San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary Federal Maritime Commission, Washington, D.C. 20573, or before March 8, 1977. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the Commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

[FR Doc. 77-2929 Filed 7-25-77; 3:15 am]
NOTICES

FEDERAL POWER COMMISSION

[DOCKET Nos. RI76-119, etc.]

ANADARKO PRODUCTION Co. ET AL.

Amended Petition for Special Relief

February 9, 1977.

Take notice that on February 3, 1977, Diamond Shamrock Corporation (Petitioner), P.O. Box 651, Amarillo, Texas 79173, filed a proposed settlement agreement in the above-captioned docket which amends its petition for special relief filed June 25, 1976, for natural gas produced in waters more than 250 feet deep, pursuant to § 256(a)(2) of the Commission's rules of practice and procedure. By this amendment petitioner seeks a flat rate of approximately $1.75 per Mcf, commencing March 1, 1977, for all gas attributable to its 15 percent working interest in West Cameron Block 659, Offshore Louisiana. Petitioner, on the basis of the record submitted to date, was seeking a comparable rate of approximately $1.93 per Mcf.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should file on or before March 4, 1977, with the Federal Power Commission, Washington, D.C. 20426, a protest or a petition in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protagonists parties to the proceeding. Any person wishing to become a party to the proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMS, Secretary.

[FR Doc. 77-4822 Filed 2-15-77;8:45 am]

[Project No. 271]

ARKANSAS POWER AND LIGHT Co.

Issuance of Annual License(s)

February 9, 1977.

The license for Project No. 271 was issued effective February 7, 1923, for a period ending February 6, 1972. Since expiration of the original license, the project has been maintained and operated under annual licenses, the most recent of which will expire on February 6, 1977. In order to continue the operation and maintenance of the project, pending Commission action on Licensee's application, it is appropriate and in the public interest to issue an annual license to the Arkansas Power and Light Company.

Take notice that an annual license is issued to the Arkansas Power and Light Company for the period February 7, 1977, to February 6, 1978, or until Federal takeover, or until the issuance of a new license for the project, whichever comes first, for the continued operation and maintenance of Carpenter and Remmel Developments Project No. 271 subject to the terms and conditions of the original license. Take further notice that if Federal takeover or issuance of a new license does not take place on or before February 6, 1978, a new annual license will be issued each year thereafter, effective February 7 of each year, until such time as Federal takeover takes place or a new license is issued, without further notice being given by the Commission.

KENNETH F. PLUMS, Secretary.

[FR Doc. 77-4879 Filed 2-15-77;8:45 am]

[DOCKET No. RP73-63. (PGA77-31)]

COLUMBIA GAS TRANSMISSION CORP.

Proposed Changes in Gas Tariff

February 8, 1977.

Take notice that Columbia Gas Transmission Corporation (Columbia) on January 26, 1977, tendered for filing proposed changes in its FPC Gas Tariff, Original Volume No. 1, as follows:

Thirty-sixth Revised Sheet No. 16. Seventeenth Revised Sheet No. 64A.

These proposed changes to be effective March 1, 1977, result from the implementation of Columbia's Purposed Gas Cost Adjustment provision contained in Section 20 of the General Terms and Conditions of its FPC Gas Tariff, Original Volume No. 1.

Copies of the filing were served upon the Commission's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, Union Center, Building, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before February 25, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protagonists parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMS, Secretary.

[FR Doc. 77-4870 Filed 2-15-77;8:45 am]

[DOCKET No. CP77-129]

COLUMBIA GAS TRANSMISSION CORP.

Findings and Order Authorizing Importation of Natural Gas

On February 3, 1977, Columbia Gas Transmission Corporation (Columbia) filed in Docket No. CP77-129 an application pursuant to section 3 of the Natural Gas Act to import up to 25,300 cubic meter shiploads of liquefied natural gas (LNG) from Algeria to the United States through the LNG terminal facilities of Distragas of Massachusetts Corporation (DOMAC), all as more fully set forth in the application.

Columbia seeks authorization to import up to approximately 70,000 cubic-
Columbia is currently in a grave emergency situation where it has been created by a number of factors. The primary factor is the severe cold weather experienced throughout Columbia's service area during the end of its underground storage injection season last October and extending from the commencement of its underground storage injection season on December 1, 1976, to date. The months of October and November 1976 and January 1977 are the coldest October, November and January ever experienced in Columbia's service area. From October 1, 1976, through January 31, 1977, Columbia's overall service area experienced a degree days deficiency (DDD) of 1066 DDD's or 35 percent colder than normal and 604 DDD's or 17 percent colder than the coldest period experienced on Columbia's system during the past 30 years.

This abnormally cold weather has had a drastic impact on Columbia's underground storage inventories. Due to an extremely severe cold weather prevailing during the last 16 days of October, Columbia entered the winter season with a storage deficiency of approximately 25 million Mcf out of a total underground storage capacity of 590 million Mcf, 211 million Mcf of which represent turnover storage volumes available for withdrawal during the winter season. Columbia has not been able to make up this deficiency. Rather, such deficiency has nearly quadrupled due to the continued unprecedented cold weather and the increased heating requirements that have existed throughout the current winter season.

In addition to the inadequate gas supply available to meet the requirements of Columbia's customers over the remainder of the current winter season, Columbia faces a severe problem in meeting its customers' peak-day requirements due to the present deficiency in storage inventories. As a result of the severe drain on Columbia's storage facilities, Columbia has already withdrawn 192 million Mcf from storage and is approximately 91 million Mcf behind scheduled storage withdrawals. Thus, only 19 million Mcf of storage turnover remains for the rest of the winter season. With Columbia's storage in such depleted condition, it is essential that supplemental flowing gas be obtained immediately. In addition, it is essential during the summer injection season that Columbia have sufficient supplies such as LNG to assure that LNG storage will be adequate to meet storage requirements for the 1977-78 heating season.

The impact of the gas shortage on Columbia's system was compounded by the recent explosion at the Green Springs Synthetic Gas Plant owned and operated by Columbia's affiliate, Columbia LNG Corporation (Columbia LNG). While this plant's design output of 250,000 Mcf per day is not considered a part of Columbia's own gas supply, all of this synthetic gas was regularly sold to Columbia's wholesale customers, was transported to said customers by Columbia and is relied upon by them as part of their total gas supplies. One of the two trains in this plant was restored to operation on January 16, 1977, at a reduced level of output.

The Commission has heretofore authorized the importation of LNG to the United States from Skikda by Distriegas Corporation (Distriegas). Natural gas at Skikda is subject to claims of entitlement from the istanbul Government of the Republic of Turkey. The instant application does not indicate the source of the LNG proposed to be imported by Columbia. However, the authorization hereinafter granted is not intended and shall not prejudice any claim which Distriegas may have for gas from Skikda under any authorization which has hereafter been granted by the Commission or in any proceeding presently before the Commission. The Commission is cognizant of the unprecedented cold weather which has affected the nation east of the Rocky Mountains, including the area served by Columbia. By order issued January 18, 1977, in Docket No. CP77-63-3 the Commission authorized Columbia to import 15,000,000 Mcf of natural gas to meet the immediate needs of its system and for the same reason has authorized the proposal in the instant application. The authorization granted herein is subject to the broad powers conferred upon the Commission by Sections 3 and 16 of the Natural Gas Act. "Public Service Commission of the State of New York v. FPC," 327 F. 2d 893; "Niagara Mohawk Power Corp. v. FPC," 379 F. 2d 153. The Commission finds, (1) A natural gas supply emergency exists in the system of Columbia which has substantially diminished Columbia's ability to render natural gas service for high priority end uses.

(2) It is not inconsistent with the public interest to authorize the importation of natural gas as proposed by Columbia.

(3) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act to waive the regulations of the Commission thereunder to permit the granting of authorization as hereinafter provided.

(4) Prior public notice of this proceeding is impracticable, unnecessary, and contrary to the public interest, given the circumstances set forth above.

The Commission orders. (1) Columbia is authorized to import up to two shipments of approximately 35,000 cubic meters each of LNG from Algeria to the United States, as hereinbefore described and more fully described in the application, upon the terms and conditions of this order.

(2) The natural gas herein authorized to be imported shall not be used to displace alternate fuel capability or cause other gas to displace alternate fuel capability.

(3) The regulation under the Natural Gas Act are waived to permit the acceptance of the instant application and the expeditious granting thereof in view of the demonstrated emergency;
however, within 10 days from the date the LNG is unloaded at Everett, Massachusetts, Columbia shall file the following with the Commission:

(1) Copies of any contracts with Sonatrach for importation of LNG.
(2) Copies of any contracts with multinational and/or others for transportation of the LNG from Algeria to the United States, and
(3) Copies of any contracts with DOMAC, other natural gas companies, or other persons or municipalities for transportation of the LNG or equivalent volumes of vaporous natural gas for or to Columbia, by displacement or otherwise, in the United States.

(D) Columbia shall advise the Commission of the arrival of each ship at Everett, Massachusetts, within one day (24 hours) thereof and of the volume of LNG carried by said ship for Columbia.

By the Commission.

KENNETH F. PLUMB, Secretary.

[F.R Doc. 77-4864 Filed 2-15-77; 8:45 am]

[Docket No. ER77-178]

CONNECTICUT LIGHT AND-POWER CO.

Amendment to Transmission Agreement

FEBRUARY 9, 1977.

Take notice that on January 31, 1977, The Connecticut Light and Power Company (CL&P) tendered for filing a proposed Amendment to Transmission Agreement (Amendment) dated November 1, 1976 between (1) CL&P, Hartford Electric Light Company (HELCO), and Western Massachusetts Electric Company (WMECO) and (2) Long Island Lighting Company (LILCO).

CL&P states that LILCO has executed a contract with the Vermont Electric Power Company (VELCO) of Rutland, Vermont, for the purchase of power from VELCO's entitlement in the Vermont Yankee nuclear generating facility (the LILCO purchase) in the amount of 30,000 kilowatts for the period November 1, 1976 to March 31, 1976, 23,000 kilowatts for the period May 1, 1976 to October 31, 1976, 70,000 kilowatts for the period November 1, 1976 to November 30, 1976 and 28,000 kilowatts for the period December 1, 1976 to March 31, 1977.

CL&P states that the Amendment provides for an extension of the termination date of the Transmission Agreement from October 31, 1976 to March 31, 1977 together with changes in LILCO's entitlement from Vermont Yankee nuclear generating facility.

CL&P states that after arrangements had been completed with all interested parties, there was not sufficient time to prepare, execute and file the Amendment with the Commission more than thirty days prior to the proposed effective date. CL&P therefore requests that, in order to permit LILCO to receive transmission service to wheel the LILCO purchase, the Commission, pursuant to § 35.11 of its regulations, waive the thirty-day notice period and permit the Amendment to become effective on May 1, 1976.

CL&P states that the monthly transmission charge is equal to one-twelfth of the estimated annual average unit cost of transmission service on the Northeast Utilities system determined in accordance with § 35.11 of the Commission's regulations, which were the subject of PTP. Costs of the New England Power Pool (NEPOOL) Agreement and the uniform rules adopted by the NEPOOL Executive Committee, multiplied by the number of kilowatts of winter capability which LILCO is entitled to receive.

HELCO and WMECO have filed certificates of concurrence in this document. CL&P states that copies of this rate schedule have been mailed or delivered to CL&P, Hartford, Connecticut, HELCO, Hartford, Connecticut, WMECO, West Springfield, Massachusetts and LILCO, Hicksville, New York.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.1 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.1, 1.10). All such petitions or protests must be filed on or before February 22, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not affect the disposition of the petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB, Secretary.

[F.R Doc. 77-4864 Filed 2-15-77; 8:45 am]

[Docket No. CP68-113]

CONSOLIDATED GAS SUPPLY CORP.

Petition to Amend

FEBRUARY 9, 1977.

Take notice that on January 31, 1977, Consolidated Gas Supply Corporation (Petitioner)' 440 White Street, Clarksburg, West Virginia 26301, filed in Docket No. CP68-113 a petition to amend the Commission's order of December 29, 1976 (37 FPC 1967), issued in the instant docket pursuant to section 7(c) of the Natural Gas Act so as to authorize Petitioner to use certain exchange facilities constructed and operated under said certificate for the purpose of correcting any imbalances which may occur under a separate exchange agreement with Cabot Corporation (Cabot), all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

It is stated that pursuant to the certificate issued in Docket No. CP68-113, Petitioner is authorized to exchange natural gas with Cabot in Calhoun and Pleasants Counties, West Virginia.

It is further stated that Petitioner and Cabot are parties to another exchange agreement, known as the “Multiwell Exchange Agreement” in Docket No. G-5236, under which deliveries are received by Petitioner from Cabot at various points in southern West Virginia, and equivalent volumes are returned to Cabot by delivery into Cabot's Southern West Virginia distribution system. It is asserted that by the end of December 1976, deliveries by Cabot had declined to approximately 33,352 Mcf per month, and a cumulative deficit in Cabot exchange deliveries of 241,496 Mcf had resulted. Petitioner states that in order to correct this imbalance, it entered into a supplemental agreement with Cabot dated February 20, 1976, which provided for the addition to Multiwell Exchange of two producing oil and gas leasesholds and one new delivery point to Petitioner in McDowell County, West Virginia. Petitioner further states that by or before March 30, 1976, the imbalance had been eliminated, and, in fact, Petitioner's monthly Multiwell deliveries are now running approximately 33,600 Mcf less than Cabot's.

It is stated that the proposed amendment would enable Petitioner and Cabot to achieve greater flexibility in the operation of existing jurisdictional transmission facilities, and would avoid the necessity of constructing duplicate facilities.

Any person desiring to be heard or to make any protest with reference to said petition to amend should file a petition for intervention or protest with the Commission by March 4, 1977, with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.1, 1.10) and the regulations under the Natural Gas Act (15 CFR 157.10). All protests filed with the Commission will be considered by it for determining whether any protest shall be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to the proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB, Secretary.

[F.R Doc. 77-4864 Filed 2-15-77; 8:45 am]

[Docket No. CP68-113]

CONSOLIDATED GAS SUPPLY CORP.

Findings and Order Authorizing Importation of Natural Gas

FEBRUARY 8, 1977.

On February 7, 1977, Consolidated Gas Supply Corporation (Consolidated) filed in Docket No. CP77-189 an application pursuant to section 5 of the Natural Gas Act and part 153 of the Commission's regulations for authorization to import up to 58,000 cubic meters of liquefied nat-
ural gas (LNG) from Algeria. Consolidated proposes to purchase two shiploads of LNG from Sonatrach at Skikda, Algeria, and has arranged for its transportation to the LNG terminal and re-vaporization facilities of Distirgas of Massachusetts Gas Company for delivery to Consolidated. The re-vaporized LNG will be physically delivered through the local distribution facilities of Boston Gas Company (Boston Gas) and Consolidated will receive gas via exchange with this terminal.

The proposal is more fully set forth in the application. Consolidated proposes to purchase the subject gas from Sonatrach F.O.B. Skikda, Algeria, at a price of $1.40 per million Btu and has arranged with Hilmar Rekston, a Norwegian corporation, for its transoceanic transportation at a rate of $0.75 per million Btu. DOMAC will charge Consolidated $1.00 per million Btu to receive, terminal, and re-vaporize the LNG imported. In addition, Boston Gas will impose a charge of 23.5 cents per million Btu because of this terminal's贶ial Btu equalization charge. It is estimated that the total cost will be approximately $3.40 per Mcf, plus any charges assessed as a result of exchanges with other pipelines. No contracts for the purchase of the transoceanic transportation were submitted with the application by Consolidated pursuant to § 155.4 of the Commission's regulations. However, in view of the emergency to be addressed, we will waive this requirement. The authorization herein granted will be conditioned upon the filing of such contracts within 10 days from the date the LNG is unloaded at Everett, Massachusetts.

The Commission has heretofore authorized the importation of LNG to the United States from Skikda by Distirgas Corporation, having offices at Boston. The application states that Consolidated and DOMAC have received assurances from Sonatrach that the instant transaction will in no way impinge on Sonatrach's ability or existing contractual obligations to deliver LNG to DOMAC. Applicant has been authorized to state that these assurances are satisfactory to DOMAC.

No applications, either under the Natural Gas Act or the recent emergency legislation, are submitted concurrently with this import request for authority to effectuate the exchanges with other pipelines from Boston to the Consolidated system. Our order is conditioned upon satisfactory evidence of these arrangements. Should the exchanges be commenced, emergency provisions contained in § 155.22 of the Commission's regulations, we wish to remind the pipelines participating of the requirement for prompt notification of the commencement of service, and the time limitations imposed.

Consolidated proposes to flow through these charges under the purchase gas adjustment clause of its tariff and specifically requested a waiver of § 154.38(d) (4) of the Commission's regulations to the extent that it would prohibit Consolidated from flowing through the cost related to the LNG to be imported under its PGA clause. The proposed application does not identify any charges to be assessed by other pipelines for exchanges. Given this fact, as well as the lack of written contracts for purchase and ocean transportation, this request for a PGA treatment requested by Consolidated cannot be fully assessed. Moreover, as we see it, the urgency relates to approval of the import itself, not the PGA treatment, and notice of this request for waiver of § 154.38(d) (4) will permit interested persons to comment, as well as the actual charges by contract for ocean transport and related services, and by contract for ocean transport and related services.

In its application, Consolidated asserts that prompt authorization of the importation and purchase is urgently needed to assist it in the unprecedented emergency gas supply situation over its system. Consolidated describes its supply situation as follows:

On January 16, 1977, Consolidated instituted a force main curtailment requiring the curtailment of all industrial loads except plant protection as defined by § 2.78 of our Statements of General Policy and Regulations. We noted in the order issued February 5, 1977, in Docket No. RP77-29, that the implementation of the force main curtailment is expected to result in the closure of 1600 industrial plants throughout Consolidated's service area. More than 130,000 employees are out of work.

Consolidated has requested that its commercial and residential needs be met by alternative sources of supply, such as coal, fuel oil, and oil. Despite all the measures Consolidated has taken, a grave, supply constraint still exists on its system. On February 1, 1977, its storage inventories were 50 million Mcf below the normal level for that date. Although Consolidated recently proposed, in Docket No. RP77-29, to implement shortly an emergency tariff plan that would partially lift the force main curtailment, Consolidated notes that the continuing cold winter may make replenishment of storage more difficult. The Commission is cognizant of the unprecedented cold weather which has affected the eastern half of the country including Consolidated's service region. The application by Consolidated for an order authorizing the proposed limited project herein clearly demonstrates that additional gas is needed to assist Consolidated in maintaining its ability to render natural gas service to its high priority customers. Viewed in this context, we shall grant authorization for the proposed importation under the broad powers conferred upon the Commission by sections 3 and 16 of the Natural Gas Act. "Public Service Company of the State of New York v. FPC," 327 F. 2d 803; "Niagara Mohawk Power Corp. v. FPC," 379 F. 2d 153.

The Commission finds: (1) A natural gas emergency situation exists on the Consolidated Gas Supply Corporation system which has substantially diminished Consolidated's ability to render natural gas service to its high priority customers. (2) It is not inconsistent with the public interest to authorize the importation of natural gas as proposed by Consolidated. (3) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act to waive the regulations of the Commission that would render the granting of authorization as hereinbefore provided.

Prior public notice of this proceeding is impracticable, unnecessary, and contrary to the public interest, given the circumstances set forth above.

The Commission orders: (A) Consolidated is authorized to import up to two shiploads of approximately 52,000 cubic meters each of LNG from Algeria to the United States, as hereinbefore described and as more fully described in the application, upon the terms and conditions of this order. (B) The natural gas herein authorized to be imported shall not be used to displace alternate fuel capability or cause other gas to displace alternate fuel capability. (C) The Regulations under the Natural Gas Act are waived to permit the acceptance of the instant application for filing and the expeditious granting of the relief it contains. The granting of authorization as hereinbefore provided. (D) Copies of any contracts with Sonatrach for the purchase of LNG, (E) Domac shall file the following with the Commission upon commencement of service, and the time limitations imposed.

The Secretary shall prepare and send copies of any contracts with Hilmar Rekston and/or others for transportation of the LNG from Algeria to the United States, and (F) Copies of any contracts with Hilmar Rekston and/or others for transportation of the LNG from Algeria to the United States, and (G) Copies of any contracts with DOMAC, other natural gas companies, or other persons or municipalities for transportation of the LNG or equivalent volumes of vaporous natural gas for or to Consolidated, to the public interest, by displacement or otherwise, in the United States. (H) Consolidated shall advise the Commission of the arrival of each ship at Everett, Massachusetts, within one day (24 hours) thereof and the volume of LNG carried by said ship. (I) The Secretary shall prepare a notice of the request for a waiver of § 154.38(d) (4) of the regulations submitted by Consolidated authorizing flow through transportation of the LNG authorized herein through the operation
of the PGA clause contained in Volume No. 1 of its FPC gas tariff.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[F.R. Doc. 77-4876 Filed 2-15-77; 8:45 am]

Docket No. CP77-155

EL PASO NATURAL GAS CO.

Notice of Application

February 9, 1977.

Take notice that on January 27, 1977, El Paso Natural Gas Company (Applicant), P.O. Box 1492, El Paso, Texas 79979, filed in Docket No. CP77-155 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon from its interstate system certain gas purchase facilities, together with the natural gas service and associated therewith and since Applicant proposes to abandon the following gas purchase meter stations and pipeline:

(1) The Warren-Tatum Plant No. 29 meter station located in Lea County, New Mexico, and authorized in Docket No. G-12500 (8 FPC 6231), due to the decline in availability of the gas supply from Warren Petroleum Company;

(2) The J. Cleo Thompson Pure University *A* No. 1 meter station located in Eddy County, New Mexico, and authorized in Docket No. CP74-60 (36 FPC 979), due to the depletion of the gas produced from the zone in which Applicant has been purchasing gas from the University *A* No. 1 Detrial Well also located in Crane County, Texas; and

(3) The Walterschied Com. No. 1 meter station and approximately 0.69 mile of 4 1/2-inch O.D. pipeline located in Eddy County, New Mexico, and authorized at Docket No. CP74-85 (51 FPC 388), due to the plugging and abandonment of such well by the producer, Cities Service Oil Company.

Applicant also proposes to abandon the following gas sales meter stations and pipeline:

(1) The U.S.I.L.S. Diesel Plant meter station served by the distributor, Southwest Gas Corporation, located in Pinal County, Arizona, and authorized at Docket No. G-208 (4 FPC 460), since gas service has not been rendered by Applicant since 1972 and is no longer required; and

(2) The Dallas Street Sales Lateral pipeline, consisting of approximately 0.07 mile of 4 1/2-inch O.D. pipeline, authorized in Docket No. G-287 (7 FPC 886), and located in El Paso County, Texas, inasmuch as the abandonment of the Peyton tap served by the Peyton Packing Company on July 20, 1976, obviated the need for such pipeline and the deliveries associated therewith and since Applicant does not envision a further use for such pipeline.

It is stated that Applicant further proposes to abandon an approximate 3.0 mile segment of the 12 1/4-inch El Paso to Douglas Mainline Loop Pipeline authorized in Docket No. G-288 (4 FPC 480), and located in Luna County, New Mexico, in order that approximately 2.1 miles of such pipeline may be utilized after reconducting and replacing the deteriorated segment of Applicant's 123 1/4-inch O.D. El Paso to Douglas Mainline transmission pipeline. It is stated that due to a misunderstanding by Applicant's field operating personnel as to the regulatory requirements respecting removal of the segment of 3.0 miles of loop pipeline herein proposed to be abandoned, such segment was physically removed during the period of August 17 through August 29, 1976, and is currently awaiting reconditioning.

It is further stated that the four meter stations, with appurtenances, would be removed, salvaged and placed into stock pending a future need, and that the Dallas Street pipeline would be abandoned in place.

Applicant estimates the cost of the proposed abandonment to be $27,400, including filing fees.

Any person desiring to hear or to make any protest with reference to said application should on or before February 24, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition for leave to intervene for a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.110). Any protests filed with the Commission will be considered by it in determining the appropriate action to be taken and will not serve to make the protestants parties to the proceeding.

Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided, for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

Docket No. CP77-176

KANSAS-NEBRASKA NATURAL GAS CO., INC.

Application

FEBRUARY 9, 1977.

Take notice that on February 1, 1977, Kansas-Nebraska Natural Gas Company, Inc. (Applicant), 300 N. St. Joseph Avenue, Hastings, Nebraska 68901, filed in Docket No. CP77-176 an application pursuant to section 7 of the Natural Gas Act for permission and approval to abandon certain existing facilities and for a certificate of public convenience and necessity authorizing the construction and operation of natural gas pipeline facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it has recently obtained a gas purchase contract on reserves produced from the Lance and Cody formations in Fremont County, Wyoming, from which initial delivery of gas into Applicant's gathering pipeline system is estimated to average 11,300 Mcf per day with a peak day potential of approximately 17,000 Mcf per day. Applicant also states that it anticipates a substantial increase in daily delivery volumes upon the 1977 completion and connection of a third Cody well. Applicant asserts that it must substantially increase its gathering pipeline capacity in the Cody formation in order to meet its existing and reasonably projected future gas purchase contract obligations.

Applicant, therefore, proposes to install a 10-inch gas pipeline extending from Applicant's existing 10-inch pipeline in section 23, Township 30 North, Range 90 West, Fremont County, Wyoming, south to a point of delivery on the transmission system of Northern Utilities, Inc. (Northern) at an estimated cost of $1,600,000.

It is stated that pursuant to an existing transportation agreement between Applicant and Northern dated September 18, 1965, as amended, Northern would deliver to Applicant, at Applicant's Casper, Wyoming, compressor station, that volume of gas delivered to (Northern) by Applicant. It is further stated that the transportation of such gas by Northern would be performed pursuant to Northern's FPC Gas Tariff, First Revised Volume No. 1.

Applicant states that it was authorized by order of the Commission issued in Docket No. CP62-248 (28 FPC 885) to construct approximately 33.9 miles of 8-inch gathering pipeline facilities for gathering gas produced from the Dolls Hill Field in Fremont County, Wyoming. It further stated that when the Dolls Hill Field was abandoned, the pipeline was utilized to purchase gas from wells in the Lost Cabin and Marden Fields. Applicant states that the capacity in this line is inadequate to transport the additional volumes of Marden Area Cody and Lance formation gas which Applicant has and reasonably expects to purchase, but Northern Gas Company (Northern) is not willing to acquire said line for its intrastate operations in the area.

Applicant proposes to abandon by sale an approximate 29.3 mile segment of the 8-inch pipeline together with a connecting 2.3 mile segment of 4-inch pipeline.

It is stated that Applicant would continue to purchase all gas delivered to it from the wells presently connected to the gathering pipeline facilities to be abandoned to Northern Gas, Applicant states that the volume so purchased would be received by it by adjustment of volumes purchased from wells where Applicant.

This notice does not provide for consolidation of hearing for the matters covered hereinafter.

1This notice does not provide for consolidation of hearing for the matters covered hereinafter.
NOTICES

and Northern Gas are joint purchasers under contracts with no restriction for use of the gas in interstate systems.

Any person desiring to be heard or to make any protest with reference to said application should on or before March 4, 1977, file with the Federal Power Commission, Washington, D.C. 20585, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 197.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 1 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application unless no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval of the proposed abandonment are required by the public convenience and necessity. If a petition to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB, Secretary.

[FR Doc.77-4888 Filed 2-15-77; 8:45 am]

KENTUCKY WEST VIRGINIA GAS CO.

Proposed Change in Rates

FEBRUARY 9, 1977.

Take notice that Kentucky West Virginia Gas Company (Kentucky West) on January 27, 1977, tendered for filing with the Commission a proposed change in rates resulting from the application of the Purchase Gas Cost Adjustment provision in Section 9, General Terms and Conditions of FPC Gas Tariff, Original Volume No. 1, approved by the Commission in Docket No. RP73-97 and the Purchase Gas Cost Adjustment provision in Section 18, General Terms and Conditions of FPC Gas Tariff, First Revised Volume No. 1, approved by the Commission in Docket No. RP76-83.

Kentucky West states that a copy of its filing has been served upon the purchasers and interested state commissions and upon each party on the service list of Docket No. RP77-26.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, Washington, D.C. 20426, in accordance with §§1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before February 25, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB, Secretary.

[MID LOUISIANA GAS CO.]

Application

FEVERARY 9, 1977.

Take notice that on February 1, 1977, Mid Louisiana Gas Company (Applicant), 300 Parrent Street, New Orleans, Louisiana 70130, filed in Docket No. CP-77-174 an application pursuant to section 7(e) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction of certain facilities so as to receive gas from Trunkline Gas Company (Trunkline), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it has contracted to purchase from HNG Oil Company (HNG) certain quantities of gas produced in Kansas, Nebraska, and the public convenience and necessity of the certificate and permission for leave to intervene is timely filed, or if the Commission on its own motion finds that a grant of the certificate is required by the public convenience and necessity of the certificate, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it has contracted to purchase from HNG Oil Company (HNG) certain quantities of gas produced in Kansas, Nebraska, and the public convenience and necessity of the certificate, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it has contracted to purchase from HNG Oil Company (HNG) certain quantities of gas produced in Kansas, Nebraska, and the public convenience and necessity of the certificate and permission for leave to intervene is timely filed, or if the Commission on its own motion finds that a grant of the certificate is required by the public convenience and necessity of the certificate, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB, Secretary.

[FR Doc.77-4855 Filed 2-15-77; 8:45 am]

NATIONAL FUEL GAS SUPPLY CORP.

Order Granting Petition for Declaratory Order

FEBRUARY 9, 1977.

On February 1, 1977, National Fuel Gas Supply Corporation (Supply) requested that the Commission provide appropriate relief in order to enable it to cope with the emergency situation that currently exists on its system due to the

FEDERAL REGISTER, VOL. 42, NO. 32—WEDNESDAY, FEBRUARY 16, 1977

9425
abnormally cold winter and extreme curtailments of Supply's pipeline suppliers.

Supply stressed in its petition that it can no longer maintain adequate service to its Priorities I customers to meet the essential requirements in order to prevent damage to life and property unless it secures emergency supplies pursuant to §157.23 of the Commission's regulations under the Natural Gas Act.

Supply, in its petition for a Declaratory Order, asserted that it has negotiated a 60-day emergency purchase of gas produced in Chautauqua County, New York, from Paragon Resources, Inc. (Paragon) pursuant to §157.23 of the Commission's regulations. Supply states that gas produced by Paragon will be delivered into the interstate pipeline of Tennessee Gas Pipeline Company (Tennessee) near Sherman, New York, for Tennessee Gas Pipeline Company (Tennessee) to transport the gas for Distribution of Tennessee's affiliate National Fuel Gas Distribution Corporation (Distribution) in the area of Buffalo, New York. Paragon has signed a long term contract to sell this gas to Distribution, which lacks pipeline capacity to take the gas directly into its system and has arranged service with Tennessee and Supply to transport the gas to its distribution system. Those companies have applied for authority to transport the gas to its distribution systems, but Tennessee is prepared to deliver a 60-day emergency purchase of gas to Support to avoid damage to life and property unless it secures the supplies in order to prevent damage to life and property unless it secures emergency supplies pursuant to §157.23 of the Commission's regulations.

In light of the foregoing, it is necessary and appropriate for the purposes of the Natural Gas Act to grant the relief requested by Supply, and find that Paragon will be exempt from the requirement of section 7 of the Natural Gas Act if it sells natural gas to Supply pursuant to §157.23 of the Commission's regulations as contemplated in the context of this order.

The Commission finds that good cause does not exist to permit intervention out of time, but we will accept its Brief on Exceptions as amicus curiae.

On January 21, 1977, the City of Anderson (Anderson), a Electric Power Co.) filed its Petition to Intervene Out of Time and Motion to File Brief on Exceptions of Electric Power Co.) filed its Petition to Intervene Out of Time and Motion to File Brief on Exceptions. Electric Power Co.) is an unincorporated association whose members are representative of all municipalities which, within and within the vicinity of their municipal boundaries, own and operate their own electric systems serving their citizens and customers. These municipalities purchase electric power and energy at wholesale from utilities subject to the jurisdiction of the Commission.

The parties to this proceeding are: Nevada Power Company (Nevada) and Cal-Pac, the wholesale service provider to Nevada.

Nevada Power Company (Nevada) tendered for filing a notice of cancellation of wholesale service to California-Pacific Utilities Company (Cal-Pac) at Henderson, Nevada, to become effective as of June 1, 1975. In its notice of cancellation, Nevada stated that the reason for termination is its inability to attract capital to support its sales to Cal-Pac at Henderson. Notice of the March 3, 1975, filing was issued on March 18, 1975, with comments, protests, or petitions intervenue due on or before May 1, 1975. Subsequently, Cal-Pac filed a motion to intervene within the prescribed period. Cal-Pac resisted the notice of cancellation of service at Henderson, Nevada, and moved that Nevada's tendered filing of March 18, 1975, be rejected for not conforming with the terms of §35.15 of the Commission's regulations under the Federal Power Act.

The Initial Decision of Administrative Law Judge Curtis L. Wagner, Jr., in Docket E-9305, rendered December 15, 1971, permitted Nevada to terminate service to Cal-Pac.

On January 18, 1977, North Carolina Electric Membership Corporation (N.C. EMC) and Four County Electric Membership Corporation (Four County EMC) filed a motion for Allowance of Un timely Petition to Intervene, for Acceptance of Brief on Exceptions or, in the Alternative, For Acceptance of Brief on Exceptions as amicus curiae of N.C. EMC and Four County EMC receive most of their power at wholesale in transactions governed by the Federal Power Act, and therefore seek to Intervene in order to protect their interests and the Interests of N.C. EMC's distribution member systems. We find that good cause does not exist to permit intervention out of time but we will accept their Brief on Exceptions as amicus curiae.

On January 21, 1977, the City of Anderson (Anderson), a Electric Power Co.) filed its Petition to Intervene Out of Time and Motion to File Brief on Exceptions. Electric Power Co.) is an unincorporated association whose members are representative of all municipalities which, within and within the vicinity of their municipal boundaries, own and operate their own electric systems serving their citizens and customers. These municipalities purchase electric power and energy at wholesale from utilities subject to the jurisdiction of the Commission.

Although these petitioners do not purchase gas produced in the Permian Basin area, they contend that their Interests are affected by the prudential principles which may be adopted herein justifying their intervention. However,
Thousands respond to the anici briefs. Although we accept its briefs, we are granting Nevada more time to file a brief. The Commission finds that the precedents established in this case are applied to similar proceedings to which movants are or will be parties, movants may well be affected by the precedents which may be established in this proceeding.

1. Administrative Law Judge Wagner found Nevada Power’s termination of its service to be in the public interest. If this determination is interpreted as strictly limited to the facts of this particular proceeding, movants have no interest in this proceeding.

However, if the precedents established in this case are applied to similar proceedings to which movants are or will be parties, movants may well be affected by the precedents which may be established in this proceeding.

In view of the far reaching effects of the precedents established in this proceeding, all the movants should be permitted to present their views as amici curiae. The Commission said: 22 FPC at 1982.

This order granted three associations (apparently representing between them approximately one thousand small producers of oil and gas in the Permian Basin as well as seventy public utilities distributing natural gas in fifteen states) leave to file Briefs on Exceptions as amici curiae. We accept sua sponte the Briefs on Exceptions filed by Anderson and ElectricCities as amici curiae. They may well be affected by the precedents which may be established in this case.

The City of Anderson, Indiana and ElectricCities of North Carolina are accepted as amici curiae.

Four County Electric Member Corporation has twenty days from the date of this order to file its Brief Opposing Exceptions and to respond to the above accepted Briefs on Exceptions as amici curiae.

The Secretary shall cause prompt publication of this order in the Federal Register.

By the Commission.

K. F. PLUMB,
Secretary.

[Docket No. CP77-187]

NIAGARA MOHAWK POWER CORP.
Order Authorizing Importation of Natural Gas

February 5, 1977.

On February 5, 1977, Niagara Mohawk Power Corporation (Niagara Mohawk) acting for itself and as agent for the named NYGG members, entered into an agreement with Ontario Hydro by which Ontario Hydro agrees to make available 30,000 Mcf of natural gas per day for the period through February 28, 1977. This agreement is in its application that these severe weather conditions “have resulted in complete curtailment, with the exception of plant protection volumes, of almost all industrial customers on the systems of the NYGG members.” The natural gas to be imported under this agreement would provide the NYGG additional volumes to prevent further curtailment and thus avoid severe and lasting economic harm in this area.

Niagara Mohawk, acting for itself and as agent for the named NYGG members, filed a Petition to Intervene Out of Time and Petition to Intervene and for Acceptance of Briefs on Exceptions of Niagara Mohawk.

We are granting Nevada twenty days from the date of this order to file its Brief Opposing Exceptions and to respond to the above accepted Briefs on Exceptions as amici curiae.

The Commission finds: 1. Good cause does not exist to permit N.C.EMC and Four County EMC to intervene out of time.

2. Good cause does not exist to permit Anderson to intervene out of time.

3. Good cause does not exist to permit ElectricCities to intervene out of time.

4. Good cause exists to allow N.C.EMC and Four County EMC to file their Brief on Exceptions as amici curiae.

5. Good cause exists to accept the Briefs on Exceptions of Anderson and ElectricCities as amici curiae.

The Commission orders: (A) The Motion for Leave to File Amici Unanimously Petition to Intervene and for Acceptance of Brief on Exceptions of North Carolina Electric Membership Corporation and Four County Electric Membership Corporation is denied.

(B) The Motion for Leave to File Petition to Intervene Out of Time and Petition to Intervene of the City of Anderson, Indiana is denied.

(C) The Petition to Intervene Out of Time and Motion to File Brief on Exceptions of ElectricCities of North Carolina is denied.

(D) The Motion for Acceptance of Brief on Exceptions as Amicus of North Carolina Electric Membership Corporation and Four County Electric Membership Corporation is granted.

(E) The Briefs on Exceptions filed by The City of Anderson, Indiana and ElectricCities of North Carolina are accepted as amici curiae.

(F) Niagara Mohawk Power Company has twenty days from the date of this order to file its Brief Opposing Exceptions and to respond to the above accepted Briefs on Exceptions as amici curiae.

(G) The Secretary shall cause prompt publication of this order in the Federal Register.

By the Commission.

K. F. PLUMB,
Secretary.

[Docket No. CP77-187]

NIAGARA MOHAWK POWER CORP.
Order Authorizing Importation of Natural Gas

February 5, 1977.

On February 5, 1977, Niagara Mohawk Power Corporation (Niagara Mohawk) acting for itself and as agent for certain members of the New York Gas Group (NYGG) filed in the captioned docket an application under section 3 of the Natural Gas Act for importation of natural gas acquired from Ontario Hydro-electric Power Commission (Ontario Hydro) and, under section 202 of the Federal Power Act for the exportation of electric energy to Ontario Hydro. Niagara Mohawk states, "As a result of the concurrent importation of natural gas and exportation of electric energy would be an emergency basis commencing immediately upon Commission authorization and terminating February 28, 1977, Niagara Mohawk requests that Part 153 of the Commission's regulations under the Natural Gas Act and §§ 32.30 et seq. of the Regulations under the Federal Power Act be waived. Niagara Mohawk requests also that notice requirements be waived prior to issuance of this order that an emergency situation which exists on the systems of the requesting NYGG members and the necessity for immediate action to alleviate this emergency, the Commission shall authorize the requested importation of natural gas and the exportation of electric energy; shall waive the requirements of the applicable regulations; and, shall waive notice requirements prior to the issuance of this order.

The Commission takes administrative notice of the severe weather conditions which have affected upstate New York state this winter. Niagara Mohawk states in its application that these severe weather conditions "have resulted in complete curtailment, with the exception of plant protection volumes, of almost all industrial customers on the systems of the NYGG members." The natural gas to be imported under this agreement would provide the NYGG additional volumes to prevent further curtailment and thus avoid severe and lasting economic harm in this area.

Niagara Mohawk, acting for itself and as agent for the named NYGG members, entered into an agreement with Ontario Hydro by which Ontario Hydro agrees to make available 30,000 Mcf of natural gas per day for the period through February 28, 1977.

The Secretary shall cause prompt publication of this order in the Federal Register.

By the Commission.

[Docket No. CP77-187]

NIAGARA MOHAWK POWER CORP.
Order Authorizing Importation of Natural Gas

February 5, 1977.

On February 5, 1977, Niagara Mohawk Power Corporation (Niagara Mohawk) acting for itself and as agent for certain members of the New York Gas Group (NYGG) filed in the captioned docket an application under section 3 of the Natural Gas Act for importation of natural gas acquired from Ontario Hydro-electric Power Commission (Ontario Hydro), and, under section 202 of the Federal Power Act for the exportation of electric energy to Ontario Hydro. Niagara Mohawk states, "As a result of the concurrent importation of natural gas and exportation of electric energy would be an emergency basis commencing immediately upon Commission authorization and terminating February 28, 1977, Niagara Mohawk requests that Part 153 of the Commission's regulations under the Natural Gas Act and §§ 32.30 et seq. of the Regulations under the Federal Power Act be waived. Niagara Mohawk requests also that notice requirements be waived prior to issuance of this order that an emergency situation which exists on the systems of the requesting NYGG members and the necessity for immediate action to alleviate this emergency, the Commission shall authorize the requested importation of natural gas and the exportation of electric energy; shall waive the requirements of the applicable regulations; and, shall waive notice requirements prior to the issuance of this order.

The Commission takes administrative notice of the severe weather conditions which have affected upstate New York state this winter. Niagara Mohawk states in its application that these severe weather conditions "have resulted in complete curtailment, with the exception of plant protection volumes, of almost all industrial customers on the systems of the NYGG members." The natural gas to be imported under this agreement would provide the NYGG additional volumes to prevent further curtailment and thus avoid severe and lasting economic harm in this area.

Niagara Mohawk, acting for itself and as agent for the named NYGG members, entered into an agreement with Ontario Hydro by which Ontario Hydro agrees to make available 30,000 Mcf of natural gas per day for the period through February 28, 1977. This agreement is in its application that these severe weather conditions "have resulted in complete curtailment, with the exception of plant protection volumes, of almost all industrial customers on the systems of the NYGG members." The natural gas to be imported under this agreement would provide the NYGG additional volumes to prevent further curtailment and thus avoid severe and lasting economic harm in this area.

Niagara Mohawk, acting for itself and as agent for the named NYGG members, entered into an agreement with Ontario Hydro by which Ontario Hydro agrees to make available 30,000 Mcf of natural gas per day for the period through February 28, 1977. This agreement is in its application that these severe weather conditions "have resulted in complete curtailment, with the exception of plant protection volumes, of almost all industrial customers on the systems of the NYGG members." The natural gas to be imported under this agreement would provide the NYGG additional volumes to prevent further curtailment and thus avoid severe and lasting economic harm in this area.

Niagara Mohawk, acting for itself and as agent for the named NYGG members, entered into an agreement with Ontario Hydro by which Ontario Hydro agrees to make available 30,000 Mcf of natural gas per day for the period through February 28, 1977. This agreement is in its application that these severe weather conditions "have resulted in complete curtailment, with the exception of plant protection volumes, of almost all industrial customers on the systems of the NYGG members." The natural gas to be imported under this agreement would provide the NYGG additional volumes to prevent further curtailment and thus avoid severe and lasting economic harm in this area.
through the concurrent exportation and sale of electric energy, that Ontario Hy-
dro’s electric energy capacity will not be
impaired by sale of the natural gas to
United States customers. The Commis-
sion believes that good cause ex-
ists to waive the applicable filing and not-
ice requirements at this time. However,
this waiver shall be limited to further
conditions as ordered herein.

The Commission finds, (1) A natural
gas supply emergency exists on the sys-
tems of the applicants which limits their
ability to render service for high pri-
ority uses.
(2) The proposed importation of nat-
ural gas and exportation of electric en-
ergy are not inconsistent with the public
interest.
(3) Good cause exists to waive the
pertinent filing and notice regulations
at this time, subject to the conditions
ordered herein.
(4) Prior public notice of this pro-
ceeding is impractical, unnecessary, and
counter to the public interest, given the
circumstances set forth above.
(5) Good cause exists to authorize
transportation by Tennessee, Columbia
and Consolidated.

This Commission orders, (A) Pursuant
to section 3 of the Natural Gas Act and
the regulations thereunder, Niagara Mo-
hawk is hereby authorized to import nat-
ural gas in the amount of 50,000 Mcf
per day, from the balance of this order
through February 28, 1977.
(B) The authorization for importation
of natural gas granted in this docket is
conditioned upon the appropriate au-
thorization being issued by the National
Energy Board of Canada.
(C) The natural gas imported under
this order shall not be used to displace
alternate fuel capability or other gas to
displace alternate fuel capability.
(D) Niagara Mohawk shall file within
10 days of the issuance of this order,
copies of all contracts relating to the
transportation, transmission and sale of
natural gas to the applicants authorized
by this order, all contracts under which
Niagara Mohawk may act as agent
for any party involved in these arrange-
ments. Also, Niagara Mohawk shall file
a report showing the accounting and bill-
ing procedures by which the transac-
tions between the Canadian and United States
systems will be completed, and how
the U.S. Systems will account for the trans-
actions among themselves. This report
shall have final NEB approval and the
costs basis which the NEB sets forth for
Canadian gas involved.
(E) Waiver of Part of 153 of the Com-
mission’s regulations under the Natural
Gas Act and §§ 35.36 et seq. is hereby
granted.

Commissioners Tennessee, Columbia, and
Consolidated are hereby authorized to per-
form transportation services required
under the proposals approved by this
order.

By the Commission,
KENNETH F. PLUMB,
Secretary.

PACIFIC POWER & LIGHT CO.

Application

February 9, 1977.

Take notice that on January 27, 1976,
Pacific Power & Light Company, a Maine
corporation, qualified to transact busi-
ness in the States of Oregon, Wyoming,
Washington, California, Montana, and
Idaho, with its principal business office
in Portland, Oregon, entered into agree-
ments with the Federal Power Commission,
pursuant to section 203 of the Federal
Power Act, seeking authority to acquire
from the United States of America, seek-
ing and through the Administrator of the
General Services, certain electric trans-
mission facilities located in Wash-
ington and Oregon.

Applicants seek to acquire from the
United States of America the following
facilities and associated easements and
other property rights relating thereto
which Bonneville Power Administration
facilities and real estate are in excess of its plant
requirements.

(1) Certain electric transmission util-
ity plant, including a transmission sub-
station, poles, lines, transformers, related
transmission facilities, real property and
easements necessary for the operation
thereof, owned, operated and main-
tained by the United States of America
in Coos and Yakima Counties, Wash-
ington, and Clatsop County, Oregon.

(2) The facilities and properties to be
acquired by Applicant are shown in the
exhibits accompanying the Application
filed on file with the Commission

Applicant represents that upon pur-
chase of these facilities there will be no
change in their operation.

PUBLIC SERVICE COMPANY OF NEW HAMPSHIRE

Filing of Agreement

FEBRUARY 9, 1977.

Take notice that Public Service Company of New Hampshire (PSNH) on January 24, 1977, tendered for filing an initial rate schedule a Transmission Contract with Long Island Lighting Company (the Buyer).

The Applicant contends that copies of the filing were served upon the Buyer as well as the New Hampshire Public Utilities Commission.

Any person desiring to be heard or to protest said application shall file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.W., Washington, D.C. 20426, in accordance with §§ 1.9 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.9, 1.10). All such petitions or protests should be filed on or before February 25, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this Application are on file with the Commission and are available for public inspection.

SOUTH GEORGIA NATURAL GAS CO.

Proposed Increase In Rates

FEBRUARY 9, 1977.

Take notice that South Georgia Natural Gas Company (South Georgia), on February 1, 1977, tendered for filing proposed changes in its FPC Gas Tariff, Original Volume No. 1. The proposed changes are based on the 12-month period ending October 31, 1976, as adjusted, and would increase Jurisdictional revenues by $357,857. The increased rates are proposed to become effective on March 1, 1977.

South Georgia states that the principal reasons for the proposed rate increase are to reflect (1) an increase in the overall rate of return to 10.88%; (2) increased operation and maintenance expense; and (3) a projected decline in sales volumes.

Copies of this filing have been served upon South Georgia's jurisdictional cus-
NOTICES

[FR Doc.77-4483 Filed 2-16-77;8:45 am]

SOUTHERN NATURAL GAS CO.

Proposed Increase in Rates

Take notice that Southern Natural Gas Company (South Texas), Five Greenway Plaza East, Houston, Texas 77046, filed in Docket No. CP72-18 an amendment to its application filed in said docket pursuant to section 7 of the Natural Gas Act by which amendment South Texas deletes the request for permission for and approval to abandon the 4 miles of 4½-inch O.D. pipe located at the Brooks County, Texas, delivery point, all as more fully set forth in the amendment on file with the Commission and open to public inspection.

In the initial application, South Texas proposed to abandon a gas exchange service to Trunkline Gas Company (Trunkline), and consequently proposed to abandon the following facilities:

- **Facilities**: 4 mi of 8-3/8-in O.D. pipe—Bidwell County delivery point, 500 bhp compressor—Bidwell County delivery point, 4 mi of 4½-in O.D. pipe—Brooks County delivery point, 120 bhp compressor—Brooks County delivery point.

South Texas states that it has determined that the 4 miles of 4½-inch O.D. pipe located at the Brooks County, Texas, delivery point is currently being used to gather gas produced from Mc-Cormick Oil and Gas Corporation (McCormick) and is still used. South Texas, therefore, proposes to amend its application in order to continue to utilize this gathering line.

Any person desiring to be heard or to make any protest with reference to said request should file on or before February 22, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All such petitions or protests should be filed on or before February 22, 1977. Petitions will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUM, Secretary.

[FR Doc.77-4483 Filed 2-16-77;8:45 am]

TRANSCONTINENTAL GAS PIPE LINE CORP. AND TEXAS GAS TRANSMISSION CORP.

Joint Application To Amend

FEBRUARY 9, 1977.

[FR Doc.77-4506 Filed 2-15-77;8:45 am]

Take notice that on January 28, 1977, Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas, 77001, and Texas Gas Transmission Corporation (Texas Gas), P.O. Box 1159, Owensboro, Kentucky, 42301, filed in Docket No. CP72-182 a joint application to amend a certificate of public convenience and necessity and request for temporary certificate of public convenience and necessity for exchange of natural gas, as more fully set forth in the application which is on file with the Commission and open to public inspection.

Under the proposal therein, Transco and Texas Gas seek authorization for three additional delivery points, in accordance with the letter agreements be-
NOTICES

between them, dated December 8, 1976, and January 17, 1977, Transco and Texas Gas have further amended the Exchange Agreement between them, dated July 27, 1973, as amended, to add the following points of delivery: (1) At the existing point of intersection between the systems of Transco and Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), where Tennessee's 30-inch pipeline intersects Transco's 30-inch pipelines near Kinder in Allen Parish, Louisiana; (2) At the intersection of a proposed pipeline to be constructed by Transco pursuant to its certificate authority and Transco's 30-inch Pipeline Company near Myette Point in St. Mary's Parish, Louisiana; and (3) At an existing point of interconnection between Transco and Texas Gas located near Eunice, Louisiana. (The addition of this point will allow Texas Gas to deliver volumes of natural gas to Transco pursuant to a certificate authorized to deliver volumes to Texas Gas at this point.)

The addition of the Kinder delivery point will allow Transco to receive volumes of natural gas, for Texas Gas' account, billed by Tennessee. The addition of the Myette Point and Eunice delivery points will assist Transco in taking available gas into its system from the Myette Point Field.

Any person desiring to be heard or to make any protest with reference to said application, on or before March 4, 1977, should file with the Federal Power Commission, 825 North Capitol Street, N.W., Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's rules.

Take further notice, that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. E857-177]

TUCSON GAS & ELECTRIC CO.

Filing of Los Angeles-TGE 1977 Energy Agreement

FEBRUARY 9, 1977.

The primary purpose of this Agreement is to establish terms and conditions for the delivery of electrical power and energy by TGE to Los Angeles on Sundays only during the term provided in the Agreement. The parties desire that this Agreement shall extend as an initial rate schedule until May 31, 1977.

A copy of this transmittal together with all attachments has been mailed to the Department of Water and Power of the City of Los Angeles, California.

Any person desiring to be heard or to make any application with reference to said Agreement should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before February 23, 1977. Petitions and protests filed after February 23, 1977, will be duly given.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-4889 Filed 2-15-77;7:8:45 am]

[Docket No. E857-177]

SOUTHERN NATURAL GAS CO.

Certificate Application

Take notice that on February 4, 1977, Southern Natural Gas Company (Applicant), P.O. Box 2563, Birmingham, Alabama 35202, filed in Docket No. CP77-138 an application pursuant to Section 7(a) of the Natural Gas Act and Section 2.70 of the Commission's General Policy and Interpretations (18 CFR 2.70) in accordance with the condition set forth in the Commission's order issued January 27, 1977, in Docket Nos. CP77-139 et al. (37 FCC ----), for a certificate of public convenience and necessity authorizing the transportation of natural gas on behalf of Pennzoil Producing Company (Pennzoil), all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicant proposes to transport for Pennzoil approximately 3,500 Mcf of natural gas per day for an unspecified period for use at Pennzoil's Tinsley Field, Mississippi, oil production facility. It is stated that the subject gas would be received by United Gas Pipe Line Company (United) from Pennzoil Offshore Gas Operations Inc. (P&GCO) and Pennzoil Louisiana and Texas Offshore, Inc. (PLATO), at Grand Bay, Louisiana, and transported by United through capacity it has contracted for with Mid Louisiana Gas Company to an existing point of interconnection with Applicant. Applicant would transport the gas so received to the Tinsley Field.

The Commission's order issued January 27, 1977, in Docket Nos. CP77-139, et al., authorized the transportation service for 60 days.
NOTICES

It is indicated that pursuant to two gas sales contracts between Pennozil and POGO and PLATO, dated April 8, 1976, Pennozil would purchase about 2,500 MCF per day of natural gas produced from interests owned by POGO and PLATO in Block 140, Main Pass Area, offshore, Louisiana.

Applicant states that the transportation charge would be 13 cents per MCF. The subject natural gas supply is not described for available for purchase by Applicant; and, it is said, the proposed service would have no impact on Applicant's ability to deliver to Priority 1 markets.

It is further stated that the subject gas would be diverted for general use in Applicant's pipeline system should the gas be required to relieve Priority 1 curtailments.

It is indicated that Pennozil requires approximately 3,000 MCF of natural gas per day to fuel engines which pump about 150 oil wells and fuel about 50 salt water injection wells for water flood operations at the Tinsley Field. Applicant states that it is curtailing deliveries to the field to meet essential Priority 1 requirements and to serve customers not properly classified in Priority 1 but which cannot safely sustain curtailment.

Any person desiring to hear or to make any protest with reference to said application should on or before February 24, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB, Secretary.

TENNESSEE NATURAL GAS LINES, INC., ET AL.

Application

FEBRUARY 11, 1977.

Take notice that on February 3, 1977, Tennessee Natural Gas Lines, Inc. (TNGIL), 2006 Parkway Towers, Nashville, Tennessee 37219, Tennessee Gas Pipelines Company, a Division of Tenneco Inc. (Tennessee), P.O. Box 2511, Houston, Texas 77001, and Southern Natural Gas Company (Southern), P.O. Box 2563, Birmingham, Alabama 35202, filed in Docket No. CP77-180 a joint application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing for a 60-day period the transportation and delivery of up to 150 MCF of natural gas per day to Nashville Gas Company (Tennessee), P.O. Box 2511, Houston, Texas 77001, and Southern Natural Gas Company (Southern). Applicant's Corporation's (Collins & Aikman) account, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is stated that Collins & Aikman, a diversified integrated manufacturer of textile products, conducts a carpet manufacturing and sales business through its wholly-owned subsidiary Tuffing Company (Tuffing). It is further stated that Tuffing's Nashville, Tennessee, carpet and rug manufacturing plant takes natural gas from TNGIL for its operations and has a long-term contract for the supply of natural gas with TNGIL. Collins & Aikman also has a long-term contract for the supply of natural gas with Tuffing. In order to effectuate the exchange, Collins & Aikman has entered into an exchange agreement with the City of LaGrange, Georgia, whereby Collins & Aikman would transfer to the City of LaGrange, up to 150 MCF of natural gas, it is said. It is stated that in terms of Btu's exchanged, Collins & Aikman would be transferring approximately 1.25 Btu's per every Btu delivered to Collins & Aikman. It is further stated that Collins & Aikman have agreed to buy or to sell to Tuffing its gas, if LaGrange's propane air plant has capacity available for such amounts. It is said that in return Southern would compensate Collins & Aikman for quantities of propane transferred by providing equivalent amounts of natural gas, up to 150 Mcf per day, on subsequent days when Priority 1 requirements are being met.

In order to effectuate the exchange TNGIL, Tennessee, and Southern propose to transport and deliver up to 150 Mcf of gas per day to Nashville Gas for Collins & Aikman's account. It is stated that Southern would deliver gas at an existing point of delivery equivalent to 150 Mcf of gas per day released by LaGrange. It is stated that Tuffing would deliver at an existing point of delivery equivalent to 150 Mcf of natural gas per day to Nashville Gas. It is said that in terms of Btu's exchanged, Collins & Aikman would be transferring approximately 1.25 Btu's per every Btu delivered to Collins & Aikman. It is further stated that TNGIL would charge 4.0 cents per Mcf for all quantities transported to TNGIL for Collins & Aikman's account. It is further stated that TNGIL would charge 3.4 cents per Mcf for all quantities transported to Nashville Gas and no charge would be made for the natural gas transported to Nashville Gas.

Any person desiring to be heard or to make any protest with reference to said application should on or before February 24, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB, Secretary.

[Excerpts from the original document have been redacted.]
NOTICES

Regulations under the Natural Gas Act (15 CFR 157.10). All protests filed with the Commission are considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission’s Practice Manual.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 16 of the Natural Gas Act and the Commission’s Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application. No petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

Deputy Secretary of the Board.

[F.R. Doc.77-4990 Filed 2-16-77;8:45 am]

FIRST NATIONAL BOSTON CORP.

Order Approving Acquisition of Bank

First National Boston Corporation, Boston, Massachusetts, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board’s approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire all of the voting shares of the successor bank by merger to The First National Bank of Yarmouth, Yarmouth, Massachusetts.

The bank with which Bank is to be consolidated has no significance except as a means to facilitate the acquisition of the voting shares of the Bank. Accordingly, the proposed acquisition of shares of the successor organization is treated herein as the proposed acquisition of the shares of the Bank.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application together with all comments received, including those of the Comptroller of the Currency, in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant has no subsidiary banking offices in the Commonwealth of Massachusetts. The largest commercially bank holding organization in Massachusetts controls four banks with aggregate domestic deposits of approximately $3,403 million, representing 23.52 percent of total domestic deposits in commercial banks in the State. Acquisition of Bank would increase Applicant’s share of commercial bank deposits in the State only slightly and would not have a significant effect upon the concentration of banking resources in Massachusetts.

Bank (deposits of $33.2 million) operates seven bank offices in the Barnstable County (Cape Cod) banking market, the relevant geographic market for purposes of analyzing the competitive effects of the proposed acquisition. Bank is the fourth largest of eight banks in the Barnstable County banking market, with 13.5 percent of the total deposits held by offices of commercial banks in that market, and is the sixty-ninth largest commercial bank in the State with .20 percent of the total commercial bank deposits in the State. Inasmuch as Applicant has no subsidiary banking offices in that market (the nearest office of Bank to any office of Applicant’s subsidiary banks is approximately 73 miles), the Board is of the opinion that Applicant’s acquisition of Bank would not result in the elimination of a significant amount of existing competition.

While the market is somewhat concentrated and Applicant possesses the financial and managerial resources to enter the Barnstable County market de novo, the amount of potential competition that would be eliminated in the context of the subject proposal is not considered significant, in view of Bank’s market share and rank in the Barnstable County market.

In the context of this proposal, the Board regards the financial and managerial resources of Applicant and its subsidiaries as generally satisfactory and their future prospects as favorable. On March 18, 1976, the Board denied an unrelated bank acquisition application filed by Applicant. The Board expressed the view that Applicant should direct its financial and managerial resources toward its existing structures. That application

The Comptroller of the Currency recommended that the Board approve the instant application.

Deposit data as of March 31, 1976, unless otherwise indicated.

As of September 30, 1976.

As of December 31, 1976.

Applicant’s order of March 18, 1976, denying the application of First National Boston Corporation, Boston, Massachusetts, to acquire The Blackstone Valley Bank, Blackstone, Massachusetts, 62 F. R. C. Bull. 372 (1976).

FIRST BANCSHARES OF KIRKSVILLE, INC.

Formation of Bank Holding Company

First Bancshares of Kirksville, Inc., Kirksville, Missouri, has applied for the Board’s approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of 87.5 percent of the voting shares of First National Bank, Kirksville, Missouri. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of St. Louis. Any person wishing to comment on the application should submit views in writing to the Reserve Bank, to be received not later than March 10, 1977.

GRiffTH L. GArwoD,
Deputy Secretary of the Board.

[F.R. Doc.77-4990 Filed 2-16-77;8:45 am]
confronted a proposed cash purchase of shares; whereas the instant application concerns a transaction involving shares. Applicant's financial condition has improved somewhat this past year and that improvement is expected to continue. The financial and managerial factors and future prospects of Bank, absent consummation of the proposed acquisition, are not entirely satisfactory but are expected to improve as a result of Bank's association with Applicant. Applicant has committed that, upon consummation of the acquisition, it would make a contribution of funds to increase Bank's equity capital position and would provide Bank with managerial assistance. Accordingly, the financial and managerial factors, as they relate to Bank, lend some weight toward approval of the application.

Affiliation with Applicant would enable Bank to draw upon Applicant's resources and expertise and thereby offer expanded services to Bank's customers. Applicant states that, following consummation of the acquisition, Bank would make available to its customers new services, including free checking accounts, overdraft privileges, and 90-day notice accounts. Through affiliation with Applicant, Bank would also expand existing services, such as revolving auto loans, credit card services, and prepayment certificates of deposit. It is expected that enabling Bank's customers to obtain additional and expanded services through Bank would result in Bank becoming a more attractive banking alternative and stronger competitor in the relevant banking market. Considerations relating to the convenience and needs of the community to be served together with the financial and managerial factors discussed above, outweigh any adverse competitive effects that might result from consummation of the proposal.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this order, or (b) later than three months after the effective date of this order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Boston, pursuant to delegated authority.

By order of the Board of Governors,\(^1\) effective February 9, 1977.

GRIGGHT &. GARWOOD, Deputy Secretary of the Board.

8435

NOTICES

LINCOLN NATIONAL CO.

Acquisition of Shares of Bank

Lincoln National Company, Saba Cynwyd, Pennsylvania, has applied for the Board's approval under 3(a) (3) of the Bank Holding Company Act (12 U.S.C. 1842(c) (3) to acquire, indirectly, 9.9 percent of the voting shares of The Bryn Mawr Trust Company, Bryn Mawr, Pennsylvania. The factors that are considered in such an acquisition are set forth in 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Philadelphia. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors, Federal Reserve System, 20551, to be received not later than March 7, 1977.

GRIGGIHT L. GARWOOD, Deputy Secretary of the Board.

[FR Doc. 77-4894 Filed 2-15-77; 7:4: am]

QUIVIRA BANC SHARES, INC.

Order Approving Formation of Bank

Quiwira Bank Shares, Inc., Hutchinson, Kansas, has applied for the Board's approval under section 3(a) (1) of the Bank Holding Company Act (12 U.S.C. 1842 (a) (1)) of formation of a bank holding company through acquisition of 80 percent or more of the voting shares of The First National Bank of Sterling, Sterling, Kansas ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(c) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant, a nonoperating corporation with no subsidiary, has been organized under the laws of the State of Kansas for the purpose of becoming a bank holding company through the acquisition of Bank. Upon consummation of the proposed transaction, Applicant would own the 33rd largest bank in Kansas, controlling less than 0.1 percent of the total deposits in commercial banks in the State. Bank (deposits of $4.4 million) is the third largest of eight banks in the relevant banking market and controls approximately 13.4 percent of the total deposits in commercial banks in the market.

Several principals of Applicant are also principals in four other bank holding companies in Kansas. However, none of these banking organizations operates in Bank's market. Thus, it appears that no meaningful competition would be eliminated as a result of this proposal. Inasmuch as the proposed transaction represents a reorganization of the ownership of 80 percent or more of the shares of Bank from individuals to a corporation owned by the same individuals, it appears that the acquisition of Bank by Applicant would not have any significant adverse effect upon either existing or potential competition within the relevant banking market. Accordingly, on the basis of the record, the Board concludes that competitive considerations are consistent with approval of the application.

The financial and managerial resources of Applicant and Bank are regarded as satisfactory. The future prospects of Applicant are dependent upon the financial position of Bank, which are also regarded as satisfactory. While Applicant will incur acquisition debt as a result of this proposal, Applicant plans to meet its debt servicing requirements through dividends to be declared by Bank. In the Board's view, Applicant's earnings prospects appear to be adequate in order to service that debt without adversely affecting the financial condition of Bank. Furthermore, the financial and managerial resources of the other bank holding companies with which several of Applicant's principals are associated are regarded as satisfactory. Accordingly, the Board concludes that considerations relating to the banking factors are consistent with approval of the application. Applicant proposes to increase the interest rates paid on depositors' time and savings accounts and to speed customer servicing by computerizing records of customers' accounts. Considerations relating to the convenience and needs of the community to be served are regarded as being consistent with approval of the application. Accordingly, it is the Board's judgment that the proposed transaction would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this order nor (b) later than three months after the effective date of this order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Kansas City pursuant to delegated authority.

By order of the Board of Governors,\(^1\) effective February 9, 1977.

GRIGGHT L. GARWOOD, Deputy Secretary of the Board.

FEDERAL TRADE COMMISSION

Consent Agreement with Analysis to Aid Public Comment

Pursuant to section 6(f) of the Federal Trade Commission Act, 15 U.S.C. 45 and § 2.34 of the Commission's rules of practice (16 CFR 2.34, 40 FR 15236, April 1, 1975), notice is hereby given that the following consent agree-

ment containing a consent order to cease and desist and an explanation thereof, having been filed with and provisionally accepted by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited on or before April 15, 1977. Such comments or views are directed to: Office of the Secretary, Federal Trade Commission, 6th Street and Pennsylvania Avenue, NW., Washington, D.C. 20580.

Las Animas Ranch, Inc., ET AL.

Las Animas Ranch, Inc., ET AL.

AGREEMENT CONTAINING CONSENT ORDER TO CEASE AND DESIST

In the matter of Las Animas Ranch, Inc., a corporation; Mount Blancena Steates, Mount Blanca Valley Ranches, Inc., Chubasco, Inc., Pine Cone Properties, Inc., O'Keefe-Baldwin & Associates, Ltd., a limited partnership, Trinchera Creek Estates, Ltd., and Danney W. O'Keefe, individually and as an officer, stockholder and managing partner of said corporations and partnerships, and Charlie B. Biedstern, individually and as an officer, stockholder and managing partner of said corporations and partnerships.

The Federal Trade Commission having received on the public record for a period of sixty (60) days for reception of comments by interested persons.

Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received, and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

The complaint alleges that the various corporations have sold lots in several Colorado subdivision projects, including Las Animas Ranch, Mount Blanca Estates, Mount Blanca Valley Ranches, Inc., and Trinchera Creek Estates. In marketing these subdivisions, it is alleged that the respondents misrepresented the value of their land as an investment and its suitability as a homesite. Further, it is alleged that respondents did not inform customers that their purchase was a risky investment and that they would probably be unable to resell their lot. Additional allegations include that the respondents misrepresented the cost and availability of water, sewage disposal, electricity, and telephone service that they used unfair contract provisions. The proposed order requires public respondents to make full and fair disclosure of all material facts, including the availability of water, sewage disposal, electricity, and telephone service that they used unfair contract provisions. The proposed order also provides for a ten-day “cooling-off” period after purchase of a lot and for a three-day “cooling-off” period following a property inspection tour if a refund is based on such a tour.

There is no consumer redress in the order, but the agreement reserves for the Commission the right to later file a consumer redress action.

The purpose of this action is to facilitate public comment on the proposed order, and it is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

Las Animas Ranch Inc., ET AL.

[FR Doc No. 77-2617]

AGREEMENT CONTAINING CONSENT ORDER TO CEASE AND DESIST

In the matter of Las Animas Ranch, Inc., a corporation; Mount Blancena Estates, Mount Blanca Valley Ranches, Inc., Chubasco, Inc., Pine Cone Properties, Inc., O'Keefe-Baldwin & Associates, Ltd., a limited partnership, Trinchera Creek Estates, Ltd., a general partnership, Charles R. Biedstern, individually and as an officer, stockholder and managing partner of said corporations and partnerships; and Danney W. O'Keefe, individually and as an officer, stockholder and managing partner of said corporations and partnerships.

This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.54 of the Commission's rules, the Commission may, without further notice to proposed respondents, (1) issue its complaint corresponding in form and substance with the draft of the complaint attached hereto, containing factual findings and conclusions of law as attached and its decision containing the following order to cease and desist in disposition of the proceeding, and (2) make information public in respect thereto.

When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Mailing of the complaint, findings of fact, and conclusions of law and decision containing the agreed-to order to proposed respondents' address as stated in this agreement shall constitute service. Proposed respondents waive any right to contest in administrative proceedings the findings and conclusions contained in the draft of the complaint and order pursuant thereto bar any action under section 19 of the Federal Trade Commission Act, as amended.

This agreement is for settlement purposes only and does not constitute an admission by the respondents that the law has been violated as alleged in the draft of complaint here attached.
NOTICES

1. That real estate is a good or safe investment, or that the purchase of a lot in one of respondents' subdivisions is a good or safe investment.

2. That there is little or no financial risk involved in the purchase of respondents' lots.

3. That the resale of a lot purchased from respondents is not difficult.

4. That the value of, or demand for, any land, including lots being offered for sale or previously sold by respondents, has increased, increased, or will increase, without clearly and conspicuously disclosing at the same time, and by the same medium by which the price increases are communicated, that the price increases of respondents' lots do not in any way relate to the value of said lots.

5. That the purchase of a lot in one of respondents' subdivisions is a way to achieve financial security or prosperity, to deal with inflation or to become wealthy.

6. That the land in any of respondents' subdivisions will soon be unavailable or will be unavailable or will become increasingly scarce.

7. That sales commissions, advertising, offering for sale of subdivisions, in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:
   A. Misrepresenting:
      1. That real estate is a good or safe investment, or that the purchase of a lot in one of respondents' subdivisions is a good or safe investment.
      2. That there is little or no financial risk involved in the purchase of respondents' lots.
      3. That the resale of a lot purchased from respondents is not difficult.
      4. That the value of, or demand for, any land, including lots being offered for sale or previously sold by respondents, has increased, increased, or will increase, without clearly and conspicuously disclosing at the same time, and by the same medium by which the price increases are communicated, that the price increases of respondents' lots do not in any way relate to the value of said lots.
      5. That the purchase of a lot in one of respondents' subdivisions is a way to achieve financial security or prosperity, to deal with inflation or to become wealthy.
      6. That the land in any of respondents' subdivisions will soon be unavailable or will be unavailable or will become increasingly scarce.

FEDERAL REGISTER, VOL. 42, NO. 22—WEDNESDAY, FEBRUARY 16, 1977
This is a contract by which you agree to purchase land. The future value of this land is uncertain—Do not count on an increase in its value. You should not consider this purchase as an investment. In fact, purchasers may not be able to resell their land.

It is suggested that you consider your needs carefully and contact a lawyer, realtor or other qualified professional about this purchase.

__________________________  _________________________
(Signature)  (Date)

No contract for the sale of respondents' land shall be valid unless this statement is signed and dated by the purchaser after he has had a reasonable amount of time to read the whole page.

D. Whenever respondents provide prospective purchasers with a contract for the sale of land by any means other than by mailing said contract directly to such purchasers:

1. Furnish each purchaser, at the time the purchaser signs a contract for the sale of land, with two copies of a form, captioned in 12-point type "NOTICE OF RIGHT OF CANCELLATION," which shall contain in 10-point boldface type the following information and statements:

   Date of Transaction: __________________________
   Contract Number: __________________________
   Notice of Cancellation: __________________________

   You may cancel this transaction, without any penalty or obligation, at any time prior to midnight of the tenth business day after the date shown on the contract.
   If you cancel, any payments made by you under the contract may be returned within ten business days.

2. Before furnishing copies of the above "Notice of Right of Cancellation" to the purchaser, complete both copies by entering the name of the respondent, the address of the respondent's place of business, the date of the transaction, the contract number and the date by which the purchaser may give notice of cancellation, but in no event may such date be earlier than the tenth business day following the date of the transaction.

3. Where the Notice of Cancellation is received and said notice is not properly signed, and respondents do not intend to honor the notice, immediately notify the purchaser by certified mail, return receipt requested, enclosing the notice, informing the purchaser of his error and stating clearly and conspicuously that a notice signed by the purchaser may give notice of cancellation, but in no event may such date be earlier than the tenth business day following the date of the transaction.

4. Where the signature of a prospective purchaser is solicited during the course of a sales presentation, inform each person orally, at the time he signs the contract, of his right to cancel as stated in paragraph II.D. of this order.

5. Include clearly and conspicuously in each contract for the sale of respondents' land the following statement in 12-point boldface type:

   Purchaser has the right to cancel the contract, without any penalty or obligation, at any time prior to midnight of the tenth business day after the date of this contract. See the attached "Notice of Right of Cancellation" for an explanation of this right.

6. Within 10 business days after the receipt of a cancellation signed by a purchaser, refund all payments made under the contract and cancel and return any negotiable instrument executed by the purchaser in connection with the contract.

E. Whenever respondents provide prospective purchasers with a contract for the sale of land by mailing said contract directly to such purchasers:

1. Include clearly and conspicuously in each contract for the sale of respondents' land the following statement in 12-boldface type:

   This offer of land to you will remain open for thirty calendar days from the date of your receipt of the contract, and we will accept any contract mailed to us within said thirty day period.

2. Honor any contract which is signed and mailed to respondents by purchaser within thirty calendar days from the date purchaser received it.

F. Furnish any report required by Federal or State law to be furnished to a purchaser of respondents' land at the time the contract is signed and mailed, or before the signing of a contract, and all materials required to be furnished by this order, with the first written materials or during the first contact with the prospective purchaser which has with respondents or any of their agents or employees.

G. Inform all prospective purchasers that home financing may not be available, and that a bank located near the subdivision should be consulted prior to the purchase of land if the purchaser intends to build a house on that land.

H. Whenever respondents provide a refund contingent upon the purchaser taking a company-guided inspection tour or making a registered inspection of the property in which the purchaser's lots is located:

1. Provide the purchaser three business days after taking said tour or making said inspection within which to request a refund.

2. Include in any contract, in immediate proximity to the provision setting forth the availability of a refund upon the completion of a company-guided inspection tour or registered inspection of the property, the following statements:

   a. You, the purchaser(s) have the right to cancel this transaction if you take the company-guided tour or make a registered inspection of the property and notify the seller of your cancellation within three days.
   b. The seller will not reimburse the purchaser(s) for any expenses incurred by the purchaser(s) in travelling to the property in order to take the tour or inspection.

3. Furnish each purchaser at the completion of the tour or inspection a completed form entitled "Notice of Cancellation," which shall contain in at least 10-point boldface type the following statements:

NOTICE OF CANCELLATION

__________________________________________
(Date of company-guided inspection tour or registered inspection of property)

__________________________________________
(Contract number)

You may cancel your contract without any penalty or obligation, at any time prior to midnight of the third business day after the above date.

If you cancel, any payments made by you under the contract will be returned within 10 business days from the date of receipt by the seller of your cancellation notice.

To cancel your contract, mail or deliver a signed copy of this cancellation notice or any other written notice, or send a telegram to:

Name of respondent) (address of not later respondents' place of business)

I (We) hereby cancel the contract. (Each purchaser must sign this notice.)

__________________________________________
(Purchasers signature)

__________________________________________
(Purchasers signature)

4. Before furnishing the purchaser copies of the "Notice of Cancellation" set forth in paragraph I.H. of this order, complete both copies by entering the name of the respondent and the address of the place of business, the date of the company-guided inspection tour or the registered inspection of the property and the date by which the purchaser may give notice of cancellation, but in no event shall that date be earlier than the third business day following the date of said tour or inspection.

5. Where a timely notice of cancellation is received properly in accordance with the requirements of this paragraph of this order, but where said notice is not properly signed, and respondents do not intend to honor the notice, immediately notify the purchaser by certified mail, return receipt requested, enclosing the notice, informing the purchaser of his error and stating clearly and conspicuously that a notice signed by the purchaser may give notice of cancellation, but in no event may such date be earlier than the tenth business day following the date of the transaction.

6. Orally inform the purchaser at the time the contract is signed and at the time the tour is taken or the inspection is registered of this cancellation right.

7. Provide an additional notice of cancellation to the purchaser at the following: 3 above to purchasers not on a tour and purchasers who withdraw from tours, (1) who have completed their registration inspections, (2) who are invited to remain in the area and (3) who meet again with respondents or their agents. Said notice shall be provided to these purchasers on the day of the last such meeting. The notice shall be completed as required by subparagraph 4. above except the date by which the purchaser may give notice of cancellation shall not be
earlier than the third business day following the date of the last such meeting.

For the purpose of determining the date after which the cancellation period shall begin to run, the termination date of the tour shall be the date on which that respondent notifies respondents or their agents of his decision. For purchasers not on a tour, the date of the registered inspection shall be controlling.

III

It is further ordered, That in the event that any respondent transfers all or a substantial part of its subdivision land to any other person, partnership or corporation, or transfers all or part of its ownership interest in any or all of its wholly-owned subsidiaries, respondents shall promptly with the Commission a written notice of the transfer to be filed promptly with the Commission a written notice of the transfer to be promptly set forth in this order including this one; provided that, if respondents wish to present to the Commission any reasons why said order should not apply in its present form to said transferee, they shall submit to the Commission a written statement setting forth in detail the reasons for the consummation of said succession or transfer.

IV

It is further ordered, That respondents and respondents’ officers, agents, representatives and employees, directly or through any corporation, partnership, subsidiary, division or other device, in connection with any extension (or arrangements for) or advertising of consumer credit, or any advertisement to aid, promote or assist directly or indirectly any extension of consumer credit, as “advertising” and “consumer credit” are defined in Regulation Z (12 CFR Part 226) of the Truth in Lending Act (U.S.C. 1601 et seq.), do forthwith cease and desist from:

A. Failing to:

1. State the number, amount and the due dates or period of payments scheduled to repay the indebtedness, and the sum of such payments, using the term “total amount due” as required by § 226.8(b)(3) of Regulation Z.

2. Use the terms “cash downpayment,” “total downpayment” and “unpaid balance of cash price,” and to give the corresponding disclosures with those terms, as required by §§ 226.8(c)(1), 226.8(c)(2) and 226.8(c)(3) of Regulation Z.

B. Failing to:

3. Use the term “deferred payment price,” and corresponding disclosure with that term, as required by § 226.8(c)(3)(i) of Regulation Z.

4. Use the term “finance charge,” and to give the corresponding disclosure with that term, as required by § 226.8(c)(3) of Regulation Z.

5. Disclose the identity of the creditor as required by § 226.8(a) of Regulation Z.

6. Make the disclosures in the manner required by § 226.8(a)(1) or § 226.8(a)(2) of Regulation Z.

7. Accurately disclose the “annual percentage rate,” to the nearest quarter of one percent, as required by §§ 226.5(b) and (b)(2) of Regulation Z.

8. Disclose whether a rebate of the unearned finance charges upon prepayment in full is available and, if available, the method of computation as required by § 226.8(b)(7) of Regulation Z.

9. Use the term “annual percentage rate,” as required by § 226.8(b)(3) of Regulation Z.

10. Use the term “amount financed,” as required by § 226.8(c)(7) of Regulation Z.

11. In any transaction subject to §§ 226.3(b) and 226.3(c)(2). Provide the customer with the notice of right to rescind, in the form and manner provided in that section prior to consummation of the transaction.

B. Representing in any advertisement the amount of the down-payment or that no down-payment is required, the amount of an installment payment, or the period of repayment, or that there is no charge for credit, unless all of the following items are clearly and conspicuously stated, in terminology prescribed under § 226.8 of Regulation Z, as required by § 226.10(d)(2) of Regulation Z:

1. The cash price.

2. The amount of the downpayment required or that no downpayment is required, as applicable.

3. The number, amount and due dates or periods of payments scheduled to repay the indebtedness if the credit is extended.

4. The amount of the finance charge expressed as an annual percentage rate, and

5. The deferred payment price.

C. Stating in any advertisement the rate of finance charge unless said rate is expressed as an annual percentage rate, using the term “annual percentage rate,” as “finance charge” and “annual percentage rate” as required, in a manner and form in which they have complied with this order.

V

It is further ordered, That respondents deliver, by certified mail, a copy of this decision and order to each of their present or future salesmen and other employees, independent brokers and all others who sell or promote the sale of lots in respondents subdivisions, and, as to each such person:

1. Provide them with a form, returnable to the respondents and to the Commission, clearly stating the intention to be bound by and to conform business practices to the requirements of this order.

2. Inform them that respondents:

a. Shall not use any person, or the services of any person, to sell or promote the sale of real estate unless such person agrees to and does file notice with the respondents and the Commission that it will be bound by the provisions contained in this order.

b. Are obligated by this order to discontinue dealing with those persons who continue on their own the unfair or deceptive acts or practices prohibited by this order or fail to adhere to the affirmative requirements of this order.

3. Institute a program of continuing surveillance adequate to reveal whether their business operations conform to the requirements of this order.

4. Discontinue dealing with, using, or using the services of such persons who:

(a) Do not file notice with the respondents and Commission of their intent to comply with, and be bound by, this order.

(b) Are revealed by the aforesaid program of surveillance or by any other means to have continued on their own the unfair or deceptive acts or practices prohibited by this order: Provided, That, if remedial action is taken, evidence of such dismissal or termination shall not be admitted in any proceeding to recover penalties for alleged violation of any other paragraph of this order.

VI

It is further ordered, That respondents notify the Commission at least thirty (30) days prior to any proposed change in the corporate and partnership respondents, such as dissolution, assignment or sale resulting in the emergence of a successor corporation or partnership, the creation or dissolution of subsidiaries or any other change in the corporations or partnerships which may affect compliance obligations arising out of this order.

VII

It is further ordered, That the individual respondents named herein promptly notify the Commission of the discontinuance of his present land sales business or employment and of his affiliation with a new land sales business or employment. Such notice shall include respondents’ current business address and a statement as to the nature of the business or employment in which he is engaged as well as a description of his duties and responsibilities.

VIII

It is further ordered, That respondents shall within nine (9) months after this order becomes final file with the Commission a written report, itemizing the gross income and expenses of each respondent for a year ending on a date no earlier than six (6) months after this Order becomes final, and also itemizing the gross income and expenses of each respondent for a year ending on a date no earlier than six (6) months after this Order becomes final.

IX

It is further ordered, That the respondents herein shall within sixty (60) days after service upon them of this order file with the Commission a report, in writing, setting forth in detail the manner and form in which they have complied with this order.

APPENDIX A

FINDINGS OF FACT AND CONCLUSIONS OF LAW

1. Las Animas Ranch, Inc., subdivided approximately 18,000 acres of Colorado land and designated the subdivision as Las Animas Ranch.
NOTICES

2. Mount Blanc Valley Ranches, Inc., sub-divided approximately 5,000 acres of Colorado land and designated the subdivision as Mount Blanc Valley Ranches.

3. Mount Blanc Valley Ranches, Inc., sub-divided approximately 5,000 acres of Colorado land and designated the subdivision as Mount Blanc Estates.

4. Trine Creek Estates, Ltd., sub-divided approximately 10,000 acres of Colorado land and designated the subdivision as Trine Creek Estates.

6. Charles B. Edbheim and Danny W. O'Keefe formed a real, direct and control the acts and practices of the above corporations and partnerships.

Hereinafter, the corporations, partnerships, and individuals of the above, are collectively referred to as respondents.

7. The aforesaid subdivisions were divided for the most part into five (5) acre lots.

8. Lots in the aforesaid subdivisions were sold to the public, who are located throughout the country.

Hereinafter, findings of present acts and practices include past acts and practices, and findings of the acts and practices include oral or written communications, made directly or indirectly.

9. Respondents represent that the lots which respondents offer for sale are good investments and that there is little or no financial risk involved in the purchase of said lots.

10. A significant number of the aforesaid lots are not good investments involving little or no financial risk to purchasers from respondents. Therefore, the acts and practices described in Finding 9, are unfair or deceptive.

11. Respondents offer for sale and sell lots in their subdivisions without disclosing to prospective purchasers that the purchase of said lots is a risky investment. In the future, the failure to disclose such information is an unfair or deceptive act or practice.

12. Respondents represent that the value of the undeveloped land and lots in their subdivisions does not correspond to the growth rate of the value, at the undeveloped stage, of land and lots in more fully developed and populated areas.

13. The growth rate of the value of the undeveloped land and lots in respondents' subdivisions does not correspond to the growth rate of the value of lots adjacent to such land.

14. Respondents represent that utilities, such as electricity and telephone, are presently available on the subdivisions, or that such utilities are located nearby, or that such utilities will be extended to prospective purchasers' lots at no additional cost to them, or that prospective purchasers will be able to obtain such utilities at a nominal cost.

15. Most of the lots sold by respondents are located a great distance from existing utility lines; no current plan exists to extend such lines to them. In addition, respondents must pay substantial expenses for utility line extensions, plus sign long-term use contracts with wholesale companies. Therefore, the acts and practices described in Finding 14, are unfair or deceptive.

16. Respondents' lots are sold to purchasers, or indirectly, without full disclosure of the availability of water, or that many homes are now being built on respondents' lots. Therefore, the acts and practices described in Finding 14, are unfair or deceptive.

17. On most of the lots sold by respondents, sufficient drinkable water is either not available at all, or available only at excessive depths; the State of Colorado does not guarantee the availability of water, and on some lots, the State will not automatically issue well drilling permits; water permits are limited, in some areas, to domestic (in house) uses only; and drilling for water on many of respondents' lots involves substantial expense. Therefore, the acts and practices described in Finding 16, are unfair or deceptive.

18. Respondents represent that the lots in respondents' subdivisions are saleable as homesites. Therefore, the acts and practices described in Finding 17, are unfair or deceptive.

19. All or most of the aforesaid lots are not saleable as homesites because of, inter alia, the value of utilities, the difficulty in obtaining home construction financing, the remote location of the property and the poor quality of the land. Therefore, the acts and practices described in Finding 18, are unfair or deceptive.

20. Respondents sell lots in their subdivisions without disclosing to prospective purchasers the total cost of all utilities, that one or more utility services may not be available and that home construction financing is difficult to obtain. Therefore, the acts and practices described in Finding 19, are unfair or deceptive.

21. Respondents represent that the land in their subdivisions will soon be available and that prospective buyers must purchase lots immediately or risk being unable to do so.

22. Respondents' land is not selling at a loss such that no one is likely to affect the consideration of purchasers, whether or not to purchase. The failure to disclose such information is an unfair or deceptive act or practice.

23. Respondents represent that the money paid to respondents by purchasers is fully protected or “Guaranteed” by respondents' refund plan.

24. The money paid to respondents by purchasers is fully protected or “Guaranteed” by respondents' refund plan because of the conditions required of purchasers to get refunds including, but not limited to, the conditions that purchasers must bear the cost of traveling to the property and that purchasers must request a refund immediately upon completion of a required contract between purchasers and respondents. Therefore, the acts and practices described in Finding 23, are unfair or deceptive.

25. Respondents represent that their subdivision and the area in which said subdivision is located is comparable either to urban, metropolitan and industrial areas as well as to mountain resort areas and recreation areas.

26. Respondents' land is not similar or comparable either to urban, metropolitan and industrial areas or to mountain resort areas or to recreation areas. Therefore, the acts and practices described in Finding 25, are unfair or deceptive.

27. Respondents represent that the subdivision and lots are developed or that many homes are now being built or will be built in the immediate future. Such representation is false. Furthermore, the respondents have no plans to make additional developments or to build motels, resorts, ski areas and restaurants on or near the subdivisions.

28. Few permanent residences have been built on respondents' subdivisions and respondents have no plans to make additional developments on their subdivisions. Therefore, the acts and practices described in Finding 27, are unfair or deceptive.

29. Respondents represent that certain lots have been repossessed or forfeited, that the interest in such lots may be assumed by making certain back payments, and that purchasers are recieving credit for the equity or amount paid in by the previous purchasers.

30. Respondents offer no assumptions. The amounts identified by respondents as “assignment of equity” or “discount by credit” are not repayable, and are not a disposition or reduction, and purchasers, in fact, pay the normal purchase price offered by respondents. Therefore, the acts and practices described in Finding 29, are unfair or deceptive.

31. Respondents represent that no sales commission is being paid to any party in connection with the purchase of respondents' lots and that, therefore, the purchase of respondents' lots is more economical than other purchase or investment opportunities.

32. Respondents' salesmen do work on a commission basis. Therefore, the acts and practices described in Finding 31, are unfair or deceptive.

33. Respondents represent that lots in two subdivisions known as Las Animas Ranch may be used for any purpose desired by the purchasers thereof, including principal residence, mobile homes, resort developments or vacation homes.

34. All or most of the lots in the Las Animas Ranch subdivisions are zoned "plains agricultural," requiring ownership of 200 acres before building of any sort is allowed. Therefore, the acts and practices described in Finding 33, are unfair or deceptive.

35. Respondents offer lots in their Las Animas Ranch subdivisions to prospective purchasers that the lots being offered are zoned "plains agricultural," requiring ownership of 200 acres before building of any sort is allowed. Respondents, therefore, have failed to disclose material characteristics of their lots which, if known to certain prospective purchasers, would be likely to affect their consideration of whether or not to purchase a lot from respondents. The failure to disclose such information is a deceptive or unfair act or practice.

36. Respondents use land sales contracts which contain declarations that the contract contains the entire agreement of the parties and that no representations were made to anyone that the lot purchasers were entitled to purchase such land. Therefore, the acts and practices described in Finding 35, are unfair or deceptive.

37. Use by respondents of the contract declarations described in Finding 36, is an unfair or deceptive act or practice because respondents knowingly and falsely represent the land and their agreements to purchasers, which differ in material respects from, or which obscure, the rights and obligations of purchasers and respondents.
NOTICES

purchasers forfeit all payments previously made to respondents under the contract. When purchasers default and forfeit previously made payments, respondents retain and fail to offer refunds of those amounts of the purchasers' total payments which exceed respondents' reasonable damages caused by the defaults.

39. Use by respondents of the contract provisions described in Finding 38, and the retaining by respondents of purchasers' payments in excess of reasonable damages are unfair acts or practices.

40. Respondents induce members of the public through unfair and deceptive acts and practices, described in the enumerated findings above, to pay them, in advance of the passage of title, substantial sums of money toward the purchase of lots located within respondents' subdivisions. Said lots are of little or no use or value to purchasers as investments or as homesites. Respondents retain said sums of money.

41. Respondents' retaining of the sums of money obtained through the acts and practices described in Finding 40, is an unfair act or practice.

42. The use by respondents of the aforementioned unfair or deceptive statements, representations, and practices has the capacity and tendency to deceive substantial numbers of respondents into the erroneous and mistaken belief that such statements relate to the purchase of substantial numbers of respondents' lots because of said mistaken and erroneous belief.

43. The aforementioned acts and practices, as herein alleged, are all to the prejudice and injury of the public and respondents' competitors and constitute unfair methods of commerce and unfair or deceptive acts and practices in or affecting commerce in violation of section 5 of the Federal Trade Commission Act.

John F. Dugan,
Acting Secretary.

GENERAL ACCOUNTING OFFICE
REGULATORY REPORTS REVIEW

Receipt of Report Proposal!

The following request for clearance of a report intended for use in collecting information from the public was received by the Regulatory Reports Review Staff, GAO, on February 9, 1977. See 44 U.S.C. 3512(c)(1) above. Unless you are already familiar with the information contained in the proposed report, you should obtain a copy of the report from the government agency responsible for its preparation. A copy of the report proposal is also available from the Regulatory Reports Review Staff, GAO, Washington, D.C. 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202-275-3352.

FEDERAL COMMUNICATIONS COMMISSION

FCC requests clearance of a revision to Form 442, Application for New Or Modified Radio Station Authorization Under Part 5 Of FCC Rules Experimental Radio Service (Experimental Broadcast). FCC must consider administratively the earth stations applications filed by non-government entities approved for participation in the Applications Technology Satellite (ATS) program developed and administered by the National Aeronautics and Space Administration. It is intended that a number of experiments will be put into effect involving Application Technology Satellite No. 6 and using non-government frequencies. The bulk of the applications will be in the experimental area of broadcasting communications. Additional information beyond that contained in Form 442 will be required by the Commission to make the determinations necessary in processing an application. The additional information which will be required by the revised Form 442 is set out in the Commission's Memorandum Opinion and Order FCC 77-37, 43617, adopted January 12, 1977, and released January 19, 1977. FCC estimates potential respondents to be 10 and requiring burden to average 6 hours per application.

Norman F. Hery, Regulatory Reports Review Officer.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE
Office of Education
GIFTED AND TALENTED MODEL PROJECTS

Closing Date for Receipt of Applications for Programs for Gifted and Talented—Competitive Continuation Assistance Contracts

Notice is hereby given that pursuant to the authority contained in section 404(g) of Pub. L. 93-380 (20 U.S.C. 1863(g)), applications are being accepted for continuation contracts of assistance from public and private agencies to continue and operate model projects. Applications for continuation awards are competitive with other applications for continuation awards in the same year (45 CFR 150.4). Funds are available for contracts to continue the operation of model projects presently in operation pursuant to an approved project period in excess of one year. Continuation applications must be received by the U.S. Office of Education Application Control Center on or before April 27, 1977.

A. Application by mail. An application sent by mail should be addressed as follows: U.S. Office of Education, Application Control Center, 400 Maryland Avenue, S.W., Washington, D.C. 20203.

Attention: 13,562c. Applications sent by mail will be considered to be received on time by the Application Control Center if:

(1) The application was sent by registered or certified mail not later than April 27, 1977 as evidenced by the U.S. Postal Service Postmark on the wrapper or envelope, or on the original receipt from the U.S. Postal Service;

(2) The application is received on or before the closing date by the Department of Health, Education, and Welfare, or the U.S. Office of Education.

B. Hand delivered applications. An application to be hand delivered must be taken to the U.S. Office of Education, Application Control Center, Room 6753, Regional Office Building, 200 Independence Avenue, S.E., Washington, D.C. Hand delivered applications will be accepted daily between the hours of 8:00 a.m. and 4:00 p.m. on weekdays. Applications will not be accepted after 4:00 p.m. on the closing date.

C. Program information and forms. The amount of funds which is expected to be available in Fiscal Year 1977 for the continuation of gifted and talented programs is $1,865,000, out of which $250,000 is projected for Model Projects. The anticipated number of continuation assistance contracts for gifted and talented Model Projects is six. The funding level of multi-year projects has ranged in the past operation year between $41,461 and $41,709. It is projected that many of these continuation projects may be funded at the same level this fiscal year. This statement on the availability of funds is only an estimate and does not bind the Office of Education to any pattern of distribution, except as required by the applicable provisions of the Gifted and Talented regulations, and appropriation acts.

Further information and application forms may be obtained from the Office for Gifted and Talented, U.S. Office of Education, 400 Maryland Avenue, S.W., Washington, D.C. 20202.

D. Applicable regulations. Assistance contract awards made pursuant to this notice will be subject to the Regulations published in the Federal Register on May 6, 1976 (41 FR 18660 45 CFR Part 160b, Subpart F) and the Office of Education General Provisions Regulations (45 CFR Part 100a).

(D) (20 U.S.C. 1863(g)).

(Catalog of Federal Domestic Assistance Number 13.562, Gifted and Talented.)

William F. Pierce,
Acting Commissioner of Education.

[FR Doc. 77-4830 Filed 2-16-77; 8:45 am]
PROGRAM FOR THE GIFTED AND TALENTED

Closing Date for Receipt of Applications for Programs for Gifted and Talented—Competitive Continuation Awards

Pursuant to the authority contained in section 404(c), (d), and (e) of Pub. L. 93-380, the Education Amendments of 1974 (20 U.S.C. 1300), the United States Commissioner of Education hereby gives notice that applications for the continuation of assistance (1) for Statewide activities under §160b.22 and Subpart D of the program regulation (45 CFR 160b.22 and Subpart D of Part 160b) for Gifted and Talented are being accepted from State educational agencies, and (2) for graduate training programs for leadership personnel and internships from colleges and universities (45 CFR 160b.42(b) (1) and (3)). Funds are available for grants to continue programs presently in operation pursuant to an approved project period in excess of one year. Applications for continuation awards are competitive with other applications for continuation awards in the same year. (45 CFR 160b.4 (c) (2).)

Applications must be received by the U.S. Office of Education Application Control Center on or before April 27, 1977.

A. Applications sent by mail. An application sent by mail should be addressed as follows: U.S. Office of Education, Application Control Center, 400 Maryland Avenue, S.W., Washington, D.C. 20202, Attention: 13.562. An application sent by mail should be addressed as follows: U.S. Office of Education, Application Control Center, 400 Maryland Avenue, S.W., Washington, D.C. 20202, Attention: 13.562A for State Educational Agencies, and 13.562B for graduate training programs for leadership personnel and internships from colleges and universities. An application sent by mail will be considered to be received on time by the Application Control Center if:

(1) The application was sent by registered or certified mail or air mail and mailed by April 22, 1977 as evidenced by the U.S. Postal Service postmark on the wrapper or envelope, or on the original receipt from the U.S. Postal Service; or

(2) The application is received on or before the closing date by either the Department of Health, Education, and Welfare or the U.S. Office of Education mail rooms in Washington, D.C. in establishing the date of receipt, the Commissioner will rely on the time-date stamp of such mail rooms or other documentary evidence of receipt maintained by the Department of Health, Education, and Welfare or the U.S. Office of Education.

B. Hand delivered applications. An application to be hand delivered must be taken to the U.S. Office of Education Application Control Center, Room 5673, Regional Office, Building Three, 7th and D Streets, S.W., Washington, D.C. Hand delivered applications will be accepted daily between the hours of 8:00 a.m. and 4:00 p.m. Washington, D.C. time except Saturdays, Sundays, and Federal holidays. Applications will not be accepted after 4:00 p.m. on the closing date.

C. Program information and forms. The amount of funds which is expected to be available in Fiscal Year 1977 for the continuation of Gifted and Talented programs is $1,686,000. The anticipated number of continuation awards for gifted and talented programs is twenty-eight. The funding level of programs funded in excess of 12 months has ranged in the past operation year between $25,000 and $200,000. It is projected that many of these continuation projects may be funded at the same level this fiscal year.

This statement on the availability of funds is only an estimate and does not bind the Office of Education to any pattern of distribution, except as required by applicable provisions of the Gifted and Talented regulations, and appropriation acts.

Further information and application forms may be obtained from the Office of Gifted and Talented, U.S. Office of Education, 400 Maryland Avenue, S.W., Washington, D.C. 20202.

D. Applicable regulations. Grant awards made pursuant to this notice will be subject to the regulations published in the Federal Register on May 6, 1976 (41 FR 13562B). Federally assisted programs are required to be made available to all persons, aids, and agencies for a training Institute for leadership personnel and for graduate training projects; and (3) Institutions or agencies for a training Institute for leadership personnel (20 U.S.C. 1303(c); 45 CFR Part 160b, Subpart C); (2) State agencies for State personnel training projects (20 U.S.C. 1303(d); 45 CFR Part 160b, Subpart D); and (3) Institutions or agencies for a training Institute for leadership personnel (20 U.S.C. 1303(e); 45 CFR 160b.42(b) (2)).

Applications must be received by the U.S. Office of Education Application Control Center on or before April 27, 1977.

A. Applications sent by mail. An application sent by mail should be addressed as follows: U.S. Office of Education, Application Control Center, Room 5673, Regional Office, Building Three, 7th and D Streets, S.W., Washington, D.C. Hand delivered applications will be accepted between the hours of 8:00 a.m. and 4:00 p.m. Washington, D.C. time except Saturdays, Sundays, and Federal holidays. Applications will not be accepted after 4:00 p.m. on the closing date.

PROGRAM FOR THE GIFTED AND TALENTED

Closing Date for Receipt of Applications for Programs for Gifted and Talented—Initial Awards

Pursuant to the authority contained in section 404(c), (d), and (e) of Pub. L. 93-380, the Education Amendments of 1974 (20 U.S.C. 1863), the U.S. Commissioner of Education hereby gives notice that applications for initial awards will be accepted from: (1) State and local educational agencies for grant programs for gifted and talented children (20 U.S.C. 1863(c); 45 CFR Part 160b, Subpart C); (2) State agencies for State personnel training projects (20 U.S.C. 1863(d); 45 CFR Part 160b, Subpart D); and (3) Institutions or agencies for a training Institute for leadership personnel (20 U.S.C. 1863(e); 45 CFR 160b.42(b) (2)).

Applications must be received by the U.S. Office of Education Application Control Center on or before April 27, 1977.

A. Applications sent by mail. An application sent by mail should be addressed as follows: U.S. Office of Education, Application Control Center, Room 5673, Regional Office, Building Three, 7th and D Streets, S.W., Washington, D.C. Hand delivered applications will be accepted between the hours of 8:00 a.m. and 4:00 p.m. Washington, D.C. time except Saturdays, Sundays, and Federal holidays. Applications will not be accepted after 4:00 p.m. on the closing date.

VOCA TIONAL REHABILITATION

Closing Date for Receipt of Applications

Notice is hereby given that pursuant to the authority contained in Section 203 of the Rehabilitation Act of 1973, as amended (20 U.S.C. 763), grants may be made to State vocational rehabilitation agencies and other public or nonprofit agencies and organizations, including institutions of higher education, to assist in increasing the numbers of personnel trained in providing vocational rehabilitation services to handicapped individuals and in performing other functions necessary to the development of such services.

Applications for rehabilitation long-term training projects (except for projects for the in-service training of State vocational rehabilitation agency personnel) must be received by April 8, 1977. Applications for projects for the in-service training of State vocational rehabilitation agency personnel must be received by July 15, 1977.

A. Purpose. Long-term training grants in vocational rehabilitation are made for the purpose of paying part of the costs of projects designed to increase the supply of personnel available for employment in public and private agencies involved in the rehabilitation of physically and mentally handicapped individuals, especially those who are the most severely disabled. Long-term training projects include: training projects in established rehabilitation disciplines; experimental and innovative training projects; rehabilitation continuing education programs; and projects for the in-service training of State vocational rehabilitation agency personnel.

B. Eligible Applicants. Applications may be submitted by State vocational rehabilitation agencies and other public or nonprofit agencies or organizations, including institutions of higher education.

C. Available Funds. The budget request level for FY 1978 beginning October 1, 1977 for the rehabilitation training program is $20 million.

D. Areas of Training. Grants are made to provide part of the necessary assistance to meet the medical, vocational and other personnel training needs of both public and private rehabilitation programs and institutions. A balanced program of long-term assistance is considered to include the following:

1. Long-Term Training in the Established Rehabilitation Disciplines, including training projects in those areas identified in Section 203 of the Rehabilitation Act of 1973, as amended.
2. Experimental and Innovative Training Projects.
3. Rehabilitation Continuing Education Programs; and
4. State Vocational Rehabilitation Agency In-Service Training.

E. Program Priorities. In awarding long-term training grants, priority will be given to the support of ongoing training projects which are eligible for continuation grants and which have been determined to make satisfactory progress toward achieving established objectives. In addition, special priority will be assigned to training in those professional fields which directly support and enhance the delivery of rehabilitation and service delivery activities of the State vocational rehabilitation agencies. It is unlikely that funds will be available for the initial support of any new rehabilitation long-term training projects during FY 1978.

F. Application Review and Evaluation. Applications for the support of new or competing extension long-term training projects in vocational rehabilitation (except for projects for the in-service training of State vocational rehabilitation personnel) receive a scientific and technical review by qualified experts who are not Federal employees. Applications are evaluated in terms of the following factors:

1. The relevance of the purpose of the training project to the administratively established objectives of the public rehabilitation program and the Rehabilitation Act of 1973, as amended;
2. The methodology to be employed in implementing the project and its feasibility for the achievement of the established educational objectives;
3. The existence of a plan for the evaluation of the effectiveness of project activities;
4. The existence of a working relationship with the State vocational rehabilitation agency and other agencies and rehabilitation facilities providing vocational rehabilitation services;
5. The extent to which the training project holds promise of increasing the supply of personnel trained to deliver vocational rehabilitation services to physically or mentally handicapped persons, especially those with the most severe handicaps; or other groups of handicapped persons, such as handicapped persons from minority groups;
6. The extent to which other training programs in the same field are available in the State or Region;
7. Evidence that the training institution is architecturally accessible to the handicapped;
8. Evidence that the training institution is architecturally accessible to the handicapped;
9. The extent to which application instructions have been adequately addressed.

10. Evidence that the supervised clinical practice will be educationally focused and that standards to assure the competence of those staff persons supervising students have been established and will be maintained by the training institution.

11. The designation of a project director qualified in his field, able to devote sufficient time to the project to ensure its successful implementation, and a demonstrated interest in the rehabilitation of physically and mentally handicapped persons;
12. The financial and other resources of the applicant for accomplishing the objectives of the project, how much the applicant plans to contribute to the total cost of the project, and the reasonableness of the budget in relation to the proposed project.
13. The criteria to be used for the selection of students to whom traineeships are to be awarded;
14. Where appropriate, evidence of current accreditation by the designated accrediting agency; and
15. Information on the employment outlook for graduates of the training program including reports from potential employers, job vacancies in the geographical area served by the educational institution, and records of positions held by students who have completed the training program.

G. Program Information and Application Forms. Application materials including program guidelines and grant administration policies are being mailed to applicants who have graduated from the continuing rehabilitation training programs during the 1976-1977 academic year. Other eligible applicants may request application materials for the rehabilitation training program from the appropriate Regional Office of the Rehabilitation Services Administration.

H. Application Submission. 1. Applications sent by mail. (a) Applications for the support of special long-term training projects of national scope should be addressed as follows: The Special Long-Term Training and Contract Management, Office of Human Development, Room 1427, 330 C Street, S.W., Washington, D.C. 20201. Special long-term training projects of national scope are intended to have a direct impact on vocational rehabilitation programs...
NOTICES
9145

throughout the country; (2) have objectives which, if achieved, could result in an improved delivery system for vocational rehabilitation services, especially as it relates to those with the most severe handicaps, and which could affect national policies or standards established for the rehabilitation training program; (3) encompass participants from all sections of the country and not necessarily relate to a single rehabilitation field of practice; and (4) be conducted by an institution, agency or organization with the capacity to offer training in more than one geographical location.

(b) Applications for the support of long-term training projects of Regional scope and projects for the in-service training of State vocational rehabilitation personnel should be addressed to the appropriate Director, Office of Rehabilitation Services as follows:

REGION 1
Director, Office of Rehabilitation Services, Department of Health, Education, and Welfare, John F. Kennedy Federal Building, Government Center, Boston, Massachusetts 02203.

REGION II

REGION III
Director, Office of Rehabilitation Services, Department of Health, Education, and Welfare, 1333 S. Wacker Drive, 15th Floor, Chicago, Illinois 60606.

REGION IV
Director, Office of Rehabilitation Services, Department of Health, Education, and Welfare, 601 East 12th Street, Kansas City, Missouri 64106.

REGION V
Director, Office of Rehabilitation Services, Department of Health, Education, and Welfare, 303 South Walker Drive, 16th Floor, Chicago, Illinois 60606.

REGION VI
Director, Office of Rehabilitation Services, Department of Health, Education, and Welfare, Federal Office Building, Room 340, 1511 Bryan Street, Dallas, Texas 75201.

REGION VII
Director, Office of Rehabilitation Services, Department of Health, Education, and Welfare, 507 South Street, Kansas City, Missouri 64106.

REGION VIII
Director, Office of Rehabilitation Services, Department of Health, Education, and Welfare, Federal Office Building, Room 7415, 19th and Stout Streets, Denver, Colorado 80220.

REGION IX

REGION X
Director, Office of Rehabilitation Services, Department of Health, Education, and Welfare, Arcade Building, 1831 Second Avenue (MS 622), Seattle, Washington 98101.

An application sent by mail will be considered to be received on time if:

(1) The application was sent by registered or certified mail not later than April 8, 1977 as evidenced by the U.S. Postal Service postmark, or on the original receipt from the U.S. Postal Service; or

(2) The application is received on or before the closing date in either the Department of Health, Education, and Welfare or the Office of Human Development, Washington, D.C. or as appropriate, a Regional Office mailroom. (In establishing the date of receipt, consideration will be given to the time date stamps of such mailrooms or other documentary evidence of receipt maintained by the Department of Health, Education, and Welfare, or the Office of Human Development.)

3. Hand delivered applications.—An application to be hand delivered must be taken to the Division of Grants and Contract Management, Office of Human Development, 330 C Street, S.W., Washington, D.C. or to the appropriate Region Office of the Director, Office of Rehabilitation Services. Hand delivered applications will be accepted during normal working hours. Applications will not be accepted after 5:00 p.m. on the closing date.

3. Late submittals.—Grant applications received at the designated office after the April 8, 1977 deadline are late applications and will not be considered for review by the non-Federal experts.

VOCA TIONAL REHABILITATION

Priorities and Closing Date for Receipt of Applications Regarding Rehabilitation Short-Term Training of National Scope

Notice is hereby given that pursuant to Section 202 of the Rehabilitation Act of 1973, as amended (29 U.S.C. 763), grants may be made to State vocational rehabilitation agencies and other public or nonprofit agencies and organizations, including institutions of higher education, to provide short-term training in vocational rehabilitation in order to assist in increasing the numbers of personnel trained in providing vocational rehabilitation services to handicapped individuals and in performing other functions necessary to the development of such services. Applications for rehabilitation short-term training of national scope must be received by the Division of Grants and Contract Management, Office of Human Development, 330 C Street, S.W., Washington, D.C. 20201 by April 15, 1977.

A. Purpose. Short-term training grants in vocational rehabilitation are made for the purpose of paying part of the costs of projects designed to improve the professional practice skills of vocational rehabilitation workers serving the physically and mentally disabled, especially those who are severely disabled.

B. Eligible applicants. Applications may be submitted by State vocational rehabilitation agencies and other public or nonprofit agencies or organizations, including institutions of higher education.

D. Purpose of rehabilitation short-term training of national scope and program priorities. 1. Rehabilitation short-term training of national scope includes proposals for the support of a workshop, institute, seminar or other short-term training course conducted in order:

a. To demonstrate curriculum, or other training modules appropriate for general use in rehabilitation agencies throughout the country and related to (1) the provision of vocational rehabilitation services to specific groups of handicapped individuals or (2) the improved performance of vocational rehabilitation practitioners in carrying out specific functional responsibilities;

b. To provide special training of national significance at a single training setting, or, on a coordinated basis, at a number of different training settings.

There are no geographical restrictions for trainees participating in short-term training courses of national scope.

2. In FY 1977 the following program priorities, not in order of priority, have been identified for short-term training of national scope:

a. Client-counselor cooperative relationships in the development of the individualized, written rehabilitation program;

b. Alternative methods for accelerating the delivery of client services;

c. Re-defining the definition of "severe handicap";

d. The use of self-employment as a vocational goal for the severely handicapped;

e. Group rehabilitation counseling techniques in the vocational rehabilitation of the severely handicapped;

f. The definition of role, function, and training needs of work adjustment specialists with the handicapped;

g. Setting standards for providers of physical and mental restoration services;

h. State vocational rehabilitation agency rehabilitation facility specialist training;

i. The provision of psychological services by State vocational rehabilitation agencies;

j. The evaluation of vocational rehabilitation programs and activities;

k. The vocational rehabilitation of clients with multiple sclerosis, muscular dystrophy, and the chronic degenerative disabilities;
NOTICES

1. Training of trainers of personnel providing physical and mental restoration services;
2. Alternatives to institutionalization of the mentally ill;
3. Improving counselor-educator-State vocational rehabilitation agency communication;
4. The use of job forecasting, job development, and job analysis in vocational rehabilitation;
5. The rehabilitation of handicapped migratory agricultural workers;
6. The rehabilitation of the homebound elderly disabled;
7. The removal of architectural and transportation barriers;
8. The use of similar benefit resources by State vocational rehabilitation agencies;
9. Competency based rehabilitation education;
10. Forward planning in vocational rehabilitation;
11. The role of self-help organizations in the vocational rehabilitation of the severely handicapped; and
12. The evidence of a working relationship with an appropriate State vocational rehabilitation agency and other agencies providing vocational rehabilitation services; and
13. The extent to which the proposal is of a national scope.

F. Program information and application forms. Program information, including the general FY 1977 plan for short-term training of personnel, will be available under innovation and expansion grants.

G. Application submission. 1. Applications sent by mail—Applications for the support of short-term training of national scope for the training of individuals from throughout the country should be addressed as follows: Division of Grants and Contract Management, Office of Human Development, Room 147D, 330 C Street, S.W., Washington, D.C. 20201.

2. Hand delivered applications. An application to be hand delivered must be accepted during normal office hours. Applications will not be accepted after closing date.

3. Late submittals. Grants applications received after the closing date will not be considered for review.

Social and Rehabilitation Service

GRANTS FOR TRAINING PERSONNEL FOR FIELD OF CHILD WELFARE

Notice of Availability of Training Grants for Child Welfare

Notice is hereby given of the availability of Fiscal Year 1977 funds for training grants in the field of child welfare as authorized under Section 428 of Title IV, Part B of the Social Security Act (42 U.S.C. 628). Applications must be received by May 1, 1977 in order to be considered.

A. Purpose and Objectives. Grants may be made to training projects which have one or more of the following objectives: to improve the quality of service delivery to children and families and the management of child and family service programs; to develop an adequate supply of personnel qualified for professional, technical, or other work in the field of child and family services; to provide educational and training opportunities to personnel currently employed in child and family services to raise their level of competence and broaden their expertise; to strengthen and improve educational programs and resources for preparing personnel for the field of child and family services; and to support experimentation with new methods of education and training. Three types of grants may be awarded:

1. Teaching grants to institutions of higher learning for the purpose of developing, expanding, and improving educational programs and resources for preparing personnel for work in the field of child and family welfare. These grants are intended to defray part of the costs of instruction and program development, including salaries of faculty and supporting services. They may be made to initiate new or experimental programs, to expand existing programs in order to prepare larger numbers of students, or to strengthen instructional resources, curriculum offerings, and educational methods.

2. Traineeship grants to institutions for the purpose of providing financial support for students preparing for work in the field of child and family services. Trainee support in the form of stipends, tuition and educational fees, and dependency allowances may be provided by institutions to students with career goals in child and family services who are enrolled in appropriate programs. Such support may be provided to students in the junior and senior years at the undergraduate level, in master's degree programs, and in doctoral programs. Traineeship funds, which are available for Regionally funded projects, are not available for national projects.

3. Short-term training grants to institutions of higher learning for the purpose of increasing the competence of personnel currently employed in the field of child and family services. They are intended to strengthen and improve the State and local public social service agencies—and of other public and private agencies and facilities that provide services in association with the public agencies under purchase-of-service or other arrangements—to manage social service programs and deliver services effectively. Short-term training may be provided in courses, institutes, workshops, or programs that are not degree-oriented although educational institutions may grant academic credit for completion of short-term courses. Short-term training can be provided to a wide range of per-
somen-administrators, middle management, supervisors, caseworkers, para-
professionals and aides, specialists, lawyers, law enforcement and court personnel, and others. Foster parents, institutional personnel, homemakers, day care staff, and volunteers for projects for whom teaching may be provided.

B. Eligible Applicants. Public or other nonprofit accredited institutions of higher learning may apply for training grants and short-term training grants. Traineeship grants are available only to public or nonprofit private colleges and universities offering baccalaureate degree programs in social work which are accredited or holding program approval by the Council on Social Work Education, and to graduate schools of social work accredited by the Council or accepted as candidates for accreditation. Grants are not made to individuals even though they may be affiliated with an institution of higher learning.

C. Available Funds. Of the total appropriation of $8,150,000 available in Fiscal Year 1977, approximately $1,059,000 is expected to be awarded for training grants for projects of national significance. National significance projects are expected to approach educational and training needs from a national or multi-regional perspective, respond to the diverse range of conditions in social service and educational programs throughout the nation, take an innovative and developmental approach, and promote the dissemination and utilization of training programs, products and materials on a national or multi-regional basis. The balance of available funds will be allocated to the Regional Offices for training projects oriented toward the needs of the geographical area of the respective Regions. Funds will be allocated in direct proportion to the amount of Federal funds expended in each Region in FY 1976 for social services programs under the Social Security Act.

D. Duration and Amount of Grants. Grants will be awarded for a period of one year, but may be continued, on a competing basis, for a longer period depending on the availability of funds, the meeting of the project objectives, and completion of first year projects, and relevance of the project to current program priorities. Grants for projects of national significance generally have amounted to approximately $100,000 each, but applications may be made for lesser or greater amounts than this award. It is anticipated that only one new project of national significance under each priority area will be funded. The number of Regional projects funded under each priority area will depend on needs in the Region and available funds.

E. Program Priority Areas. The current priorities of the Social and Rehabilitation Service are reflected national and State priorities. They are intended to promote near-term and long-range planning, development, and implementation of social services programs for families and children under Title XX. Applications must be related to these priorities. They should show new approaches to advancing and expanding the current "State of the Art" in education and training for the field of child welfare delivery, and the quality of service delivery to children and families. Utilization of the following priorities will vary according to the educational objectives appropriate for different levels of education.

1. Administration of Child and Family Service Programs. Administration is defined broadly to include all aspects of planning, administration, and management of a social services program: Comprehensive social services planning, citizen involvement, manpower planning, financial management, contracting methodology and management, research and evaluation activities, and others.

2. Delivery of Social Services to Families and Children of Ethnic Minority Groups (Hispanic, Indians, American, Blacks). Training and educational opportunities directed to provide a knowledge base and understanding of ethnicity: Cultural differences and values and anthropological behavior, needs, parental roles, etc.

3. Preventive Social Services to Children and Their Families. Education and training programs related to preventive services to children and their families include such areas as organization and delivery of service at the community level; principles and techniques to achieve "permanency" for children in foster care; management of foster care systems and deinstitutionalization; development of knowledge base and skills in family dynamics and in intervention techniques; evaluation of effectiveness and costs of services, etc.

4. Child Care Services. Education and training programs as related to delivery of social services in settings of in-home care, family day care, group home day care, and day care centers.

5. Social Services in Support of the Delivery of Health Services. The planning, management, and delivery of health support services for children and their families; training programs for providers of child care services in health concepts and principles; maintaining necessary linkages with delivery systems for preventive and health care.

F. Application Review and Evaluation. Applications will be reviewed by a review panel composed of a minimum of three reviewers (Federal and/or non-Federal) having expertise in child welfare training programs and needs. The following criteria will be applied in evaluation of applications:

1. Teaching grant and short-term training grant applications will be evaluated according to (a) significance of the project in relation to current Section 426 priorities and objectives of the SRS and to Regional, State, or local manpower needs and priorities; (b) feasibility of the project; (c) soundness of training or educational design and, with respect to teaching applications, the relationship of the project to the basic program of the institution; (d) qualifications of project leadership and professional staff; (e) capacity and resources of applicant to conduct project; (f) evidence that project has been designed in consultation with State and local public service agencies and other interested agencies or groups. Evaluation criteria for teaching grants will also include project plans for evaluation and follow up.

2. Traineeship requests will be evaluated according to (a) significance of project in relation to current Section 426 priorities and objectives of the SRS and to Regional, State, or local manpower needs and priorities; (b) adequacy of institution's education program and resources to prepare students for the field of child and family services; (c) adequacy of institution's plan for selection of candidates for child and family service traineeships.

G. Program Information and Application Forms. Applications for Fiscal Year 1977 are available on Form SF-424/HEW-608T. Grants will be administered in accordance with DH/EW Regulations 45 CFR Part 74 and DHEW and SRS grants administration policies. Application forms, instructions, and program information, including the complete program announcement for FY 1977, may be obtained as follows:

1. For training projects of national significance—from the Division of Project Grants Administration, Social and Rehabilitation Service, Room 6200/C, 330 C Street SW., Washington, D.C. 20201.

2. For Regional training projects—from the appropriate Regional Office of the Social and Rehabilitation Service (see addresses at the end of this Notice).

H. Application Submittal. Applications for training projects of national significance should be addressed to the Division of Project Grants Administration, Social and Rehabilitation Service, Room 6200/C, 330 C Street SW., Washington, D.C. 20201. Applications for the support of Regional training projects should be addressed to the appropriate Regional Office of the Social and Rehabilitation Service. All applications must be received by May 1, 1977. An application will be considered to be received on time if:

1. The application was sent by registered or certified mail not later than May 1, 1977 as evidenced by the U.S. Postal Service postmark, or on the original receipt from the U.S. Postal Service; or

2. The application is received on or before the closing date in either the Department of Health, Education, and Welfare or the Social and Rehabilitation Service mailrooms in Washington, D.C., or as appropriate, a Regional Office mailroom. On establishing the date of receipt, consideration will be given to the time date stamps of such mailrooms or other documentary evidence of receipt maintained by the DHEW or the SRS.)

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Interstate Land Sales Registration

[Docket No. N-77-725; OLSR No. 0-6910-0-183; 76-334 JS]

KINGS PARK AND CROWN DEVELOPMENT OF FLORIDA CORP.

Hearing

Pursuant to 15 U.S.C. 1706(d) and 24 C.F.R. 1720.160(b) Notice is hereby given that:

1. Kings Park, Herman Heisler, President and Crown Development of Florida Corporation, authorized agents and officers, hereinafter referred to as "Respondent," being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. Law 90-448) (15 U.S.C. 1710 et seq.) received a Notice of Proceedings and Opportunity for Hearing issued November 4, 1976, which was sent to the developer pursuant to 15 U.S.C. 1706(d), 24 C.F.R. 1710.45(b)(1) and 1720.125 informing the developer of information obtained by the Office of Interstate Land Sales Registration alleging that the Statement of Record and Property Report for Kigs Park subdivision, located in Marion County, Florida, contain untrue statements of material fact or omit to state material facts required to be stated therein or necessary to make the statements therein not necessary to make the statements therein not misleading.

3. In said Answer the Respondent requested a hearing on the allegations contained in the Notice of Proceedings and Opportunity for Hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 C.F.R. 1720.160(d), it is hereby ordered that a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Judge James W. Mast, in Room 7146, Department of HUD, 451 Seventh Street, S.W., Washington, D.C. on March 8, 1977 at 10:00 a.m.

5. The following time and procedure is applicable to such hearing: The parties are directed to file affidavits and a list of all witnesses with the Hearing Clerk, HUD Building, Room 10278, Washington, D.C. 20410 on or before February 14, 1977. Copies of all documents filed should be served at the same time on all parties of record.

6. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the proceedings shall be determined against Respondent, the allegations of which shall be deemed to be true, and any Order Suspending the Statement of Record, herein identified, shall be issued pursuant to 24 C.F.R. 1710.45(b)(1). This Notice shall be served upon the Respondent forthwith pursuant to 24 C.F.R. 1720.440.

JAMES W. MAST,
Chief Administrative Law Judge.

[FR Doc.77-4912 Filed 2-15-77; 8:45 am]

WINTER PARK HIGHLANDS UNITS 1-6 ET AL.

Hearing

Pursuant to 15 U.S.C. 1706(d) and 24 C.F.R. 1720.160(b) Notice is hereby given that:

1. Winter Park Highlands Units 1-6, Winter Park Highlands, Inc. and David G. Elmore, President and Director, authorized agents and officers, hereinafter referred to as "Respondent," being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. Law 90-448) (15 U.S.C. 1710 et seq.) received a Notice of Proceedings and Opportunity for Hearing issued November 26, 1976, which was sent to the developer pursuant to 15 U.S.C. 1706(d) 24 C.F.R. 1710.45(b)(1) and 1720.125 informing the developer of information obtained by the Office of Interstate Land Sales Registration alleging that the Statement of Record and Property Report for Winter Park Highlands, Units 1-6, located in Grand County, Colorado, contain untrue statements of material fact or omit to state material facts required to be stated therein or necessary to make the statements therein not necessary to make the statements therein not misleading.

3. In said Answer the Respondent requested a hearing on the allegations contained in the Notice of Proceedings and Opportunity for Hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 C.F.R. 1720.160(d), it is hereby ordered that a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Judge James W. Mast, in Room 10278, Department of HUD, 451 Seventh Street, S.W., Washington, D.C. on March 30, 1977 at 10:00 a.m.

5. The following time and procedure is applicable to such hearing: The parties are directed to file affidavits and a list of all witnesses with the Hearing Clerk, HUD Building, Room 10278, Washington, D.C. 20410 on or before March 8, 1977. Copies of all documents filed should be served at the same time on all parties of record.

6. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the proceedings shall be determined against Respondent, the allegations of which shall be deemed to be true, and any Order Suspending the Statement of Record, herein identified, shall be issued pursuant to 24 C.F.R. 1710.45(b)(1). This Notice shall be served upon the Respondent forthwith pursuant to 24 C.F.R. 1720.440.

JAMES W. MAST,
Chief, Administrative Law Judge.

NOTICES

Disclosure Act (Pub. Law 90–448) (15 U.S.C. 1710, et seq.) received a Notice of Proceedings and Opportunity for Hearing issued October 26, 1976, which was sent to the developer pursuant to 15 U.S.C. 1706(d), 24 CFR 1710.45(b) (1) and 1720.125 informing the developer of information obtained by the Office of Interstate Land Sales Registration alleging that the Statement of Record and Property Report for Compass Lake Hills located in Jackson County, Florida, contain untrue statements of material fact or omit to state material facts required to be stated therein or necessary to make the statements therein not misleading.

2. The Respondent filed an Answer received November 11, 1976, in response to the Notice of Proceedings and Opportunity for Hearing.

3. In said Answer the Respondent requested at hearing on the allegations contained in the Notice of Proceedings and Opportunity for Hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160(d), it is hereby ordered, That a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Judge James W. Mast, in Room 7146, Department of HUD, 451 7th Street, SW, Washington, D.C., on February 24, 1977 at 10:00 a.m.

5. The following time and procedure is applicable to such hearings: All affidavits and a list of all witnesses are required to be filed with the Hearing Clerk, HUD Building, Room 10150, Washington, D.C., 20410 on or before January 27, 1977.

6. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the proceedings shall be determined against Respondent, the allegations of which shall be deemed to be true, and an ORDER Suspending the Statement of Record, herein identified shall be issued pursuant to 24 CFR 1710.45(b) (1).

This Notice shall be served upon the Respondent forthwith pursuant to 24 CFR 1720.440.

By the Secretary.

JAMES W. MAST, Administrative Law Judge.

CANYON LAKE HILLS

Hearing

In the matter of: Canyon Lake Hills, David Miller, President and Lake Croft Beach Estates, Inc., 76-314-35, OilSR No. 0-2445-49-177.

Pursuant to 15 U.S.C. 1706(d) and 24 CFR 1720.160(b) notice is hereby given that:

1. Canyon Lake Hills, David Miller, President and Lake Croft Beach Estates, Inc., authorized agents and officers, hereinafter referred to as "Respondent", being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. L. 90–448) (15 U.S.C. 1710, et seq.) received a Notice of Proceedings and Opportunity for Hearing issued October 21, 1976, which was sent to the developer pursuant to 15 U.S.C. 1706(d), 24 CFR 1710.45(b) (1) and 1720.125 informing the developer of information obtained by the Office of Interstate Land Sales Registration alleging that the Statement of Record and Property Report for Canyon Lake Hills, located in Conal County Texas, contain untrue statements of material fact or omit to state material facts required to be stated therein or necessary to make the statements therein not misleading.

3. In said Answer the Respondent requested at hearing on the allegations contained in the Notice of Proceedings and Opportunity for Hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160(d), it is hereby ordered, That a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Judge James W. Mast, in Room 7146, Department of HUD, 451 7th Street, SW, Washington, D.C., on February 23, 1977 at 10 a.m.

5. The following time and procedure is applicable to such hearings: All affidavits and a list of all witnesses are required to be filed with the Hearing Clerk, HUD Building, Room 10150, Washington, D.C., 20410 on or before January 28, 1977.

6. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the proceedings shall be determined against Respondent, the allegations of which shall be deemed to be true, and an ORDER Suspending the Statement of Record, herein identified shall be issued pursuant to 24 CFR 1710.45(b) (1).

This Notice shall be served upon the Respondent forthwith pursuant to 24 CFR 1720.440.

By the Secretary.

JAMES W. MAST, Administrative Law Judge.

EVERGREEN MEADOWS

Hearing

In the matter of: Evergreen Meadows Units 1-7 and Evergreen Meadows West Units 1-2, Evergreen Meadows Land Company and Walter J. Burke, President, authorized agents and officers, hereinafter referred to as "Respondent", being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. L. 90–448) (15 U.S.C. 1710, et seq.) received a Notice of Proceedings and Opportunity for Hearing issued October 26, 1976, which was sent to the developer pursuant to 15 U.S.C. 1706(d), 24 CFR 1710.45(b) (1) and 1720.125 informing the developer of information obtained by the Office of Interstate Land Sales Registration alleging that the Statement of Record and Property Report for Evergreen Meadows Units 1-7 and Evergreen Meadows West Unit 1-2, located in Jefferson County, Colorado, contain untrue statements of material fact or omit to state material facts required to be stated therein or necessary to make the statements therein not misleading.

3. In said Answer the Respondent requested a hearing on the allegations contained in the Notice of Proceedings and Opportunity for Hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160(d), it is hereby ordered, That a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Judge James W. Mast, in Room 7146, Department of HUD, 451 7th Street, SW, Washington, D.C., on March 15, 1977 at 10:00 a.m.

The following time and procedure is applicable to such hearings: All affidavits and a list of all witnesses are required to be filed with the Hearing Clerk, HUD Building, Room 10150, Washington, D.C., 20410 on or before February 22, 1977.

5. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the proceedings shall be determined against Respondent, the allegations of which shall be deemed to be true, and an ORDER Suspending the Statement of Record, herein identified shall be issued pursuant to 24 CFR 1710.45(b) (1).

This Notice shall be served upon the Respondent forthwith pursuant to 24 CFR 1720.440.

Dated: December 6, 1976.

SHENANDOAH SHORES AND SHENAN-
DOH HEIGHTS DEVELOPMENT CORP-

Hearing

Pursuant to 15 U.S.C. 1706(d) and 24 CFR 1720.160(b) notice is hereby given that:

1. Shenandoah Shores, John J. Hall, President and Shenandoah Heights Development Corporation, authorized agents and officers, hereinafter referred to as “Respondent,” being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. Law. 90-448) (15 U.S.C. 1710, et seq.) received a Notice of Proceedings and Opportunity for Hearing issued November 4, 1976, which was sent to the developer pursuant to 15 U.S.C. 1706(d), 24 CFR 1710.45(b) (1) and 1720.125 informing the developer of the information obtained by the Office of Interstate Land Sales Registration alleging that the Statement of Record and Property Report for Shenandoah Shores, located in Warren County, Virginia, contain untrue statements of material fact or omit to state material facts required to be stated therein or necessary to make the statements therein not misleading.

3. In said Answer the Respondent requested a hearing on the allegations contained in the Notice of Proceedings and Opportunity for Hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160(d), it is hereby ordered, That a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Judge James W. Mast, in Room 7146, Department of HUD, 451 Seventh Street, S.W., Washington, D.C. on March 24, 1977 at 10:00 a.m.

5. The following time and procedure is applicable to such hearing: The parties are directed to file all affidavits and a list of all witnesses with the Hearing Clerk, HUD Building, Room 10150, Washington, D.C. 20410 on or before February 23, 1977.

6. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the proceedings shall be determined against Respondent, the allegations of which shall be deemed to be true, and an order Suspending the Statement of Record, herein identified, shall be issued pursuant to 24 CFR 1710.45 (b) (1).

This Notice shall be served upon the Respondent forthwith pursuant to 24 CFR 1720.440.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

GULF OF MEXICO OUTER CONTINENTAL SHELF (TENTATIVE-SALE NO. 51)

Call for Nominations of and Comments on Areas for Oil and Gas Leasing

Pursuant to the authority prescribed in 43 CFR 3301.3 (1975), nominations are hereby requested for areas on the Gulf of Mexico Outer Continental Shelf for possible oil and gas leasing under the Outer Continental Shelf Lands Act (43 U.S.C. 1331-1343 (1970)). Nominations will be considered for any or all of that part of the following mapped area which is located offshore the South Atlantic States.

1. Outer Continental Shelf Official Leasing Maps—Texas Nos. 1 through No. 7C. These maps are arranged in two sets (Nos. 1 through 4-7 maps, and Nos. 5 through 7C-8 maps) which will sell for $5 per set.

2. Outer Continental Shelf Official Leasing Maps—Louisiana Nos. 1 through No. 11A. This a set of 26 maps which sells for $15.

3. Outer Continental Shelf Official Protections Diagrams:

NG 14-3 Christi
NG 14-9 Port Isabel
NG 15-1 East Breaks
NG 15-6 Garden Banks
NH 18-12 Ed Bank (formerly New Orleans)
NG 15-3 Green Canyon (formerly New Orleans South No. 1)
NH 10-4 Mobile
NH 16-7 Viosca Knoll (formerly Mobile South No. 1)
NH 16-10 Mississippi Canyon (formerly Mobile South No. 2)
NH 18-5 Pensacola (except that area between the western boundary of the E18 range of blocks and the western boundary of the E18 range of blocks)
NH 18-8 Destin Dome (except that area between the western boundary of the E18 range of blocks and the western boundary of the E18 range of blocks; formerly Pensacola South No. 1)
NH 18-11 De Soto Canyon (except that area between the western boundary of the E18 range of blocks and the western boundary of the E18 range of blocks; formerly Pensacola South No. 2)

NH 16-9 Apalachee
NH 16-12 Florida Ridge Ground (formerly Apalachee)
NH 15-3 The Elbow (formerly Tampa West No. 1)
NH 15-8 North Tam (formerly Fort Myers West No. 2)
NH 17-7 Gainesville
NH 17-1 Tarpon Springs
NH 17-1 St. Petersburg (formerly Tampa)
NH 17-4 Charlotte Harbor (formerly Fort Myers West No. 1)

NO

These protection diagrams may be purchased individually for $2 each.

4. The disputed area between Texas and Louisiana now known as the Sabine Pass Area (Texas Map No. 8—Louisiana Map No. 12). An unpublished copy of this map is available for inspection at the New Orleans Outer Continental Shelf Office at the address cited below. An Official Leasing Map will be available prior to the closing date of the Call for Nominations and Comments, April 15, 1977, for $2 each.

All these maps may be purchased from the Manager, Bureau of Land Management, Outer Continental Shelf Office, Bureau of Land Management, Suite 841, Hale Boggs Federal Building, 500 Camp Street, New Orleans, Louisiana 70130.

All nominations must be filed in accordance with the Outer Continental Shelf Official Leasing Maps or Protection Diagrams prepared by the Bureau of Land Management, Department of the Interior, referred to above. Only whole blocks or properly described subdivisions thereof, not less than one quarter of a block, may be nominated.

In addition to requesting nominations of tracts for possible oil and gas leasing within the specified areas, this notice also requests comments identifying particular tracts recommended to be either specifically excluded from oil and gas leasing or leased only under special conditions because of conflicting values or environmental concerns. Particular geological, environmental, biological, archaeological, paleontological or other information which may bear upon potential leasing and development of particular tracts is requested where available. Information on the subjects will be used in the tentative selection of tracts which precedes any final selection by the Director pursuant to 43 CFR 3301.4. This information is requested not later than April 15, 1977.

Copies must be sent to the Conservation Manager, Gulf of Mexico OCS Operations, Geological Survey, Suite 336, Imperial Office Building, 3301 North Causeway Boulevard, Metairie, Louisiana 70011, and to the Manager, New Orleans Outer Continental Shelf Office, Bureau of Land Management at his address cited above.

This call for nominations and comments does not in any way commit the Department to leasing in the Gulf of Mexico. It is an information-gathering component of the Department's leasing procedure.

Final selection of tracts for competitive bidding will be made only after compliance with established Departmental procedures and all requirements of the National Environmental Policy Act of 1969. Notice of any tracts finally selected for competitive bidding will be published in the Federal Register stating the conditions and terms for leasing, the area involved, the place, date, and hour at which bids will be received and opened.

GEORGE L. TURCO,Associate Director, Bureau of Land Management.

HEATHER L. ROSS,Acting Assistant Secretary of the Interior.

OUTER CONTINENTAL SHELF OFFSHORE THE SOUTH ATLANTIC STATES

Availability of Draft Environmental Impact Statement and Holding of Public Hearings Regarding Proposed Oil and Gas Lease Sale

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a draft environmental impact statement relating to a proposed oil and gas lease sale of 225 tracts of submerged lands on the Outer Continental Shelf offshore the South Atlantic States (OCS Sale No. 43).

Single copies of the draft environmental statement can be obtained from the Office of the Manager, New Orleans Outer Continental Shelf Office, Bureau of Land Management, Hale Boggs Federal Building, Suite 841, 500 Camp Street, New Orleans, Louisiana 70130, and from

FEDERAL REGISTER, VOL. 42, NO. 32—WEDNESDAY, FEBRUARY 16, 1977

Copies of the draft environmental statement will also be available for review at the following public libraries: Atlanta Public Library, 128 Carnegie Way, Atlanta, Georgia; Savannah Public Library, 2902 Bull Street, Savannah, Georgia; Atlantic Regional Library, 205 Gloucester Street, Brunswick, Georgia; Volusia County Public Library, City Island, Daytona Beach, Florida; Jacksonville Public Library System, 122 North Ocean Street, Jacksonville, Florida; Leon and Jefferson-Bureau of Land Management, at the wish to testify at the hearings are re-leased Outer Continental Shelf Office, 1977. Written comments from those un-above address Orleans Outer Continental Shelf Office, of organizations, and public officials who local agencies.

opportunities to receive further com-ments and views of concerned State and eval-uate fully the potential effects of both public and private sectors to help

annual installments on the average 22-foot thick Rosebud Coal Seam will be mined from the lands to be leased. This coal contains an average of 8,350 Btu per pound, and has an average content of 0.69% sulfur and 8.0% ash, all determined on the as-received basis. Written comments on the fair market value will be received by the Area Mining Supervisor, U.S. Geological Survey, P.O. Box 2550, Billings, Montana 59103, until February 24, 1977.

LANDS OFFERED: The lands are located in Rosebud County near the community of Colstrip, Montana. Coal is located 29 miles south of Interstate 94 and 36 miles from Forsyth, Montana. The lands are described as follows: Township 92 North, Range 41 East, Principal Meridian, Montana, Section 32, E1/2SW1/4, containing 200 acres.

DETAILED STATEMENT: A detailed statement of the terms and conditions of the lease offer, how and where to submit sealed bids and the obligations of the high bidder to pay for publication of this notice may be obtained from Chief, Division of Technical Services, Montana State Office, 220 North 32nd Street, P.O. Box 30157, Billings, Montana 59107.

NOTICES

The matters to be discussed at this meeting will include: (1) an Operations Report; (2) Status of General Management Plan; and (3) Report of Development Concept Plans for Davis Bayou, Santa Rosa, and Naval Live Oaks Reservation.

The meeting will be open to the public. However, facilities and spaces for accommodating members of the public are limited and it is expected that not more than 25 persons will be able to attend. Any member of the public may file with the commission a written statement concerning the matters to be discussed. Members of the public may attend the tour of Fort Barrancas and the Advanced Redoubt if they provide their own transportation to the forts.

Persons wishing further information concerning this meeting or who wish to submit written statements may contact the Acting Deputy Director of Operations, subject, Gulf Islands National Seashore, P.O. Box 100, Gulf Breeze, Florida 32561, Telephone 904/393-3032. Minutes of the meeting will be available for public inspection approximately 4 weeks after the meeting at park headquarters.

DAVID G. WRIGHT,
Acting Regional Director, Southeast Region.

INTERNATIONAL TRADE COMMISSION

MEETING

[USITC SE-77-12A]

Additional Agenda Item

At its meeting of February 10, 1977, the United States International Trade Commission, acting on the authority of 19 U.S.C. 1335 and in conformity with proposed 19 CFR 201.32(a), voted to add the following item to its agenda for the meeting of February 15, 1977:

Commissioners Parker, Leonard, Moore, Bedell, and Ablondi voted by unanimous consent, that Commission business requires the change in subject matter by addition of this agenda item, affirmed that no earlier announcement of the addition to this agenda was possible, and directed the issuance of this notice at the earliest practicable time. (Commissioner Minchew was not present for the vote.)

On the authority of 19 U.S.C. 1335 and in conformity with proposed 19 CFR 201.32(a), when a person's privacy interests may be directly affected by holding a portion of a Commission meeting in public, that person may request the Commission to close such portion to public observation. Such requests should be communicated to the Office of the Chairman.

By order of the Commission.

KENNETH R. MASON,
Secretary.
NOTICES

The Legal Services Corporation was established pursuant to the Legal Services Corporation Act of 1974, Pub. L. 93-355, 88 Stat. 378, 42 U.S.C. 2996-29961. Section 107(f) provides: "At least thirty days prior to the approval of any grant application or prior to entering into a contract or prior to the initiation of any other project, the Corporation shall announce publicly, and shall notify the Governor and the State Bar Association of any State where legal assistance will thereby be initiated, or such grant, contract, or project.

The Legal Services Corporation hereby announces publicly that it is considering the grant applications submitted by:

1. Legal Aid Bureau of Pulaski County to serve counties of Jefferson, Garland, Lonoke, Faulkner and Saline, Arkansas.
2. Jackson County Legal Services, to serve Independence, Lawrence, Fansett & Woodruff Counties, Arkansas.
3. Spartansburg County Legal Aid, Inc., to serve Spartansburg County, South Carolina.

Interested persons are hereby invited to submit written comments or recommendations concerning the above applications to the Regional Office of the Legal Services Corporation at:

Atlanta Regional Office, 616 Peachtree Street, N.E., Room 503, Atlanta, Georgia 30306.

THOMAS EHRLICH, President.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

ARCHITECTURE & ENVIRONMENTAL ARTS ADVISORY PANEL

Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92-463), notice is hereby given that a closed meeting of the Architecture & Environmental Arts Advisory Panel to the National Council on the Arts will be held on March 7-8, 1977, from 9:00 a.m. to 5:30 p.m., in Room 1120, Columbia Plaza Building, 2401 E Street NW, Washington, D.C.

This meeting is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in con- fidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the Federal Register of June 16, 1975, this meeting, which involves matters exempt from the provisions of the Freedom of Information Act (5 U.S.C. 552(b), (4), (5), and (6)) will not be open to the public.

Further information with reference to this meeting can be obtained from Mr. Robert M. Sims, Advisory Committee Management Officer, National Endowment for the Arts, Washington, D.C. 20506, or call (202) 334-6377.

ROBERT M. SIMS, Administrative Officer, National Endowment for the Arts, National Foundation on the Arts and the Humanities.

MUSIC ADVISORY PANEL

Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92-463), notice is hereby given that a meeting of the Music Advisory Panel (Composer/Librettist Section) to the National Council on the Arts will be held on March 1-4, 1977, from 9:30 a.m. to 5:30 p.m., in Room 1625, Columbia Plaza Building, 2401 E Street NW, Washington, D.C.

A portion of this meeting will be open to the public on March 2, from 1:00 p.m. to 5:30 p.m., on a space available basis. Accommodations are limited. The agenda for this session will include a discussion of program guidelines.

The remaining sessions of this meeting will be closed to the public. A summary of the closed sessions will be presented to the National Council on the Arts.

[FR Doc.77-4903 Filed 2-15-77; 8:45 am]

FEDERAL REGISTER, VOL. 42, NO. 32—WEDNESDAY, FEBRUARY 16, 1977

The General Counsel to the Commission certified that it is his opinion that the Commission's action in closing this portion of its meeting of February 22, 1977, was properly taken by a vote of a majority of the entire membership of the Commission pursuant to 5 U.S.C. 552b(d) (1) and in conformity with proposed 19 C.F.R. 201.37(e). The discussion to be held in closed session is within the specific exemptions of 5 U.S.C. 552b(e) (2) and (6) and proposed 19 C.F.R. 201.37(b) (2) and (6).

By order of the Commission.

RUSSELL N. SHEWMAKER,
General Counsel.

KENNETH R. MASON,
Secretary.

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

IMMIGRATION AND NATURALIZATION SERVICE, HISPANIC ADVISORY COMMITTEE ON IMMIGRATION AND NATURALIZATION

Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. App. I) notice is hereby given of a meeting of the Hispanic Advisory Committee on Immigration and Naturalization to be held from 9:30 a.m. to 5:00 p.m. on Thursday, March 3 and continuing from 9:30 a.m. to 5:00 p.m. on Friday, March 4, 1977, in Conference Room 7051, Immigration and Naturalization Service, 425 "T" Street, NW., Washington, D.C.

The agenda for the meeting will be as follows:

THURSDAY, MARCH 3

I. Call to order by the Chairperson.
II. Welcoming remarks by the Commissioner.
III. Approval of minutes of Advisory Committee meeting of December 17, 1976.
IV. Staff Briefings:
   (a) Report by Domestic Council Committee on Illegal Aliens.
   (b) Western Hemisphere Bill Update (Pub. L. 94-571).
   (c) Allen Smuggling.
   (d) Fraudulent Entry Study.
   (e) Alien Identification Documentation and Telecommunications (ADIT) System.
   (f) National/State Legislation review.
   (g) INS Media/Public Service Announcement Efforts.
V. Subcommittee Meetings.
VI. Recess.

FRIDAY, MARCH 4

VII. Meeting reconvenes.
VIII. Subcommittee reports, Committee action, and formal recommendations to the Commissioner.
IX. Presentations from audience.
X. Old/New business.
XI. Subcommittee meetings.
XII. Adjournment.

Attendance is open to the interested public, but is limited to the space available.

Persons seeking information concerning this meeting should contact: Mr. E. G. Durate, Special Assistant to the Commissioner of Immigration and Naturalization for Hispanic Liaison, Room 7051, 425 "T" Street, NW., Washington, D.C. 20535, telephone (202) 376-8211.

L. F. CHAPMAN, JR.,
Commissioner of Immigration and Naturalization.

GOVERNMENT IN THE SUNSHINE ACT

Rules Governing Open Meetings; Proposed Amendment to By-Laws

The Government in the Sunshine Act (5 U.S.C. 552b) (hereinafter "Sunshine Act") requires government agencies to hold open meetings, subject to prescribed exceptions, when agency members take final action on agency business.

While the Sunshine Act refers only to government agencies, as defined therein, the Report of the Conference Committee on the bills adopted by the House and Senate refers to the National Railroad Passenger Corporation (hereinafter the "Corporation") as an example of the type of "agency" intended to be included in language the Conference rewrote to describe the agencies subject to the Sunshine Act.

The Corporation was created by the Rail Passenger Service Act of 1970 (45 U.S.C. 501 et seq.) (hereinafter "RPS Act") as a for-profit corporation. The RPS Act expressly provides that the Corporation "will not be an agency or establishment of the United States Government" (45 U.S.C. 541). The budget submitted by the former administration for fiscal year 1978 describes the Corporation as a "** * private, for-profit corporation".

The Corporation is subject to the provisions of the RPS Act and pursuant to that Act is incorporated under the District of Columbia Business Corporation Act. The Corporation has issued 9,385,693 shares of common stock which are held by four stockholders. The stock was required by the RPS Act to be issued in amounts equal in par value to payments that the RPS Act required railroads to make to the Corporation in consideration of their being relieved of their entire responsibility for the provision of intercity rail passenger service as of May 1, 1971 (45 U.S.C. 561).

Eight of the thirteen members of the present Board of Directors are appointed by the President of the United States with the advice and consent of the Senate. Three of the eight members are required to be designated at the time of their appointment as consumer representatives pursuant to the Sunshine Act.

The Secretary of Transportation and the President of the Corporation, who is elected by the Board of Directors, are full time employees of the Corporation, ex officio. Three other members of the Board are elected by the common stockholders.

The Board of Directors meets only at stated intervals in the same manner as board of directors of typical business corporations. It is not a full time body, nor are its members, except for the President, full time employees of the Corporation. The members who comprise the collegial bodies that head the government agencies subject to the Sunshine Act. The bulk of the Corporation's decisions, as in the case of typical business corporations, are made by management. The Board of Directors, its members, and their functions differ substantially from the collegial bodies which head government agencies and in which the law places total responsibility for agency decision.

As a business corporation in the field of transportation, the Corporation is competitive with intercity bus lines such as Greyhound Corporation and Continental Trailways, Inc., some airlines, and in a limited sense with four other privately owned passenger carrying railroads (Auto-Train Corporation, Southern Railway Company, Denver and Portland, Chicago, Rock Island & Pacific Railroad Corporation).

The bulk of the Corporation's routes are run over the tracks of eighteen privately owned railroads, since the Corporation owns only the tracks in the so-called Northeast Corridor from Washington to Boston, New Haven to Springfield, and Philadelphia to Erie, and certain small segments of track in the Midwest.

The right to use the tracks of the nation's railroads is subject to contractual arrangements negotiated on an arms-length basis. The negotiations involve cost considerations and factors, and trade and technical information and practices, that vary from railroad to railroad. The Corporation's effectiveness in negotiating such business transactions can be realized only when the Corporation is able to negotiate on the same basis as the operating railroads, who are not required to conduct or discuss their business in meetings open to the public. The Corporation's ability to compete with other rail companies is also subject to the same practical business considerations.

Open meetings attended by the public permit the attendance of competitors, contractors, suppliers, and others with whom the Corporation does business. The ability of any commercially competitive business organization to maintain its competitive status in such circumstances is questionable. In the case of the Corporation, public attendance will impinge upon the attainment of the goals in the RPS Act and might frustrate actions necessary to generate increased revenues and opportunities to reduce losses (and subsidies) and move toward profitability.

The Corporation's by-laws are proposed without prejudice to the Corporation's legal status as a for-profit business corporation for the reason noted. Further, the reason that the public interest might be jeopardized by the requirement that the Corporation's business activities be conducted in the manner of a government agency. The Corporation, the note in the reason that the Sunshine Act assimilates the Corporation to the form, character, and mold of a government agency engaged in performance of government functions, and in so doing, lends support to the legal argument that a condemnation has occurred with respect to certain railroad properties acquired by the Corporation on April 1, 1976.

This risk was sufficiently grave that the then Secretary of Transportation on March 18, 1976, advised the Congress not to appropriate funds appropriated by law for the purchase of the Northeast Corridor railroad properties from Consolidated Rail Corporation (hereinafter "ConRail"). The Congress acknowledged the warning and the courts might rule that a condemnation occurred, by heeding the Secretary's advice and refusing to appropriate the money at that time. The Congress exercised its discretion in the circumstances, and decided against a step that might conceivably lead to a ruling of condemnation at some later time.

The financial consequences of such a ruling, while impossible to predict, are potentially large; the creditors of the Penn Central Transportation Company informed the Supreme Court of the United States that a study which they had commissioned indicated a cost that could run as high as $13.5 billion on their own alone. Cost benefit considerations suggest that it might be wiser to invest such large sums in the rehabilitation of the nation's railroads or the construction of a new, solely passenger train system, rather than risk having to pay the remainder to creditors of bankrupt railroads because the Corporation is now being linked to governmental function, status, and activity by the Sunshine Act.

In heeding the Secretary's warning in March 1976, the Congress refrained from taking a specifically directed federal action because of the risk that might follow. In the Sunshine Act, the Congress, without reference to the concerns to which it responded in March 1976, gave effect to a specifically directed federal action that places the Corporation in the context of agencies performing government functions, the creation of which might equally prove to be a risk of a condemnation ruling.

The action was taken presumably because the Corporation receives money from the federal government to make up for unavoidable operating deficits and to finance equipment purchases. As a sub-
sidy, these monies vary only in amount and manner of availability from sub-
stantial government financed programs, that are
available to the Corporation's competi-
tors among bus and airlines, none of which is subject to the Sunshine Act.
By amendment to the Government Corporation Control Act (31 U.S.C. 856), the
Corporation is defined as a mixed-
ownership government corporation in or-
der to enable it or the Comptroller General of the United States to audit the manner in which the Corporation uses such mon-
ies in order to assure that the public in-
terest is adequately protected. Indeed, the Comptroller General is empowered to audit ConRail, also a mixed-ownership
government corporation under the Gov-
ernment Corporation Control Act (31 U.S.C. 856(b)), because of its receipt of
financial aid from the federal govern-
ment, even though ConRail has not been
made subject to the Sunshine Act.
The public interest is protected also by the presence on the Corporation's Board of Directors of three members appointed by the President and confirmed by the Senate as representatives of consumer interests. The Corporation is subject to supervision and regulation of its ac-
tivities by a multiplicity of federal, reg-
ulatory and executive agencies (the reg-
ulatory agencies themselves being sub-
ject to the Sunshine Act while executive agencies, in general, are not), in
many instances by state regulatory bodies, and by several committees of the
Congress. The Corporation is subject to the Freedom of Information Act (5
U.S.C. 552b), in addition to the substan-
tial information that it customarily re-
leases to the public in the interest of
promoting train travel and "selling tickets. In order to meet the goal of mak-
ing a profit that the law requires, and in
order to increase the Corporation's rev-
ues in the hope of reducing subsidies, the Corporation must preserve the
normal commercial negotiating and
competitive advantages—available to its competitors and the general public—on
roads—that are essential to its operation in a safe, efficient and economical man-
ner.

Notwithstanding the necessity to comply with the goals and the mandate provided by the RPS Act to become more effective as a competitive business enter-
tprise, the Corporation, without prejudice to its status or to the ability of the
United States to avoid a potential finan-
cial liability of considerable magnitude, will amend its by-laws in order to com-
ply also with the apparent directive of the Supreme Court which will add an Appendix A in form and content as set forth below.

Written comments concerning the pro-
posed addition to the Corporation's By-
laws are invited from interested persons. Comments may be addressed in writing to the Secretary, National Railroad Pas-
enger Corporation, 305 L'Enfant Plaza
North, Washington, D.C. 20024. All
written comments received no later than
March 18, 1977, will be considered. Such
written comments will be made available
until that date for public inspection at the
office of the Secretary of the Corpora-
tion during normal business hours.

The purpose of adding an Appendix A to the Corporation's By-laws to imple-
ment subsections (b) through (f) of the
Sunshine Act (5 U.S.C. § 552b) to the extent the Corporation may be subject to these requirements.

tion during normal business hours.
Board of Directors to open or close a meeting, or any portion thereof, to the public, may be changed following the adoption of the provisions of this rule only if (A) a majority of the members of the Board of Directors determines by a recorded vote that the business of the Corporation so requires and that no earlier announcement of the change was possible, and (B) the Corporation makes a subsequent public announcement thereof to the public at the earliest practicable time that (1) contains the information required by paragraph (a) of this rule subject matter or the determination to open or close a meeting, or any portion thereof, to the public, and (ii) includes the vote of each member of the Board of Directors upon such change.

Subject to the requirements of paragraph (d) of this rule, the Board of Directors expressly reserves the right during the course of a meeting to discuss and to vote on a matter not previously announced as an agenda item if its relevance to the meeting was not previously known.

The Secretary shall issue each announcement to the public required by this rule by (A) releasing such announcement to the press, (B) posting such announcement in a public place located at the Corporation's principal office in Washington, D.C., (C) mailing and maintaining a record of each such announcement on a bulletin board or in a similar manner to the public and the staff, and (D) submitting each such announcement for publication in the Federal Register.

RULE 5—OPEN MEETINGS

(a) All meetings shall be conducted in accordance with the provisions of the rules contained in this Appendix. Except as provided in Rule 6, every portion of every meeting shall be open to the public unless the Corporation determines to contain a clearly unwarranted invasion of personal privacy;

(b) Disclose information contained in or related to examination, operating, or condition reports prepared by, or on behalf of, or for an entity that is regulated or supervised by a financial institution;

(c) Disclose information the premature disclosure of which would be likely to significantly frustrate implementation of a proposed action by the Corporation, except in any instance where the Corporation has already disclosed to the public the content or nature of its proposed action, or where the Corporation is required by law to make such disclosure on its own initiative prior to taking final corporate action on such proposal;

(d) Disclose investigative techniques and procedures, or (E) endanger the life or physical safety of law enforcement personnel;

(e) Disclose investigatory records compiled for law enforcement purposes, or information which if written would be contained in such records, but only to the extent that the production of such records or information would (A) interfere with enforcement proceedings, or (B) deprive a person of a right to a fair trial or an impartial adjudication, (C) constitute a clearly unwarranted invasion of personal privacy,

(f) Disclose the identity of a confidential source, and, in the case of a record compiled by a branch, division, or agency authority in the course of a criminal investigation, confidential information furnished only by the confidential source, or (G) disclose investigative techniques and procedures, or (F) endanger the life or physical safety of law enforcement personnel;

(g) Disclose records or information required to be made publicly available a full written explanation of its action closing the portion together with a list of all persons expected to attend the meeting and their affiliation.

RULE 5—CERTIFICATION OF GENERAL COUNSEL

For every meeting closed pursuant to subparagraph (a) of Rule 6, the General Counsel shall publicly certify that, in his or her opinion, the conditions of (A) and (B) of this rule exist and he or she shall state each relevant exemption provision. A copy of such certification, together with a list of all persons present at the time of closing, shall be submitted by the Chairman setting forth the time and place of the meeting, and the persons present, shall be retained by the Secretary.

RULE 6—CLOSING MEETINGS

(a) The Secretary shall maintain a complete transcript or electronic recording adequate to record fully the proceedings of each meeting, or any portion thereof, closed to the public, except that in the case of a meeting, or any portion thereof, closed to the public pursuant to subparagraph (b) or (d) of rule 6, the Secretary shall maintain such transcript or recording, for a period of at least two years after such meeting.

(b) With respect to any transcript, electronic recording, or minutes made pursuant to the requirements of paragraph (a) of this rule, the Secretary shall promptly compile a complete copy of the minutes, or a complete electronic recording of each meeting, or any portion thereof, closed to the public pursuant to subparagraph (b) or (d) of rule 6, the Secretary shall maintain such transcript or recording, for a period of at least two years after such meeting, or until one year after the conclusion of any instance where the Corporation has already disclosed to the public the content or nature of its proposed action, or where the Corporation is required by law to make such disclosure on its own initiative prior to taking final corporate action on such proposal;

(c) Disclose information the premature disclosure of which would be likely to significantly frustrate implementation of a proposed action by the Corporation, except in any instance where the Corporation has already disclosed to the public the content or nature of its proposed action, or where the Corporation is required by law to make such disclosure on its own initiative prior to taking final corporate action on such proposal;

(d) Disclose investigative techniques and procedures, or (F) endanger the life or physical safety of law enforcement personnel;

(e) Disclose investigatory records compiled for law enforcement purposes, or information which if written would be contained in such records, but only to the extent that the production of such records or information would (A) interfere with enforcement proceedings, or (B) deprive a person of a right to a fair trial or an impartial adjudication, (C) constitute a clearly unwarranted invasion of personal privacy,

(f) Disclose the identity of a confidential source, and, in the case of a record compiled by a branch, division, or agency authority in the course of a criminal investigation, confidential information furnished only by the confidential source, or (G) disclose investigative techniques and procedures, or (F) endanger the life or physical safety of law enforcement personnel;

(g) Disclose records or information required to be made publicly available a full written explanation of its action closing the portion together with a list of all persons expected to attend the meeting and their affiliation.

RULE 7—REPORT TO CONGRESS

The Secretary shall annually report to Congress the Corporation with respect to which the meeting, or any portion thereof, was closed, whichever occurs later.
NOTICES

11:30 a.m. Discussion from task force, chairman.
1 p.m. Continuation of morning discussions, chairman.
3 p.m. Tentative agenda for third task force meeting, chairman.
4 p.m. Adjourn.

FRED K. MURAKAMI,
Committee Management Officer.

OFFICE OF MANAGEMENT AND BUDGET

PRIVACY ACT OF 1974

Reports on New Systems

The purpose of this notice is to list reports on new systems filed with the Office of Management and Budget to give members of the public the opportunity to make inquiries about them and to comment on them.

The Privacy Act of 1974 requires that agencies give advance notice to the Congress and the Office of Management and Budget of their intent to establish or modify systems of records subject to the Act (5 U.S.C. 552a(b)). During the period January 24, through February 4, 1977 the Office of Management and Budget received the following reports on new (or revised) systems of records.

DEPARTMENT OF JUSTICE

System Names:
(1) Pretrial Diversion Program Files.
(2) DEA Employee Profile Files.
(3) Inmate Commissary Accounts Records.
(4) LEAA Law Enforcement Information System.
(5) LEAA Grants Management Information System.
(6) Financial Management System.

Report Date: January 19, 1977.

Point of Contact:
Mr. Harry L. Gastley, Administrative Counsel, Office of Management and Finance, Department of Justice, Washington, D.C. 20540.

DEPARTMENT OF DEFENSE

System Names:
(1) Kindergarten Student File.
(2) Advanced Personal Data System.
(3) Air Traffic Control Personnel Reporting.

Report Date: January 26, 1977.

Point of Contact:
Mr. William T. Caveney, Defense Privacy Board, Forrestal Building, 100 Independence Avenue, SW, Washington, D.C. 20314.

FEDERAL MARITIME COMMISSION

System Names:
(1) Management and Program Evaluation File.
(2) Payroll Records.

Report Date: January 27, 1977.

Point of Contact:
Mr. Otto J. Kirse, Assistant Managing Director for Consumer Affairs, Federal Maritime Commission, 1100 L Street, NW, Washington, D.C. 20573.

FEDERAL POSTAL SERVICE

System Names:
(1) Equal Employment Opportunity, EEO Administrative Case Files.
(2) Personnel Records Arbitration Case Files.
(3) Personnel Records Veterans Appeals (Administrative Litigation Case Files).
(4) Personnel Records Gannishment Case Files.
(5) Personnel Records Monetary Claims Involving Present or Former Employees (Case Files).
(6) Labor Law Civil Action, Civil Action Case Files.

Report Date: January 31, 1977.

Point of Contact:
Mr. John E. Finlay, USPS Records Officer, United States Postal Service, Washington, D.C. 20260.

VILMA N. BALDWIN,
Assistant to the
Director for Administration.

SECURITIES AND EXCHANGE COMMISSION

[Release 34-33523; File No. SB-NASD-77-4]

NATIONAL ASSOCIATION OF SECURITIES DEALERS, INC.

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78(2)(b)(1), as amended by Pub. L. 94-29, 16 (June 4, 1975) notice is hereby given on February 6, 1977 the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

NASD'S STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

TEXT OF PROPOSED RULE CHANGE

The following is the full text of the proposed amendments to Schedule C under Article I, Section 2(c) of the By-Laws. These amendments shall be designated Part III of Schedule C and existing
NOTICES

parts III-VI shall be redesignated Parts IV-VII.

III

SUMMARY SUSPENSION

(1) Summary Action. The Corporation may summarily:

(a) Suspend a member or person associated with a member who has been and is expelled or suspended 1 from any self-regulatory organization or barred or suspended from being associated with a member of any self-regulatory organization; and

(b) Suspend a member who is in such financial or operating difficulty that the Corporation determines and so notifies the Securities and Exchange Commission that the member cannot be permitted to continue to do business as a member with safety to investors, creditors, other members, or the Association. Any person aggrieved by such summary action shall be promptly afforded an opportunity for a hearing by the Association in accordance with the provisions of paragraphs (1) or (2) of this subsection.

Section 15A(h) (1) provides that "in any proceeding by a registered securities association to determine whether a member or person associated with a member shall be disciplined (other than a summary proceeding pursuant to subparagraph (3) of this paragraph) the Association shall bring specific charges, notify such member or person of, and give him an opportunity to defend against, such charges, and keep a record."

(2) Written notification. Any member or person associated with a member against whom the Corporation takes summary action pursuant to section (1) above shall be promptly notified in writing or otherwise of such action. Such notification shall contain a statement of the specific grounds on which such action is taken and an opportunity for a hearing is afforded pursuant to the provisions of sections (3) and (4) hereof. Such summary action shall not be conditioned upon such notification but shall be effective immediately.

(3) Request for hearing. Any member or person associated with a member against whom the Corporation takes summary action may request an opportunity for a hearing within ten (10) days of the date of notification pursuant to section (2) above. Such hearing shall be held within five (5) days of such request. A request for a hearing shall not operate as a stay of the summary action.

(4) Hearing. If a hearing is requested pursuant to section (3) above, it shall be held before a person or persons designated by the Board of Governors. Such member or person associated with a member shall be entitled to be heard in person and represented by counsel and to submit any relevant matter which such member or person desire to present. Counsel for the Corporation or other designated Corporation personnel may participate in such hearing and be entitled to submit any relevant matter which counsel or such personnel may desire to present. In any such proceeding, a record shall be kept.

(5) Decision. A written decision shall be issued within five (5) days of the date of the hearing, and a copy shall be sent to the member or person associated with a member. A written decision shall contain the reasons supporting the action taken.

(6) Review by Board. (a) If the member or person associated with a member does not request an opportunity for a hearing pursuant to section (3) above, the notification of summary action shall be subject to review by the Board of Governors within thirty (30) days of the date of the notification.

(b) The written decision issued pursuant to section (5) above shall be subject to review by the Board of Governors upon application of the member or person associated with a member filed within fifteen (15) days after issuance. Any such decision shall also be subject to review by the Board of Governors on its own motion within thirty (30) days after issuance.

(c) The institution of review, whether by the Board of Governors or on its own initiative, shall not operate as a stay of the summary action.

(7) Findings of Board on Review. Upon consideration of the record and after further hearings as the Board of Governors shall order, if the Board shall find that the notification or written decision is inconsistent with the grounds of the summary action contained in section (1) above, the Board shall, in writing, modify, amend, or abrogate such notification or decision, or require the matter for further proceedings consistent with its instruction. The Board shall set forth specific grounds upon which its determination is based.

(8) Procedure of Summary Suspension. The Procedures of Summary Suspension are not intended to foreclose action by the District Business Conduct Committee of the District in which the broker/dealer is located under the Code of Procedure for Handling Trade Practice Complaints where a violation of the Rules of Fair Practice may be involved.

(9) Application to Commission for Stay of Summary Action. Any member or person associated with a member aggrieved by summary action taken by the Corporation may apply to the Securities and Exchange Commission for a stay of such summary action as permitted by Section 15A of the Securities Exchange Act of 1934 as amended. Such application shall bring specific charges, notify such member or person of, and give him an opportunity to defend against, such charges, and keep a record.

(10) Application to Commission for Review. In any case where a member or person associated with a member feels aggrieved by any action taken or approved by the Board of Governors, such member or person may make application for review to the Securities and Exchange Commission in accordance with section 19 of the Securities Exchange Act of 1934 as amended.

Purpose of Proposed Rule Change. Section 15A(h) (3) of the Securities Exchange Act as amended in 1975 provides that a registered securities association may summarily suspend a member if certain due process protections enunciated in the statute are met. The proposed amendments to Schedule C provide that the procedures the Association has devised to insure that a member firm or person associated with a member firm who is summarily suspended is afforded due process protection in the form of a hearing and notice by the Board of Governors of the NASD.

Basis Under the Act for Proposed Rule Change. Section 15A(h) (3) of the Securities Exchange Act as amended in 1975 provides that a registered securities association may summarily suspend a member if certain due process protections enunciated in the statute are met. The proposed amendments to Schedule C provide that the procedures the Association has devised to insure that a member firm or person associated with a member firm who is summarily suspended is afforded due process protection in the form of a hearing and notice by the Board of Governors of the NASD.

1 The term "suspended from any self-regulatory organization" in paragraph (1) (a) hereof refers to a suspension that is in effect and not one that has expired.
tioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before March 18, 1977.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS, Secretary. FEBRUARY 10, 1977. [FR Doc. 77-4635 Filed 2-15-77; 8:45 am]

WESTERN RESOURCE AND DEVELOPMENT, INC.

Order Permanently Suspending Exemption FEBRUARY 9, 1977.

I. Western Resource and Development, Inc. (the “issuer”), 3353 South Main Street, Salt Lake City, Utah 84121, formerly a Utah corporation with offices located in Salt Lake City, Utah, filed with the Denver Regional Office of the Securities and Exchange Commission on September 25, 1973, a notification, offering circular, and related exhibits relating to an offering of 2,000,000 shares of one cent par value common stock at ten cents per share for an aggregate of $200,000 for the purpose of obtaining an exemption from the registration requirements of the Securities Act of 1933, as amended, pursuant to the provisions of section 3(b) thereof, and Regulation A, promulgated thereunder. Aaron R. Jenkins, president of the issuer, was to act as underwriter. No amendments to the notification were filed and a commencement date for the offering has not been established.

II. On August 25, 1976, the Commission temporarily suspended the Regulation A exemption of the issuer, stating that it had reasonable cause to believe that:

A. The Offering Circular contained untrue statements of material facts and omitted to state material facts necessary to make the statements made, in light of the circumstances under which they were made, not misleading, particularly with respect to:

(1) Failure to adequately describe the nature of the assets of the issuer.
(2) Failure to adequately disclose the purposes for which the proceeds were to be used.
(3) Failure to disclose that the State of Utah dissolved the issuer’s Charter.
(4) Failure to disclose the present address of the issuer.
B. The terms and conditions of Regulation A were not met in that:

(1) The business in which the issuer proposed to engage was not adequately described in the offering circular.
(2) The purposes for which the proceeds were to be used were not adequately disclosed.
(3) The loss of the Corporate Charter with the State of Utah and the present address of the issuer were not disclosed.
(4) The accurate addresses of all the officers and directors of the issuer were not disclosed.
C. The issuer and its officers and directors have failed to cooperate.
D. The offering, if made, would be in violation of section 17 of the Securities Act of 1933, as amended.

III. No further offering having been requested by the issuer within thirty days after entry of the order temporarily suspending its exemption under Regulation A, the Commission finds that it is in the public interest and for the protection of investors that the exemption be permanently suspended.

It is ordered, Pursuant to Rule 201 of the General Rules and Regulations under the Securities Act of 1933, as amended, that the exemption of the issuer under Regulation A be, and it is hereby, permanently suspended.

For the Commission, by its Secretary, pursuant to delegated authority.

GEORGE A. FITZSIMMONS, Secretary.

DEPARTMENT OF STATE

[Public Notice CM-7/21]

SHIPPING COORDINATING COMMITTEE
SUBCOMMITTEE ON SAFETY OF LIFE AT SEA Meeting

The working group on ship design and equipment of the Subcommittee on Safety of Life at Sea concerned with nuclear ships will hold an open meeting on Thursday, March 10, 1977, at 9:30 a.m. in Room 8233 of the Department of Transportation, 400 Seventh Street, S.W., Washington, D.C.

The purpose of the meeting will be to review the latest Intergovernmental Maritime Consultative Organization (IMCO) activities in the development of a design code for nuclear ships; discuss and make recommendations for the development of Chapters 3—Ship Design; 4—Reactor Design; 5—Main and Auxiliary Machinery and—Electrical Restrictions, for submission to IMCO.

Requests for further information on the meeting should be directed to Captain D. J. Linde, United States Coast Guard. He may be reached by telephone on (area code 202) 426-2167.

The Chairman will entertain comments from the public as time permits.

RICHARD K. BANK, Chairman.

Shipping Coordinating Committee. FEBRUARY 9, 1977. [FR Doc. 77-4631 Filed 2-15-77; 8:45 am]

Agency for International Development

ADVISORY COMMITTEE ON AGRICULTURAL AND RURAL SECTOR PLANNING Certification

The Advisory Committee on Agricultural and Rural Sector Planning will serve the public interest by establishing a joint system which will enable U.S. professional economists to have an integral role in activity evaluation with their AID colleagues and to collaborate fully with their LDC counterpart professionals. The stated goal of the program "is to improve the performance and contribution of the agricultural and rural sectors of LDCs in achieving their overall economic and social development objectives." The Committee will provide advice for ensuring that project activities are consonant with AID objectives and goals, and will develop recommended policies for the project, including criteria for priority setting of activity workload, for professional staff utilization and development, and for review activities.

Accordingly, I hereby certify, pursuant to the provisions of the Federal Advisory Committee Act, Pub. L. 92-463 and OMB Circular A-63, that establishment of the Advisory Committee in the public interest.

DANIEL PARKER. JANUARY 8, 1977. [FR Doc. 77-4632 Filed 2-15-77; 8:45 am]

FEDERAL REGISTER, VOL. 42, NO. 32—WEDNESDAY, FEBRUARY 16, 1977
NOTES

3. SALE PROCEDURES

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, D.C. 20226, up to 1:30 P.M., Eastern Standard Time, February 17, 1977. Noncompetitive tenders, as defined below, will be considered timely if postmarked no later than Wednesday, February 16, 1977.

3.2. Each tender must state the face amount of securities bid for, which must exceed $5,000, or a multiple thereof. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.11%. Common fractions may not be used. Noncompetitive tenders must show the term “noncompetitive” on the tender form in lieu of a specified yield. No tender may submit more than one noncompetitive tender, and the amount may not exceed $1,000,000.

3.3. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York the yields of securities in their positions with respect to Government securities and borrowings thereon, may submit tenders for account of custo- 
mers, provided the names of the custo- 
mers and the amount for each cus- 
tomer are furnished. Others will not be 
permitted to submit tenders except for 
their own account.  

3.4. Tenders will be received without deposit for their own account from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and 

3.5. Immediately after the closing hour, tenders will be opened, following which publication will be made of the amount and yield range of accepted bids. Subject to the restrictions expressed in Section 4, noncompetitive tenders will be accepted in full at the average price (in three decimals) of accepted competitive tenders. and competitive tenders with the lowest yields will be accepted to the extent required to attain the amount offered. Tenders at the highest accepted yield will be pro- 
rated if necessary. After the determina- 
tion is made as to which tenders are ac-
cepted, a coupon rate will be determined at a 3/4 of one percent increment that translates into an average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 99.500. That rate of interest will be paid on all of the securities. Based on such interest rate, the price on each competitive tender allotted will be deter-
mained and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Calcula-
tions will be carried to three decimal places on the basis of price per hundred, e.g., .99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of yield. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the average price of accepted competitive tenders.

3.6. Those submitting competitive tenders 
will be advised of the acceptance or rejection thereof. Those submitting non-
competitive tenders will not be notified when the tender is not accepted in full or when the price is over par.

4. RESERVATIONS

4.1. The Secretary of the Treasury expres-
sely reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of securities specified in Section 1, and to make different percentage alloc-
tions to various classes of applicants when he deems it to be in the public interest, and the Secretary's action in any such respect shall be final.

5. PAYMENT AND DELIVERY

5.1. Settlement for securities allocated 
hereunder must be made by or com-
pleted on or before Monday, February 
28, 1977, at the Federal Reserve 
Bank or Branch of the Bureau of the 
Public Debt where the tender was sub-
mitted. Payment must be made in 
United States funds immediately available to the Treasury; in Treasury bills, notes or bonds (with all coupons detached) maturing on or before the settlement date but which are not overdue as defined by the regulations governing United States securities; or by check drawn on the Federal Reserve Bank or Branch or the Bureau of the Public Debt to which the tender was submitted, which must be received at such institution no later than:

(a) Thursday, February 24, 1977, if 
the check is drawn on a bank in the 
Federal Reserve District of the institu-
tion to which the check is submitted 
(the Fifth Federal Reserve District in 
case of the Bureau of the Public Debt), or

(b) Wednesday, February 23, 1977, if 
the check is drawn on a bank in an-
other Federal Reserve District.

Checks received after the dates set 
forth in the preceding sentence will not 
be accepted unless they are payable to the applicable Federal Reserve Bank. Payment will not be deemed to have been completed where registered securities are
NOTICES.

9463

requested if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (for social security number or an employer identification number) is not furnished. When payment is made in securities, a cash adjustment will be made to or required of the bidder for any difference between the face amount of securities presented and the amount payable on the securities allotted.

5.2. In every case where full payment is not completed on time, the deposit submitted with the tender, up to 5 percent of the face amount of securities allotted, shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered securities tendered as deposits and in payment for securities allotted hereunder are not required to be assigned if the new securities are to be registered in the same names and forms as appear in the registrations or assignments of the securities surrendered. Specific inscriptions on the issuance and delivery of the new securities, signed by the owner or his authorized representative, must accompany the securities presented. Presently assigned securities should be assigned by the registered payees or assignees thereof in accordance with the general regulations governing United States securities, as hereinafter set forth. When the new securities are to be registered in names and forms different from those in the inscriptions or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for securities offered herein in the name of (name and taxpayer identifying number)." If new securities in coupon form are desired, the assignment should be to "The Secretary of the Treasury for coupon securities offered herein to be delivered to (name and address)." Securities tendered in payment should be surrendered to the Federal Reserve Bank or Branch or to the Bureau of the Public Debt, Washington, D.C. 20226. The securities must be delivered at the expense and risk of the holder.

5.4. If bearer securities are not ready for delivery on the settlement date, purchasers may elect to receive interim certificates. The interim certificates shall be issued in bearer form and shall be exchangeable for the securities offered herein, when such securities are available, at any Federal Reserve Bank or Branch or at the Bureau of the Public Debt, Washington, D.C. 20226. The interim certificates must be returned at the risk and expense of the holder.

5.5. Delivery of securities in registered form will be made after the requested form of registration has been validated, the registered interest account has been established and the securities have been inscribed.

6.1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive tenders, to make such allotments as may be prescribed by the Secretary of the Treasury, to issue such notices as may be necessary, to receive payment for and make delivery of securities on full-paid allotments, and to issue interim certificates pending delivery of the definitive securities.

6.2. The Secretary of the Treasury may at any time, or from time to time, prescribe supplemental or amendatory rules and regulations governing the offering, which will be communicated promptly to the Federal Reserve Banks.

W. MICHAEL BUCHNERAL, Secretary of the Treasury.

IRREGULAR-ROUTE MOTOR COMMON CARRIERS OF PROPERTY-ELIMINATION OF GATEWAY LETTER NOTICES

FEBRUARY 11, 1977.

The following letter-notices of proposals to eliminate gateways for the purpose of reducing highway congestion, alleviating air and noise pollution, minimizing safety hazards, and conserving fuel have been filed with the Interstate Commerce Commission under the Commission’s Gateway Elimination Rules (49 CFR Part 1053), and notice thereof to all interested persons is hereby given as provided in such rules.

An original and two copies of protests against the proposed elimination of any gateway herein described may be filed with the Interstate Commerce Commission on or before February 28, 1977. A copy must also be served upon applicant and its representative. Protests against the elimination of a gateway will not operate to stay commencement of the proposed operation.
Sucessively filed letter-notices of the same carrier under these rules will be numbered consecutively for convenience in identification. If more than one letter-number refer to such letter-notices by number.

No. MC 8973 (Sub-No. E21), filed May 16, 1974. Applicant: METROPOLITAN TRUCKING, INC., 2423-95th Street, North Bergen, N.J. 07047. Applicant’s representatives: Henry E. Seaton, 815 Pennsylvania Building, Philadelphia, Pa., and William J. Lavellc, Highway 542 to Junction unnumbered highway, through Fries Woodstown, 40. thence along Delaware River at or near Deepwater, ren, White, Jasper, Tippecanoe and along cast, and south of a line beginnlnat the (except points in Newton, Benton, War- homa-Texas State line and extending

No. MC 42863 (Sub-No. E15, Correction), filed April 22, 1975, published in the Federal Register issue of July 21, 1975, and republished, as corrected, this issue. Applicant: CHIEF TRUCK LINES, 5020 Industrial Ave., Cynthiana, Ky. 41031. Applicant’s representative: James C. Hardman, Suite 2108, 33 North La- Salle St., Chicago, Ill. 60602. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Iron and steel—angles, bars, channels, conduits, fencing, flooring, fouts, lath, mesh, molding, pipe, parts, rails, rods, roof/beam mats, roofing, strip, structural, tank parts, tubing and wire in coils (except articles requiring special handling or rigging because of size or weight) (1) from points in Lake, Cook, DuPage, Kane, Kendall, and McHenry Counties, Ill. within 40 miles of Grant Park, Chicago, Ill. and those in Will Counties on and north of U.S. Highway 40, (2) from points in Will County south of U.S. Highway 40 and within 40 miles of Grant Park, Chicago, Ill. to points in that part of Indiana on and north of U.S. Highway 40. (2) from points in Will County south of U.S. Highway 40 and within 40 miles of Grant Park, Chicago, Ill. to points in that part of Indiana on and north of U.S. Highway 40, (except points in Newton, Benton, War- len, White, Jasper, Tippecanoe and Fountan Counties and those in Vermilion Counties, Ind., north of U.S. Highway 40). The purpose of this filing is to eliminate the gateway of Chicago, Ill.

The purpose of this filing is to eliminate the gateway of Kansas City, Mo.

No. MC 112070 (Sub-No. E74), filed June 4, 1974. Applicant: GRAY MOVING & STORACE, INC., 1209 South Pearl, Denver, Colo. 80210. Applicant’s representative: D. R. Gray (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Household goods, as defined by the Commission, within 40 miles of Denver, Colo.

No. MC 47149 (Sub-No. E22), filed May 30, 1974. Applicant: C. D. AMBROSIA TRUCKING CO., R. D. I, Edin- burgh, Pa. 16116. Applicant’s representative: William J. Leavell, 2310 Grant Highway, Pittsburgh, Pa. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Limestone and limestone products, fusescicides, herbicides, juncture ingredients and materials (other than such com- modities in bulk liquid form), and forming bearing appliers, when transported in dump trucks, (1) from points in Ash- tabula County, Ohio, to points in West Virginia on and north of U.S. Highway 30 (except points in Hancock County, W. Va.) (3) from points in Columbiana County, Ohio, east and south of a line beginning along Ohio-Pennsylvania State line extending along Ohio Highway 555 to Junction Ohio Highway 517, thence along Ohio Highway 517 to Lib- don, Ohio, thence along U.S. Highway 30 to the Columbiana-Stark County line, to points in Jefferson, Berkeley and Morgan Counties, W. Va., and (3) from points in Jefferson, Berkeley and Morgan Counties, W. Va. The purpose of this filing is to eliminate the gateway of Mahoning Township, Lawrence County, Pa.

No. MC 112070 (Sub-No. E75), filed June 4, 1974. Applicant: GRAY MOVING & STORACE, INC., 1209 South Pearl, Denver, Colo. 80210. Applicant’s representative: D. R. Gray (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Household goods, as defined by the Commis-
tion, between points in South Dakota, on the one hand, and, on the other, those points in Oklahoma, within 90 miles of Enid, and Okla. The purpose of this filing is to eliminate the gateway of those points in Kansas within 90 miles of Enid, Okla.

No. MC 112070 (Sub-No. E78), filed June 4, 1974. Applicant: GRAY MOVING & STORAGE, INC., 1290 South Pearl, Denver, Colo. 80210. Applicant's representative: D. R. Gray (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Household goods, as defined by the Commission, (a) between points in Iowa on the one hand, and, on the other, points in Texas on and west of a line beginning at the international boundary between United States and Mexico, and extending along U.S. Highway 281 to the South Dakota-North Dakota State line, and ending along Interstate Highway 90, thence along New Mexico Highway 90, to the International boundary between United States and Mexico. The purpose of this filing is to eliminate the gateway of points in Colorado.

No. MC 112070 (Sub-No. E83), filed June 4, 1974. Applicant: GRAY MOVING & STORAGE, INC., 1290 South Pearl, Denver, Colo. 80210. Applicant's representative: D. R. Gray (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Household goods, as defined by the Commission, (a) between points in Oklahoma, within 90 miles of Enid, and Okla., and points within 90 miles thereof.

No. MC 112070 (Sub-No. E77), filed June 4, 1974. Applicant: GRAY MOVING & STORAGE, INC., 1290 South Pearl, Denver, Colo. 80210. Applicant's representative: D. R. Gray (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Household goods, as defined by the Commission, (a) between points in Missouri, on the one hand, and, on the other, those points in Texas on and west of a line beginning at the North Dakota-South Dakota State line, extending along U.S. Highway 281 to the South Dakota-Nebraska State line, on the one hand, and, on the other, those points in Texas on and east of a line extending along U.S. Highway 63, thence along U.S. Highway 277, thence along U.S. Highway 90, to the International boundary between United States and Mexico. The purpose of this filing is to eliminate the gateway of points in Colorado.
NOTICES

along U.S. Highway 83 to junction Texas Highway 70, thence along Texas Highway 70 to Junction U.S. Highway 277, thence along U.S. Highway 277 to the International boundary between United States and Mexico. The purpose of this filing is to eliminate the gateway of points in Colorado.

No. MC 112070 (Sub-No. E66), filed June 4, 1974. Applicant: GRAY MOVING & STORAGE, INC., 1200 South Pearl, Denver, CO 80221. Applicant's representative: D. R. Gray (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Household goods, as defined by the Commission, Between points in Tennessee, on the one hand, and, on the other, points in Utah and San Juan County, N. Mex. The purpose of this filing is to eliminate the gateways of Denver, Colo., and points within 10 miles thereof.

No. MC 114632 (Sub-No. E2), filed January 18, 1977. Applicant: APPLE LINERS, INC., P.O. Box 507, Madison, S. Dak. 57042. Applicant's representative: Andrew Clark, 1001 First National Bank Bldg., Minneapolis, Minn. 55402. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Iron and steel buildings, knocked down, or in sections, and steel prefabricated structural components, from Chicago, Ill. and Porter County, Ind., to points in Montana, Colorado, Kansas, and points in Missouri on and west of a line beginning at the Iowa-Missouri State line and extending along Interstate Highway 35 to junction Missouri Highway 291, thence along Missouri Highway 291 to junction U.S. Highway 71, thence along U.S. Highway 71 to Junction U.S. Highway 54, thence along U.S. Highway 54 to the Missouri-Kansas State line. The purpose of this filing is to eliminate the gateway of the facilities of American Building Company, Inc. at Atlantic, Iowa.

No. MC 119767 (Sub-No. E94), filed June 4, 1974. Applicant: BEAVER TRANSPORTCO., P.O. Box 186, Pleasant Prairie, Wis. 53158. Applicant's representative: Henry W. Gath, 425 Thirteenth Street, N.W., Washington, D.C. 20004. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Canned and prepared foodstuffs, (except frozen), (1) from points in Illinois on, east and north of a line beginning at the Illinois-Wisconsin State line and extending along Illinois Highway 47 to junction Interstate Highway 74, thence along Interstate Highway 74 to junction Interstate Highway 57 to Junction Illinois Highway 16, thence along Illinois Highway 16 to the Illinois-Indiana State line, to points in North Dakota and South Dakota on, west, Environmental issues in the proceeding and does not purport to resolve the issue of whether the present or future public convenience and necessity permit discontinuance of the line proposed for abandonment. Consequently, comments on the environmental study should be limited to the presence or absence of environmental impacts and reasonable alternatives.

Robert L. Oswald, Secretary.
[FR Doc.77-4942 Filed 2-15-77; 8:45 am]

KANSAS CITY SOUTHERN RAILWAY CO.
Transit Privileges on Canned Goods

It appearing that, pursuant to the order of the United States District Court for the Western District of Missouri, Western Division, entered on August 26, 1976, in Civil No. 76 CV 317-N-4, the Kansas City Southern Railway Company filed a petition on October 28, 1976, requesting a declaratory order concerning certain carloads of canned goods shipped between July 8, 1972 and December 31, 1973.

It further appearing that note 2 of Item 3920 of Southwestern Line's Tariff 174-X makes that Item subject to Item 470(c) which states:

(c) No substitution of commodities or freight bills will be permitted at transit station that will impair the integrity of the applicable through rate.

It further appearing that the issue raised by the petition is whether failure to comply with Item 470(c) affects the status of transit "impaired by the integrity of the through rate" and justifies imposition of the applicable combination rate instead of the through rate.

And it further appearing that the petition discloses a controversy or uncertainty which would warrant the entry by the Commission of an order:

Wherefore, and for good cause: It is ordered, That the petition be, and it is hereby, granted to the extent of instituting this proceeding to determine the question presented.

It is further ordered, That any person interested in the matter which is the subject of the petition and who wishes to actively participate in further proceedings herein shall notify this Commission, by filing with the Office of Proceedings, Room 5342, 12th Street and Constitution Avenue, N.W., Washington, D.C., 20423, on or before March 8, 1977, an original and copy of a statement of his intention to participate. Thereafter, this proceeding will be set for handling under the modified procedure. The petition and statements of intention to participate, if any, will be available for public inspection at the offices of the Commission during regular business hours.

A copy of this order will be served upon the petitioner, and notice of the filing of the petition will be given to the general public by depositing a copy of this
NOTICES

The following are notices of filing of application for authority under Section 210(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of a completed application, together with supporting documents, must be filed with the field official named in the Federal Register publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the Federal Register. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular provisions of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

Motor Carriers of Property

No. MC 57697 (Sub-No. 5726) (Correction), filed December 30, 1976, published in the Federal Register issue of January 11, 1977, and restated as corrected this issue. Applicant: LESTER SMITH TRUCKING, INC., P.O. Box 16424, 2645 E. 51st St., Denver, Colo. 80216. Applicant's representative: Michael J. Norton, P.O. Box 2135, 404 Boston Blvd., Salt Lake City, Utah 84110. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: (a) Gypsum and gypsum products, from points in Albuquerque, N. Mex., and its commercial zone, to points in Colorado and Arizona; and (b) Paper products and cement paper, from points in Colorado, over regular routes, to Albuquerque, N. Mex., and its commercial zone, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Support-
state Commerce Commission, 518 Federal Bldg., Des Moines, Iowa 50309.

No. MC 109397 (Sub-No. 353TA), filed January 31, 1977. Applicant: TRA-STATE MOTOR TRANSIT CO., P.O. Box 115, Joplin, Mo. 64801. Applicant's representative: Max C. Morgan, 232 Claudia Blvd., Oklahoma City, Okla. 73112. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Nitro carbo nitrate slurry (a blasting agent) when loaded in isolated "end deliveries," from Atlas, Mo., to Barre, Vt., with specific authority to return collapsed "seal tanks" to either Atlas, Mo., or Reynolds (Tamaqua), Pa., for 180 days. Applicant's representative: Thomas M. Leahy, Jr., 1980 Financial Center, Des Moines, Iowa 50309.

No. MC 110583 (Sub-No. 197TA), filed January 31, 1977. Applicant: COLDWAY FOOD EXPRESS, INC., P.O. Box 747, 113 N. Ohio Ave., Ohio Bldg., Sidney, Ohio 45365. Applicant's representative: John L. Mauro, 30350 S. State Hwy. 21, Kansas, Kentucky, Louisville, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Hampshire, New Jersey, New York, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Vermont, Virginia, West Virginia, Wisconsin, and parts therefor. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Compressed gas packages, and related advertising materials and parts therefor, in mixed loads with compressed flammable loads, from Marion, Ohio, to points in Alabama, Arkansas, Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Hampshire, New Jersey, New York, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Vermont, Virginia, West Virginia, Wisconsin, and parts therefor. Applicant also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Atlas Powder Company, 12700 Park Central Place, Dallas, Tex. 75251.

No. MC 113460 (Sub-No. 10TA), filed February 1, 1977. Applicant: BLACKHAWK TRANSPORTATION, INC., 3909 E. 28th St., Des Moines, Iowa 50310. Applicant's representative: Thomas E. Leach, Jr., 1030 Financial Center, Des Moines, Iowa 50309. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Malt beverages, (1) from Milwaukee, Wis., to Chariton and Red Oak, Iowa; and (2) from LaCross, Wis., to Des Moines and Red Oak, Iowa, and return of empty containers, for 180 days. Supporting shipper: Rite Beverage Company, 4601 S.W. 34th St., Des Moines, Iowa 50316. Central Sales Company, Charterton, Iowa 50649. England Distributing Company, Inc., 103 S. Broadway, Red Oak, Iowa, 51566. Pocahontas Distributing Co., 1947 Hull Ave., Des Moines, Iowa 50312. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: William L. Hughes, Dist. Super., Bureau of Operations, Interstate Commerce Commission, 814-B Federal Bldg., 1600 Broadway, Denver, Colo. 80202. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Meat and packaging products, and meat by-products, from the plant and storage facilities of Wilson Foods Corporation, at or near Cherokee, Iowa, to points in Virginia, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Wilson Foods Corporation, P.O. Box 26724, Oklahoma City, Okla. 73126. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Applicant's representative: Dan Sullivan, 327 S. LaSalle St., Chicago, Ill. 60604. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Coca-cola and Coca-cola products, for use in conjunction with self-propelled vehicles; and parts and attachments for the commodities in (a), from Pocahontas, Iowa, to Warren, Mich., and New Carlisle, Ohio, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: E. R. Buske Mfr. Co., Inc., P.O. Box 120, Pocahontas, Iowa 50574. Applicant's representative: Herbert W. Allen, Dist. Super., Bureau of Operations, Interstate Commerce Commission, 518 Federal Bldg., Des Moines, Iowa 50309.

No. MC 116151 (Sub-No. 1TA), filed January 31, 1977. Applicant: BAEUER-MEISTER HEGEMAN, INC., 3651 N. Fruitridge Ave., Bldg. 104, Terra Haute, Ind. 47888. Applicant's representative: W. H. Grosbach, 711 E. Jackson St., Brazil, Ind. 47834. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Trailers, semitrailers, trailer chassis (other than designed to be drawn by passenger automobiles), and parts and accessories therefor, in initial movements, from the plant sites and storage facilities of Great Dane Trailers Indiana, Inc., located east of 191st Ave., to points in Indiana, Kentucky, Illinois, Ohio, Michigan, Missouri, Wisconsin, Alabama, Tennessee, Arkansas and Iowa, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Great Dane Trailers Indiana, Inc., Highway 40 East, P.O. Box 350, Brazil, Ind. 47834. Applicant's representative: Fran Sterling, Transportation Assistant, Interstate Commerce Commission, Federal Bldg., and U.S. Courthouse, 46 E. Ohio St., Room 429, Indianapolis, Ind. 46204.

No. MC 124986 (Sub-No. 2TA), filed January 31, 1977. Applicant: WERNER SON TRUCK LINES, INC., P.O. Box 3405 (Thorne and Ralston Sts.), Wilson, N.C. 27893. Applicant's representative: B. H. Williamson (same address as applicant). Applicant's representative: Great Dane Trailers Indiana, Inc., located east of 191st Ave., to points in Indiana, Kentucky, Illinois, Ohio, Michigan, Missouri, Wisconsin, Alabama, Tennessee, Arkansas and Iowa, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Great Dane Trailers Indiana, Inc., Highway 40 East, P.O. Box 350, Brazil, Ind. 47834. Applicant's representative: Fran Sterling, Transportation Assistant, Interstate Commerce Commission, Federal Bldg., and U.S. Courthouse, 46 E. Ohio St., Room 429, Indianapolis, Ind. 46204.

No. MC 125035 (Sub-No. 44TA), filed January 25, 1977. Applicant: RAY E. BROWN TRUCKING, INC., 1236 Stuart St., N.W., P.O. Box 501, Massillon, Ohio 44644. Applicant's representative: Jerry.

Supporting shipper: John Morrell & Co., 298 S. LaSalle St., Chicago, Ill. 60644. Send protests to: J. L. Hammond, District Supervisor, Interstate Commerce Commission; Bureau of Operations, Room 369 Federal Bldg., P.O. Box 1267, Arlington, Va. 22203.
NOTICES

OREGON SHORT LINE RAILROAD CO.
Determination of Environmental Impact

JANUARY 31, 1977

The Interstate Commerce Commission hereby gives notice that its Section of Energy and Environment has concluded that the proposed abandonment of 1,633 miles of a portion of the “R Street Line” in Sacramento County, Calif., by the Southern Pacific Transportation Co., if approved by the Commission, does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4321, et seq., and that preparation of a detailed environmental impact statement will not be required under section 4332 (2)(C) of the NEPA.

It was concluded, among other things, that the diversion of rail traffic to motor carrier would produce only minimal changes in ambient environmental conditions and safety of the subject area. No economic development plans exist which are dependent on the subject rail line remaining in service and, consequently, there will be no impact on community or rural development. No historic or archaeological sites or endangered species will be affected by the proposed action.

This conclusion is contained in a staff-prepared environmental threshold assessment survey, which is available on request to the Interstate Commerce Commission, Office of Proceedings, Washington, D.C. 20423, on or before March 14, 1977.

It should be emphasized that the environmental threshold assessment survey represents an evaluation of the environmental issues in the proceeding and does not purport to resolve the issue of whether the present or future public convenience and necessity permit discontinuance of the line proposed for abandonment. Consequently, comments on the environmental study should be limited to discussion of the presence or absence of environmental impacts and reasonable alternatives.

ROBERT L. OSWALD,
Secretary.

SOUTHERN PACIFIC TRANSPORTATION CO.

Determination of Environmental Impact

JANUARY 31, 1977

The Interstate Commerce Commission hereby gives notice that its Section of Energy and Environment has concluded that the proposed abandonment of 13.86 miles of the Walnut Grove Branch in Sacramento County, Calif. by the Southern Pacific Transportation Company, if approved by the Commission, does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4321, et seq., and that preparation of a detailed environmental impact statement will not be required under section 4332 (2) (C) of the NEPA.

It was concluded, among other things, that the diversion of rail traffic to motor carrier would produce only minimal changes in ambient environmental conditions and safety of the subject area. No economic development plans exist which are dependent on the subject rail line remaining in service and, consequently, there will be no adverse effect on community or rural development. No historic or archaeological sites or endangered and threatened species will be affected by the proposed action.

This conclusion is contained in a staff-prepared environmental threshold assessment survey, which is available on request to the Interstate Commerce Commission, Office of Proceedings, Washington, D.C. 20423; telephone 202-275-7011.

Interested persons may comment on this matter by filing their statements in writing with the Interstate Commerce Commission, Washington, D.C. 20423, on or before March 14, 1977.

It should be emphasized that the environmental threshold assessment survey represents an evaluation of the environmental issues in the proceeding and does not purport to resolve the issue of whether the present or future public convenience and necessity permit discontinuance of the line proposed for abandonment. Consequently, comments on the environmental study should be limited to discussion of the presence or absence of environmental impacts and reasonable alternatives.

DEPARTMENT
OF JUSTICE

Law Enforcement Assistance
Administration

NONDISCRIMINATION IN
FEDERALLY ASSISTED
CRIME CONTROL AND
JUVENILE DELINQUENCY
PROGRAMS
Title 28—Judicial Administration
CHAPTER I—DEPARTMENT OF JUSTICE
PART 42—NONDISCRIMINATION; EQUAL EMPLOYMENT OPPORTUNITY; POLICIES AND PROCEDURES

NONDISCRIMINATION in Federally-Assisted Crime Control and Juvenile Delinquency Programs

AGENCY: Department of Justice/Law Enforcement Assistance Administration (LEAA).

ACTION: Final rule.

EFFECTIVE DATE: These rules are effective immediately upon signature. In order to comply with the 120-day requirement noted, supra.

FOR FURTHER INFORMATION CONTACT: Thomas J. Madden, General Counsel, LEAA (202) 276-3691.

SUPPLEMENTARY INFORMATION:

In the Introduction to the proposed regulations, LEAA specifically invited comment on ten issues. Several related to interpretation of the Crime Control Act, some were proposed revisions of the previous regulations, and others were policy questions concerning the administration of the Act and the regulations.

The comments received were numerous and helpful. The issues drawing the most attention were the definition of "service population" in proposed § 42.206, which was adopted, and the complaint timetables proposed in § 42.205. The commenters believed that the proposed service population definition is too limiting, and the complaint timetables proposed in § 42.205 were too onerous.

In the timetables, LEAA has revised the regulations in a number of places. An analysis of the comments and changes follows. The ten issues highlighted in this section are addressed first, followed by a section-by-section analysis of all other comments and amendments.

COMPLAINT INVESTIGATION AND COMPLAINT REVIEW TIMETABLES

The great majority of commenters on this issue felt that the complaint processing timetable was too long. After an analysis of the comments, LEAA has substantially revised § 42.205 to shorten the complaint processing timetables by 40 days, (from 255 to 215) where on-site investigation is not required, and 45 days (from 261 to 216) where an on-site investigation is required.

The reductions are largely the result of two changes in the proposed method of investigation. The first change, as reflected in the definition of "investigation" in § 42.202 (d) and in the timetables, at § 42.205 (e) (3) (iii), removes the implication in the proposed regulations that LEAA must attempt voluntary compliance efforts in every case and could result in an additional 30-day delay in time. The new regulations now limit compliance efforts to a 30-day period, and specify that LEAA will attempt to negotiate compliance during that period only if it is likely to succeed and only when the recipient requests it to do so. In those cases where a determination of non-compliance is made, triggering a letter to the chief executive, voluntary compliance efforts may take place during the statutory 30-day period for securing compliance. See §§ 42.211 and 42.312.

The other change facilitating the reduction of the proposed timetables was placement of the opportunity to make a documentary submission earlier in the process. The proposed regulations provided the opportunity at the end of the investigation, after the respondent had received recommendations for compliance. Upon review, LEAA believes that, besides prolonging the investigatory process, it would also impair the efficiency of the investigation. A respondent could render the investigation preceding the findings letter meaningless by withholding its documentary response until after receipt of the letter. To meet the statutory requirement to provide an opportunity for a documentary submission, therefore, the final regulations offer the recipient the opportunity to submit a response at any time prior to receipt of the findings letter. This change will shorten the investigatory process, enhance the quality of the investigation, and provide a recipient full opportunity to rebut, deny, or otherwise respond to the allegations in the complaint.

A new processing mechanism has been established with lodging and tracking procedures which will make the investigatory process work with increasing efficiency. The regulations as now adopted will require investigation of all complaints to be completed within the time periods specified. In a typical case, the time periods will be used as follows:

Upon the receipt of a complaint, the complaint will be docketed and the complaint letter sent a letter of acknowledgment. An initial review will be made to verify funding and resolve any jurisdictional problems. Once jurisdiction is determined, the complaint and respondent will be notified. A detailed interview will be held with the complainant. Thereafter, the actual investigation will be initiated, at the maximum, within 21 days. LEAA will then draft and mail inter rogatories to the respondent, including notice of allegations and a notice of the right to make a documentary submission. Thereafter, the respondent will have 60 days to respond, and following receipt of the respondent's submission, the regulations provide for on-site investigation, which period may take a maximum of 175 days. Field visits may include interviews with complainant, respondent and other witnesses; statements and other documentary submissions may be required as well as a review of records and files to verify data. If an on-site review is not required, the time period will be reduced to 150 days. Upon completion of the investigation, a letter of findings and recommendations will be sent to the respondent. Thirty (30) days have been allotted for a response from the respondent to negotiate voluntary compliance. Fourteen (14) days thereafter, the Administrator of LEAA will make a determination of compliance or non-compliance and the complaint investigation will be at an end.

With the limited resources now available and an inventory of approximately 325 cases, the case inventory alone will be a minimum of 40.6 cases per person year, or three full-time investigators during the first seven or eight months following the issuance of these regulations. The investigation of the inventory cases must be completed within 171 days where no on-site investigation is required and 198 days where on-site work is required. This will allow an investigator to spend no more than 42 days (no on-site) and 48 days (on-site) on each case. Based on current experience, it is also estimated that an additional 180 complaints will be received during the initial eight-month period. LEAA believes that no further reduction in the time period can therefore be made at this time. Because of the many other civil rights-related functions performed by LEAA, no other qualified personnel can be allocated to complaint investigations within the near future. Civil rights-related functions include not only investi-
tigations and reviews to insure compliance with civil rights requirements, but also include affirmative action, such as providing technical assistance to recipients of LEAA funds toward development of methods to assure compliance with civil rights laws, and the monitoring of recipients whose compliance has been secured. Both technical assistance and proposals and contracts developed by other offices of LEAA are reviewed to insure that they are in consonance with Federal civil rights policies and practices.

LEAA also conducts preaward compliance reviews, analyzing discretionary and juvenile justice grants in excess of $500,000 to determine the existence of possible civil rights concerns. Such reviews may also be conducted on grant applications of lesser amounts where warranted; where appropriate, negotiations will be conducted with prospective grantees to attach special conditions, to the grants or contracts in order to resolve the civil rights problems.

LEAA will continuously monitor the new procedures of the Department of Justice for the purpose of reducing the new-established time periods. As the backlog is cleared, a shortening of the time periods set forth in these regulations should occur. Within the next eight months, the review process should be reduced to the average time period for the complaint investigation and review cycle. LEAA will, during that eight-month period, begin gathering data on the timeliness required to process complaints under the new procedures. This data will assist LEAA in making appropriate amendments to these regulations.

CREED AND RELIGION

No substantive comments were received on the proposal to equate the meaning of the term “religion” under the Civil Rights Act with the term “creed” under the Juvenile Justice Act. The proposal to define both terms as provided in § 42.202(d) is, therefore, adopted.

HEIGHT GUIDELINE

Of the few comments received on the proposed revision of the LEAA Minimum Height Guideline, two criticized the implied presumption that all minimum height requirements, in every community, are discriminatory. LEAA is unaware of any jurisdiction where women, Asian-Americans, or Hispanic males are of the same average height as white males. Nevertheless, LEAA did not intend to state the provision in § 42.203(d) as a presumption. To remove this implication, the comments following the phrase “minimum height requirement” in the first sentence of proposed § 42.203(d) has been deleted.

Two other commenters believed that the “business necessity” test stated in Robinson v. Lorillard, 444 F. 2d 791 (4th Cir. 1971), and adopted in the previous guideline should have been retained. As noted in the Introduction to the proposed regulations at 41 FR 51765, the courts examining the minimum height issue have not applied this test. See Miehl v. Dothard, 418 F. Supp. 1169 (M.D. Ala. 1976); LULAC v. Santa Ana, 410 F. Supp. 873 (C.D. Cal. 1976); and Officers for Justice v. Civil Service Commission, 395 F. Supp. 378, 380 (N.D. Cal. 1976). Accordingly, the proposed revision of the minimum height guideline is adopted as final.

In response to several other comments and after further consideration, LEAA has also specified that discriminatory minimum weight, as well as minimum height, requirements are to be evaluated in every circumstance in which they have been validated in accordance with the Department of Justice Guidelines on Employee Selection Procedures.

The first part of the first sentence of § 42.203(d) has, therefore, been amended to read “The use of a minimum height or weight requirement which operates to exclude white males, females, or persons of certain national origins” ***

COMPLIANCE WITH PRELIMINARY INJUNCTION

LEAA requested comment on whether suspended payments to a recipient should be resumed upon the recipient's compliance with a preliminary injunction, in light of the statutory requirement that payment of suspended funds may be resumed upon a recipient's compliance with the “final order or judgment” of a court. Several observers evidently believed their comments were requested on whether a preliminary injunction should trigger the fund termination process. In accord with the direction of the statute, LEAA will initiate that procedure upon receipt of notice of the findings made after “notice and opportunity for a hearing.” Findings rendered after procedures not meeting that proviso will not result in the initiation of the fund termination process.

Most comments on the issue of whether compliance with a preliminary injunction should be compliance with a “final order” for the purpose of resuming payment of suspended funds fell if it should not be. The majority of commenters believed, and LEAA agrees, that the spirit of the Act dictates a policy of suspending or terminating a recipient if the recipient complies with a final order of affirmative relief designed to resolve the pattern or practice of discrimination at issue.

Accordingly, only where (1) the order addresses all substantial outstanding issues, and (2) the recipient's compliance, as defined in § 42.213(b), brings it into compliance with § 5186(a) of the Act, will payment of previously suspended funds resume.

SERVICE POPULATION

In proposed § 42.205(b), LEAA proposed to make the disparity between the percentage of minorities in the recipient’s workforce and the percentage in its “service population” a factor in selecting recipients for consideration. Two other commenters invited comment on the definition of “service population” in this context.

This issue generated the most comment of any section of the regulations. The great majority of the departments of corrections responding to our inquiry expressed the view that the minority representation on their workforces be measured in the same way as minority representation on the workforces of the LEAA grantees—by comparing the population of any section of the regulations. This shift in focus suggests that a particular percentage of minorities or women in the correctional officer workforce is somehow required to do an adequate job in guarding and supervising the inmates. No empirical evidence supporting this notion was offered to LEAA.

The Director of Corrections, however, commented that the rationale behind the previous definition:

It would appear to be more proper to assert that a staff makeup proportionate to the general civilian population is more rational than an inmate of a protected minority or otherwise, who must return someday to the general civilian population. To assert that the supposed benefit of a staff not representative of the real world seems destined to denote inmates into false expectations about the free world.

For the above reasons, and the reiteration by a number of commenters of the reasons listed in the Introduction to the proposed regulations (41 FR 51782), LEAA has decided to define the relevant population the same for correctional facilities, courts, and law enforcement agencies.

Opinion was divided on which population should be the relevant measure of disparity. Some believed that the geographical area served by the agency in question should be the relevant population; others favored the population variously defined as the “relevant labor market,” “applicant pool,” or “recruiting area.” LEAA believes that the term “relevant labor market” best describes the population to which the employer’s workforce should be compared. Although this market may often be the same as the geographical area served.

LULAC v. Santa Ana, 410 F. Supp. 873 (C.D. Cal. 1976), is flexible enough to address situations where recruiting is actually done in jurisdictions other than the one served by the agency in question. Davis v. Washington, 348 F. Supp. 15 (D.C. 1972), LEAA will accordingly, define the “relevant labor market” of each recipient investigated or reviewed on a case-by-case basis.

Therefore, the term “relevant labor market” is substituted for the term “service population” in § 42.205(b). (1)
Section 42.302(g) is redesignated § 42.302(f).

Referral to Attorney General

The Administration invited comment on whether, and in what circumstances, a matter could be referred to the Attorney General for litigation. A number of commenters took exception to the term “referral,” believing it connoted a relinquishment of jurisdiction. These observers, including Congressman Peter Rodino, Chairman of the House Judiciary Committee, pointed out, regardless of whether LEAA requested the Attorney General to sue a recipient, it had to retain administrative jurisdiction over the matter. Chairman Rodino, in a letter dated December 20, 1976, cautioned that “it is not appropriate for LEAA to refer cases to the Civil Rights Division or other Federal or State agencies without monitoring the case for prompt resolution.”

If the Attorney General responds to our request and initiates suit, however, LEAA’s ability to “promptly” resolve the matter said to exist, is, for very practical reasons, limited. The Civil Rights Division of the Department of Justice has advised us that, in many instances, the Rodino, Chairman of the House Judiciary servers, including Congressman Peter relinquishment of jurisdiction. These ob-
time to hear and decide. As indicated at 41 FR 51763, LEAA believes that some matters may be better suited to litigation than the administrative process for any a number of reasons, such as the presence of novel issues, the lack of significant funding, or a prior investigation by the Civil Rights Division in a particu-
lar matter. Where such matters do not exist, and this should be the case in the vast majority of complaints, LEAA will utilize the administrative process. In no circumstances will the Chief Judge, over a case the Attorney General is litigating on its behalf. LEAA believes § 42.217(a), and the Com-

The comments were divided on the question of whether LEAA should initiate an investigation and proceed administratively on a complaint when the same issues involved in the complaint were being litigated by a private party at the same time. Some observers believed de-
feral was always appropriate, another felt it was inappropriate if the litigation became protracted, and others believed LEAA could not defer.

RULES AND REGULATIONS

(3)” inserted after “fact-finding efforts and.” The Commentary on § 42.202(d) has also been deleted. See also the discussion of the proposed complaint investigation process, supra.

3. Section 42.202(b). A definition of “pattern or practice,” reflecting the legislative history of the phrase, has been added. For a further elaboration, see U.S. House Rep. 94-1155 (94th Cong., 2d Sess.), at p. 25.

Proposed §§ 42.202(b), (k), and (l) have been redesignated §§ 42.202(d), (k), and (l), respectively, to accommodate the definition of “pattern or practice” in § 42.202(b).

In addition, the Commentary on proposed § 42.202(b) has been deleted. The substance of the Commentary now appears in § 42.201(c).

5. Section 42.202(d). The phrase “directly, or” has been added following the phrase “to which Federal financial assistance is extended” to clarify that all private recipients are covered by the prohibitions in this Subpart, regardless of whether the Federal financial assistance comes from LEAA, through another private entity, or through a unit of State or local government.

Section 42.203(b). A second paragraph has been added to the Commentary on this section to explain the Administration’s position on individual projects which benefit a particular race, sex, or ethnic group. Such projects are not violative of Section 518(c) unless the granting agency or the recipient has engaged in an unjustified pattern of such preferential treatment.

7. Section 42.203(b) (d). The word “any” has been added before “advantage” to be consistent with Subpart C of the Department of Justice Nondiscrimination Regulations, at 28 CFR 42.104(b) (iv).

8. Section 42.203(b) (g). A reference has been added in the Commentary on this section. For those desiring a comprehensive analysis of the Federal Executive Agency Guidelines on Employee Selection Procedures, attention is directed to the Department of Justice Questions and Answers on the Guidelines, published at 42 FR 3820 (January 19, 1977).

9. Section 42.203(c). Numerous commenters questioned the meaning of the term “analogous cases” in the description of the relationship between Section 518 (c) (1), Section 262(b), and Title VII of the Civil Rights Act of 1964. In response to their confusion, the phrase “consistent with” has been substituted for “as analogous of.” The Commentary on this section has been retained to explain congressional intent on this issue.

In addition, the sentence in the Commentary on § 42.203(c), discussing Washington v. Davis, ___ U.S. ___ 96 S.Ct. 2040 (1976) has been clarified to read:

“Discriminatory purpose on the part of the employer, where shown before the burden shifts in a Fourteenth Amendment case such as Washington v. Davis, ___ U.S. ___ 96 S.Ct. 2040 (1976), need not be shown in an employment discrimination case brought under Section 518(e) (1).”

10. Section 42.203(g). A reference has been added in the Commentary on this section to the discussion of goals and timetables in the Equal Employment Opportunity Coordinating Council Policy Statement on Affirmative Action Programs for Federal Agencies, 41 FR 38816 (September 13, 1976).

11. Section 42.203(h). A reference to the violation of Title VII of the Civil Rights Act of 1964 would also be a violation of Section 518(c) or Section 262(b), the last sentence of proposed § 42.205(a) and the paragraph in the Commentary on that sentence have been deleted as superfluous.

12. Section 42.205(b). A number of comments criticized LEAA for imposing a 180-day “statute of limitations” on complaints without statutory authorization. LEAA has extended the time period to one year, and provided for a waiver of even that lengthly period for “good cause shown.” In the Commentary, the purpose of § 42.205(b) is to ensure that LEAA will be devoting its resources to the resolution of active issues, and that necessary witnesses and evidence are likely to be available. “Good cause” will also be construed liberally, as explained in the Commentary.

“ ‘One year’ has been substituted for ‘180 days’ and the phrase for ‘good cause shown’ has been added to the end of § 42.205(b). As noted above, a Commentary on this section has also been added.

13. Section 42.205(c). See the explanation in the revised investigation timetables, supra. Proposed § 42.205(c) (1–7) have been deleted and replaced by § 42.205(c) (1–6). Two paragraphs explaining the timetables and LEAA’s expectations have been added to the Commentary on § 42.205(c) (c). A Commentary on § 42.206(c) (c) has also been added. The LEAA believes it is necessary to initiate an investigation of a complaint where the same issues are in litigation if the litigation becomes protracted or apparently likely to be available, “in a reasonable time.” See also the discussion under “Pending Litigation by a Private Party,” supra.

14. Section 42.206(b). The proposed commentary on § 42.206(b), relating to LEAA’s intention to first review those respondents which appear to have the most serious discrimination problems, has been deleted from the commentary and placed in the regulations as the first sentence of § 42.206(b).

As explained in the discussion of “service population,” supra, the term “relevant labor market” has been substituted for the phrase “service population” in § 42.206(b) (1).

In addition, the disparity between the percentage of women in the relevant labor market and the percentage of women employed by the recipient has specifically been made an additional factor to be reviewed in the selection of recipients for a compliance review.

Proposed § 42.206(b) (2) has, therefore, been deleted, and the phrase “or women” added to § 42.206(b) (1) after “minority” each place that phrase appears in § 42.206(b) (1).

Section 42.206(b) (3) has been redesignated § 42.206(b) (2) and amended to read “the percentage of minorities in the population receiving project benefits.”

Proposed § 42.206(b) (4), (5), and (6) have been redesignated § 42.206(b) (2), (4), and (5), respectively.

The phrase “and nature” has been added to § 42.206(b) (3) after the num- bers. The proposed amendment was made in response to a comment that the number of complaints alone is not a dispositive factor in selecting recipients for review.

In addition, a sentence has been added to the commentary on this section, stating “LEAA will consider data from all sources, including information provided by both internal and external auditors.” This is to advise recipients that the Administration will require LEAA will receive by not only the LEAA Office of Civil Rights Compliance, but the LEAA Office of Audit and Inspection, and the General Accounting Office, among others, as well.

15. Section 42.206(d) and (e). The phrase “and to the appropriate SPA” has also been added to the end of both sections to insure that the appropriate SPA’s are adequately informed of the progress of compliance reviews conducted in their jurisdictions.

16. Section 42.207. After review, LEAA added the sentence “A refusal to provide requested information shall be enforced pursuant to the provisions of Section 505 of the Crime Control Act” to the end of § 42.207. In order to clearly inform all recipients of the sanctions for withholding requested information. See the discussion of Section 505 under § 42.201(b) and (c), supra.

17. Sections 42.208 and 42.209. See the discussion under Civil Rights Compliance Activities by LEAA State Planning Agencies, supra.

18. Section 42.310(c). Several commenters, including the Administrative Conference of the United States, noted the procedural importance of the Administrative Procedure Act (APA) to require that a hearing be conducted by a person not involved in the investigation or prosecution of the matter at issue. In response to these comments, and after further consideration, LEAA has decided to make this requirement and the opportunity of all parties to be represented by counsel, required procedures by any hearing examiner to be consistent with the APA. LEAA believes these procedures, and the requirements listed in the proposed regulations at § 42.210(e) will insure that an agency hearing was conducted consistent with the due process requirements of the APA, yet not make the procedural prerequisites so onerous as to imperil LEAA's ability to resolve disputes. See the discussion of the APA in the regulations on § 42.206(b), supra.

In addition to the proposed amendment, the phrase “or women” has been added to § 42.206(b) (1) after “minority” each place that phrase appears in § 42.206(b) (1).
Accordingly, the phrase "by an individual not having participated in the investigation or prosecution of the matter" has been added to the end of § 42.210(e)(1)(II), the phrase "to the extent that the parties are unable to determine a controversy by consent" has been deleted as inapposite, and the phrase "be represented by counsel or other qualified representative" has been inserted in § 42.210(e)(2) after "A party is entitled to."

10. Section 42.211(a). A sentence has been added to the Commentary on this section, indicating that a compliance agreement may be an "agreement to comply over a period of time, particularly in complex cases or where compliance would require an extended period of time for implementation." This makes compliance under this section the same as compliance under § 42.213(b), which refers to resumption of suspended funds. LEAA intends to dispel any inference to the contrary that may have been in the proposed regulations.

20. Section 42.211(b). A number of comments urged LEAA to send a copy of any compliance agreement reached pursuant to § 42.211 to the complainant, if any, prior to the effective date of the agreement. Although the Act would require the agreement to be sent either "on or prior to" the date of the agreement, LEAA has amended § 42.211(b) to provide that a copy will be sent to the complainant prior to the effective date. As explained in the Commentary, the agreement would be "more likely to resolve all concerns and discourage litigation if the complainant's views were considered before it took effect." The phrase "on or" has therefore been deleted from § 42.211(b). A paragraph on this change has been added to the commentary.

In addition, the phrase "and to the appropriate SPA" has been added to the end of § 42.211(b) to insure that the SPA is aware of the recipient's obligations under the agreement.

21. Section 42.211(c). This section has been added to clarify that a recipient may come into compliance by means other than a compliance agreement. The methods listed are the same as those that would cause a resumption of suspended funds under § 42.213.

22. Section 42.215(a) has been amended to provide that, in the case of non-compliance with Section 262(b) of the Juvenile Justice Act, a recipient has only 30 days in which to request a hearing. This is consistent with § 42.108 of the regulations implementing Title VI of the Civil Rights Act of 1964, which requires at least a 20-day period in which a hearing can be requested. Accordingly, the phrase "or within 30 days after notification of non-compliance with Section 262(b)" has been inserted in the first sentence of § 42.215(a) after "referred to in § 42.213," and the phrase "of non-compliance with Section 518(c)(1)" has been inserted in the same sentence after "At any time after notification."

23. Section 42.217(a). See the discussion under "Referral to Attorney General," supra. A paragraph quoting Congressman Rodino's letter has been added to the commentary.

24. Proposed §§ 42.217(a) and (b) have been redesignated §§ 42.217(b) and (c), respectively to accommodate the addition of § 42.217(a).

25. Section 42.217(b)(1). LEAA believes that any suit filed by the Attorney General that alleges conduct which, if proven, would be a violation of Section 518(c) should trigger the 45-day suspension provision, whether or not a violation of Section 518(a) is specifically alleged. This position is especially appropriate in light of Congress's intention that Section 518(c) be interpreted consistently with Title VII of the Civil Rights Act of 1964, as amended, the principal statute under which the Department of Justice brings its employment discrimination suits.

Accordingly, the phrase "or would violate" has been inserted after "the conduct allegedly violated" in § 42.217(b)(1).

26. Section 42.217(b)(2). This section has been added to state LEAA's expectation that a recipient seeking to enjoin the suspension of funds under § 42.217(b)(2) should have the burden of showing that it is likely to prevail on the merits. The hearing should be analogous to a pre-suspension administrative preliminary hearing conducted under § 42.214, where the sole issue is whether the recipient is likely to prevail on the merits.

Accordingly, Subpart D of 28 CFR Part 42 is revised as follows:
Subpart D—Nondiscrimination in Federally-Assisted Programs—Implementation of Section 518(c) of the Crime Control Act of 1966 and Section 518(b) of the Juvenile Justice and Delinquency Prevention Act of 1974

§ 42.201 Purpose and application.

(a) The purpose of this subpart is to implement the provisions of section 518(c) of the Crime Control Act of 1966, Pub. L. 90-353, 80 Stat. 2407, and section 262(b) of the Juvenile Justice and Delinquency Prevention Act of 1974, Pub. L. 93-415, 87 Stat. 1109, to the extent that no person in any State shall be denied the benefits of, or be subjected to discrimination under, or be denied employment in connection with any program or activity funded in whole or in part with funds made available under the Crime Control Act or the Juvenile Justice Act.

§ 42.202 Definitions.

(a) "Law enforcement," "State," and "unit of general local government" shall have the meanings set forth in section 601 of the Crime Control Act.

(d) "Investigation" includes fact-finding efforts and, pursuant to § 42.205(c), attempts to secure the voluntary resolution of complaints.

(e) "Noncompliance" means the failure of a recipient to comply with section 518(c) (1) of the Crime Control Act, section 262(b) of the Juvenile Justice Act, or this subpart.

(f) "Program or activity" means the operations of the agency or organizational unit of government receiving or offering financial assistance awarded, e.g., a police department or office of corrections.

(g) "Religion" or "creed" includes all aspects of religious observance and practice as well as belief.

(h) "State planning agency" or "SPA" means the criminal justice state planning agency created to implement the Crime Control Act and, where authorized by State law, the Juvenile Justice Act within each State.

(i) "Compliance review" means a review of a recipient's selected employment practices or delivery of services for compliance with the provisions of section 518(c) (1) of the Crime Control Act, section 262(b) of the Juvenile Justice Act, and this subpart.

§ 42.203 Discrimination prohibited.

(a) No person in any State shall be denied the benefits of, or be subjected to discrimination under, or be denied employment in connection with any program or activity funded in whole or in part with funds made available under the Crime Control Act or the Juvenile Justice Act.

(b) A recipient may not, directly or through contractual or other arrangements, on the grounds set forth in paragraph (c) of this section:

1. Deny an individual any disposition, service, financial aid, or benefit provided under the program;

2. Provide any disposition, service, financial aid, or benefit to an individual which is different, or is provided in a different manner, from that provided to others under the program;

3. Subject an individual to segregation or separate treatment in any matter related to his receipt of any disposition, service, financial aid, or benefit under the program;

4. Restrict an individual in any way in the enjoyment of any advantage or privilege enjoyed by others receiving any disposition, service, or financial aid or benefit under the program;

5. Treat an individual differently from others in determining whether he satisfies any admission, enrollment, eligibility, or any other requirement or condition which individuals must meet in order to be provided any disposition, service, financial aid, function, or benefit provided under the program;

6. Deny an individual an opportunity to participate in the program through the provision of services or otherwise afford him an opportunity to do so which is different from that afforded others under the program;

7. Deny a person the opportunity to participate as a member of a planning or advisory body which is an integral part of the program;

8. Subject any individual to discrimination in his employment practices in connection with any program or activity funded in whole or in part with funds made available under the Crime Control Act or the Juvenile Justice Act.

9. Take any selection device in a manner which is inconsistent with the Department of Justice Guidelines on Employee Selection Procedures, 28 CFR Part 50.

(b) The use of a minimum height or weight requirement which operates to disproportionately exclude women and persons of certain national origins, such as are set forth in Title VII of the Civil Rights Act of 1964, as amended, or which is based on race or color, is a violation of this subpart, unless the recipient is able to demonstrate convincingly, through use of supportive factual data, that the requirement has been
§ 42.204 Assurances required.
(a) Every application for Federal financial assistance to which this subpart applies shall, as a condition of approval of such application and the extension of any Federal financial assistance pursuant to such application, contain or be accompanied by an assurance that the applicant will fulfill all applicable nondiscrimination requirements and will obtain such assurances from its subgrantees, contractors, or subcontractors to which this subpart applies, as a condition of the extension of Federal financial assistance to them.
(b) Every application for Federal financial assistance from a State or local unit of government or agency thereof shall contain an assurance that in the event a Federal or State court or Federal or State administrative agency makes a finding of discrimination on the ground of race, color, religion, national origin, or sex against the recipient State or local government unit or agency thereof, the recipient will forward a copy of the finding to the Federal or State planning agency and to LEAA.

§ 42.205 Complaint investigation.
(a) The Administration shall investigate complaints that allege a violation of:
(1) Section 518(c)(1) of the Crime Control Act;
(2) Section 262(b) of the Juvenile Justice Act; or
(3) This subpart.
(b) No complaint will be investigated if it is received more than one year after the date of the alleged discrimination, unless the time for filing is extended by the Administrator for good cause shown.
(c) The Administration shall conduct investigations of complaints as follows:
(1) Within 21 days of receipt of a complaint, the Administration shall:
(I) Ascertain whether it has jurisdiction under paragraphs (a) and (b) of this section;
(II) If jurisdiction is found, notify the recipient alleged to be discriminating of the allegations made in the complaint; and
(III) Initiate the investigation.
(2) The investigation will ordinarily be initiated by a letter requesting data pertinent to the complaint and advising the recipient of:
(I) The nature of the complaint, and, with the written consent of the complainant, the identity of the complainant;
(II) The programs or activities affected by the complaint;
(III) The opportunity to make, at any time prior to receipt of all the Administrator's findings, a documentary submission, responding to, rebutting, or denying the allegations made in the complaint; and
(IV) The schedule under which the complaint will be investigated and a determination of compliance or noncompliance made.
Copies of this letter will also be sent to the chief executive of the appropriate unit(s) of government, and to the appropriate SPA.

(3) Within 150 days or, where an on-site investigation is required, within 175 days after the initiation of investigation, the Administration shall advise the complainant, the recipient, the chief executive(s) of the appropriate unit(s) of government, and the appropriate SPA, of:
(I) Its preliminary findings;
(II) Where appropriate, its recommendations for compliance, and
(III) If it is likely that satisfactory resolution of the complaint can be obtained, the opportunity to request the Administration to engage in voluntary compliance negotiations prior to the Administrator's determination of compliance or non-compliance.

(4) If, within 30 days, the Administration's recommendations for compliance are not met, or voluntary compliance is not secured, the matter will be forwarded to the Administrator for a determination of compliance or non-compliance. The determination shall be made no later than 14 days after the conclusion of the 30-day period. If the Administrator makes a determination of non-compliance with section 518(c) of the Crime Control Act, or section 518(o) of the Juvenile Justice Act, the Administration shall institute administrative proceedings pursuant to § 42.210, et seq.

(5) If the complainant or another party, other than the Attorney General, has filed suit in Federal or State court alleging the same discrimination alleged in a complaint to LEAA, and, during LEAA's investigation, the trial of such suit would be in progress, LEAA will suspend its investigation and monitor the litigation through the court docket and contacts with the complainant. Upon receipt of notice that the court has made a finding of discrimination within the meaning of § 42.210, the Administration shall institute administrative proceedings pursuant to § 42.210, et seq.

(6) The time limits listed in paragraphs (c) (1) through (c) (5) of this section shall be appropriately adjusted where LEAA requests another Federal agency or another branch of the Department of Justice to act on the complaint. LEAA will monitor the progress of the matter through liaison with the other agency. Where the request to act does not result in timely resolution of the matter, LEAA will institute appropriate proceedings pursuant to this section.

§ 42.206 Compliance reviews.
(a) The Administration shall periodically conduct compliance reviews of selected recipients of LEAA assistance, to be conducted in such manner that each recipient is subject to at least one review every three years.
(b) A review of this type shall consist of an inspection of the files and other documents pertaining to the recipient and its programs.
(c) The purpose of the review shall be to determine whether the recipient has complied with the terms and conditions of the agreement under which it received Federal financial assistance and to determine whether the recipient has taken appropriate action to ensure compliance with nondiscrimination requirements.
(d) The results of the review shall be reported to the recipient and the appropriate SPA, and to the Department of Justice.

FEDERAL REGISTER, VOL. 42, NO. 32—WEDNESDAY, FEBRUARY 16, 1977
(2) The percentage of women and minorities in the population receiving project benefits;
(3) The number and nature of discrimination complaints filed against a recipient with LEAA or other Federal agencies; and
(4) The scope of the problems revealed by an investigation commenced on the basis of a complaint filed with the Administration against a recipient.

(5) The amount of assistance provided to the recipient.

(c) Within 15 days after selection of a recipient for review, the Administration shall inform the recipient that it has been selected and will initiate the review. The review will ordinarily be initiated by a letter requesting data pertinent to the review and advising the recipient of:

(1) The practices to be reviewed;
(2) The programs or activities affected by the review;
(3) The opportunity to make, at any time prior to receipt of the Administration's findings, a documentary submission responding to the Administration, explaining, validating, or otherwise addressing the practices under review; and
(4) The schedule under which the review will be conducted and a determination of compliance or non-compliance made.

Copies of this letter will also be sent to the chief executive of the appropriate unit(s) of government, and to the appropriate SPA.

(d) Within 150 days or, where an on-site investigation is required, within 175 days after the initiation of the review, the Administration shall advise the recipient, the chief executive(s) of the appropriate unit(s) of government, and the appropriate SPA of:

(1) Its preliminary findings;
(2) Where appropriate, its recommendations for compliance; and
(3) The opportunity to request the Administration to engage in voluntary compliance negotiations prior to the Administrator's determination of compliance or non-compliance.

(e) If, within 30 days, the Administration's recommendations for compliance are not met, or voluntary compliance is not secured, the matter will be forwarded to the Administrator for a determination of compliance or non-compliance. The determination shall be made no later than 14 days after the conclusion of the 30-day negotiation period. If the Administrator makes a determination of non-compliance with section 518(c) of the Crime Control Act, or section 262(b) of the Juvenile Justice and Delinquency Prevention Act, the Administration shall institute administrative proceedings pursuant to section 262 of Title 5, United States Code, Subtitle B, Chapter 19, and the Administrative Procedure Act.

§ 42.207 Compliance information.

(a) The provisions of section 509 of the Crime Control Act, or section 262(b) of the Juvenile Justice and Delinquency Prevention Act, shall be enforced pursuant to the provisions of section 509 of the Crime Control Act, or section 262(b) of the Juvenile Justice and Delinquency Prevention Act. Each recipient receiving a grant or subgrant of $250,000 or more shall provide the Administration with a copy of its current Equal Employment Opportunity and Affirmative Action Plans and any subsequent revisions or supplements. The Administration shall maintain a file of these plans, which shall be available for inspection.

§ 42.210 Notice of noncompliance.

Whenever the Administration has:

(1) Received notice of a finding, after notice and opportunity for a hearing by:

(A) A Federal court other than in an action brought by the Attorney General under section 518(c) (3) of the Crime Control Act;

(B) A State court;

or

(C) A Federal or State administrative agency (other than the Administration) under paragraph (a) (2) of this section; or

(2) Made a determination after an investigation by the Administration pursuant to § 42.205 or § 42.207 that a State government or unit of general local government is not in compliance with this part, section 518(c) (1) of the Crime Control Act or section 262(b) of the Juvenile Justice Act;

the Administration shall, within 10 days after such occurrence, notify the chief executive of the affected State and, if the action involves a unit of general local government, the chief executive of such unit of general local government, that such program or activity has been found or determined not to be in compliance with this part or section 518(c) (1) of the Crime Control Act or section 262(b) of the Juvenile Justice Act.

§ 42.210(a).
(1) The program or activity determined to be in noncompliance;
(2) The general legal and factual basis for its determination of noncompliance; and
(3) The Administration's request to secure compliance.

(4) The action to be taken and the provisions of law under which the proposed action is to be taken should the chief executive fail to secure compliance;

(5) The right of the recipient to request a preliminary hearing, pursuant to § 42.214, if the determination is of noncompliance with section 518(c) (1), and a full hearing, pursuant to § 42.215.

§ 42.211 Compliance secured.

(a) In the event a chief executive secures compliance after notice pursuant to § 42.210, the terms and conditions with which the affected State government or unit of general local government agrees to comply shall be set forth in writing and signed by the chief executive of the State, by the chief executive of the unit (in the event of a violation by a unit of general local government), and by the Administrator.

(b) Prior to the effective date of the agreement, the Administrator shall send a copy of the agreement to each complainant, if any, with respect to such violation, and to the appropriate SSA.

(c) The chief executive of the State, or the chief executive of the unit (in the event of a violation by a unit of general local government) shall file semi-annual reports with the Administration detailing the steps taken to comply with the agreement.

(d) Within 15 days of receipt of such reports, the Administration shall send a copy to each complainant, if any.

(e) The Administrator shall also determine a recipient to be in compliance if it complies fully with the final order or judgment of a Federal or State court, if that order or judgment covers all matters raised by the Administrator in the notice pursuant to § 42.210, or if it is found by such court to be in compliance with section 518(c) (1).

§ 42.212 Compliance not secured.

(a) If, at the conclusion of 90 days after notification of noncompliance with section 518(c) (1):

(1) Compliance has not been secured by the chief executive of that State or the chief executive of that unit of general local government; and

(2) An administrative law judge has not made a determination under § 42.214 that it is likely the State government or unit of local government will prevail on the merits;

the Administration shall notify the Attorney General that compliance has not been secured and suspend further payment of any funds under the Crime Control Act to the specific program or activity in which the noncompliance has been found.

(b) If a hearing is requested pursuant to § 42.215, suspension of funds made available under the Crime Control Act shall be effective for a period of not more than 30 days after the conclusion of the hearing, or in the absence of a hearing under § 42.215, funds shall be suspended for a period of up to 90 days, unless there has been an express finding by the Administrator after notice and opportunity for such a hearing, that the recipient is not in compliance with this subpart in section 518(c) (1) of the Crime Control Act.

(c) Paragraphs (a) and (b) of this section do not apply to funds made available under the Juvenile Justice Act. If compliance is not secured within 90 days after notification of noncompliance with section 262(b), the Administrator may suspend approval of new applications for assistance to the program or activity determined to be in noncompliance for a period of up to 90 days pending a hearing under § 42.215.

§ 42.213 Resumption of suspended funds.

(a) Payment of suspended funds made available under the Crime Control Act shall resume only if:

(1) Such State government or unit of general local government enters into a cooperative agreement signed by the Administrator in accordance with § 42.211;

(2) Such State government or unit of general local government:

(i) Complies with the final order or judgment of a Federal or State court, if that order or judgment covers all matters raised by the Administrator in the notice pursuant to § 42.210, or

(ii) Is found by such court to be in compliance with section 518(c) (1) of the Crime Control Act by such court;

(3) After a hearing, the Administrator pursuant to § 42.215 finds that noncompliance has not been demonstrated; or

(4) An administrative law judge has determined, under § 42.214, that it is likely that the State government or unit of local government will prevail on the merits.

(b) Full compliance with a court order, for the purposes of paragraph (a) (2) of this section, securing of an agreement to comply over a period of time, particularly in complex cases or where compliance would require an extended period of time for implementation.

§ 42.214 Preliminary hearing.

(a) Prior to the suspension of funds under § 42.212(c), but within the 90-day period after notification under § 42.210, the State government or unit of local government may request an expedited preliminary hearing by an administrative law judge in order to determine whether it is likely that the State government or unit of local government would, at a full hearing under § 42.215, prevail on the merits on the issue of the alleged noncompliance.

(b) The preliminary hearing shall be initiated within 30 days of request. The ALJ shall make its finding within 15 days after the conclusion of the preliminary hearing.

§ 42.215 Full hearing.

(a) At any time after notification of noncompliance with section 518(c) (1) under § 42.210, but before the conclusion of the 90-day suspension period referred to in § 42.212, or within 30 days after notification of noncompliance with section 262(b), a State government or unit of general local government may request a full hearing to consider the findings or determination of noncompliance made under § 42.210. The Administrator shall initiate the hearing within 60 days of request.

(b) Within 90 days after the conclusion of the hearing, or, in the absence of a hearing, at the conclusion of the 120-day period referred to in § 42.212, the Administrator shall make a finding of compliance or noncompliance.

1. Complainant, if any, with respect to such violation, and to the appropriate SSA.

2. The chief executive of the State, or the chief executive of the unit (in the event of a violation by a unit of general local government) shall file semi-annual reports with the Administration detailing the steps taken to comply with the agreement.

3. Full compliance with a court order, for the purposes of paragraph (a) (2) of this section, securing of an agreement to comply over a period of time, particularly in complex cases or where compliance would require an extended period of time for implementation.

4. An administrative law judge has determined, under § 42.214, that it is likely that the State government or unit of local government will prevail on the merits.

5. Full compliance with a court order, for the purposes of paragraph (a) (2) of this section, securing of an agreement to comply over a period of time, particularly in complex cases or where compliance would require an extended period of time for implementation.

6. An administrative law judge has determined, under § 42.214, that it is likely that the State government or unit of local government will prevail on the merits.

7. Full compliance with a court order, for the purposes of paragraph (a) (2) of this section, securing of an agreement to comply over a period of time, particularly in complex cases or where compliance would require an extended period of time for implementation.

8. An administrative law judge has determined, under § 42.214, that it is likely that the State government or unit of local government will prevail on the merits.

9. Full compliance with a court order, for the purposes of paragraph (a) (2) of this section, securing of an agreement to comply over a period of time, particularly in complex cases or where compliance would require an extended period of time for implementation.

10. An administrative law judge has determined, under § 42.214, that it is likely that the State government or unit of local government will prevail on the merits.

11. Full compliance with a court order, for the purposes of paragraph (a) (2) of this section, securing of an agreement to comply over a period of time, particularly in complex cases or where compliance would require an extended period of time for implementation.
RULES AND REGULATIONS

administrative proceedings unless enjoined from doing so by the court.

(2) Whenever the Attorney General files a civil action alleging a pattern or practice of discriminatory conduct on the basis of race, color, religion, national origin, sex, or equality of access of a State government or unit of local government which State government or unit of local government receives funds made available under the Crime Control Act and the conduct alleged violates or would violate the provisions of this part, section 518(c) (1) of the Crime Control Act and another party within 63 days after such filing has been granted such preliminary relief with regard to the suspension or payment of funds as may otherwise be available by law, the Administrator shall suspend further payment of any funds under the Crime Control Act to that specific program or activity alleged by the Attorney General to be in violation of the provisions of section 518(c) (1) of the Crime Control Act until such time as the court orders resumption of payment.

(3) The Administrator expects that preliminary relief authorized by this subsection will be extended to any other party making application for such preliminary relief meets the standards for a preliminary injunction.

(4) (a) Whenever a State government or unit of local government or any officer or employee thereof acting in an official capacity, has engaged or is engaging in any act or practice prohibited by section 518(c) (1) of the Crime Control Act, a civil action may be instituted after exhaustion of administrative remedies by the person aggrieved in an appropriate United States district court or in a State court of general jurisdiction.

(b) Administrative remedies shall be deemed to be exhausted upon the expiration of 60 days after the date the administrative complaint was filed with the Attorney General or any other administrative enforcement agency, unless within such period there has been a determination by the Attorney General or the agency on the merits of the complaint, in which case such determination shall be deemed to have been exhausted at the time the determination becomes final.

Section 42.201 (c). The compliance enforcement mechanism of section 518(c) (2) applies by its terms to State and local government units. The prohibition in section 518(c) (1), however, applies to all recipients of LEAA assistance. Accordingly, where a private entity which has received LEAA assistance is acting in a State or local unit of government is determined by LEAA to be in non-compliance, LEAA will invoke the section 518(c) (2) mechanism against the appropriate unit of government for its failure to enforce the assurances of compliance given by it to the private recipient, unless the unit has initiated its own compliance action against the private entity. Where the termination procedures of section 509 will be invoked against non-complying private recipients which receive assistance directly from LEAA or through another private entity, the courts of the United States shall be vested with jurisdiction to terminate their activities.

Section 42.202 (g). Section 518(c) of the Crime Control Act limits suspension and termination of assistance in the event of noncompliance to the "specific program or activity" in which the noncompliance is found.

House Report No. 94-1155 (94th Cong., 2d Session), at p. 20, explained this provision as follows:

Suspension may be limited to the specific program or activity found to have discriminated, rather than all of the recipients' LEAA funds.

For example, if discriminatory employment practices in a city's police department were cited in the notification, LEAA may only suspend those funds which fund the police department. LEAA may not suspend the city's LEAA funds which are used in the city courts, prisons, or juvenile justice agencies.

This passage makes it clear that LEAA need not demonstrate a nexus between the particular project funded and the discriminatory activity. See Lau v. Nichols, 414 U.S. 563, 566 (1974).

Sections 42.203 (b) and 42.203 (d). These provisions are derived from 28 CFR 104.104 (b) (Subpart C of the Department of Justice Nondiscrimination Regulations). Where appropriate, "sex" and "religion" have been added as prohibited grounds of discrimination, and "denial of employment" as another activity within the scope of sections 518(c) (1) and 265(c).

Individual projects benefitting a particular sex, race, or ethnic group are not violations of section 518(c), unless the granting agency or the recipient has engaged in a pattern of granting preferential treatment to one such group and cannot justify the preference on the basis of a compelling governmental interest, in the case of race or sex discrimination. Where appropriate, sex or race, or a substantial relationship to an important governmental function, in the case of sex discrimination.

Section 42.203 (b) (9). On November 17, 1976, the Department of Justice adopted as official policy the guidelines proposed by the Equal Employment Opportunity Coordinating Council (EEOCC) in 41 FR 38815 (July 14, 1976), with modifications (518(c) (1) ), in which the Department, these guidelines are now applicable to the selection procedures of LEAA recipients. See the Department of Justice Questions and Answers on the Federal Executive Agency Guidelines on Employee Selection Procedures in 42 FR 3830 (January 10, 1977) for a detailed commentary on the Guidelines.

Section 42.203 (c). In the Conference Report on the Crime Control Act, the managers stated that "in the area of employment cases brought under this title (the Crime Control Act), the Act confers that the standards of Title VII of the Civil Rights Act of 1964 apply." H. Rept. No. 94-1723 (94th Cong., 2d Sess.) at p. 32.

This section makes the LEAA standards of employment discrimination consistent with those used by the Civil Rights Division of the Department of Justice. The further practice of burden shifts to the employer, which must be shown before the burden shifts in a Fourteenth Amendment case since as Washington v. Davis, 96 S. Ct. 2040 (1976), need not be shown in an employment discrimination case brought under section 518(c) (1).

Section 42.203 (f). Section 518(b) of the Crime Control Act reads:

Notwithstanding any other provision of law, nothing contained in this title shall be construed to authorize the Administration (1) to require, or condition the availability or amount of a grant upon, the adoption by an applicant or grantee under this title of a percentage ratio, quota system, or other program to achieve racial balance or to eliminate racial imbalance, or (2) to deny or discontinue a grant because of the refusal of an applicant or grantee under this title to adopt such a ratio, system, or other program.

In commenting on the Crime Control Act of 1976, Senator Roman Hruska of Nebraska explained the difference between quotas and goals and timetables as follows:

Section 518(b) of the act prohibits the setting of quotas. This provision was unchanged, and this provision will still bind the Act.

LEAA does have an affirmative obligation under this law to seek to eliminate discriminatory practices. The Act would require, if possible, prior to reciting to fund termination, as certified to the recipient eliminate the effect of past discrimination by requiring the recipient to commit itself to goals and timetables. The formulation of goals is not a quota prohibited by section 518(b) of the Act. A goal is a numerical objective fixed realistically in terms of the number of vacancies expected and the number of qualified applicants available. Factors such as a lower attrition rate than expected, bona fide fiscal restraints, or a lack of qualified applicants would not be acceptable as the basis for a goal that has been established and no sanctions would accrue under the program. Cong. Rec. S. 17320 (September 29, 1976, daily ed.).
Section 42.204. All grantees and subgrantees must make the assurances found in paragraph (a). Only State and local units of government must make the assurance found in paragraph (b), since, as explained in the commentary on § 42.203(b), the enforcement provisions of section 518(c)(2) apply only to recipients.

Section 42.205(a). Where information available to the Administration clearly and convincingly demonstrates that the recipient failed, after due process, to discharge its fiduciary responsibilities, the backlog will be considered, once the backlog is fully disposed, and without further action. The factors listed below in the following list will be considered cumulatively by LEAA in selecting recipients for reviews.

Section 42.205(b). A one-year statute of limitations is imposed to ensure that LEAA will be devoting its resources to the resolution of active issues, and to maximize the possibility that necessary witnesses and evidence are still available.

Examples of good cause which would clearly warrant an extension of the filing period are a statement from the complainant stating that he or she was unaware of the discrimination until after a year had passed, or that he or she was not aware that a remedy was available through LEAA.

Section 42.205(c). Jurisdiction exists to the extent that the complaint alleges discrimination on a ground prohibited by section 518(c)(1) or section 262(b) and, the respondent named in the complaint is a current recipient of LEAA assistance.

Section 42.205(d). A factor which will not be considered by LEAA in selecting recipients for reviews is the timetables set forth in § 42.205(c) or (d) are intended to apply only to future complaints received by LEAA, but a backlog of approximately 300 complaints as well. Every complaint in the backlog will be treated as received on the date these regulations are published as final. LEAA anticipates that, once the backlog is fully disposed of the timetables will be significantly reduced further.

Prior to a determination of non-compliance, LEAA will attempt to negotiate voluntary compliance only during the 30-day period following receipt of the Administration's preliminary findings, and only if the recipient agrees, as provided in § 42.205(c)(3). If a determination of non-compliance is made, LEAA will participate in voluntary compliance efforts during the 90-day period following the letter sent to the chief executive(s) under § 42.210.

Section 42.206(a). LEAA recognizes the practical impossibility of reviewing the timetables of recipients to its more than 39,000 recipients. The regulations seek to expedite the review process by reducing its length and narrowing its focus. Compliance reviews may, in some instances, limit the investigation of past practices, or other functions of a recipient, that appear to have the greatest adverse impact on an affected class.

LEAA will continue its practice of making pre-award desk audits of all discretionary grants awarded by LEAA which amount to $500,000 or more. If the audit reveals a significant potential for discrimination in employment or services, the recipient will be scheduled for a compliance review.

Section 42.206(b). The factors listed below will be considered cumulatively by LEAA in selecting recipients for reviews. LEAA will consider data from all sources, including information provided by both internal and external sources.

Section 42.207. Section 42.106 of Subpart C requires, among other things, that a recipient must keep such records, and submit such reports as the granting agency may determine to be necessary in order to evaluate the recipient's compliance. Each recipient must also permit access by responsible officials during normal business hours to such records as may be pertinent to an evaluation of compliance.

Section 42.210(a). Section 266(b) of the Juvenile Justice Act requires the non-discrimination provision of the Act to be enforced “in accordance with Section 518(c) (2)” of Title VI of the Civil Rights Act of 1964. That section provides a different enforcement procedure than section 518(c)(2) of the Crime Control Act.

Where possible, the regulations have made the two procedures consistent. Where they cannot be harmonized, the regulations explain the separate requirements. See, e.g., § 42.212(c) and § 42.215(b)(2).

The enforcement procedure for non-compliance with § 42.21(b) will be initiated by a determination of non-compliance by the Administration (after an investigation) and a letter to the appropriate chief executive(s). See § 42.211(a)(2). A finding by a Federal or State court or Federal or State administrative agency will not trigger the notification letter. The contents of the notification letter are set forth in § 42.210(c).

Compliance will be secured in the same manner as compliance with § 42.210(c)(1). See § 42.211.

Pending a full hearing on the issue of non-compliance, LEAA cannot suspend active funding to a recipient of Juvenile Justice Act funds. LEAA may only suspend active funding for purposes of new applications for assistance to the program or activity determined to be in non-compliance, for up to 90 days pending the hearing. See § 42.212(g). Because active funding is not suspended, the opportunity to request a preliminary hearing is not provided to Juvenile Justice Act recipients.

After a full hearing, if requested within 30 days after notification of non-compliance, the Administration may request another agency to act on a final determination of compliance or non-compliance. If a determination of non-compliance is made, no funding can be terminated until the expiration of 30 days after the Administration files a full written report of the circumstances and grounds for the determination with the appropriate Congressional committee.

This provision is mandated by section 602 of title VI of the Civil Rights Act of 1964. See § 42.215(b)(2).

The final determination may be appealed, as provided in section 603 of Title VI (see § 42.218).

Section 42.210(b). Upon receipt of the publication of the regulations, LEAA will review the case reports for findings that may be violations of section 518(c)(1). In the case of the West Publishing Company reporters, LEAA will consult the topic “Civil Rights” in the Key Number Digest section. The regulations will be sent to the appropriate congressional committee.

Section 42.210(c). This subsection sets forth the minimum procedural safeguards that LEAA would require of an administrative hearing to assure that the process was consistent with the Administrative Procedure Act. The sufficiency of other procedures that may vary in form but assure due process and the same opportunity for a fair hearing of both parties’ evidence will be determined by LEAA on a case-by-case basis.

The Administration will compile a list of State agencies whose procedures have been found consistent with the Administrative Procedure Act, and a list of State agencies whose procedures have been found inconsistent. When a finding of an agency not on either list is received, the Administration will attempt to reliably determine the procedures used to render the findings.

Section 42.211. Although the signiﬁcant that the appropriate chief executive(s) are ultimately required on the compliance agreement, these regulations do not preclude them from delegating the responsibility for securing compliance during the 90-day period following notification, to State or local administrative or human rights agencies under their respective authority. A compliance agreement may be an agreement to comply over a period of time, particularly in complex cases or where compliance would require an extended period of time for implementation.

Section 42.211. The regulations require that a copy of the proposed compliance agreement be sent to the complainant, if any, before the effective date. Although the Act would permit a copy to be sent as late as the effective date, LEAA believes the compliance agreement would be more likely to resolve all issues and discourage litigation if the complainant’s views were considered before it took effect.
Section 42.213(b). An example of a case where compliance would require an extended period of time for implementation would be a court order setting a goal of five years for an employer to raise the percentage of minorities in its workforce to parity with the percentage of minorities in the relevant geographical labor force.

Section 42.215. The full hearing will be conducted in accordance with the LEAA Administrative Review Procedures, 28 CFR 18.1, et seq.

Section 42.217(a). Congressman Peter Rodino, Chairman of the House Judiciary Committee, indicated in his comments on the proposed regulations in a letter to the LEAA Administrator dated December 20, 1976, that "the Committee intentionally omitted the word 'refer' from the law to ensure that LEAA would always retain administrative jurisdiction over a complaint filed with them. It is not appropriate for LEAA to refer cases to the Civil Rights Division or other Federal or State agencies without monitoring the case for prompt resolution."

Section 42.217(c) (2). The exhaustion of administrative remedies at the end of 60 days (unless the Administration has made a determination) does not limit LEAA's authority to investigate a complaint after the expiration of that period. LEAA will continue to investigate the complaint after the end of the 60-day period, if necessary, in accordance with the provisions of Section 42.205.

The provision for attorney's fees in section 518(c) (4) (B) of the Crime Control Act is not recited in the regulations because it does not affect the authority or actions of the Administration.

Richard W. Velde, Administrator.

FEDERAL ELECTION COMMISSION

ADVISORY OPINION REQUESTS
FEDERAL ELECTION COMMISSION

ADVISORY OPINION REQUESTS

Pursuant to 2 U.S.C. § 437f(c) and the procedures reflected in Part 112 of the Commission's Proposed Regulations, published on August 25, 1976 (41 FR 35854), Advisory Opinion Requests 1977-4 and 1977-5 have been made public at the Commission. Copies of AOR 1977-4 and AOR 1977-5 were made available on February 8, 1977. These copies of advisory opinion requests were made available for public inspection and purchase at the Federal Election Commission, Public Records Division, at 1325 K Street, N.W., Washington, D.C. 20463.

Interested persons may submit written comments on any advisory opinion request within ten days after the date the request was made public at the Commission. These comments should be directed to the Office of the General Counsel, Advisory Opinion Section, at the Commission. Persons requiring additional time in which to respond to any advisory opinion requests will normally be granted such time upon written request to the Commission. All timely comments received by the Commission will be considered before the Commission issues an advisory opinion. Comments on pending requests should refer to the specific AOR number of the requests and statutory references should be to the United States Code citations rather than to the Public Law citations.

A descriptive listing of each of the requests recently made public as well as the identification of the requesting party follows hereafter:

AOR 1977-5: Do the exemptions for legal and accounting services to ensure compliance with the Act permit a principal campaign committee or other political group to accept donations to defray such legal and accounting fees without regard to the contribution limits in the Act? Requested by Senators Bennett Johnston and Bob Packwood on behalf of the Democratic and Republican Senatorial Campaign Committees, Washington, D.C.

Vernon W. Thomson,
Chairman for the Federal Election Commission,

PART IV

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Insurance Administration

NATIONAL FLOOD INSURANCE PROGRAM

Final and Proposed Flood Elevation Determinations for Various Communities
Title 24—Housing and Urban Development
CHAPTER X—FEDERAL INSURANCE ADMINISTRATION, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM
[Docket No. FR-26063‐F]

PART 1914—COMMUNITIES ELIGIBLE FOR THE SALE OF INSURANCE

Status of Participating Communities

The purpose of this notice is to list those communities wherein the sale of flood insurance is authorized under the National Flood Insurance Program (42 U.S.C. 4001-412B).

Insurance policies can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurers Association servicing company for the state (addresses are published at §1912.5, 24 CFR Part 1912).

The Federal Insurance Administrator finds that delayed effective dates would be contrary to the public interest. The Administrator also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

Section 1914.6 of Part 1914 of Subchapter B of Chapter X of Title 24 of the Code of Federal Regulations is amended by adding in alphabetical sequence new entries to the table. In each entry, a complete chronology of effective dates appears for each listed community. The date that appears in the fourth column of the table is provided in order to designate the effective date of the authorization of the sale of flood insurance in the area under the emergency or the regular flood insurance program. These dates serve notice only for the purposes of granting relief, and not for the application of sanctions, within the meaning of 5 U.S.C. 551. The entry reads as follows:

§ 1914.6 List of eligible communities.

FEDERAL REGISTER, VOL. 42, NO. 32—WEDNESDAY, FEBRUARY 16, 1977
PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the Township of Earl, Berks County, Pennsylvania

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the community must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community of individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at the Earlville Post Office, Route 562, Boyertown, and at the Earl Township Firehouse, Ironstone Drive, Boyertown, Pennsylvania.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations, for the selected locations set forth below:

<table>
<thead>
<tr>
<th>Source of flooding</th>
<th>Location</th>
<th>Elevation in feet above mean sea level</th>
<th>Width in feet from bank of 100-yr flood boundary facing downstream</th>
</tr>

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the City of Youngstown, Mahoning and Trumbull Counties, Ohio

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the City must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to § 1917.6, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with § 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at City Hall, Boardman, and South Streets, Youngstown.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

<table>
<thead>
<tr>
<th>Source of flooding</th>
<th>Location</th>
<th>Elevation in feet above mean sea level</th>
<th>Width in feet from bank of stream to 100-yr flood boundary facing downstream</th>

[Docket No. 77-2303]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the City of Myrtle Beach, Horry County, South Carolina

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the community must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at City Hall on the bulletin board, 10 Avenue and Broadway, Myrtle Beach, South Carolina.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations, for the selected locations set forth below:

RULES AND REGULATIONS

J. ROBERT HUNTER,
Acting Federal Insurance Administrator.

[FR Doc.77-4658 Filed 2-15-77; 8:45 am]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the Township of Franklin, Carbon County, Pennsylvania

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the community must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at the township building, R. D. 4, Lehighton, Pennsylvania.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations, for the selected locations set forth below:

<table>

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the Borough of Yardley, Bucks County, Pennsylvania

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the community must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

(Continued from previous page.)
RULES AND REGULATIONS

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

Final flood elevations (100-year flood) are listed below for selected locations.

Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at the Bulletin Board in the Police Department, 50 South Main Street, Yardley, Pennsylvania.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations, for the selected locations set forth below:

FEDERAL REGISTER, VOL. 42, NO. 32—WEDNESDAY, FEBRUARY 16, 1977
PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the Borough of Shillington, Berks County, Pennsylvania

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National flood Insurance Program, the community must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review in the Borough office of the Town Hall, Shillington, Pennsylvania.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations, for the selected locations set forth below:

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

EASTERN BERING SEA

King and Tanner Crab Fisheries
On the 4th of February, 1977, the Secretary of Commerce, through an appropriate delegation of authority to the Associate Administrator for Marine Resources of the National Oceanic and Atmospheric Administration and the Director of the National Marine Fisheries Service, published a Notice of Determination, Preparation, Issuance, and Implementation of Preliminary Fishery Management Plans at 42 FR 6873. In order that each Plan may have the widest possible circulation, the Secretary has decided that each should be published in the FEDERAL REGISTER.

Dated the 9th day of February 1977, at Washington, D.C.

WINFRED H. MEIBOHM,
Associate Director, National Marine Fisheries Service.

6.0 References.

7.0 Footnotes.

8.0 Appendix.
This preliminary management plan for the foreign king and snow (Tanner) crab fisheries in the eastern Bering Sea is in direct response to the Fishery Conservation and Management Act of 1976 (P.L. 94-265). The Act extends U.S. fisheries jurisdiction, establishes an exclusive management authority, and mandates preparation of preliminary management plans for each individual fishery unit in which foreign participation may occur under provisions of the Act. The crab fishery of the eastern Bering Sea is one such fishery unit.

The Japanese fishery for king crab in the eastern Bering Sea began in 1930 and, except for 1931, continued through 1940. The United States conducted experimental fishing and processing studies in 1940-41. After World War II the United States began a commercial fishery in the eastern Bering Sea that continued from 1947 through 1957. In the late 1950's the U.S. effort continued to grow but shifted temporarily to stocks in the Gulf of Alaska. Japan reentered the Bering Sea fishery in 1953, and catches continued near 1 million crabs per year until 1959 when the U.S.S.R. entered the fishery. Catches of these two foreign nations grew rapidly to 8.1 million crabs in 1964 after which they declined in response to quotas established in separate bilateral agreements. The U.S. fishery returned to the eastern Bering Sea in the early 1960's and rapidly increased its harvest until it reached about 9 million crabs in 1974. As the U.S. fishery developed its capacity to fully utilize the king crab resource, the remaining foreign efforts have been phased out through bilateral agreements.

The foreign fishery for snow crab was minor and incidental to the king crab fishery until 1967 when both the U.S.S.R. and Japan increased their efforts on this resource. The foreign fishery grew explosively and peaked at 24 million crabs in 1959 and 1970. Since that time catch quotas have been reduced progressively through bilateral agreements. The U.S. snow crab fishery in the eastern Bering Sea began in 1963 but has been sporadic and incidental to the king crab fishery until 1975. It now appears that U.S. fishery is firmly established and growing rapidly in this area.

Preliminary Description of the Fishery

Areas and Stocks Involved

The commercial fishery for king crab in the eastern Bering Sea targets on the red king crab, Paralithodes camtschatica, and the blue king crab, P. platypus. Also present but not utilized to a significant extent is the brown king crab, Lithodes acutispina. The Alaska Department of Fish and Game (ADFG) has divided the eastern Bering Sea into areas—Bering Sea, Unalaska, Adak, and Western Aleutians (Figure 1)—for purposes of regulating the domestic fishery. All but the Bering Sea stocks are considered as inshore populations and will not be considered further in this report. For the Bering Sea, two stocks are differentiated: red king crab found along the Alaska Peninsula (Figure 2) and blue king crab found exclusively in the Pribilof Island region.

Two species of snow (Tanner) crab, Chionoecetes bairdi, and C. opilio, are also harvested in the eastern Bering Sea. The distribution of C. bairdi extends from Bristol Bay to the Pribilof Islands (Figure 2). The commercial fishery occurs north of Unalaska Island and near the Pribilof Islands. Stocks of C. opilio are found more to the north and west of C. bairdi. Presently the Alaska Department of Fish and Game monitors all

FEDERAL REGISTER, VOL 42, NO. 32—WEDNESDAY, FEBRUARY 16, 1977
Bering Sea snow crab as if they were one stock.

History of the Fishery

King Crab

The commercial harvest of king crab in the eastern Bering Sea was initiated by Japanese fishermen in 1930. During that year, approximately 1 million crabs were caught by a fleet of 12 small vessels fishing with tangle nets and processed by a factory-mothership. Catches reached 2 million crabs in 1933 but declined in succeeding years. The fishery was abandoned in 1940 prior to World War II. Japan's crab fleet was destroyed during the war and was not replaced until 1953 when she reentered the fishery.

The United States conducted exploratory fishing and processing studies on this resource in 1940 and 1941, but commercial development was interrupted by World War II. The U.S. fishery began in 1947 when trawlers began harvesting about a half million crabs annually. The Japanese crab fleet returned to the Bering Sea in 1953, and the United States fishery temporarily shifted its efforts to exploit stocks south of the Alaska Peninsula. Between 1957 and 1963 there was no significant U.S. crab effort in the eastern Bering Sea (Table 1).

Table 1—Eastern Bering Sea king crab catch (1,000's of crabs).

as stocks in the Gulf of Alaska became more heavily exploited. In the late 1960's and early 1970's, total catch declined to less than half of the peak years of 1962-64, principally as a result of bilateral arrangements which reduced the foreign catch. After 1971, the U.S.S.R. no longer participated in the fishery. Japan, after 4 years of very low catches, did not fish for king crab after 1974. In 1973, king crab stocks began to increase in abundance and the U.S. fishery expanded rapidly. In 1974 and 1975, all-time record catches were recorded, and the 1975 harvest was taken entirely by the U.S. crab fleet.

Snow (Tanner) Crab

Snow (Tanner) crab harvested in the eastern Bering Sea prior to 1964 were caught incidentally in the king crab fisheries. However, in 1964 when the combined Soviet and Japanese king crab fisheries were at their peak, bilateral agreements between the United States-Japan and United States-U.S.S.R. resulted in immediate reductions in the foreign production of king crab. Foreign emphasis then shifted to snow crab and the combined Japanese-Soviet snow crab catch increased rapidly to about 24 million in 1969 and 1970 (Table 2). Since 1970, quotas for snow crab have sharply reduced foreign landings. As was the case for king crab, the Soviet snow crab fishery ended after 1971.1/

Prior to 1974 the U.S. snow crab catch from the Bering Sea was incidental to the king crab harvest but has since grown to a purposeful fishery with an estimated catch of 8,931,000 crabs in 1976-about half of the directed catch (Table 2).

1/ Snow (Tanner) crab are also taken incidental to the foreign trawl fisheries.

**DATA SOURCES:** Statistics for the Japanese and United States fisheries are from NPFDC documents. Statistics for the U.S.S.R. fishery provided to the United States by the U.S.S.R.
Vessels and Gear Types Employed

There has been no Soviet crab fishery in the eastern Bering Sea since 1971. The two factoryships utilized by Japan to process crabs in recent years are the Keiko Maru (7,519 GT) and the Koyo Maru (7,500 GT). Since 1975, each factoryship has been supplied by six catcher boats which are about 100 GT. Japanese crab fishermen now deploy conical, "top-loading" pots which are fished on a groundline. About 130 pots are fished per line, generally with a 3-4 day soak. Each vessel has about 2,000 pots distributed among 15-18 strings of this gear. The gear is hauled using a longline puller; the crabs are removed, stored dry in sacks in the fishhold, and delivered daily to the factoryship where processing takes place.

In 1975, 104 U.S. crab vessels averaging 131 NT fished in the Bering Sea. All vessels are equipped with circulating seawater tanks so crabs can be held live for several days before the vessels return to port. Typical U.S. crab vessels are shown in Figures 3-4. All crabs are taken in large, rectangular pots weighing over 600 pounds which are fished singly on a buoyline. A single vessel may fish as many as 300 pots. Relative sizes of United States and Japanese crab fishing vessels are shown in Figure 5.

Regulatory History and Violations

Fishery Restrictions

Regulations on harvest of king crab were introduced early in the fishery. A minimum size limit of 5½ inches in shell width was introduced in lower Cook Inlet in 1919. This size limit was extended to all of Alaska...
Figure 4.  -- Sea Rover, 102' x 23' x 14', built 1973 by Marine Construction & Design Co., Seattle, Wash.  (R. Kent Publishing Co. 1979)

Figure 5.  Relative sizes of United States and Japanese crab vessels in the ca. 12,000 ton, Bering Sea.
in 1942 and remained in effect until 1951, when the limit was increased to 165 mm (64 inches). This new size limit remained in effect until growth studies at Kodiak provided a basis to increase the limit to 7 inches for stocks at Kodiak and areas eastward in the Gulf of Alaska. In the eastern Bering Sea, bilateral fisheries agreements set size limits for foreign fleets first at 146 mm (5-3/4 inches) and later at 159 mm (64 inches) in shell width. These limits were imposed on the domestic fishery during periods of foreign competition. The 1976 size limit is 65 inches for all areas west of Kodiak. Regulations also prohibit the retention of female crabs and of soft-shelled males.

Legal fishing gear has included trawls, tangle nets, ring nets, and pots or traps. Trawls were the most common gear used to capture crabs in the early years of the fishery but were soon used for criticism. Trawls were non-selective and their use contributed to mortality of female and crab of sublegal size, especially during the spring when molting was in progress. The use of trawls to catch king crab was made illegal in 1961. Tangle nets found little application in Alaskan fisheries because they required too much labor to remove the crabs. They were made illegal in 1955.

Pots rapidly came into use by the fishermen in the 1950's. In 1955 the number of pots per vessel was restricted to 15 in the Cook Inlet fishery. To 1960 the pot limit was increased to 30 and extended to other areas. As production increased and larger boats became common in the fishery, the pot limit has been increased. In 1975 the limit was 75 pots per vessel in most fishing areas, but there was no pot limit in the eastern Bering Sea. Ring nets remain legal but have found little application in commercial fisheries; they are commonly used by subsistence fishermen.

Arctic and winter closures were uncommon in the early fishery, but after the catch reached its peak then began to decline in 1966 and 1967, a new regulatory scheme came into being. Guideline harvest levels were established for specific areas, along with shorter seasons. In general, only the opening date of the season is significant since closure in made by emergency order when the harvest level is reached. Seasons have become progressively shorter and, in 1973, they ranged from about 10 to about 30 days in the various regulatory areas.

Another form of regulation has also been introduced which requires fishing vessels to choose one area in which they will fish. The eastern Bering Sea has been excepted from this regulation because an international fishery occurs there and it has been considered desirable to allow U.S. fishermen free access to compete for the resource.

The domestic snow crab fishery has grown very rapidly and conservation regulations have been imposed recently. In the Prince William Sound and Cook Inlet areas exclusive area registration regulations apply. Guideline harvest limits have been established for the Kodiak, Cook Inlet, Prince William Sound, and Southeastern Districts. A minimum size limit has been set at 54 inches in carapace width. Season opening dates and pot limits have been applied to most districts.

Foreign

Prior to 1964 there were no U.S. regulations for the foreign crab fisheries of the eastern Bering Sea. In 1964, the United States ratified the 1958 Continental Shelf Convention and declared king and snow (chum) crab (among other species) as "Creatures of the Continental Shelf." In

FEDERAL REGISTER, VOL. 42, NO. 32—WEDNESDAY, FEBRUARY 16, 1977
that same year, bilateral arrangements were concluded with both Japan and the U.S.S.R. in which quotas and a minimum size limit were applied to their king crab catches. In addition, only hard shell male crabs could be retained. Catch quotas were first applied to the foreign snow crab fisheries in 1969 and use of single net gear was restricted in later bilateral agreements. These bilateral agreements have been modified every 2 years, resulting in progressively lower foreign quotas for both king and snow crabs (Table 3).

Since 1973, separate snow crab quotas have applied to each of two sub-areas of the Bering Sea in an indirect attempt to reduce foreign exploitation of Callinectes, the species of snow crab preferred by the U.S. crab industry (Figures 6 and 7). The sub-areas were further defined in the 1975-76 bilateral to eliminate the foreign fishery east of 164°W longitude and south of 54°30'N latitude—the principal area fished by the United States.

The United States initiated an observer program in 1971 aboard the two Japanese crab factory ships to make biological observations and to ascertain Japanese compliance to quota restrictions established in the bilateral agreement. Although observers spent a total of 191 vessel days at sea during the 1971-73 period, it was not possible to determine Japanese adherence to catch quotas because of a lack of authority to control the unloading operations of the catcher boats and the processing operation.

The observer program was strengthened during bilateral negotiations, and in 1975 and 1976 the U.S. observers positively verified Japanese crab catch statistics. The salient features of this successful program are as follows:

1) All crabs harvested by the catcher boats will be processed (but-chored, cooked, and/or frozen) on the two factory ships.

NOTICES

Figure 6. EASTERN BERING SEA CRAB QUOTAS FOR 1973 AND 1974
ESTABLISHED BY U.S.-JAPAN CRAB AGREEMENT DECEMBER 1972
AND U.S.-U.S.S.R. CRAB AGREEMENT FEBRUARY 1973

---

FEDERAL REGISTER, VOL 42, NO. 32—WEDNESDAY, FEBRUARY 16, 1977
(2) No deliveries of crab by the catcher boats will be made to a
nothershio unless at least one U.S. observer is present on the nothershio,
except in the cases where circumstances on the U.S. side prevent the
presence of U.S. observers on the nothershio.

(3) Observers will be notified of each and every delivery. Where
possible, Japanese enforcement officials will schedule all crab deliveries
during the same 12-hour period each day, during which time United States
observers will be allowed to be present on deck at the time of verification
of the weight of each crab landing to ascertain said weight for their records.
Observers will be allowed to check the accuracy of the scales at any time,
particularly after a period of absence.

(4) Observers will be allowed to notify the United States by wire or
radio daily of the nothershio's position and catch of crabs and other matters
related to the observer program.

(5) To the extent possible, 6 weeks before the beginning of the crab
season, Japan will notify the United States of the departure date of the
nothershio and the names and distinguishing markings of all vessels
involved.

(6) Information can be supplied to the Japanese government by United
States officials regarding the progress of the Japanese fleet, as observed
by the U.S. observers, when the quota is being approached. The Japanese
officials will take due account of this information at the time of making
the decision concerning when the quota has been reached.

(7) Observers will be allowed to sample each day's catch for the
purpose of gathering biological data. In addition, observers will be
allowed freedom to move on the deck of the factory ship to observe the conduct
of law enforcement.

(8) At the conclusion of each year, the parties will conduct a joint
review of the adequacy of the observer program and related matters and,
based on this review, will make appropriate changes.

In both 1975 and 1976 a team of two United States observers were
aboard the two Japanese crab factory ships during the entire fishing season.
Japanese officials cooperated with every aspect of the observer program.
As a result, for the first time, the United States was able to verify the
Japanese crab landings.

2.4.4 Violations and Gear Losses

Violations of international agreements concerning crab fishing by
foreign fishing vessels are summarized in Table 4. All violations but one
occurred in the Bering Sea and Aleutian Islands. All Soviet violations
pertain to the bilateral crab agreement; Japanese fishing vessels were
cited for crab agreement, contiguous fishery zone, and Continental Shelf
Fishery Resources violations.

No losses of U.S. gear are attributable to foreign crab fisheries.
There have, however, been many losses to foreign trawlers (Table 5).

3. The Impact on Domestic Fishery

The Japanese snow ( Tanner) crab fishery in the eastern Bering Sea
(the only foreign crab fishery now operating) has little impact on king
crab stocks or the U.S. king crab fishery. Not only is the fishery limited
by bilateral agreement to areas of relatively low king crab abundance, but
U.S. observers report that incidental king crab catches are small and that
which are caught are returned quickly to the sea. Two Japanese crews...

2/ Including 143 believed lost to Soviet vessels.
3/ Including 45 believed lost to Soviet vessels, 19 to Japanese vessels, and 2 to Japanese or South Korean vessels.
In the snow crab fishery, Japanese catcher boats procured certain grounds that could otherwise be used by United States fishermen. This occurs particularly in the southeast corner of Area A (Figure 7) where Japanese effort is concentrated.

Another impact on the snow crab fishery is caused by losses from the incidental catch of snow crab in the foreign trawl fisheries. Japanese trawlers, according to both United States and Japanese estimates, take more than 100,000,000 snow crab annually. Although these crabs must be returned to the ocean, mortality is estimated to be about 60-70 percent. Taking into consideration the size of capture and the rate of natural mortality, it is estimated that the total loss of snow crab to the fishable male population amounts to about 25-30 million pounds (11,000-14,000 metric tons) annually. The incidental catch of snow crab by the foreign trawl fisheries approaches the magnitude of the directed crab catch. It is probable that this level of removal, if it continues, will to some degree inhibit expansion of the domestic snow crab fishery.

History of Cooperative Research and Statistical Exchange

King crab investigations by the United States Bureau of Commercial Fisheries began in 1953 and, in 1954, were included as a part of the U.S. research program under auspices of the International North Pacific Fisheries Commission (INPFC), of which Canada, Japan, and the United States are parties. In 1953 biological data were collected aboard a Japanese factoryship and, in 1954, from a United States factory trawler for use by INPFC's Crab Subcommittee. In the following years, short visits by United States scientists were made to the Japanese factoryships; but since 1954, research efforts of Japan and the U.S. have been essentially unilateral.

Statistics covering various aspects of crab research have been exchanged between Japan and the United States scientists in recent years. Data collected aboard research and commercial fishing vessels, as well as fishery catch statistics, have been exchanged annually.

The U.S.S.R. did not release information concerning their catches, production figures, or tag returns through 1964, despite repeated United States requests for these data. The Soviets have conducted an annual, standardized trawl survey in the eastern Bering Sea since 1963. In recent years a complete report of data collected during this survey has been presented to United States scientists, and Soviet scientists have published their analysis of stock conditions.

3.0 Status of Stocks

Abundance of Exploited Stocks

The abundance of crabs in the eastern Bering Sea has been estimated from INPFC trawl surveys during 1954-61 and 1966-present, using the area-count method of analysis (Loosanoff and Greenough, 1970).

Estimates of P. camtschaticus abundance are shown for 1976 and compared with previous years in Table 6. The survey results indicate a rapid increase in the number of male crabs greater than 1¾-inch carapace length after 1973, increasing to a high of 32.7 million in 1976. This increase may be partly an artifact caused by the less effective trawl design prior to 1973; i.e., the earlier estimates may be underestimates of the true...

Note: Data in 1971 inadequate to provide abundance estimates.

### Population Size

The total population increase in 1975 can be attributed to significant increases in the abundance of the smallest size groups. This suggests the occurrence of several strong year classes which will be entering the exploitable population in the future.

The abundance of *P. platypus* in 1976 is comparable to abundances in earlier years in Table 7. Owing to the high variability in those estimates and the short data series, no trend is apparent.

Estimates of abundance for snow crabs in recent years are given and compared in Table 8. Survey coverage for *C. bairdi* which extends to approximately 58°N latitude is comparable for each year and indicates the 1976 estimates are lower for natural males. The relatively higher abundance of males over 129 cm in carapace length in 1976 is probably the result of one or several strong year classes moving through the exploitable population. GES-related survey results of the eastern Bering Sea north to 62°N during 1975 (Figure 3) indicate coverage of large areas by the Bering Sea surveys has been adequate.

Survey coverage for *C. pallipes* has expanded during the 1974-75 period accounting for at least some of the increases in apparent abundance; but 1971 surveys from the GES survey reveal that the Bering Sea survey area does not encompass the entire range of the species. The problem of incomplete survey coverage also applies to estimates of abundance for *C. bairdi* and *C. pallipes*, given in Table 3.

* cm, carapace width.
crab stocks in the eastern Bering Sea. The first estimate of MSY
(Greenough, 1972) was based on the yield-per-recruit method. Essentially,
this method involves examination of growth and mortality rates of a given
stock to determine the maximum biological yield per unit of recruitment
to the fishery. The size limit and amount of fishing effort that are
selected then will give the maximum yield per unit of recruitment. If it
is possible to determine the actual size of the yearly recruitment, then
an equilibrium yield for current recruitment levels can be obtained by
multiplying the yield per recruit by recruitment. As an example, for a
given set of growth and mortality rates, one crab recruited to the fishery
might yield 3.2 pounds on the average to the fishery. Thus, if 1 million
crab are recruited to the exploitable population then that group would be
expected to yield 3.2 million pounds during its collective life in the
fishery.

Greenough estimated equilibrium yield for the 1966-70 period to be
around 26 million pounds (legal-sized male crabs). Using more recent
information on fishing and natural mortality rates, growth rates, and
recruitment levels, Balsiger (1976) updated Greenough's work to reflect
1972 conditions in the fishery and stock. His estimate of equilibrium
yield was also 26 million pounds.

There was little change in the abundance of pre-recruit crabs (those
that would have entered the fishery after the next molt) during the time
span between Greenough's and Balsiger's work. However, since 1972 the
level of pre-recruits, thus recruitment to the exploited population, has
increased substantially (Table 9). As mentioned earlier, survey year
changes may have introduced an artifact to the data. The year, however,

* 115-139 mm size class used
has remained relatively constant since 1973. Furthermore, U.S. catch statistics indicate an increasing catch/pot-lift in the United States fishery (Table 9). These factors taken together indicate that recruitment has increased.

Since fishing effort has remained relatively constant over the past 7 years (Table 9), and assuming that growth and mortality rates have not changed, the yield-per-recruit multiplier given by Balsiger (4.3) provides an equilibrium yield estimate for legal-sized males of about 75 million pounds. It should be noted that 1975 survey estimates of pre-recruit abundance is used for this calculation, since information from the fishery needed to confirm the 1976 abundance estimate is not yet available.

The model described above for the estimate is complex and a confidence interval on the estimate can only be approximated. Assuming no error in the yield-per-recruit multiplier, the 95% confidence interval is ± 14% (61-86 million pounds). Assuming a 5% error in the multiplier given a 95% confidence interval of ± 22% (56-96 million pounds). The error in the multiplier is probably greater than 5%.

Blue King Crab, *P. platypus*.

Data needed for an NSY analysis similar to that presented for red king crab are not available for blue king crab stocks of the eastern Bering Sea. Thus, an approximation technique has been applied, in which the average exploitation rate derived for legal, male red king crab — 0.40 (Reeves, 1975b; Lechner, in press) — is applied to current estimates of the abundance of legal male blue king crab. The rationale for this application is that the red king crab stock has held up well at this rate of exploitation and quite similar with respect to key population parameters.

Estimates of the abundance of blue king crab are shown in Table 7. Applying the 0.40 rate to the estimated numbers of legal (>150 mm) male *P. platypus* in 1976 (2.5 million crabs) yields an estimate of NSY of 1.0 million crabs or, using a 7-lb. average weight per crab, 7 million pounds.

Snow (Tanner) Crab, *Chionoecetes* spp.

Data similar to that used for the NSY analyses of red king crab are not available for the Tanner crab stocks of the eastern Bering Sea. Thus, the same approximation technique used for blue king crab has been applied to these stocks — that is, multiplying abundances by the exploitation rates based on historic experience with the red king crab fishery.

Estimates of abundance of Tanner crabs are available for both species, *C. borealis* and *C. opilio*, in the eastern Bering Sea. However, the distribution of abundance is different between species (Figure 8). Almost all the stock of *C. borealis* occurs south of 50°N latitude. *C. opilio* extends farther north, with half of the total stock surveyed during the 1975 DCS-related work located north of 50°N latitude.

Estimates of NSY for *C. borealis* and *C. opilio* are given in Table 10. For *C. borealis*, the 1976 CNS survey abundance estimates are used, since coverage of this species is adequate. NSY calculation is based on the estimated abundance of legal-sized male crabs (259 million pounds) since a domestic size limit of 150 mm is in effect for this species. At an exploitation rate of 0.60, the average catch for the eastern Bering Sea red king crab.

fishery, applied to the estimated abundance of legal-sized males given an NSY of 108 million pounds.

The estimated NSY for C. opilio is calculated from the estimated abundance of mature males (2.220 million pounds), determined from the 1975 GCS survey. The mature component of the population is used since no size limit exists for this species.

The exploitation rate applied is 0.15, the average rate for mature male red king crabs, and results in an NSY of 333-million pounds. Half of this estimate, 167 million pounds, is available from the area north of 58° latitude, where large C. bairdi occur only rarely (Figure 9).

\[ \text{Total Allowable Level of Foreign Fishing} \]

The Fishery Conservation and Management Act directs that a total allowable level of foreign fishing (TALF) for each fishery be determined. This TALF is based on the difference between the preliminary determination of optimum yield and the capacity and extent to which the U.S. fishing fleet will harvest the optimum yield. The TALF is determined in this section for both king crabs (C. cressonii and C. platypus) and snow (Turner) crabs (C. bairdi and C. opilio).

\[ \text{Optimum Yield} \]

The optimum yield for king and snow (Turner) crabs is heavily weighted by social and economic factors. These are described in detail in the following sections.

\( \text{E-52} \)  

(1) Kl. of Crab

The king crab stocks in the eastern Bering Sea are considered to be in a healthy condition, and the prognosis for the future is good. Accordingly, the optimum yields for king crab can be set at a level equal to the present estimate of NSY for 1977:

Red king crab, Paralithodes cressonii  
Legal sized males > 33cm carapace length  
\( 30,000 \text{ mt} \)

Blue king crab, Paralithodes platypus  
Legal sized males > 15cm carapace length  
\( 2,000 \text{ mt} \)

(2) Snow (Turner) Crab

Optimum yields for C. bairdi and C. opilio have been determined taking into consideration the following:

(a) United States policy, through a series of bilateral agreements over the past several years, has been directed at improving the optima l conditions for developing the Alaska snow (Turner) crab industry. As a result of these agreements, foreign nations have been prevented from snow (Turner) crab fishing in the Gulf of Alaska and have either reduced their take of snow (Turner) crabs in the eastern Bering Sea or withdrawn from the fishery altogether. The policy has accelerated a favorable investment climate for a growing U.S. catching, processing, and marketing capacity.

(b) The U.S. markets for snow (Turner) crabs are in an early stage of development with imports accounting for a substantial portion of U.S. production. Industry representatives have repeatedly drawn attention to
the volatility of markets for shellfish and repeatedly stated that
increases in foreign allocations of snow (Turner) crab will weaken
U.S. domestic and export markets.

(a) The domestic market for snow (Turner) crabs has discouraged
the delivery of crabs less than 5 inches in carapace width. In 1976,
a minimum carapace size limit of 5½ inches was imposed on the domestic
snow (Turner) crab fishery in the eastern Bering Sea. Since less than
one percent of the population of male C. opilio exceed 5½ inches
carapace width, this species does not at this time meet domestic size
requirements. The U.S. fishery for snow (Turner) crabs is therefore
primarily for C. bairdi.

(b) The snow (Turner) crab fishery is conducted by heavily
capitalized vessels originally constructed for the offshore king crab
fishery. Public testimony revealed that the catch per unit effort
(CPUE) must be maintained in the range of 50-70 crabs per pot to enco-
U.S. fishermen to engage in the fishery. The U.S. CPUE in the eastern
Bering Sea in 1976 was 63 crabs per pot. This criterion would suggest
that populations must be maintained at near present abundance to
produce an economically acceptable catch per unit effort for U.S.
fishermen.

(c) Rational management concerns other than NSY must be taken
into consideration in specifying optimum yield. NSY estimates are
based on the entire eastern Bering Sea snow (Turner) crab biomass;
however, large portions of the area are occupied by non-commercial
densities of th C. bairdi and C. opilio making NSY unobtainable
in real terms. Stability of the fishery should be ensured by
maintaining a stock base of various age-classes of marketable
crab, rather than creating an industry dependency on a single year-
class resource. By maintaining a fishery on a broad age group,
the variations associated with strong and weak year classes would
be reduced.

(f) The ecological importance of snow (Turner) crab stocks
is not well understood. The rich eastern Bering Sea is inhabited
by the largest concentration of sea birds and marine mammals in
the world. Millions of seals, important populations of whales,
sea otters and other marine mammals, as well as hundreds of millions
of sea birds and other forms of marine life are currently being
impacted by the annual removal of more than 5 billion pounds from
the eastern Bering Sea biomass. Optimum yield considerations in-
dicate a cautious approach to additional removals.

Optimum yields for snow (Turner) crabs for 1977 are prescribed
as follows:

- C. bairdi 30,000 metric tons (66,300,000 lbs.)
- C. opilio 7,400 metric tons (16,300,000 lbs.)

9. U.S. Capacity

The number, size, and efficiency of U.S. crab vessels fishing
in the Bering Sea leaves little doubt that the domestic production
potential is far in excess of present catches. In 1975, 104 vessels
of an average 132 net tons harvested 49,665,776 pounds of red king
crab in about 29 months. There has been no foreign catch of king crab allowed since 1974, and the U.S. fishing fleet has demonstrated both the desire and capacity to take the entire optimum yield.

These vessels have a large capacity to harvest snow (Flower) crab in the eastern Bering Sea. Assuming each vessel makes a full trip every two weeks during a 6-month season, the total domestic harvest would be 187 million pounds, compared with a current catch of about 22 million pounds.

The processing capacity of the U.S. seafood industry in the Bering Sea-Eastern Aleutian Islands is also impressive. Existing processing plants are shown in the following list:

1/ King crab fleet provides vessels and gear for tanner crab fishery.
3/ Catch restricted by season closure at crest of molting.

In addition to the directed catch by the foreign pot fishery at least 15,000,000 crabs of both sexes and all sizes will be killed by the foreign trawl fisheries. The calculated loss resulting from this trawl mortality is equivalent to 11-14,000 metric tons of harvestable-size males. Thus, the total mortality of harvestable-size males resulting from all foreign fishing in 1977 will be equivalent to 26,000 to 27,000 metric tons (53-60 million pounds).

The plan allows a moderate increase in allowable level of foreign fishing for C. opilio over the 1976 foreign harvest. The effects of this increase in foreign catch on the U.S. markets for snow (C. alipes) crab will be carefully monitored during 1977.

Appropriate adjustments in future foreign surpluses will be made in response to this monitoring effort to prevent weakening U.S. domestic and export markets.

Areal restrictions have been imposed to assist the U.S. domestic industry in expanding its C. opilio fishery and to reduce the possibility of gear conflicts between U.S. and foreign fishermen.
NOTICES

3. Regulations

4(b) Region-wide Restrictions
   a. There will be no directed fishery for, or retention of, any species of king crab.
   b. Crab fishing will be conducted using pot gear only.
   c. Processing of crabs will be permitted only on designated factoryships.
   d. Only male snow (Tanner) crabs may be retained and processed; females must be discarded immediately after the pots are taken aboard in a manner that will minimize handling mortality.
   e. Crabs may be taken aboard factoryships only in the presence of a U.S. observer, and only in a manner in which the observer can verify the total weight of crabs taken aboard.
   f. No foreign crab fishing within 12 miles of the baselines used to measure the U.S. Territorial Sea.
   g. Foreign fishing vessels engaged or wishing to engage in the fishery must obtain a permit from the Secretary of Commerce.

4(b) Time-area Closures
   a. East of 164°W — closed year round.
   b. South of 56°00'N — closed year round.

4(b) Area Quotas
   a. No more than 12,500 mt of crab may be taken by foreign fishers from that portion of the Bering Sea area over which the United States exercises fishing jurisdiction.

b. No more than 12,600 metric tons of snow (Tanner) crab may be taken by foreign fishing vessels from that portion of the Bering Sea area over which the United States exercises fishing jurisdiction north of 56°00'N lat. and west of 164°W long. of this 12,600 metric ton quota.

No more than 2,000 metric tons of the snow (Tanner) crab quota designated in b. may be taken by foreign fishing vessels from the area bounded by straight lines connecting the following coordinates in the order listed:
59°00'N lat. -164°00'W long.; 57°00'N lat. -168°00'W long.; 67°40'N lat. -168°00'W long.; 57°40'N lat. -170°00'W long.; 57°00'N lat. -170°00'W long.; 56°20'N lat. -168°00'W long.; 58°00'N lat. -168°00'W long.; 56°00'N lat. -164°00'W long.; 58°00'N lat. -164°00'W long.

At least 4,400 metric tons must be taken from the area located to the north and west of straight lines drawn between the following coordinates:
60°00'N lat. -175°00'W long.; 58°00'N lat. -175°00'W long.; 58°00'N lat. -175°00'W long.; 58°00'N lat. -174°00'W long.; north along 164°00'W long. to a distance of 12 nautical miles from the baseline used to measure the U.S. Territorial Sea.
(1) **Statistical Reports**

(1) **Annual**

Each nation whose fishermen operate in the Region shall report to the Director, Alaska Region, National Marine Fisheries Service, Juneau, by May 30 of the following year annual catch and effort statistics, as follows: Effort in pots hauled, catch in metric tons and number of crabs. Each to be supplied by vessel class, by 10-day period, by 1° (Lat.) x 1° (Long.) statistical area, by the following species:

- Snow (Tanner) crab, *C. fritid*
- Snow (Tanner) crab, *C. opilio*
- Any other crab species.

(2) **10-day Periods**

In addition to the annual statistical report in 2.4.2.1, above, each nation will report within 3 days following each 10-day fishing period, provisional 10-day fishery information as follows: Effort in total pot lifts; and Catch in metric tons and number of crabs of *C. opilio* and *C. fritid* for each of the 2 sub-areas in Figure 7.

(3) **Fleet Disposition Reports**

The appropriate fleet commander or individual vessel master will report to the Director, Alaska Region, National Marine Fisheries Service, Juneau, by radio prior to the commencement of fishing and the arrival in the Region of each fishing and processing vessel, giving the vessel's name and other identifying marks (such as U.S. Permit No., size, intended target species, and intended fishing area). A similar report will be made at the time of departure of each vessel from the area or Region. These reports, augmented with U.S. surveillance observations, observer reports, and monthly catch and effort reports, will be used to monitor adherence to catch limitations.

(4) **Observers**

Each nation operating in the Region will have available at no cost to the United States, accommodation for 2 U.S. observers on factory ships and 1 U.S. observer on fishing vessels. Observers will be assigned to individual vessels and for periods at the discretion of the U.S. to monitor catches; estimate species, size, and age composition; and collect other biological data as appropriate.

The observer will be accorded the rank of a ship's officer and will be assisted in transmitting messages to the United States Government whenever requested.
All observer participation in foreign crab fisheries will be monitored by the Northeast and Alaska Fisheries Center, National Marine Fisheries Service. Any coverage and activity will be scheduled in consultation with the North Pacific Management Council, the NMFS Alaska Regional Office, and the Commander, Seventeenth Coast Guard District.

Research

Bona fide fisheries or fishery-related research (but not exploratory fishing where commercial quantities of fish are retained) by foreign governments will be encouraged. Valid results of such research will be considered by the management entity in determining total allowable catches and other management measures. Cooperative U.S.-foreign research ventures will be planned and executed when they are found to be in the best regional interest of the United States.

Relation to National Standards

The prescriptive measures contained in this Preliminary Fishery Management Plan (total allowable catches, allocations to foreign fishermen, and regulations pertaining to foreign fishermen) have been designed to be consistent with the seven national standards listed in P.L. 94-265.

TAC's are entirely for the purpose of preventing overfishing (Standard 61). They are based upon the best scientific evidence available (Standard 62), and apply to the extent possible to individual stocks or stock complexes throughout their range (Standard 63).

Inasmuch as this document deals solely with foreign fisheries, that provision of the legal text concerning nondiscrimination among residents of States (Standard 64) does not apply.

These area restrictions which isolate the foreign crab fisheries from fisheries for other species will promote efficiency in resource utilization (Standard 65) by reducing the potential for gear conflicts and incidental catch of non-target species.

Ten-day catch reports, check-in/check-out procedures, and observer monitoring fishery performance will permit the timely detection of anomalies in the catch of the fishery (Standard 66) and will minimize surveillance and enforcement activity required to assure foreign compliance to this Plan (Standard 67).

FEDERAL REGISTER, VOL. 42, NO. 32—WEDNESDAY, FEBRUARY 16, 1977
NOTICES

Feetnotes

1/ Total allowable catch estimates given here relate to the equilibrium yield which can be reasonably taken from the crab stocks without impairing their biological productivity. In arriving at those estimates we did not take into account other legitimate management objectives such as the maintenance of multiple year classes in the fishery or insuring that removals come from all stock units. Therefore, in succeeding drafts of this plan annual catch quotas might well be lower than those given here.
b. No more than 12,500 metric tons of snow (Tanner) crab may be taken by foreign fishing vessels from that portion of the Bering Sea area over which the United States exercises fishing jurisdiction north of 56\textdegree 00' N lat. and west of 164\textdegree W long. of this 12,500 metric ton quota.

No more than 3,000 metric tons of the snow (Tanner) crab quota designated in b. may be taken by foreign fishing vessels from the area bounded by straight lines connecting the following coordinates in the order listed:

56\textdegree 00' N, lat. 164\textdegree 00' W, long.; 57\textdegree 00' N, lat. 168\textdegree 00' W, long.;
57\textdegree 30' N, lat. 169\textdegree 00' W, long.; 57\textdegree 30' N, lat. 170\textdegree 00' W, long.;
57\textdegree 00' N, lat. 170\textdegree 00' W, long.; 56\textdegree 00' N, lat. 169\textdegree 30' W, long.;
56\textdegree 00' N, lat. 169\textdegree 00' W, long.; 56\textdegree 00' N, lat. 168\textdegree 00' W, long.;
56\textdegree 00' N, lat. 166\textdegree 00' W, long.; 58\textdegree 00' N, lat. 166\textdegree 00' W, long.;
and at least 4,400 metric tons must be taken from the area

Located to the north and west of straight lines drawn between the following coordinates:

56\textdegree 00' N, lat. 171\textdegree 00' W, long.; 56\textdegree 00' N, lat. 171\textdegree 00' W, long.;
56\textdegree 00' N, lat. 172\textdegree 00' W, long.; 56\textdegree 00' N, lat. 174\textdegree 00' W, long.;
56\textdegree 00' N, lat. 174\textdegree 00' W, long.; 56\textdegree 00' N, lat. 174\textdegree 00' W, long.;
56\textdegree 00' N, lat. 174\textdegree 00' W, long.; 56\textdegree 00' N, lat. 174\textdegree 00' W, long.;
56\textdegree 00' N, lat. 174\textdegree 00' W, long.; 56\textdegree 00' N, lat. 174\textdegree 00' W, long.;
56\textdegree 00' N, lat. 174\textdegree 00' W, long.; 56\textdegree 00' N, lat. 174\textdegree 00' W, long.;

No more than 8,100 metric tons of snow (Tanner) crab may be taken by foreign fishermen from the area east of 170\textdegree W longitude and south of 56\textdegree North latitude.

\( \text{FC} \) 11 OPEN SEASON - The open season for crab fishing by foreign vessels in the Bering Sea area over which the United States exercises fishery management authority shall begin at 0001 GMT on March 1, 1977, and terminate at a time and date to be determined and announced under paragraph (d).

\( \text{FC} \) 12 Service shall maintain records of vessel days and catch of foreign vessels fishing for species under this section. Upon determination by the Director that foreign fishing vessels of a country have taken their assigned allocation of crab, notification of such determination shall be given to the appropriate agent or a government official of the country not less than 48 hours prior to the closure of such fishery. Upon notification, foreign fishing vessels shall cease the directed fishing for crab as of the specified closure date.

\( \text{FC} \) It shall be unlawful for any foreign fishing vessel to fish for crabs at any time east of 164\textdegree W longitude and south of 56\textdegree N latitude in the Bering Sea, throughout the Northeastern Pacific Ocean, and within 12 miles of the baseline from which the U.S. Territorial Sea is

\( \text{FC} \) Geographical restrictions - It shall be unlawful for any foreign fishing vessels fishing in the authorized area for crabs to use gear other than pots. A pot is a portable structure designed and constructed to capture and retain crabs alive in the water.

\( \text{FC} \) Statistical reporting - The owner or operator of any foreign fishing vessel shall maintain catch and effort statistics and shall report the information, through its government, to the Director, Alaska Region, National Marine Fisheries Service, Juneau, Alaska, U.S.A. 99801.

\( \text{FC} \) Annual - Each nation whose fishermen operate in the

\( \text{FC} \)
area shall report by May 30 of the following year, annual catch and

effort statistics as follows: Effort in pots hauled and hours pots soaked

daily in metric tons and number of crabs. Each to be supplied by

vessel class, by 10-day period, by 1/3° (lat.) by 1° (long.) statistical

area, by the following species: Snow ( Tanner) crab Chionoecetes bairdi

and C. opilio), and any other crab species.

(b) 10-day Periods—Each country will report within 3 days.

following each 10-day fishing period, provisional 10-day fishery

information as follows: Effort in total pot lifts; and Catch in metric

tons and number of crabs of C. opilio and C. bairdi separated by the area

described in (b)(3) and by the area outside that described in (b)(2).

10. Restrictions—No master or any other person in charge of any

foreign vessel engaged in fishing for crabs under this subpart shall:

(1) Conduct a directed fishery for, or retain any species of crab

other than snow ( Tanner) crab.

(2) Process crabs except on designated factory ships.

(3) Retain and process female or soft shell crabs; any crabs not

retained must be discarded immediately after the pots are taken aboard

in a manner that will minimize mortality.

(4) Take aboard crabs in a manner in which the observer can not

verify the total weight of crabs taken aboard.

(5) Loading ranges—Loading and other support operations are permitted

by foreign vessels during 1977, seaward of three nautical miles from the

Baseline from which the United States territorial sea is measured:

(a) Near Fortsure Island, Alaska, in the waters bounded on the north

by 54°54' North Latitude, on the east by 123°16' West Longitude, and on

the south 54°44' North Latitude, from March 1, 1977, to December 1, 1977, inclusive.

(b) On the east side of Kayak Island, Alaska, in the waters between

59°56' North Latitude and 59°56' North Latitude west of 163°53' West

Longitude and on the west side of Kayak Island in the waters between

59°56' North Latitude and 60°07' North Latitude east of 165°14' Long, from

March 1, 1977, to December 1, 1977, inclusive.

(c) North of Vinik Cape on Afognak Island, Alaska, in the waters

bounded on the north by 58°73' North Latitude, on the south by 56°25' North Latitudes, on the east by 152°02' West Longitude and on the east

by 151°52' West Longitude, from March 1, 1977, to December 1, 1977, inclusive.

(d) North and west of Sonik Island, Alaska, in the waters bounded

on the north by 54°36' North Latitude, on the south by 54°26' North Latitudes, on the west by 163°05' West Longitude and on the east by

162°40' West Longitude, from March 1, 1977, to December 1, 1977, inclusive.

(e) On the south side of Ualalaka Island, Alaska, in the waters

between 167°48' West Longitude and 167°40' West Longitude, from

March 1, 1977 to October 15, 1977 inclusive.

(f) On the north side of Ualalaka Island, Alaska, in the waters between

167°41' West Longitude and 167°35' West Longitude, from March 1, 1977 to

October 14, 1977 inclusive.
NOTICES

(7) On the north side of St. Matthew Islands, Alaska, in the waters between 172°29' West Longitude and 172°46' West Longitude, and on the south side of St. Matthew Island, Alaska, in the waters between 172°07' West Longitude, and 172°35' West Longitude, and in the waters between 172°55' West Longitude, and 173°04' West Longitude.

I. INTRODUCTION

The harvesting of Atlantic mackerel off the Northeastern United States was regulated until 1/1/77 under terms of the International Commission for the Northwest Atlantic Fisheries (ICNAF) and subsequent agreements between the 18 signatory nations. The Fishery Conservation and Management Act of 1976 (P.L. 94-265), enacted and signed into law on April 13, 1976, provided for an extended jurisdiction fishing zone and exclusive US regulation of this zone under the concept of optimal yield. In the future, management plans for offshore New England waters will be formulated by the New England Council, a regulatory body formed by P.L. 94-265. However, the Secretary of Commerce, in order to comply with other aspects of P.L. 94-265 must have Preliminary Management Plans (PMP) in place by March 1, 1977, to permit foreign nations to fish in the fisheries conservation zone, provided that no fishery management plan will be prepared by the New England Fishery Management Council prior to March 1, 1977.

II. PRELIMINARY DESCRIPTION OF THE FISHERY

a. Areas and Stocks Involved

The Atlantic mackerel is a pelagic, schooling species, ranging from Labrador to North Carolina. Scott (1950) hypothesized the existence of two contingents, northern and southern, each migrating northward in spring and summer and southward in autumn to overwinter in deep waters along the edge of the continental shelf. Until recently, the northern contingent had been thought to overwinter from Hudson Canyon to Cape Sable and the southern contingent from Long Island to Chesapeake Bay, but recent tagging experiments (Beckner et al. 1974; Pargade and Moore 1974; Moore et al. 1975; Stobo 1976) have confirmed that at least some "northern contingent" mackerel overwinter as far south as Delaware Bay.

Both contingents, therefore, probably intermingle to a considerable extent on the wintering grounds as well as during spring and autumn migrations and together support the intensive international fishery conducted from December to April in Sa, 5 and 6 (Figure 1).

On the basis of observed growth rate similarity, length-at-age, and age composition data from sampling in Sa, 3 and 4 in summer and in Sa, 5 and 6 in winter, Moore et al. (1975) suggested that the northern contingent has been the dominant of the two groups in recent years and has supported the bulk of the Sa, 5 and 6 catch. However, precise estimates of the relative contributions of the two contingents
cannot be made at present (ICNAF 1975). This problem, coupled
with an unknown degree of intermingling between contingents, sug-
gests the advisability of managing the resource on a combined
basis. Consequently, mackerel in SA 3-6 have been assessed within
ICNAF as a unit since 1975, although separate TACs have been
established for SA 5 and 6 and for areas to the north since 1973.

b. Statistical History of Exploitation

Mackerel have been harvested off the USA coast since the 17th
century, although detailed catch statistics are not available for
periods prior to 1804. In the early years (1804-1818), the fishery
was restricted to coastal waters and catches were low, averaging
3,100 tons annually (Table A). From 1819 to 1885, American
vessels ranged farther offshore to satisfy a large market for salted
mackerel, and catches rose to an annual average of 41,700 tons during
this period.

Mackerel abundance has appeared to fluctuate widely historically.
Landings ranged from 16,500 tons in 1840 to 81,300 tons in 1884,
but dropped during 1886-1924 to an average of 9,300 tons annually.
During the latter period, however, a shift from sail to motor power
occurred and a market for fresh mackerel developed. As a result,
catches again rose substantially averaging 20,300 tons annually
during 1936-1949, and reaching a peak of 36,600 tons in 1944 (Table A).
In more recent years (1950-1964), USA commercial landings declined to an
average of 1,500 tons, followed by a modest increase to 4,364 tons

1/ Tons in this plan refers to metric tons (2205 pounds)

*Not available prior to 1864.*

Prior to 1962, only the USA and Canada fished for mackerel in the Northwest Atlantic. However, Poland entered this fishery in 1962 with a modest catch of 111 tons in SA 5. Shortly thereafter, the USSR and other nations also began fishing in the Northwest Atlantic, and total landings increased dramatically from about 1,049 tons in SA 5 and 6 in 1962 to an apparent all-time high of 387,400 tons in 1972. Since 1973, the stock has been under quota management, and landings have consequently declined (302,200 tons, 294,600 tons, and 241,600 tons in 1973, 1974, and 1975, respectively). The

In 1969 and a subsequent decline to 1,042 tons in 1974. In recent years (1965-1974), the bulk of the USA catch has been taken in inshore waters off Rhode Island, New Hampshire, and Maine.

Like the USA, Canada has fished extensively for mackerel over the years although complete statistics are not available for periods prior to 1876. Since that year, landings tended to parallel those of the USA until the 1950s with both sets of data showing a pronounced decline from the 1880s to the early 1920s and subsequently increasing. Average landings throughout the 1940s by the USA exceeded those by Canada (14,900 tons for Canada and 24,200 tons for the USA), but in succeeding years Canadian landings have remained at roughly the same level while USA landings have declined precipitously (Table 1). USA landings in 1975 were approximately 1,100 tons.
increase in landings observed during the period 1962-1972 has been attributed both to increases in stock size and to subsequent diversions in effort from declining herring stocks (Anderson 1973). Intensive fisheries were initiated by the USSR in 1967, Poland in 1968, and by the GDR and Bulgaria in 1971. USSR, Polish and GDR vessels averaged 90% of the total landings from 1967 to 1975 and USSR landings exceeded those of any other country since 1965 with the exception of 1972. Total landings by nation for the 1961-1975 period are given in Table 6. Estimated total commercial landings for 1976 are 235,000 tons.

A substantial USA recreational fishery for mackerel has existed from Maine to North Carolina. Angler surveys were conducted in 1960, 1965, 1970, 1974, and 1976, with estimated catches in those years of 5,000, 8,600, 32,100, and 7,600 and 4,900 tons, respectively (Clark 1962; Deuel and Clark 1968; Deuel 1973; Deuel personal communications; and Christensen et al. 1976).

Even though Atlantic mackerel occur both offshore and inshore, even entering large estuaries, most of the angling for them occurs along the ocean shore between the 13 and 60 m contours. They are caught throughout the year, depending on the particular stretch of coast fished. Off Virginia, Maryland and Delaware they are caught during late fall, winter and early spring; off New Jersey, New York and southern New England during spring, early summer and fall; off northern New England during summer and early fall. Atlantic mackerel are caught during daylight hours by jigging, chumming and trolling from boat, and by casting, jigging and living lining from shore. The great majority of the angler catch consists of specimens weighing 0.24-0.70 kg (25-40 cm fork length).

In order to account for the recreational catches in the assessment of the stock, it was necessary to estimate the catches in the years with no surveys. In the years of the surveys, the estimated recreational catches were closely proportioned to stock biomass estimates determined from commercial data. This relationship was assumed to apply in the years with no surveys (see footnote under Table 6). The recreational catch has been significantly higher than the USA commercial catch in recent years (Table 6).

1/ Recreational surveys were conducted in 1960, 1965, 1970, 1974, and 1976. The catchers in the intervening years were estimated by assuming that the ratio between catch and stock biomass in the years of the surveys was the same in the two years preceding and succeeding each survey.

2/ Provisional

O. Significance of Historic Domestic Fishery

Historical records indicate that mackerel have been an important source of revenue to New England and Middle Atlantic fishermen since the early nineteenth century. Trends in the total dollar values reflect trends in landings; for Boston (the leading port) landings values averaged $341,928 during 1893-1930 and ranged from a low of $46,133 in 1895 to a high of $973,105 in 1926. During the next two decades, Boston landings values steadily increased to an all-time high of $1,500,000 in 1945. This was followed by a precipitous decline to $81,071 in 1949. Landings values have since declined to insignificant levels in Boston.

The total ex-vessel value of mackerel landed for human consumption in all the New England states was $2,302,596 in 1929, but since 1950 this figure has been less than $1,000,000, and in 1975 the total reported figure was $137,494. The total value in the Middle Atlantic region reached $252,814 in 1947, declined to $24,000 in 1959, and increased to $151,000 in 1972. In 1975, the total reported figure was less than $50,000. During the 1966-1972 period, total dollar value of the USA mackerel catch peaked at $522,000 in 1969.

USA mackerel (food fishery) landings and ex-vessel values and prices during 1966-1972 are given in Table 2. During this period, conditions for the fishery as a whole were rather stable, price

*Values for 1973-1975 were 13.2, 17.6, and 20.0, respectively.

Values in parentheses refer to metric tons.

Increases in the 1973-1975 period appear to have been offset by declining catches, and total catch values have, if anything, declined somewhat. The value of the 1975 catch was under $200,000.

Table 3 contains data on the value of the mackerel catch as a percentage of the total regional fish catch for the 1966-1972 period. The value of the regional mackerel catch during the 1966-1972 period constituted, in general, less than 1% of the total regional fish catch. Clearly, the mackerel fishery has not been of great economic importance during this period.

The aggregate impact of the New England mackerel fishery on the rest of the New England region was estimated and the results are presented in Table 3. The value of the total New England regional catch in 1972 was $270,000. The total estimated output impact of this production was $797,472, which includes $270,000 of mackerel output plus $527,472 of indirect and induced output by supporting industries. It is estimated that the mackerel output stimulated a total of $307,582 in household income in 1972 in the New England region.

Given that the estimated recreational catch has been much greater than the USA commercial catch in recent years and that there were an estimated 605,000 mackerel anglers in 1970 (see next section), the economic importance of the mackerel recreational fishery is clearly significant. Its importance can be measured in terms...

of the value as a food source; expenditures for fishing equipment, boats, fuel, etc.; and psychological and aesthetic benefits for the angler. Regrettably, there are no published studies on the evaluation of the recreational fishery. However, with regard to the impact of expenditures by recreational fishermen, it is believed that the recreational fishery for mackerel is presently very important in the New Jersey area. In addition to being used as human food, mackerel caught in the recreational fishery are also used as bait for more desired species.

d. Types and Numbers of Vessels

(1) Domestic - Table 6 gives the number of commercial vessels in 1965, 1970, and 1975 which landed some mackerel and the number whose catch for the year consisted of 50% or more mackerel (by weight). There was an increase in the number of vessels which landed some mackerel from 1965 to 1970, but this number declined from 1970 to 1975. Also the number of vessels whose total catch for the year was 50% or more of mackerel declined during the period.

It is estimated that in 1975 there were approximately 15 fisher-
men employed on those vessels whose catch was characterized by
50% or more of mackerel. This is not to imply that these fishermen
were solely supported by the value of the mackerel catch, for other
species were landed in addition to mackerel during the period. Nor
does it imply that the fishermen on board those vessels which
landed mackerel, but are not included in the directed mackerel
vessel category, were not supported somewhat by the value of the
mackerel catch. There are no published financial studies for these
vessels.

It is estimated that approximately ten plants in the Northeast
process mackerel, although this species constitutes only a small
percentage of the total volume. Similarly, a limited number of
firms process mackerel in the mid-Atlantic area. Processing for
domestic consumption primarily involves filleting and canning. A
substantial portion of the catch is also sold for bait. In 1963,
1965, and 1975, the value of processed mackerel from New England was
$5,000, $21,000, and $75,000, respectively.

Recent NMFS statistics indicate that there are approximately 10.8
million people participating in marine recreational finfisheries
and shellfisheries from the states of Maine through Virginia, West
Virginia, Vermont, and Washington, DC.

Marine angler surveys estimated the number of mackerel anglers
between Maine and North Carolina to be 235,000 in 1960, 220,000 in
1965, and 605,000 in 1970. About 90% of these anglers were from the
New York-Maine area. Although surveys were conducted in 1974 and
1976, the number of anglers fishing for a particular species was
not determined. For 1975, the number of anglers catching mackerel
is estimated to be over 700,000 and this number is expected to increase
in future years.

(2) Foreign vessels - In 1961, Soviet fleets made their
appearance on Georges Bank, 150 mi east of Boston. The number of
vessels observed on the grounds at any one time was about 50.
However, for the year the Soviet expedition totaled 100 individual
vessels. In subsequent years, 300-400 different Soviet vessels fished
seasonally on Georges Bank, primarily for herring. By 1965, during peak fishing seasons (summer and fall), 200–250 Soviet vessels were fishing for herring, red and silver hake, haddock, and cod on Georges Bank and in southern New England. During that year more than 450 individual vessels were sighted. Beginning in 1966 and continuing into the early 1970s, Soviet fleets were joined each year by increased numbers of vessels from Poland and Romania, followed closely by the GDR and FRG, and Japan. Other nations followed to include Bulgaria, Spain, France, Greece and Italy. Recently, nations such as Cuba, South Korea and Ireland have been represented. During this period, 900–1,000 foreign vessels annually fished in international waters off the USh East Coast from the southern tip of Nova Scotia to Cape Hatteras. Depending on the season, fleets of 250–300 vessels could be found at one time, whether it be off North Carolina and Virginia in winter or on Georges Bank during the summer.

In recent years, the annual number of foreign vessels sighted has declined from 956 in 1971 to just under 600 in 1975 (Table 8). It can reasonably be assumed that foreign fleets have dwindled even more during 1976 in response to greatly reduced fish stocks and increasingly more stringent catch restrictions, such as tight quotas, closed areas, etc.

Despite these restrictions at peak seasons (winter and spring), in 1975–1976 there were 200–250 vessels observed at one time on the

*In addition, small numbers (<10) of stern trawlers belonging to France, Cuba, South Korea, Ireland, and Greece have been observed in SA 5 and 6 in recent years.*
fishing grounds. However, during other times of the year activity has been the lowest in many years. It is obviously difficult to make an accurate evaluation as to numbers and types of vessels involved in this fishery by nation. However, it is apparent that a substantial amount of effort has been directed toward mackerel in recent years, primarily during the early months of the year off southern New England and the Mid-Atlantic states. Here large numbers (>1000) of factory stern trawlers (primarily USSR) have fished for mackerel and other species during winter. The directed USSR fishery ends in spring following the taking of most of the mackerel quota. This pattern of movement and activity is duplicated to some extent by the two other nations most heavily engaged in this fishery (i.e. Poland and the GDR), although in 1974 and 1975 these countries were unable to reach their quotas in spring and therefore fished for mackerel in fall as well. Relative amounts of directed effort by country in SA 5 and 6 during 1974 (days fished) are given in Table 6.

e. Types and Numbers of Fishing Gear Employed

Gear used to harvest mackerel in the USA commercial fishery includes purse seines, beach seines, pound nets, hand lines, floating traps, gill nets, and other trawls. Distant-water fleets conduct this fishery primarily with pelagic midwater trawls, although bottom trawls are also used to some extent (Table 10). The USA mackerel recreational fishery employs hook and line gear fished by anglers both from shore and from small boats. In 1970, over 90% of the mackerel catch was from private, party, or charter boats.

f. Historical Impacts of Foreign Fishing on Domestic Fishery

(1) Competition for Available Stocks - USA and foreign landings data for all mackerel stocks are given in Table 11. The USA percentage in terms of total catch has steadily declined since 1961 coincidentally with the introduction of the foreign fishing fleets. The USA portion of the total landings since 1971 has been less than 10%. It has already been noted in earlier sections that the major portion of the catch is taken by USSR, Poland, GDR, and Bulgaria. The reduction of stock size as a result of the foreign catch may have had an effect on the availability of mackerel to USA fishermen.

Table 11. USA (commercial and recreational), foreign, and total landings (metric tons) expressed as relative percentages of the total for the S3-6 mackerel stock, 1961-1976.

1/ Provisional
(2) **Gear Conflicts** - Previous to 1961, USA fishermen shared the fisheries on Georges Bank with Canada. The USSR arrived with a large fleet of herring drifters in 1961, that caused considerable complaints from USA fishermen alleging that they were being driven from this historical fishing area on the Bank. The number of herring drifters increased to approximately 300 individual vessels in 1962, which were joined by a fleet of factory stern trawlers and some medium side trawlers from the USSR. During this period, a number of USA trawlers were fouled either by running into set gillnets or by hauling their trawls through discarded netting, consequently fouling their propellers and necessitating being towed back into port. A USSR drifter rammed a USA scallop dredger on the northern edge of Georges Bank and left the scene in heavy fog without identifying itself and ascertaining damage or injury to personnel.

In 1971, a USA trawler was rammed and sunk on the western side of Georges Bank in the Great South Channel by a Polish trawler. The crew of six was saved, but the boat was lost.

In 1972, a USA trawler was rammed and sunk by a GDR trawler. Also in 1972, another USA trawler and its crew of three were lost, apparently as the result of a collision with an FRG trawler.

In 1968, the USA offshore lobster pot fishery began to expand. Along with the increase in fixed gear came complaints of gear loss attributed to foreign fishing activity. Reported gear conflicts by year and country from 1968-1975 are summarized as follows:

</table>

There were 17 losses of sink gillnet gear reported in 1974 by USA fishermen. These losses were blamed primarily on FRG trawlers and an Irish trawler.

There were two cases of lost longline gear attributed to Japanese activity in 1975.

(3) **Non-Target Species Mortalities** - Fisheries (main species sought category) in which mackerel were caught in SA 5 and SA 6 in 1974 are shown by country in Table 24. A total mackerel catch of 294,825 tons was taken, of which 36,554 tons (12%) occurred as bycatch in fisheries directed toward other species. In the absence of information to the contrary, it was assumed that if the largest catch for a given catch record consisted of a given species, then the

fishe was directed toward that species. This procedure is necessary since much of the catch data reported to ICNAF are not submitted in terms of species sought. Ninety-five percent of the by-catch occurred in directed fisheries for three species categories: silver hake (71%), herring (18%), and invertebrates (6%); and 94% was taken by two countries, the USSR (76%) and Poland (18%), with only minor quantities reported by other countries. Mackerel caught as by-catch accounted for approximately 12% of the total TNC allocation of 304,000 tons in SA 5 and SA 6 for 1974.

The mackerel fishery is difficult to identify under the present catch reporting scheme because it occurs in a mixed fishery situation. A procedure was adopted of assigning a catch record* to the mackerel fishery if the largest catch was of mackerel (Table 22). The international mackerel fishery thus defined had a by-catch of other species of 18% of its directed mackerel catch of 258,283 tons. The species constituting most of this by-catch were silver hake (23%), herring (28%), and other fish (35%). These by-catches accounted for 8% (10,062 tons) of the silver hake catch in 1974, 7% (13,287 tons) of the herring catch in 1974, and 12% (16,437 tons) of the other fish catch in 1974. Table 22 lists the 1974 by-catches and by-catch ratios in the mackerel fishery for all countries combined and for individual countries.

*A catch record lists catches in a month by species, for a gear-tonnage class category in an ICNAF division.

By-catch ratios should be regarded as very tentative since statistics reported to ICNAF lump several directed fisheries-together under a mixed fishery classification. This procedure gives higher ratios than actually occur, since some "directed" catch would be considered as by-catch when the target species was recorded as mixed. Analyses of US inspections under ICNAF indicate by-catch ratios in the recent directed mackerel fishery are usually below 3%. 

(4) Economic Interactions - A number of economic interactions are possible which could influence the USA industry. First, declines in stock abundance resulting from increased exploitation would result in declining catch per unit of effort, thus increasing commercial operational costs and adversely affecting profitability (a pronounced decline in catch per unit of effort has in fact occurred for the USA since 1970). The decline in stock abundance could similarly produce a declining catch per unit of effort in the recreational fishery, and adversely affect profitability of party and charter boat operators due to a reduced demand for recreational fishing. Foreign imports could have an impact on ex-vessel prices, further affecting profitability. Industry spokesmen have noted that Japan exports some canned mackerel to the USA.

9. History of Regulation of Foreign Fisheries - Regulation of foreign fisheries along the USA coast of the Northwest Atlantic Ocean began in 1949 when the USA convened a conference of 11 countries at Washington, DC. This conference resulted in the formation of ICNAF. The USA Northwest Atlantic Fisheries Act of 1950 authorized
USA involvement in the activities of the commission. The designated areas were the waters north of 39°00' north latitude and east of 71°40' west longitude. Commission regulations in the early 1950s evolved around the establishment of mesh regulations for certain directed groundfish fisheries, e.g. cod, haddock, with groundfish by-catch provisions for other small-mesh directed fisheries, e.g. silver hake, herring.

During the period from 1950 to 1957 little, if any, enforcement activity was available by US vessels. An enforcement program was organized in 1957 composed of a two-man team effort to organize and activate a viable enforcement program to board and inspect both dockside and at sea, in conjunction with, USA Coast Guard patrol vessels. The primary purpose was to coordinate a registration program of all USA commercial groundfish trawlers engaged in a directed fishery for haddock and cod. The minimum legal mesh size in effect was 4½ inches for all trawl gear on USA trawlers which were engaged in directed fishing for haddock and cod. Several USA masters were cited for alleged violations, prosecuted in USA Federal Court, and fined for violation of the rules and regulations under authority of the Northwest Atlantic Fisheries Act of 1950.

With the arrival of the distant-water fleets off the USA coast in the early 1960s much discussion was given to the possible extension of territorial waters. Failure to resolve this question through the International Law of the Sea Conferences led to the establishment of a contiguous fishing zone in late 1966 which bounded the entire USA coastline encompassing the waters lying between 3 and 12 nautical miles offshore. Only Canada was authorized to fish within this zone under a reciprocal fishing agreement for the USA fishing industry in similar waters off Canada. However, many USA fishermen continued to complain about fishing conduct by foreign nations on the high seas. These complaints ranged from infringements by foreign trawlers into the USA 12-mile contiguous fishery zone to harassment on the high seas pertaining to rules of the road and fishing conduct. Many investigations were activated both dockside and at sea, but USA fishery agents had no authority to board foreign nationals on the high seas.

Prior to the adoption of the ICNF scheme of joint enforcement, each member nation was responsible for the conduct and monitoring of its vessel inspections on the high seas. There were a number of alleged violations reported by USA fishermen during 1966 and 1967; however, a lapse of 2-3 days after observations prevented any enforcement action. These allegations were for intrusions into the 12-mile Contiguous Fishery Zone (CFZ). Investigations were made by fisheries agents, with negative results.

As the activity of the distant-water fleets increased, their operations began to expand to waters south of the convention area. Because of the overlap in fish stocks and the known migrations of commercially important species between the convention area and the
waters to the south, ICNAP in 1967 adopted the responsibility for collecting statistics for the catches from these non-convention waters as far south as Cape Hatteras, which were designated Statistical Area 6. Management of the fisheries within these waters, however, had to be accomplished through a series of bilateral negotiations, beginning in 1968 with the USSR. Figures 2-4 indicate the current status of major agreements.

Fishery management zones were instituted by ICNAP in 1969 due to the haddock crisis generated by the extremely large catch of haddock by the USSR in 1965. The poor recruitment anticipated in the haddock fishery as indicated by groundfish surveys conducted by scientific personnel from Woods Hole and joint surveys with foreign research vessels was instrumental in the adoption of seasonal closures by ICNAP. Area and seasonal zones have periodically been modified and supplemented to protect other species in addition to haddock. These are shown in Figures 2-7.

The haddock management zones were augmented in 1970 with the establishment of TACs for certain haddock stocks considered to have been overfished, and this began the present-day concept of management under an allowable quota system. There are presently 20 species stocks under a nationally allocated framework of total allowable catches. Table 2 gives the allocations for calendar year 1976.

FEDERAL REGISTER, VOL 42, NO. 32—WEDNESDAY, FEBRUARY 16, 1977
Unquestionably, problems encountered within the above management framework were instrumental in formulating an International Inspection Scheme, but progress has been slow. On August 11, 1971, the President signed an amendment (P.L. 92-87) to the Northwest Atlantic Fisheries Act of 1950. The Amendment authorized national and international measures of control and allowed the US to adopt an International Inspection Scheme on the high seas under ICNAF. During the latter part of August 1971, an inspection boarding team from the USA attempted to board USSR vessels; however, they were refused. After a series of diplomatic notes, the USSR advised the USA that they were ready to accept inspection schemes, but the inspection would be limited to the main fishing dock only. Following implementation of the ICNAF inspection scheme, 57 boardings were made on foreign vessels between August 30, 1971 and November 1, 1972 (49 USSR, 3 Polish, 2 FRG, 2 Japanese, and 1 Spanish). Five violations were recorded for refusal to accept boarding inspection teams. The reservation concerning below-deck inspection was lifted by the USSR in November 1973, thus enabling the international inspection scheme to gain a better insight regarding production capabilities and species composition. The large catches of demersal species taken as by-catch by foreign nationals were finally documented and were instrumental in leading to additional controls such as prohibiting vessels in excess of 130-ft to use demersal gear except in restricted zones. Most recently, the ICNAF 155-ft rule was implemented in the Georges Bank area to alleviate the by-catch of groundfish by large foreign trawlers. Only true pelagic gear was allowed.

The past two years show evidence of remarkable progress and improvement by all foreign nationals in adhering to the ICNAF regulations (Table 16). The additional increase in manpower and funding for NMFS working in conjunction with the USA Coast Guard has created an atmosphere of cooperation by exerting increased pressure on foreign nations to obey ICNAF regulations.

h. History of Cooperative Research, Conservation, Management, and Data Exchange

Prior to 1973 the mackerel fishery in ICNAF Sub-6 was not regulated.

The first TAC (450,000 tons) was set for 1973 in SA 5 and SA 6 in an attempt to limit the rapidly developing distant-water fisheries until an adequate assessment could be completed.

The 1974 (304,000), 1975 (285,000), and 1976 (254,000) TACs in SA 5 and SA 6 were established to stabilize fishing mortality at the 1973 level, which was near the point of Fmax. $F_{max}$ is defined as the (instantaneous) fishing mortality rate at which yield per individual entering the fishery (recruit) is maximized. The first
TAC in SA 3 and SA 4 was set (1974) only for Divs. 4MVX (55,000 tons) to permit a reasonable but limited expansion of that fishery. The 1975 TAC for SA 3 and SA 4 (70,000 tons) was established to stabilize the fishery at the 1974 expected level of catch. The 1976 TAC was set at 56,000 tons.

Although some progress has been made in tracing migratory pathways in recent years, seasonal distributions of the northern and southern contingents are still uncertain. It is known, for example, that both contingents contribute to the winter fishery off New England, although their relative contributions have never been determined.

Consequently, the ICHAF Assessments Subcommittee agreed in 1975 to assess all mackerel in SA 3-6 as a unit stock. The 1976 TAC of 310,000 tons for SA 3-6 was, therefore, apportioned on the basis of historical catches to determine the SA 5 and SA 6 and SA 3 and SA 4 allocations.

Cooperative research on the stock has involved research vessel surveys (Table 16) and assessment studies and relative work by Bulgarian, Canadian, GDR, Polish, USSR, and USA scientists. In addition, Bulgaria, France, FRG, GDR, Japan, Poland, Romania, USA, and USSR have reported length-frequency and age sampling data to ICHAF in recent years (Table 16).

A minimum size limit of 25 cm total length (TL) was instituted by ICNAF in 1976 in an attempt to curtail the capture of age I fish. Several states in the USA also have minimum size limits (SL) for the sale or possession of mackerel: Massachusetts, 6 inches (15 cm); Connecticut, 7 inches (18 cm); New York, 7 inches (18 cm); and New Jersey, 7 inches (18 cm).
III. STATUS OF THE FISHERY STOCKS

a. Distribution of Exploited Stocks

Mackerel in SA3-6 overwinter in deep offshore areas, primarily from Georges Bank to Cape Hatteras. Dense concentrations occur offshore from southern New England to New Jersey in January and February. In spring, the southern contingent moves inshore to spawn in the New York Bight area and then continues into the Gulf of Maine, where it apparently disperses along the coast in summer. While inshore, this contingent frequents territorial waters and forms the basis for an intensive recreational fishery. Most of the USA commercial catch is taken at this time.

The northern contingent moves onto the shelf and then to the northeast in spring, continuing as far north as the Gulf of St. Lawrence for spawning and feeding purposes. Small amounts of mackerel caught in summer on Georges Bank by distant-water fleets may represent stragglers from this contingent, or part of the southern contingent. USA bottom trawl surveys indicate concentrations extending from the Mid-Atlantic Bight into Georges Bank in March and April.

Both contingents return to the offshore wintering grounds in late autumn and concentrations again begin to form in deep waters in the New York Bight area in December (Sette 1950; Anderson 1975; Berrien 1976).

It is evident that primary concentrations occur in the New York Bight area in winter and it is here that a given fishery should realize its maximum potential.

b.4c Abundance and Current Status

Analyses conducted to estimate optimum yield in 1977 in the following sections includes both commercial and recreational catches (see Section II. b. for explanation of method of estimating recreational catch data). In analyses requiring age composition data of the catch, it was assumed that the age composition of the recreational catch was the same as that reported by the commercial fishery because sampling data from the recreational fishery were insufficient to determine this information.

Anderson (1973) and Walter (1975) have estimated maximum sustainable yield (MSY) from Schaefer models as 310,000 tons and 313,000 tons, respectively, for Atlantic mackerel, corresponding to a stock biomass of 1,250,000 tons (Walter 1975). These estimates were calculated using only commercial catch data. However, historical commercial landings data suggest wide fluctuations in biomass, and it is probable that the above MSY figures are overestimates because of the effect of one very strong year-class and several above-average year-classes on the catch and effort data used in the estimation procedures. The most recent estimate of MSY, which includes recreational catches in the calculations, (E.D. Anderson, personal communication) is 210,000-230,000 tons, which is based on the exploitation of an average year-class (1961-73 year-classes) at fishing mortality ranging from F_{0.1} (0.35) to F_{max} (0.70) with average patterns of fishing and mortality at age (see definition of F_{0.1} and F_{max} on next page). In view of the magnitude of past

FEDERAL REGISTER, VOL. 42, NO. 32—WEDNESDAY, FEBRUARY 16, 1977
catches, the 210-230,000 level appears more realistic than the 310,000 level.

Yield per individual entering the fishery (i.e., yield per recruit, see Ricker, 1975) is maximized at instantaneous rates of fishing mortality (F) of 0.5, 1.0, and greater than 2.0 at a mean age of first capture of 1, 2, and 3 years, respectively. These F values are commonly referred to as $F_{\text{max}}$ values. At a lower level of F (i.e., $F_{0.1}$ where the instantaneous fishing mortality rate at which the additional yield per recruit gained from an additional mortality unit is 10% of the gain per unit of mortality in a lightly exploited stock), the corresponding values are 0.28, 0.35, and 0.43. These values are judged to be more appropriate from a management standpoint as discussed under Optimality. The level of fishing mortality previously considered to be optimal ($F_{0.1}$) applied only to the commercial fishery. With recreational fishing included, it is possible that a different, probably higher, level of optimal fishing mortality may be defined. Since this new level has not yet been defined, it was tentatively felt that optimal level of fishing mortality used for the commercial fishery should be increased in proportion to the expected recreational catch when applied to the combined fisheries.

Three separate assessments were made in 1976 within STACRES of ICNAF based exclusively on catches. In April, the recommendation for 1977 by US scientists was a zero TAC. At that time there was no information available concerning the 1976 catch, and it was assumed that the full 1976 TAC of 310,000 tons would be taken as a basis for estimating fishing mortality in 1976 and stock size in 1977. Research vessel survey data from 1976 were also not available. The methods used and the data available suggested that fishing mortality in 1975 and 1976 was very high and that the spawning stock size in 1977 would be reduced to drastically low levels. Fishing at the level of $F_{0.1}=0.35$ in 1977 given the estimated stock size would have resulted in a TAC of about 35,000 tons. However, concern about the possible impairment to spawning and success and recruitment as a result of the low stock size led to the recommendation of a zero TAC.

In June, US scientists recommended a TAC of 55,000 tons for 1977. At that time, there were first quarter catch statistics available which indicated that the April estimates of fishing mortality were too high and stock size estimates for 1976-77 were too low. In addition, US spring 1976 survey data suggested higher abundance than previously assumed. The results of the assessment indicated that the estimated stock size for 1977 was greater than that calculated in April, resulting in a higher recommended TAC at the same level of fishing mortality ($F_{0.1}=0.35$). The question of a stock-recruitment relationship and a minimum stock size constraint could not be resolved with the available information.

In December, US scientists advised a 1977 TAC of 105,000 tons. Between the June and December assessments, the entire data base was reanalyzed and significant new information concerning the 1976 catch and from both the 1976 spring and autumn surveys was obtained. The 1976 catch was estimated as 235,000 tons compared to 310,000 tons as assumed in the previous two assessments. Based on more complete up-to-date data than available earlier, the level of fishing mortality in 1976 was determined to be less than estimated earlier. The resulting analyses indicated that the available stock in 1977 was greater than previously estimated. Therefore, with fishing mortality at the $F_{0.1}$
level, a 1977 catch of 105,000 tons could be taken.

Following the inclusion of the estimated US recreational catches as mentioned earlier (II.a), an additional assessment was conducted following the same procedures used at the December ICNAF assessment, but adjusting parameters where necessary to account for the added catch. Estimates of population size, based on virtual population analysis, indicate an increase in stock size to 2,375,000 tons in 1969, followed by a steady decline to 653,000 tons in 1976. Virtual population analysis is a method of estimating stock size and fishing mortality rate of a population, based on the age composition of observed catches and an estimate of the natural mortality rate (see Ricker 1975).

USA research vessel spring survey catch per tows indices indicated a 92% decline in abundance from 1968 to 1976. The autumn survey indices indicated an increase from 1963 to the 1967–1969 period and an 86% decline in abundance to 1976 (Anderson et al., 1976). USA commercial standardized catch per day indices increased steadily until 1968 and then declined 94% in 1974. Distant-water fleet indices increased during 1968–1970, declined in 1971 and 1972, and then increased again in 1973–1974. However, it appears that the pattern observed for distant-water fleets was due primarily to improvements in vessel efficiency (Anderson 1976). In summary, almost all available evidence suggests a massive decline in the mackerel stock abundance in recent years.

The fishing mortality rate in 1976 was estimated to be 0.77, higher than previously recorded in the fishery. Assuming this level of fishing mortality and a combined commercial and recreational catch of 240,000 tons in 1976 (SA3-6) and given estimates of the sizes of the 1974–1976 year-classes, the fishable stock (age I and older) in 1977 was calculated to be 592,000 tons. The year-class estimates, based largely on US survey catches, indicated that the 1974 year-class was the largest since 1969, and the 1976 year-class was about the median strength of the 1968–1973 year-classes. With fishing mortality in 1977 reduced to the level of 0.39 (F0.3=0.35 plus 0.04 to reflect recreational fishing), a catch for SA3-6 of 118,000 tons would result. Of this amount, 88,000 tons could be taken in SA5 and SA6. This level of catch would allow a slight increase (2%) in spawning stock biomass in 1978, to a level about 22% of that present in 1970–1972 and about 20% less than that observed in the early and mid-1960s prior to the entry of the 1967 year-class into the population and foreign nationals into the fishery.
Historical fluctuations in stock abundance and year-class strength, and possible effects of interspecies competition have led to considerable interest in stock-recruitment relationships for this species. Taylor et al. (1957) showed that fluctuations in mackerel catches during 1820-1830, which they assumed reflected variations in abundance, were correlated with temperature but that such a relationship was not evident in later years. Mackay (1967) related a strong 1959 year-class of mackerel to above-average water temperature in July-September in the Gulf of St. Lawrence and a poor 1962 year-class to below normal temperature. Lott et al. (1975a, 1975b, 1975c, 1976) in simulations of cod, herring, and mackerel stocks and fisheries in the Gulf of St. Lawrence have shown temperature to be the key environmental factor influencing year-class success.

An inverse correlation between herring and mackerel stock sizes in recent years has led to speculation that these species are competitors (they have similar feeding habitats). However, the influence of herring abundance on mackerel year-class strength has not yet been described quantitatively.

Egg and larval drift induced by wind and currents is critical to year-class formation. Sotte (1943) attributed the failure of the 1932 year-class of mackerel to extremely high mortality during the larvae to post-larval transitional stage. The high mortality was caused in large part by the prevalence of northwesterly winds which drifted the planktonic larvae farther than usual from their nursery grounds. Colton and Temple (1961) concluded that under average conditions most fish eggs and larvae are carried away from Georges Bank by the easterly-flowing slope-water current, and only under exceptional hydrographic conditions are appreciable numbers of eggs and larvae retained on the Bank or in nearby coastal areas. They felt that egg production for all species is always sufficient to produce a strong year-class, but that only a small percentage survive because of mortality at the egg and larval stages induced by drift and other factors.

Lott et al. (1975a) derived a stock-recruitment relationship for mackerel in SA 3-6 which suggested a strong density dependence between spawning stock biomass and egg production which was modulated by environmental effects as measured by temperature. The relationship between egg production and larval abundance was shown to be strongly density dependent through competition for food and predation. These relationships demonstrated that maximum recruitment is produced by a spawning stock biomass of 650,000 tons with symmetrically declining recruitment from smaller and larger biomasses. Results of the current assessment indicate that the 1976 spawning stock biomass (476,000 tons) was approximately at the same level which produced the moderate 1966 year-class and the large 1967 year-class. It has not been possible to evaluate the precise effects of various factors, including spawning stock size, on recruitment success and spawning, but the present level and condition of the spawning stock is reason for concern. The reduction in OF from 310,000 tons in 1976 to 240,000 tons in 1977 certainly reflects this concern.
OPTIMALITY

According to the Fisheries Conservation and Management Act of 1976, the optimum yield of a fishery means the amount of fish—
(a) which will provide the greatest overall benefit to the
Nation, with particular reference to food production and
recreational opportunities; and
(b) which is prescribed as such on the basis of the maximum
sustainable yield from such fishery, as modified by any
relevant economic, social, and ecological factors.

The specific criteria to be used to calculate optimum yield in the
future will be determined by the Regional Councils. In the interim,
ICNAF's determination of optimum yield (TMC) for 1977 is proposed in
this document. The primary objective of ICNAF has been to maximize
sustained yield. The US commercial capacity to harvest and market
each fishery was determined in order to benefit the US, based on rele-
vant economic, social, and ecological factors as expressed by advisors
of the US delegation to ICNAF. The US recreational capacity indicated
in this PMP is based on estimates of recent recreational catches as
well as anticipated increases which may result from the increased
number of anglers. Some approaches to the management of fisheries,
which have been the basis of the advice of the Standing Committee on
Research and Statistics (STACRES) considered by ICNAF commissioners
in the establishment of TACs, are discussed below.

As a consequence of differences in the nature of the dynamic
models used for assessment of fish populations, two measures of
fishing mortality (F\text{max} and F\text{MSY}) have been identified as reference
points on which to base regulations for optimizing yield. F\text{max}
refers to the fishing mortality rate at which the average catch per
recruit to a fishery is at a maximum. It is a function of the growth
and natural mortality processes within the fish stock and of the
size (age) at which the fish enter (i.e., "recruit to") the fishery,
and it is therefore independent of changes in recruitment. F\text{MSY},
on the other hand, refers to the fishing mortality rate at which the
average long-term catch from the fish stock as a whole is highest
and is therefore a function of the total production processes
within the fish stock, including recruitment. Where the average
level of recruitment does not change directly in response to changes
in stock size, F\text{max} and F\text{MSY} will correspond. In the absence of
detailed knowledge of the relationship between stock size and recruitment
for particular stocks, this correspondence was assumed by ICNAF
in the presentation of scientific advice on management action for
mackerel prior to 1976.

STACRES examined the principal features of the F\text{max} reference
point and identified the following as being of particular importance
with regard to its adequacy as a basis for management actions:
(a) The form of the relationship between catch per recruit and
fishing mortality (F) differs markedly for the various fish
stocks according to their growth and natural mortality.

FEDERAL REGISTER, VOL. 42, NO. 32—WEDNESDAY, FEBRUARY 16, 1977
characteristics. For some stocks, $F_{\text{max}}$ occurs at a relatively high level of fishing mortality and it may not be clearly defined. Furthermore, its value for each stock is dependent upon the age and pattern of recruitment to the fishery.

(b) Although $F_{\text{max}}$ defines the fishing mortality rate at which the greatest catch will be obtained from each recruit entering the fishery by taking no account of the relationship between the size of the spawning stock and recruitment, it does not necessarily correspond with that giving the highest average catch (MSY) for the fish stock as a whole (although, as indicated above, it does so if average recruitment does not change with changes in stock size).

(c) Because $F_{\text{max}}$ takes no account of the stock and recruitment relationship, management measures based on this reference point do not guarantee the maintenance of spawning stocks at a level that would ensure the maintenance of an optimum average level of recruitment.

(d) The $F_{\text{max}}$ level of fishing takes no account of possible economic objectives and factors.

This indicates that the $F_{\text{max}}$ reference point has potential limitations which have to be recognized and evaluated in the provision of scientific advice on management action. They are obviously greatest with respect to fish stocks for which the relationship between yield per recruit and fishing mortality has no clearly defined maximum or, if present, it occurs at a relatively high value of fishing mortality rate. In those situations the setting of catch quotas at the $F_{\text{max}}$ level may lead to a severe reduction in the stock size, reduction in the number of age groups in the exploited stock, large short-term changes in catch (and hence in the magnitude of the short-term quota changes), and possible recruitment failures due to the generation of too low a spawning stock size.

The principal element of the biological system governing the adequacy of $F_{\text{max}}$ as a basis for management action is the recruitment process, with its variability, due to environmental factors and especially the relationship between recruitment levels and spawning stock size. At present, little is known about the latter relationship, so that the evaluation has usually been made on a generally qualitative basis using all available information on the size and composition of the stock and the observed variability in recruitment to it together with its relation to other components of the exploited ecosystem. However, the relationship is taken into account empirically in some assessment models.

In view of the possible substantial adverse consequences of setting the fishing mortality rate too high in cases where there is doubt about its adequacy, a more restrictive management system than that based on the $F_{\text{max}}$ level would be justified. In addition to appropriate
measures for controlling the size (age) of recruitment to the fishery (e.g. through mesh regulation), the management system might comprise either, or a combination, of the following elements: (i) fixing the fishing mortality rate at a level somewhat lower than F_{\text{max}}, and (ii) setting a target spawning stock size.

For fish stocks (such as mackerel) in which the relationship between catch per recruit and fishing mortality is a relatively flat-topped curve, a fishing mortality rate lower than F_{\text{max}} can be set which would result in only a small loss in average catch but would achieve a substantially higher average stock biomass, greater stock stability due to the presence of a larger number of age groups in the exploited phase, higher average catch per unit of effort, and increased economic efficiency. The F_{0.1} level, defined as the level at which the change in yield per recruit with respect to change in mortality rate is one-tenth of that of the fishery beginning on the virgin stock, has been specified as another possible reference point below F_{\text{max}}. It results in an increased catch per unit of effort, but it does not have the unique merit in necessarily achieving the desired stability of stock size and recruitment. This level of F was used as a basis for the proposed OX for mackerel in 1977.

The establishment of a minimum spawning stock size constraint, as an element of the management objective, serves to minimize the risks of stock depletion and recruitment failure and hence should be as much as possible, an integral part of the scientific evaluation leading to specific management measures. At present, however, owing to the lack of knowledge on stock and recruitment relationships for this species, the precise value of the limiting stock size cannot be defined for mackerel. However, results of a theoretical study suggest that, at least for some stocks, an equilibrium spawning stock biomass constraint at a biomass level about two-thirds of that of the virgin stock would provide an adequate biomass buffer for maintaining stock stability and resilience against depletion in the presence of large fluctuations in recruitment.

The risks inherent in a management system based on the exploitation of individual fish stocks at their F_{\text{max}} (F_{\text{MSY}}) levels are particularly large in fisheries on multi-species resources, in which the exploitation of each stock separately is not possible due to the presence of biological interactions. In such situations, the objective of fishing each stock at the F_{\text{max}} level may lead to its depletion and a possible decrease in the long-term catch of the principal components of the commercial fisheries (although the total fish biomass available for exploitation may not decrease). The adoption of management measures, which maintain an adequate spawning biomass of the desired species, is particularly important in such cases. The second-tier quota system adopted under ICNAF for SA 5 and SA 6, establishing a total catch of all finfish and squid (except menhaden, billfishes, tuna, and large sharks) was designed to provide such a safeguard.
a. Relevant Socioeconomic Factors

For purposes of this plan, the primary economic considerations are the capacity of the US commercial industry to harvest and market mackerel, and maintenance of a suitable stock size for recreational harvest and for bait purposes. Determination of US industrial capacity is extremely difficult due to the large number of variables that must be considered. The approach that is used here is an examination of previous species landings modified by any relevant consideration; i.e., new markets and/or products, unavailability of other traditional species, etc.

Mackerel is an important species for recreational fishermen in the northeastern United States. By weight mackerel ranked 12th in 1960, for all species caught by recreational anglers in this area (Table 12). Mackerel ranked 7th in 1965, 3rd in 1970 and 7th in 1974. Thus, the mackerel fishery is a significant part of the total recreational fisheries in the northeast.

b. Optimum Yield

Given the decline in this stock referred to in previous sections, an OY of 88,000 tons (SA5 and SA6) for 1977 would be the level which would prevent further decline and begin immediate recovery towards the optimum stock size.

c. and. Estimated Domestic Production Potential and Allowable Foreign Surplus

The estimated OY is 88,000 tons with the US 'commercial' fleet capacity estimated at 6,000 tons and the US recreational fishery capacity estimated as 12,000 tons. This leaves an estimated surplus of approximately 69,000 tons.

---

(Notes)

/ Winter and summer flounder were combined as in the 1960 survey.
During the 1961 to 1974 period the peak landing of mackerel in the US commercial fishery was 4,400 metric tons. However, with reduced availability of other species, the industry has indicated that 6,000 metric tons could be harvested and marketed. Further, potential markets may be available in addition to established ones in southwestern and southeastern United States, the West Indies, and Western Europe, if proper marketing efforts were generated. Time does not permit a feasibility study of these markets to be conducted.

During the same period the peak catch of mackerel in the recreational fishery was estimated to be 32,000 metric tons in 1969. This occurred at a time when the stock biomass was at its maximum level, but in later years as stock biomass decreased, recreational catches decreased proportionately. Based on present levels of biomass, as well as anticipated increases in recreational effort, an estimated capacity of (potential harvest) for the recreational fishery could be as high as 13,000 tons.

The data below summarize the estimated MSY, OY, the needs of the US commercial and recreational sectors, and the total allowable level of foreign fishing.

CONSERVATION AND MANAGEMENT MEASURES APPLICABLE TO FOREIGN FISHERIES

---

Data to be Reported by Foreign Fishery.

(In addition to the requirements below see \( V \), d.)

The reporting procedure described below is designed to contribute to continuing needs for assessment of the status of stocks. However, specific needs may develop from time to time which require a change in standard procedures, or additional data for species studies. Also, fisheries patterns will change. These aspects require that the procedures for reporting must be flexible enough to accommodate necessary changes. It also implies that some form of archiving of the basic data be developed so that retrieval at a later date in a different format is possible.

All data described below shall be reported to the Director, Northeast Fisheries Center, National Marine Fisheries Service, Woods Hole, Massachusetts:

1. Statistical Information Requirements for all Fisheries Catch and Effort:

   Within 90 days after the close of each calendar quarter, catch-effort statistics for biweekly time periods for 30-minute square areas will.
be reported, by vessel, for the previous quarter. These will be reported using 30-minute Statlist 21 B Forms or magnetic tape, computer cards, or printouts for all species and gear types.

Vessel logbook data is to be available for selected, specific joint assessment studies. The collection of samples, specific in 2. below, should also be annotated in the logbook.

2. Procedures for Scientific Samples
   a. Length-age species composition samples
      (1) Samples should be taken separately for each gear type
      (e.g. bottom trawl, pelagic trawl, purse seine) and water layer
      (e.g. on the bottom, midwater lavel) combination every month
      for which fishing is pursued by 30-minute square areas throughout
      the agreement region. One sample should be taken for every 1,000 tons
      or fraction thereof within the above categories:

      (2) Data to be recorded for each sample:
         (a) Vessel identification
         (b) Method of fishing, e.g. pelagic
         (c) Specific type of trawl, including reference to its
             construction or actual scale drawing
         (d) Mesh sizes
         (e) Tonnage of the species sampled in the trawl haul
         (f) Total weight of the fish sampled
         (g) Time of day of haul
         (h) Date
         (i) Latitude and longitude of haul

   (3) Sampling procedures (for all species caught)
      (a) Species for which catch is sorted
      (i) From a single net haul take four random aliquots
          of approximately 50 fish each. (For species with less than 200
          fish in a single trawl haul accumulate samples over trawl hauls
          until approximately 200 fish are taken.)

   (ii) Measure fork length for each fish to nearest cm,
       except for herring, for which measurement will be the total length
       to the nearest cm below. Where other measurement systems are used
       appropriate conversion information must be supplied.

      (ii) Take a subsample of one fish from each cm interval
      and remove scales, otoliths, and/or statoliths as appropriate. Record
      the sex of mature individuals.

   (b) Species for which catch is not sorted
      (i) From a single trawl take two random aliquots of
          approximately 30 kilos each.

      (ii) Sort to individual species (for “river herring”
      this means sorting to alewife, Alonon pseudoharengus, and blueback,
      A. aestivalis; for squid, sort to Loligo and Illex).

      (iii) Measure fork length for each fish to nearest cm,
      except for herring for which the measurement will be the total length
      to the nearest cm below. Where other measurement systems are used,
      appropriate conversion information must be supplied.
(iv) Take a subsample of one fish from each cm interval and remove scales, otoliths, and/or statoliths as appropriate. Record the sex of mature individuals.

b. Length-weight samples

Individuals of one sample of each principal species of fish (e.g., expected yearly catch in area of agreement of 500 or more tons), per International Commission for the Northwest Atlantic Fisheries (ICNAF) division per month, should be weighed in grams and measured in millimeters. Each sample will contain 10 fish per centimeter interval. The length range of fish may be accumulated if necessary from small samples taken over several catches and days. With small fish, where weighing at sea of individuals is not accurate, appropriate numbers of fish of the same length class shall be weighed in aggregate. Sex shall be recorded for mature individuals.

b. Zones and/or Periods of Limited Foreign Fishing and Catch Limitations

The recent international mackerel fishery has been conducted primarily during December-April in Box 5 and Box 6 when the fish are overwintering and heavily concentrated along the edge of the continental shelf. During these months, heavy fishing has occurred from Georges Bank to Chesapeake Bay. Since the late 1960s, the overwintering concentrations have undergone a gradual northeasterly shift due primarily to increased water temperatures. Because of this tendency of the schools to shift in part at least in response to temperature changes, it is difficult to specify within narrow limits the probable area of maximum concentration in 1977.

This plan is based upon an estimated 1977 surplus of 69,000 tons for foreign harvest. If foreign nationals will be allowed access to the surplus, the plan proposes the following management measures as a means of reducing potential conflicts with US fishermen, provide for a minimum by-catch, and still allow the surplus to be harvested: (1) only pelagic gear be used, (2) fishing take place only during the months of October, November, and December, and (3) fishing activities be restricted to an area (window) bounded by straight lines connecting the following coordinates, and depicted in Figure 10:

- 40°30'N, 71°20'W
- 39°30'N, 71°20'W
- 40°20'N, 67°00'W
- 40°50'N, 67°00'W
- 40°30'N, 69°00'W

Table 25 shows the proposed seasons for foreign nationals to harvest the estimated surplus of mackerel as well as Atlantic herring, silver and red hake, and squid (Illex and Loligo).
Table 19. Proposed dates during which foreign fishing is recommended for each species and window for 1977 only.

Figure 10. Open fishing area for mackerel exploitation by foreign nationals.
1. Each foreign vessel engaged in or wishing to engage in harvesting the available surplus must obtain a permit from the Secretary of Commerce.

2. Closed Season and Areas - National Marine Fisheries Service shall maintain records of vessel days and catch of foreign vessels fishing for Atlantic mackerel under this section. Upon determination by the Director that foreign fishing vessels of a country have taken its assigned allocation of Atlantic mackerel, such determination shall be made to the appropriate agent or a government official of the country. Such notification shall be given to the foreign country not less than 48 hours prior to the closure of such fishery. Upon notification, foreign fishing vessels shall cease the directed fishing for Atlantic mackerel in the authorized area, and may continue to take and possess only those amounts of Atlantic mackerel in accordance with the incidental catch provisions of paragraph 5.

3. Gear Restrictions - It shall be unlawful for any foreign vessel fishing for Atlantic mackerel, under this section to use any other gear than pelagic gear (purse seines or true midwater trawls, using midwater trawl doors incapable of being fished on the bottom).

b. It shall be unlawful for any foreign fishing vessel fishing for Atlantic mackerel to attach any protective device to pelagic gear or to employ any means that would, in effect, make it possible to fish for demersal species in the authorized area.

4. Statistical Reporting - The owner or operator of any foreign fishing vessel shall maintain catch and effort information and shall report such information through its government to the Director, Northeast Fisheries Center, National Marine Fisheries Service, Woods Hole, Massachusetts, USA 02543.

a. Operators of all fishing vessels permitted under a Governing International Fisheries Agreement to fish in the Fishery Conservation Zone (FCZ) of the United States in the Atlantic Ocean, North of Cape Hatteras shall record their catches during the permit period on a daily basis according to position, amount, date, type of gear, amount of effort, i.e., number of sets (or hook/s) x time gear on the bottom (otter trawl) or fishing (midwater trawl, lines, other gear), discards, catch composition, and disposition of catch. Such vessels shall also record on a daily basis the estimated cumulative catch, including discards, by individual species, of all fish taken in the FCZ. The record shall include the disposition of the catch, while not subtracting any fish offloaded while the vessel is operating in the Fishery Conservation Zone and shall be retained aboard the vessel for the duration of the permit period.

b. The operator of each foreign fishing vessel operating under permit in the FCZ shall submit reports of fishing effort and yield through the vessel's designated agent in the United States to the Regional Director, National Marine Fisheries Service, 14 Elm Street, Gloucester, Massachusetts 01930.

(1) A report will be submitted within 24 hours of the vessel's arrival in the FCZ.
c. Coastal State Fishery Conservation and Management Measures

N/A

f. Other Measures

N/A

(2) A report will be submitted weekly to indicate effort and yield on Sunday through Saturday. This report should arrive at the Regional Director's office no later than Thursday of the week following the week of the report.

(3) A report will be submitted within 24 hours of any change in directed fishery by the vessel.

(4) A report will be submitted within 24 hours after the vessel transfers fishing operations from one window to another.

(5) A report will be submitted within 24 hours after the vessel has ceased fishing operations with intent to depart the FCZ.

These reports will include vessel identification, reporting circumstances, effort (if applicable), yield (if applicable), and amount and composition of fishmeal (if applicable).

c. The Secretary may require from time to time additional information concerning fishing operations of fishing vessels of a foreign country. Such information shall be provided in accordance with the procedures provided to the vessels or country.

5. Incidental Catch

a. The taking of other allocated species is permitted as an incidental catch in the directed Atlantic mackerel fishing. The quantity of any allocated species shall not exceed the allocation provided to the foreign country. When the allocation of any of the other species has been reached prior to reaching the allocation of Atlantic mackerel, fishing for Atlantic mackerel shall cease. Upon determination that a foreign country has caught its assigned quota of Atlantic mackerel, the directed fishing by that country will be closed. Subsequently, incidental catch of that species shall be limited to no more than 1
7. Fixed Gear Avoidance

All foreign fishing vessels are prohibited from fishing between the 100-200 fathom depths on the Continental Shelf in the Atlantic north of Cape Hatteras within authorized fishing zones.

Fishing is prohibited in areas of reported fixed gear outside of the 100-200 fathom lines. The operator of each foreign vessel operating in an authorized fishing zone shall exercise caution when fishing within 2 nautical miles of such reported gear areas.

Locations of fixed gear in geographic coordinates (latitude and longitude) are broadcast on the first day of each month by Coast Guard Communications Station Boston (NNF) on 472 KHZ at 1350 GMT in radiotelegraphy. These summary lists are updated each day at 1350 GMT, with a broadcast on the same frequency listing changes in fixed fishing gear locations reported by fishermen. Additionally, voice broadcasts in English are made each day by NNF on 2670 KHZ at 1405 GMT and by Coast Guard Communications Station Portsmouth (NNN) on 2670 KHZ at 1350 GMT and by the Boston Marine Operator Radio Green Harbor, and Norfolk Marine Operator after their scheduled Marine Information broadcasts. The voice broadcasts list the locations of the fixed gear in LORAN A Coordinates. Both the radiotelegraphy and voice broadcasts are number sequentially by month, day, and year. A printed monthly summary of fixed gear information is available by contacting COMMANDER(AOL), US Coast Guard, Atlantic Area, Governors Island, New York, NY 10004; Telephone (212) 264-0644 or (212) 264-0645. All operators of
foreign fishing vessels shall copy such daily fixed gear broadcasts and shall maintain on the bridge of such vessel a chart showing the current location of fixed gear in areas where it will be fishing.

b. Sanctions.

If any foreign fishing vessel, for which a permit has been issued, fails to pay any civil or criminal monetary penalty imposed pursuant to the Act, the Secretary shall:

a. revoke such permit, with or without prejudice to the right of the foreign nation involved to obtain a permit for such vessel in any subsequent year;

b. suspend such permit for the period of time deemed appropriate; or

c. impose additional conditions and restrictions on the approved application of the foreign nation involved and on any permit issued under such application.

Provided however that any permit which is suspended pursuant to this paragraph for nonpayment of a civil penalty shall be reinstated by the Secretary upon the payment of such civil penalty together with interest thereon at the prevailing rate.

Preliminary Fishery Management Plans
On the 4th of February 1977, the Secretary of Commerce, through an appropriate delegation of authority to the Associate Administrator for Marine Resources of the National Oceanic and Atmospheric Administration and the Director of the National Marine Fisheries Service, published a Notice of Determination, Preparation, Issuance, and Implementation of Preliminary Fishery Management Plans at 42 FR 6873. In order that each Plan may have the widest possible circulation, the Secretary has decided that each should be published in the Federal Register.

Dated the 8th day of February 1977 at Washington, D.C.

Winfred H. Metzohm,
Associate Director, National Marine Fisheries Service.

I Introduction

Harvesting of short-finned squid (Illex) and long-finned squid (Loligo) off the Northeastern United States was, until January 1, 1977, regulated under terms of the International Convention for the Northwest Atlantic Fisheries (ICNAF) and subsequent agreements between the 16 signatory nations. The Fishery Conservation and Management Act of 1976 (P.L. 94-265), enacted and signed into law on April 12, 1976, established an extended jurisdiction fishing zone and exclusive US regulation of this zone under the concept of optimum yield. In the future, management plans for offshore New England-waters will be formulated by the New England Fisheries Council, a regulatory body formed by P.L. 94-265. However, the Secretary of Commerce, in order to comply with other areas of P.L. 94-265 must have Preliminary Management Plans (PMP) in place by March 1, 1977 to permit foreign nationals to fish in the fisheries conservation zone, provided that no fishery management plan will be prepared by the New England Regional Fishery Management Council prior to March 1, 1977.

II Preliminary Description of Fishery

Areas and Stocks Involved.

The Commercial fishery for squid in ICNAF SA 5 and 6 is based on two species, the short-finned or summer squid (Illex illecebrosus), and the long-finned or winter squid (Loligo pealei). The former is found between Greenland and Florida, is most abundant in the Newfoundland region, and is moderately abundant between Newfoundland and New Jersey (Harbor 1965). There is a northerly migrating component which is found in SA 3 and 4 during the warm months which moves south to overwinter, possibly as far south as SA 5 and 6 (ICNAF 1975). It is found in SA 5 and 6 throughout the year, but more predominantly in the warm months (Tibbetts 1975), suggesting that part of the overall stock(s) is residual to SA 5 and 6. Illex migrates to inshore waters in the spring and summer, but moves offshore in late autumn to overwinter (Tibbetts 1975).

Little is known concerning stock structure or relationships among possible stocks throughout the range. Consequently, the approach chosen by ICNAF in 1975 was to assess Illex as a single stock complex in SA 3-6, although separate OY's are imposed for SA 3 and 4 and for SA 5 and 6 to reduce the possibility of over-exploitation until stock boundaries can be determined with greater accuracy.

Long-finned squid are found primarily from Cape Hatteras to Corsair Canyon on Georges Bank (Tibbetts 1975). They migrate inshore and are found in harbors and estuaries (particularly in New England), in spring and summer and move offshore again in autumn, where they overwinter at the edge of the continental shelf. This species is considered to constitute a unit stock in SA 5 and 6. There does not appear to be any commercially significant occurrence of this species north or south of the region.
b. Statistical History of Exploitation

United States fishermen have landed squid at least since the late 1800's (Lyles 1968). Since 1928, landings have remained fairly constant at an annual average of about 1800 metric tons (Table 1), indicating stable market conditions. The relative proportions of the total landings contributed by _Loligo_ and _Illex_ are unknown as until recently no distinction was made between the two; however, species distributions indicate that _Loligo_ has contributed the major portion of the USA catch, especially south of Cape Cod.

The distant-water fishing for squid in SA 5 and 6 was initiated in 1964 with a small incidental catch by the Union of Soviet Socialist Republics (USSR). Distant-water fleet catches remained low until 1967 and have since risen dramatically as a result of increased fishing effort and increased abundance while the USA catch has remained constant. Landings by all nations peaked at 56,800 tons in 1973 and have since declined (Table 2). Estimated landings of _Loligo_ rose from 1,700 tons in 1967 to 42,900 tons in 1973. Japan, Spain, and the USSR have taken the bulk of the catch in recent years (averaging 13,400, 7,000 and 3,600 tons, respectively, since 1970) (Table 1).

Bulgaria, France, the Federal Republic of Germany (FRG), Italy, Poland, Romania, the German Democratic Republic (GDR), Cuba, and the USA have landed smaller amounts. Estimated _Illex_ landings rose from 1,000 tons in 1967 to 20,500 tons in 1974. Japan, Spain, Poland, and the USSR appear to have accounted for most of the landings in recent years (averaging 2,300, 4,000, 3,700, and 3,600 tons, respectively, since 1972) (Table 3). Smaller amounts have also been landed by Canada, Bulgaria, the FRG, Italy, Romania, USA, GDR, and Cuba.

Tons in this Plan refers to metric tons.
### Table 1. United States historical squid landings\(^a\) for the New England and mid-Atlantic areas in metric tons, 1928-1961.

\(^a\) Preliminary figures.

FEDERAL REGISTER, VOL. 42, NO. 32—WEDNESDAY, FEBRUARY 16, 1977
The USA squid fishery has traditionally been incidental in nature, the catch being taken primarily in otter trawling directed towards groundfish species. However, squid have also been taken for some time in traps in Massachusetts waters. In 1974 and 1975, some 35-40 small and medium otter trawlers from Massachusetts ports conducted a short-term directed fishery for Loligo on spring spawning concentrations near Nantucket. Catches were processed for export. Loligo has comprised 86% of the USA squid catch in recent years.

Most recent developments in this fishery are best illustrated by landings in Massachusetts and Rhode Island, which account for 95% of the total squid landings in New England (Table 3). In general, prices were substantially higher in Rhode Island and compared somewhat favorably with groundfish prices from 1971-1974, although historical prices for squid have been substantially less than for finfish. Squid have been utilized both for food and for bait in recent years. It is likely that some of the squid used for bait does not enter the recorded statistics. The total value of the New England squid catch by year is given in Table 3.

As indicated by the table, squid have not historically been of great economic significance, but it is clear that the value of the catch has increased considerably in recent years.

There are no published studies on the relationship of the ex-vessel squid price to landings, income, prices of other products, etc. However, a recent unpublished NWFSC study estimated that the price of squid is inelastic. Current markets for squid are rather small; consequently, when landings are low, the price is high and when landings increase, the market is saturated.

Table 6 contains data on the value of the squid catch in Massachusetts and Rhode Island as a percentage of the value of the total state's catches. It can be seen from the table that the squid catch in Massachusetts constitutes less than one percent of the total value of the state catch, while in Rhode Island it has constituted from 1-2% of the total.

(1) = less than one percent
The aggregate impact of the 1975 New England catch of squid on the New England region is presented in Table 2. These results indicate that the total New England 1975 squid catch of $354,000 had an aggregate impact on the region of over $1 million. Of this amount, approximately $416,000 constitutes payments to the household sector.

A number of firms in the New England region process at least some squid. Processes of evisceration and skinning are usually done manually.

A very small domestic food market exists, concentrated among a few ethnic groups. However, squid is very popular abroad; the European market for example is estimated to approximate 113,000,000 lbs. The principle product is whole squid (eyes removed). Other potential squid products include breaded rings, chunks, minces and squid fillets and blocks.

Squid are also extensively used as bait in northeastern USA recreational fisheries. However, it appears that although Loligo and Illex are purchased in quantity in a few localities for this purpose, the primary source of bait squid used in the northeast has been the west coast. Consequently, the potential for a much larger bait fishery is obviously on the east coast.

followed to include Bulgaria, Spain, France, Greece, and Italy. Most recently nations such as Cuba, South Korea, and Ireland have been represented. During this period 900-1000 foreign vessels annually fished in international waters off the USA East Coast from the southern tip of Nova Scotia to Cape Hatteras. Depending on the season, fleets of 250 to 300 vessels could be found at one time, whether it be off North Carolina-Virginia in winter or on Georges Bank during the summer.

In most recent years the annual number of foreign vessels has declined from 950 in 1971 to under 800 in 1975 (Table 9). It can reasonably be assumed that foreign fleets have dwindled even more during 1976 in response to greatly reduced fish stocks and increasingly more stringent catch restrictions, such as low quotas, closed areas, etc. Despite these restrictions, at peak seasons (winter and spring), 1975-1976, 200-250 vessels were observed at one time on the fishing grounds. However, during other times of the year activity has been at its lowest level in many years.

It is difficult to make an accurate evaluation of actual numbers and types of vessels involved in the squid fishery, as such evaluations must be based on surveillance data collected for approximate numbers of vessels fishing a variety of species. However, Spain and Japan have fished squid extensively off New England and the mid-Atlantic states in recent years using both stern and side trawlers.

Fishing operations have been conducted chiefly in deeper water along the edge of the continental shelf during cooler months. "Days fished" data as reported to ICNAF for 1974 (Table 10) indicate the relative amount of fishing pressure exerted by foreign nationals (note that these data do not take fishing power into account).

*In addition, small numbers (<10) of stern trawlers belong to France, Cuba, South Korea, Ireland, and Greece have been observed in SA 5 and 6 in recent years.*
Types and Numbers of Fishing Gear Employed

In the USA fishery, gear used to harvest squid includes trap nets and otter trawls. Foreign nationals harvest squid with demersal trawling gear (Table 1).

Historical Impacts of Foreign Fishing on Domestic Fishery

(1) Competition for Available Stocks

United States and foreign landings data for Loligo and Illex in SA 5 and 6 are given in Tables 2 and 3, respectively. While total USA landings show no trend, USA landings, in terms of percentage of the total, for both species have declined from 100% in 1963, prior to the introduction of the foreign fishery, to 5% and 1% for Loligo and Illex, respectively, in 1975. The foreign fishery on these species has increased rapidly in recent years, primarily as a result of catches by Japan, Spain, the USSR, and Poland.

The problems of by-catch in those fisheries for other species of interest to USA fishermen (e.g., butterfish), present another level of competition for available resources (see II.C.1.f.(3)).

(2) Gear Conflicts

Previous to 1961, USA fishermen shared the fisheries on Georges Bank only with Canada. In 1961, the USSR arrived with a large fleet of herring drifters that caused numerous complaints from USA fishermen alleging that they were being driven from this historical fishing area on the bank. In 1962, the number of USSR herring drifters increased to approximately 300 individual vessels; these were augmented by a fleet of factory stern trawlers and some medium trawlers, also from the Soviet Union. During this period a number of USA trawlers were fouled by running into set gill net or hauling their trawls through discarded netting, consequently fouling their propellers.

and necessitating towing back into port. A USA scalloper was run into on the "Northern Edge" of Georges Bank by a Soviet drifter that left the scene in heavy fog without identifying itself and ascertaining damage or injury to personnel.

In 1971, a USA trawler was rammed and sunk on the western side of Georges Bank in the "Great South Channel" by a trawler from Poland. The crew of six was saved, however, all else was lost.

In 1972, a USA trawler was rammed and sunk by a trawler from the GDR. That same year a small USA trawler was lost with its crew of three, allegedly fishing activity by the FRG in the Gulf of Maine.

In 1968, the offshore lobster pot fishery began to expand. Along with the increase in fixed gear came complaints of gear losses attributed to foreign fishing activity. Table 14 displays by year and country the number of known gear conflicts.

FEDERAL REGISTER, VOL 42, NO. 32—WEDNESDAY, FEBRUARY 16, 1977
In the year 1974 a total of 17 losses of bottom gill net gear was reported. This loss was blamed primarily on trawlers from the FRG and a trawler from Ireland.

There were two cases of lost longline gear attributed to Japanese activity in 1975.

**Non-target Species Mortalities**

Fisheries (main species sought category) in which squid were caught in SA 5 and 6 are presented in Table 23 by country. A total squid catch (Illex and Loligo) of 55,277 tons was taken in 1974, of which 12,853 tons (approximately 23%) occurred as by-catch. A total of 88% of this by-catch occurred in a directed fishery for four other species categories: mackerel (41%), silver hake (25%), red hake (10%), and herring (12%); and 9% was taken by two countries: the USSR (55%) and Poland (35%). In fact, since catch by vessel class is summed by month in ICNAF statistics, some catch of squid that appears to be by-catch may have resulted from a directed fishery. Furthermore, the above figures must be regarded as tentative because squid are reported with other invertebrates in catch by gear tables, and for the USA in particular, invertebrates other than squid are taken as well; consequently, USA figures are not included. It is believed, however, that USA by-catch of squid is relatively minor since its total catch is only about 2,000 tons.

The squid fishery was difficult to identify under the ICNAF catch reporting scheme, since it occurs in a mixed fishery situation. A procedure was adopted of assigning a catch record to the squid fishery if the largest catch was of squid. A catch record lists the catches in a month by species, for a gear-tonnage class category in an ICNAF Division. The international

# USA figures are not available as squid catches are combined with other invertebrates in distribution of catch by gear tables.
squid fishery thus defined had a reported by-catch of 15% of its directed catch in 1974. The predominant by-catches were of other finfish and mackerel representing 40% and 33% of the total by-catch, respectively. This by-catch accounted for 3% (3,421 tons) of the other finfish catch in 1974, and 1% (2,345 tons) of the mackerel catch in 1974. Table 16 lists the 1974 by-catches and by-catch ratios in the squid fishery for all countries combined and for individual countries. For certain fleets (e.g., Poland and the USSR) the by-catch rates are likely to be overestimated since the mixed fishery classification may result in several directed fisheries being lumped together. Conversely, in other fisheries (e.g., Spain and Italy) where catches other than squid are discarded, the ratio is underestimated. The overall effect of these errors cannot be determined.

**Economic Interactions**

It is not known to what extent, if any, foreign fishing activities have impacted the domestic squid fishery, since the domestic fishery and the USA market are so small. The impact has probably been minimal. The foreign squid market represents a distinct opportunity for expanding the USA industry.

Table 16. By-catch ratios and catches (metric tons) in squid fishery for 1974 by countries.
History of Regulation of Foreign Fisheries

Regulation of foreign fisheries along the USA coast of the Northwest Atlantic Ocean began in 1949 when the USA convened a conference of 11 countries at Washington, D.C. This conference resulted in the formation of ICNAF, and the USA Northwest Atlantic Fisheries Act of 1950 authorized USA involvement in the activities of the convention. The designated areas were the waters north of 39°00' north latitude and east of 71°40' west longitude. Commission regulations in the early 1950s evolved around the establishment of mesh regulations for certain directed groundfish fisheries, e.g. cod, haddock, with groundfish by-catch provisions for other small-mesh directed fisheries, e.g. silver hake, herring.

During the period from 1950 to 1957 little, if any, enforcement activity was deployed on United States vessels. An enforcement program was organized in 1957 composed of a two-man team effort to organize and activate a viable enforcement program to board and inspect, both docksides and at sea, in conjunction with the USA Coast Guard patrol vessels. The primary purpose was to coordinate a registration program of all USA commercial groundfish trawlers engaged in a directed fishery for haddock and cod. The minimum legal mesh size in effect was 4½ inches for all trawl gear on USA trawlers which were engaged in directed fishing for haddock and cod. Several USA masters were cited for alleged violations, prosecuted in USA Federal Court, and fined for violation of the rules and regulations under authority of the Northwest Atlantic Fisheries Act of 1950.

With the arrival of the distant-water fleets off the USA coast in the early 1960s, such discussion was given to the possible extension of territorial waters. Failure to resolve this question through the International Law of the Sea Conferences led to the establishment of a contiguous fishing zone in late 1966 which bounded the entire USA coastline encompassing the waters lying between 3 and 12 miles offshore. Only Canada was authorized to fish within this zone under a reciprocal fishing agreement for the USA fishing industry in similar waters off Canada. However, many USA fishermen continued to complain about fishing conduct by foreign nationals on the high seas.

These complaints ranged from infringements by foreign trawlers into the USA 12-mile contiguous fishing zone to harassment on the high seas pertaining to rules of the road and fishing conduct. Many investigations were activated both docksides and at sea, but USA fishery agents had no authority to board foreign vessels on the high seas.

Prior to adoption of the ICNAF scheme of joint enforcement, each member nation was responsible for the conduct and ministration of its vessel inspections on the high seas. There were a number of alleged violations reported by USA fishermen during 1966 and 1967; however, a lapse of 2-3 days after observations prevented any meaningful enforcement action. These allegations were for intrusions of the Contiguous Fishing Zone (CFZ) or within the 12-mile zone. Investigations were made by fisheries agents, often with negative results.

As the activity of the distant-water fleets increased, their operations began to expand to waters south of the convention area. Because of the overlap in fish stocks and the known migrations of commercially important species between the convention area and the waters to the south, ICNAF in 1967 adopted the responsibility for collecting statistics for the catches from these waters as far south as Cape Hatteras which was designated Statistical Area 6. Management of the fisheries within those waters, however, had to be accomplished.
through a series of bilateral negotiations. These began in 1968 with the USSR and Figures 2-4 indicate the current status of the major country agreements.

Fishery management zones were established by ICNAF in 1969 due to the haddock crisis generated by the extremely large catch of haddock by the USSR in 1965. The poor recruitment anticipated in the haddock fishery as indicated by groundfish surveys conducted by scientific personnel from Woods Hole and joint surveys with foreign research vessels was instrumental in adopting seasonal closures. Areal and seasonal zones have periodically been modified and supplemented to protect other species in addition to haddock. These are shown in Figures 5-9.

The haddock management zones were augmented in 1970 with the establishment of TACs for certain haddock stocks considered to have been overfished, and this began the present-day concept of management under an allowable quota system. There are presently 20 species-stocks under a nationally allocated framework of total allowable catches. Table 2 gives the allocations for calendar year 1976.

Unquestionably, problems encountered within the above management framework were instrumental in formulating an International Inspection Scheme approach to these problems, but progress has been slow. On August 11, 1971, the President signed an amendment (P.L. 92-87) to the Northwest Atlantic Fisheries Act of 1950, which authorized national and international measures of control on the high seas adopted under the Convention and supposedly made possible the adoption of the International Inspection Scheme on the high seas under ICNAF. During the latter part of August 1971, an inspection boarding team from the USA attempted to board USSR vessels. The USSR master refused to permit inspectors to board. After a series of diplomatic notes, the USSR advised the

Figure 9. ICNAF Conservation Areas, 1976.
USA that they were ready to accept inspection schemes, but the inspection
would be limited to the main fishing deck only. Since implementation of
the ICMF inspection scheme, 57 boardings were made on foreign vessels between
August 30, 1971 and November 1, 1972. Five violations were recorded for refusal to accept boarding inspection teams. The reservation concerning below-
deck inspection was lifted by the USSR in November 1973, thus enabling the
international inspection scheme to gain a better insight regarding fish
species composition below deck. The large catches of demersal species taken
as by-catch by foreign nationals was finally documented and was instrumental
in leading to ICNAF adoption of additional controls such as prohibiting vessels
in excess of 130 ft to use demersal gear except in restricted zones. Most
recently, the ICNAF 155-ft rule was implemented in the Georges Bank area to
reduce the by-catch of groundfish by large foreign trawlers. Only true
pelagic gear was allowed for vessels exceeding 155 feet in length.

The past two years have shown remarkable progress and improvement by
towell nationals in adhering to the ICNAF regulations (Table 12). The
additional increase in manpower and funding for NMFS has created an atmosphere
of cooperation by exerting increased pressure on the other nations in our
accelerated high seas boarding programs in cooperation with the USA Coast Guard.

h. History of Cooperative Research, Conservation, Management, and
Data Exchange

Management of squid in ICNAF SA 5 and 6 began in 1974, when the
ICNAF Standing Committee on Research and Statistics (STACRES) recommended
a precautionary Total Allowable Catch (TAC), of between 50,000 and 60,000
tons for this stock. This was based on a 1973 assessment of the Loligo
stock by Japanese scientists. The TAC set for both species (Loligo and
Illex) was 71,000 tons for both 1974 and 1976.

Based on updated assessments for Loligo by Japanese scientists and
estimates of stock biomass from USA research vessel surveys, separate TACs
were set by species (30,000 tons for Illex and 44,000 tons for Loligo) for
1976. Cooperative research on these stocks has involved research vessel
surveys (Table 12) and assessment studies and related work by USA, Canadian,
French, Japanese, Spanish, and USSR scientists. In addition, Japan, Poland, the USA, and the USSR have reported length-frequency and age
sampling data to ICNAF in recent years (Tables 20 and 21).

**III. STATUS OF FISHERY STOCK**

### Distribution of Exploited Stocks

In the absence of evidence to the contrary, it has been assumed that the fishing for long-finned squid (*Loligo*), off the northeastern USA exploits a single stock distributed from Cape Hatteras to the northern edge of Georges Bank. Fishing activities north and south of the region are probably of minor consequence.

The short-finned squid (*Illex*) has a more northerly distribution, extending from at least Newfoundland to the mid-Atlantic Coast of the USA. Again, there is no evidence to support the designations of separate stocks within the range of the population exploited in the Northwest Atlantic, and consequently *Illex* squid in this region have been considered as a unit stock. In recent years, ICNAF has established separate quotas for SA 3 and 4 and for SA 5 and 6 based on a single assessment of the stock throughout its range followed by apportionment between the two regions.

### Abundance of Exploited Stocks

Stock size estimates of *Loligo* and *Illex* populations in SA 5 and 6 were reviewed in a recent ICNAF Research Document (Sissenwine 1976). All of these estimates are subject to considerable error. Of the estimates available, the most useful are minimum stock size estimates for *Loligo* based from the autumn US bottom trawl survey (Table 22). These estimates in Table 22 indicate a recent increase in abundance of *Loligo* for SA 5 and 6.

Efanov and Puzhakov (1975) estimated the size of the stock of *Illex* from southern New Scotia to Georges Bank during June 1971 as 110,000 tons (about 1.25 billion individuals). No description of details of the method used was given, therefore, it is difficult to judge the accuracy of this estimate. Unfortunately, no more reliable information on *Illex* stock size is available.

### Equilibrium Yield Curves

Because of the brief history of the fishery for squid in SA 5 and 6, and the lack of fishing effort data, the equilibrium yield curve of the fishery can only be estimated in relation to an assumed stock-recruitment functions (see next section).

### Yield per Recruit

Models designed to simulate the effect of fishing on squid (*Loligo* and *Illex*) were developed by Sissenwine and Tibbetts (1976). Instantaneous growth and fishing and natural mortality rates varied on a monthly basis in a realistic manner (most fishing mortality for *Loligo* occurred during winter, while for *Illex*, most occurred during summer). Recruitment was described by the Beverton and Holt (1957) stock recruitment function.
Based on these models, the maximum yield per recruit \( (\text{Y}_{\text{MSY}}) \) of Loligo and Illex is about 38 g and 45 g at an exploitation rate (over the lifespan of the species: \( E_{\text{MSY}} \)) of 75% and 63%, respectively. If recruitment is moderately dependent on spawning stock size (see II.C.2.b.(4)), then the maximum sustainable yield per recruit to the unexploited fishery is 21 g and 25 g for Loligo and Illex, respectively, with \( E_{\text{MSY}} \) equal to 40% and 37%, respectively. For a strong relationship between stock and recruitment (see II.C.2.b.(4)), the corresponding values are 8 g and 15% for Loligo, and 9 g and 15% for Illex. These results, along with the average weight of individuals of the catch at \( E_{\text{MSY}}(\text{W}_{\text{MSY}}) \), according to the above simulations, are summarized in Table 23.

**II.C.3. Cohort Analysis**

Without a reliable method to determine the age of squid landed and the age composition of the catch, only a crude approach to cohort analysis is possible. Ikeda and Sato (1976) approximated the age composition of the Japanese catch of Loligo for the 1972-1973 and 1973-1974 fishing seasons based on length composition and a hypothetical growth function. Cohorts were defined as monthly brood groups, and the estimated brood composition of the catch was used to calculate the number and exploitation rate of Loligo in the April, May, and June broods at the beginning of the fishing season. Sissenwine (1976) was critical of these results because of possible errors in the assignment of individuals to broods, inadequate data on natural mortality, and the small portion of the total catch resulting from the broods that was considered in the analysis.

**II.C.4. Stock-Recruitment Relationships**

The degree of dependence between spawning-stock size and recruitment is unknown. The simulation models (II.C.2.b.(1)) considered three hypothetical relationships in order to estimate the maximum sustainable yield per recruit to the unexploited population for a range of stock-recruitment circumstances. The three relationships considered are shown in Figure 10.

**II.C.5. Current Fishing Status**

Of the two species of squid available in New England waters, the long-finned or winter squid (Loligo pealei) is the species most heavily fished by the USA. It is available inshore from April to September and is trawled by boats from such ports as Point Judith, New Bedford, and Newport. Distant-water fleets catch Loligo offshore during the winter months. The demand for Loligo has mostly been for the export market with only a small amount going toward domestic ethnic sales.

The short-finned or summer squid (Illex illecebrosus) is fished by the USA only in small quantities from April to September. Illex is used mostly for bait in sport fisheries. Except for the Illex trap fisheries from Provincetown and Chatham, the squid is trawled. Foreign boats trawl for Illex during the same months, but on the edge of the continental shelf, whereas the USA fishes on the shelf. There is no significant recreational fishing for either species of squid at present, although it is believed to play an important role as a prey species for gamefish.
Because much of the catch of squid is not reported by species, only estimates of the catch of Loligo and Illex by month are available for some countries. Monthly catches by country of Loligo and Illex for 1974-1975 are given in Tables 24 and 25. Those catches which have not been reported by species are reported as estimated by Stassenwien and Tibbett (1976). By-catch of the squid fishery is considered in section II.C.1.f.(3).

**Optimality**

According to the Fisheries Conservation and Management Act of 1976, the optimum yield of a fishery means the amount of fish—

(a) which will provide the greatest overall benefit to the nation,

with particular reference to food production and recreational opportunities; and

(b) which is prescribed as such on the basis of the maximum sustainable yield from such fishery, as modified by any relevant economic, social, and ecological factors.

The specific criteria to be used to calculate optimum yield in the future will be determined by Regional Councils. In the interim, ICMAF's determination of optimum yield (OY) for 1977 is proposed in this document, with the constraint that US harvesting capacity must be met prior to any allocation of surplus to foreign nationals. The primary objective of ICMAF has been to maximize long-term catch. The proportion of the TAC of each fishery allocated to foreign nations was determined in order to benefit the US based on relevant economic, social, and ecological factors as expressed by advisors to the USA delegation to ICMAF. Some approaches to the management of fisheries, which have been the basis of the advice of the Standing Committee on Research and Statistics (STACRES) considered by ICMAF commissioners in the establishment of TACs is discussed below.

FEDERAL REGISTER, VOL 42, NO. 32—WEDNESDAY, FEBRUARY 16, 1977
As a consequence of differences in the nature of the dynamic models used for assessment, two measures of the instantaneous fishing mortality rate \( F_{\text{max}} \) and \( F_{\text{HSY}} \) have been identified as reference points on which to base regulations for optimum yield. \( F_{\text{max}} \) refers to the instantaneous fishing mortality rate at which average yield per recruit is at a maximum. It is a function of the growth and natural mortality processes within the stock and of the size (age) at which individuals enter (i.e., recruit to) the fishery, and is therefore independent of changes in recruitment. \( F_{\text{HSY}} \), on the other hand, refers to the fishing mortality rate at which the average long-term catch from the stock as a whole is highest and is therefore a function of the total production processes within the stock, including recruitment. Where the average level of recruitment does not change directly in response to changes in stock size, \( F_{\text{max}} \) and \( F_{\text{HSY}} \) will correspond. In the absence of detailed knowledge of the relationship between stock and recruitment for particular stocks, this correspondence was assumed by ICNAF in the presentation of scientific advice on management action prior to 1976.

SAGRES examined the principal features of the \( F_{\text{max}} \) reference point and identified the following as being of particular importance with regard to its adequacy as a basis for management actions:

- (a) The form of the relationship between catch per recruit and fishing mortality \( F \) differs markedly for various stocks according to their growth and natural mortality characteristics. For some stocks, \( F_{\text{max}} \) occurs at a relatively high level of fishing mortality and it may not be clearly defined. Furthermore, its value for each stock is dependent upon the age and pattern of recruitment to the fishery.

(b) Although \( F_{\text{max}} \) defines the fishing mortality rate at which the greatest catch will be obtained from each recruit entering the fishery by taking no account of the relationship between the size of the spawning stock and recruitment, it does not necessarily correspond with that giving the highest average catch \( (\text{HSY}) \) for the stock as a whole (although, as indicated above, it does so if average recruitment does not change with changes in stock size).

(c) Because \( F_{\text{max}} \) takes no account of the stock and recruitment relationship, management measures based on this reference point do not guarantee the maintenance of spawning stock at a level that would ensure the maintenance of an optimum average level of recruitment.

(d) The \( F_{\text{max}} \) level of fishing takes no account of possible economic objectives and factors.

This indicates that the \( F_{\text{max}} \) reference point has potential limitations which have to be recognized and evaluated in the provision of scientific advice on management action. They are obviously greatest with respect to stocks for which the relationship between catch per recruit and fishing mortality has no clearly defined maximum or, if present, it occurs at a relatively high value of fishing mortality rate. In these situations the setting of TACs for catch quotas regulation at the \( F_{\text{max}} \) level may lead to severe reduction in the stock size, reduction in the number of age groups in the exploited stock, large short-term changes in catch (and hence in the magnitude of the short-term changes which must be made in the VY's), and possible recruitment failures due to the generation of too low spawning stock sizes.
The principal element of the biological system governing the adequacy of Fmax as a basis for fishery management is the recruitment process, both its variability due to environmental factors and the relationship between recruitment levels and spawning stock size. At present, little is known about the latter relationship, so that the evaluation has usually been made on a generally qualitative basis using all available information on the size and condition of the stock and the observed variability in recruitment to it together with its relation to other components of the exploited ecosystem.

The relationship is taken into account empirically in some assessment methods.

In view of the possible large adverse consequences of setting the fishing mortality rate too high in cases where there is little known about its adequacy, a more restrictive management system than that based on the Fmax level is required. Through catch regulation, the management system might comprise appropriate measures for controlling the size (age) of recruitment to the fishery, or a combination of the following elements: (1) setting the fishing mortality rate (e.g., through catch regulation), the management system might comprise appropriate measures for controlling the size (age) of recruitment to the stock; (2) setting a target spawning stock size.
principal components of the commercial fisheries (although the total biomass available for exploitation may not decrease). The adoption of management measures, which maintain adequate spawning biomass of the desired species, is particularly important in such cases. The second-tier quota system adopted for SA 5 and 6, establishing a TAC on total catch of all finfish and squid (except menhaden, billfishes, tuna, and large sharks) was designed to provide such a safeguard.

Relevant Socioeconomic Factors

For purposes of this plan, a primary economic consideration is the estimated capacity of the USA industry to harvest and market squid. The determination of this capacity is extremely difficult due to the large number of variables that must be considered. The approach taken here involves consideration of previous species landings modified by relevant considerations (e.g. new markets and/or products, unavailability of traditional finfish species). Additionally, recreational interests should also be considered due to the importance of squid as a bait and prey species.

b. Optimum Yield

The optimum yield from fisheries for Loligo and Illex in SA 5 and 6 was determined by ICNAF commissioners based on scientific, social, and economic considerations. The optimum yield (ICNAF TAC) of Loligo and Illex in SA 5 and 6 for 1977 is 44,000 and 35,000 tons, respectively.

If recruitment of Loligo is moderately dependent on spawning stock size, then F_{opt} is estimated as 0.40 and the average weight of individuals in the catch is estimated as 72.4 g (see section 4d.2). Therefore, if 1.5 billion Loligo are recruited annually, a catch of 44,000 tons would be approximately the maximum sustainable yield under the assumptions of the

Recent minimum stock size estimates indicate from 1.0 billion to 5.0 billion Illex in SA 5 and 6 during the fall of the year, most of which are new recruits (see section 4a.2). Therefore, recruitment of at least 1.5 billion individuals for 1977 seems likely. The assumption is that a moderate stock recruitment relationship at this point in time appears responsible in terms of maintaining stock size based on examination of recent catch levels and estimated stock sizes. For this species the optimum yield for 1977 is approximately equal to the estimated maximum sustainable yield of the fishery.

In the absence of reliable estimates of stock size and uncertainty as to catch statistics of recent years, the 1977 optimum yield of Illex can only be considered as a precautionary quota instituted to regulate the orderly development of the fishery. The maximum sustainable yield of Illex has been estimated as 40,000 tons but this is only a preliminary estimate and therefore it is prudent to restrict catch below this level.

Estimated Domestic Production Potential and Allowable Foreign Surplus

The capacity of the US to exploit squid in 1977 was estimated as 36,500 tons by representatives of the US fishing industry acting as advisors to ICNAF. This would leave 42,500 tons of squid of both species in SA 5 and 6 as a foreign surplus. Specific figures by stock are shown in Table 26.

As was stated previously, the squid fishery and squid markets in the USA are extremely small. On the other hand, foreign fisheries and markets have been quite significant, and this fishery could be quite promising in terms of the European export potential. Before these potential markets can
be exploited to any significant extent, however, major obstacles will have to be resolved by the US fishing industry in terms of harvesting, storage, processing, and marketing. It obviously would be advisable to conduct an economic feasibility study addressing each of these issues vis-a-vis the MT estimated US capacity; however, available time does not permit this. Nevertheless, some industry spokesmen feel these problems can be addressed and have requested the larger allocation to assist development efforts. The US will reconsider its capacity in June, 1977, based on the catches of squid up to that date.

**CONSERVATION AND MANAGEMENT MEASURES APPLICABLE TO FOREIGN FISHERIES**

a. Data to be Reported by Foreign Fishery, ...

Sampling and reporting procedures described below are designed to contribute to continuing needs for assessment of the status of stocks; further, they conform to requirements agreed to under Governing International Fisheries Agreements (GIFAS). However, specific needs may develop from time to time which require a change in standard procedures, or additional data for special studies. Also, the pattern of fisheries will change. These aspects require that the procedures for reporting must be flexible enough to accommodate necessary changes and also imply that some form of archiving of the basic data be developed so that retrieval at a later date in a different format is possible.

All data described below will be reported to the Director, Northeast Fisheries Center, National Marine Fisheries Service, Woods Hole, Massachusetts:

1. Statistical Information Requirements for all Fisheries Catch and Effort:

   Three months after the close of each quarter, catch-effort statistics for biweekly time periods for 0° 30' square areas will be reported by vessel for the previous quarter. These will be reported using 0° 30' square Statlant 218 Forms or magnetic tape, computer cards, or printouts for all species and gear types.

Vessel logbook data are to be available for selected, specific joint assessment studies. The collection of samples, specified in 2. below, should also be annotated in the logbook.

2. Procedures for Scientific Samples

   a. Length-age species composition samples

      (1) Samples should be taken separately for each gear type (e.g. bottom trawl, pelagic trawl, purse seine) and water layer (e.g. on the bottom, midwater level) combination every month for which fishing is pursued by 30-minute square areas throughout the agreement region. One sample should be taken for every 1,000 tons or fraction thereof within the above categories.

      (2) Data to be recorded for each sample:

         (a) Vessel classification

         (b) Method of fishing, e.g. pelagic

         (c) Specific type of trawl, including reference to its construction or actual scale drawing

         (d) Mesh sizes

         (e) Tonnage of the species sampled in the trawl haul

         (f) Total weight of the fish sampled

         (g) Time of day of haul

         (h) Date

         (i) Latitude and longitude of haul

   (3) Sampling procedures (for all species caught)

      (a) Species for which the catch is sorted

         (1) From a single net haul take four random aliquots of approximately 50 fish each. (For species with less than 200 fish in a single trawl haul accumulate samples over trawl hauls until approximately 200 fish are taken.)

FEDERAL REGISTER, VOL. 42, NO. 32—WEDNESDAY, FEBRUARY 16, 1977
Measure fork length for each fish to nearest centimeter, except for herring where the measurement will be the total length to the nearest centimeter below.

Where other measurement systems are used, appropriate conversion information must be supplied. Take a subsample of one fish from each centimeter interval and remove scales, otoliths, and/or statoliths, as appropriate. Record the sex of mature individuals.

3. Species for which catch is not sorted.
   
   From a single trawl take two random aliquots of approximately 30 kilos each.

   Sort to individual species (for "river herring" this means sorting to silwif, Allos pseudoharenus, and blueback, A. aestivus for squid, sort to Loligo and Illex).

   Measure fork length for each fish to nearest centimeter, except for herring where the measurement will be the total length to the nearest centimeter below. Where other measurement systems are used, appropriate conversion information must be supplied.

   Take a subsample of one fish from each centimeter interval and remove scales, otoliths, and/or statoliths, as appropriate. Record the sex of mature individuals.

b. Length-weight samples

   Individuals of one sample of each principal species of fish (i.e., expected yearly catch in area of, e.g., 500 or more tons, per Division per month) should be weighed in grams and measured in millimeters. Each sample will contain 10 fish per centimeter interval. The length range of fish may be accumulated if necessary from small samples taken over several catches and days.

   With small fish, where weighing at sea of individuals is not accurate, appropriate numbers of fish of the same length class shall be weighed in aggregate. Sex shall be recorded for mature individuals.

Loligo and Illex are abundant along the outer edge of the continental shelf throughout SA-5 and 6 during winter and summer, respectively. During the 1970's, distant-water fleets fished Loligo at the edge of the shelf from November through May, while Illex has been fished and taken as by-catch in the same area during June through October. Butterfish are the major by-catch of the squid fishery, but the data available are inadequate to identify specific areas where by-catch is less pronounced. The edge of the continental shelf, particularly to the southwest of Velella Canyon, is also the site of the offshore lobster pot fishery during April through June. After June, lobster pots are gradually moved to shallower water (less than 150 m (500 fathoms)) from July through September and less than 100 m (about 55 fathoms) from October through December. There are few offshore lobster pot fishermen during the first 3 months of the year.

Five specific areas (windows) are proposed in which the estimated squid surplus could be harvested by foreign nationals (Figure 10). Each window is seasonal-specific and will be fished only within the dates specified (Table 33A). The areas and dates are designed to accomplish several goals: (1) minimize fishing conflicts between US and foreign vessels, (2) minimize gear conflicts (i.e., fixed lobster gear and mobile bottom trawls), (3) reduce by-catch to the extent possible, and (4) allow foreign nationals to harvest their particular allocations, if any.
FIGURE II. Proposed squid fishing areas in which foreign nationals would be allowed to harvest surplus to US needs.

Table 27 Proposed dates during which foreign fishing is recommended for each species and window for 1977 only.
Other Limitations, Conditions or Requirements (303(b)(2))

1. Permits

Each foreign vessel engaged in or wishing to engage in harvesting the available surplus must obtain a permit from the Secretary of Commerce.

2. Closed season and areas

National Marine Fisheries Service shall maintain records of vessel days and catch of foreign vessels fishing for squid. Upon determination by the Director that foreign fishing vessels of a country have taken its assigned allocation of short-finned squid and long-finned squid, such determination shall be made to the appropriate agent or a government official of the country. Such notification shall be given to the foreign country not less than 48 hours prior to the closure of such fishery. Upon notification, foreign fishing vessels shall cease the directed fishing for short-finned or long-finned squid in the authorized area, and may continue to take and possess only those amounts of short-finned or long-finned squid in accordance with the incidental catch provision of Section 5.

3. Gear restrictions

It shall be unlawful for any foreign vessel fishing for short- and/or long-finned squid, under this section, to use any trawl nets having, in any part of the net, meshes of dimensions less than 60 mm (2 3/8 inches) as measured by the gauge specified below. Provided, however, that solely for calendar year 1977, vessels fishing for squid that have traditionally used nets with a mesh size of less than 60 mm (2 3/8 inches) may continue to use such nets. Provided further that prior to use of such nets, the Regional Director, Northeast Region is notified of the intent to use such nets and he be allowed to inspect such nets. These mesh sizes relate to manila twine netting when measured wet after use or the equivalent thereof when measured dry before use. The Secretary may, on the basis of scientific advice as to selectivity equivalents, determine the appropriate mesh sizes when trawl nets made of materials other than manila are used or when seine nets are used.

Mesh sizes are measured by a flat wedge-shaped gauge having a taper of 2 centimeters in 8 centimeters and a thickness of 2.3 millimeters, inserted into meshes under a pressure or pull of 5 kilograms. The mesh size of a net shall be taken to be the average of the measurements of any series of twenty consecutive meshes, or least ten meshes from the lacements, and when measured in the codend of the net beginning at the after end and running parallel to the long axis.

4. Other statistical reporting requirements

(1) Operators of all fishing vessels permitted under a Governing International Fisheries Agreement to fish in the Fishery Conservation Zone (FCZ) of the United States in the Atlantic Ocean, North of Cape Hatteras shall record their catches during the permit period on a daily basis according to position, amount, date, type of gear, amount of effort, i.e., number of sets (or hooks) x time gear on the bottom (otter trawl) or fishing (midwater trawl, lines, other gear), discards, catch composition, and disposition of catch. Such vessels shall also record on a daily basis the estimated cumulative catch, including discards, by individual species, of all fish taken in the FCZ. The record shall include the disposition of the catch, while not subtracting any fish offloaded while the vessel is operating in the Fishery Conservation Zone and shall be retained aboard the vessel for the duration of the permit period.

(2) The operator of each foreign fishing vessel operating under permit in the Fishery Conservation Zone shall submit reports of fishing effort and yield through the vessel's designated agent in the United States to the Regional Director, National Marine Fisheries Service, 14 Elm Street, Gloucester, Massachusetts, 01930.

FEDERAL REGISTER, VOL. 42, NO. 32—WEDNESDAY, FEBRUARY 16, 1977
(1) A report will be submitted within 24 hours of the vessel's arrival in the Fishery Conservation Zone.

(11) A report will be submitted weekly to indicate effort and yield Sunday through Saturday. This report should arrive at the Regional Director's office no later than Thursday of the week following the week of the report.

(iii) A report will be submitted within 24 hours of any change in directed fishing by the vessel.

(iv) A report will be submitted within 24 hours after the vessel transfers fishing operations from one window to another.

(v) A report will be submitted within 24 hours after the vessel has ceased fishing operations with intent to depart the Fishery Conservation Zone.

These reports will include vessel identification, reporting circumstances, effort (if applicable), yield (if applicable), and amount and composition of fishlanding (if applicable).

(3) The Secretary may require from time to time additional information concerning fishing operations of fishing vessels of a foreign country. Such information shall be provided in accordance with the procedures provided to the vessels or country.

5. Incidental catch

(1) The taking of herring, mackerel or butterfish is permitted as an incidental catch in the directed short-finned or long-finned squid fishery. The quantity of herring, mackerel, or butterfish shall not exceed the incidental catch allocation provided to the foreign country. When the allocation of herring, mackerel, or butterfish has been reached prior to reaching the allocation of short-finned or long-finned squid, fishing for short-finned or long-finned squid shall cease. Upon determination that a foreign country has caught its assigned quota of short-finned or long-finned squid, the directed fishing by that country will be closed. Subsequently incidental catch of that species shall be limited to no more than 1 percent of the total weight of the catch on board any vessel for which the fishery has been closed.

(2) Foreign vessels fishing for short-finned or long-finned squid are limited with respect to the amount of the following species that they may have onboard: (a) Atlantic bluefin tuna (Thunnus thynnus), (b) sturgeon, (c) striped bass, (d) shore herring, (e) haddock, (f) coastal herring, (g) American shad, (h) American whitefish, (i) American halibut, (j) bluefish, (k) Atlantic cod, (l) striped bass, (m) striped bass, (n) sea bass, (o) hake, (p) herring, (q) mackerel, (r) butterfish, (s) shad, (t) herring, (u) menhaden, (v) mullet, (w) Atlantic menhaden, (x) Atlantic menhaden, (y) American shad, (z) American shad, (aa) American shad, (bb) American shad, (cc) American shad.

6. Restriction

(1) Except as expressly provided for by a permit, no foreign fishing vessel shall:

(11) conduct a directed fishery for any Continental Shelf fishery resource, as such term is defined in the Fishery Conservation and Management Act of 1976 section 3(4), appertaining to the United States;

(12) retain any such Continental Shelf fishery resource, appertaining to the United States taken incidentally from the Continental Shelf; or

(13) fail to return promptly to the sea with a minimum of injury any such Continental Shelf fishery resource.

(2) No operator of any foreign fishing vessel shall conduct any fishing within 12 nautical miles of the baseline used to measure the Territorial Sea of the United States unless expressly authorized by a permit.

7. Fixed gear avoidance

All foreign fishing vessels are prohibited from fishing between the 100-200 fathom depths on the Continental Shelf in the Atlantic north of Cape Hatteras within authorized fishing zones.

Fishing is prohibited in areas of reported fixed gear outside of the 100-200 fathom lines. The operator of each foreign vessel operating...
in an authorized fishing zone shall exercise caution when fishing within 2 nautical miles of such reported gear areas.

Locations of fixed gear in geographic coordinates (latitude and longitude) are broadcast on the first day of each month by Coast Guard Communications Station Boston (NNF) on 472 KHz at 1350 GMT in radiotelegraphy. These summary lists are updated each day at 1350 GMT with a broadcast on the same frequency listing changes in fixed fishing gear locations reported by fishermen. Additionally, voice broadcasts in English are made each day by NNF on 2070 KHz at 1405 GMT and by Coast Guard Communications Station Portsmouth (NNN) on 2070 KHz at 1500 GMT and by the Boston Marine Operator Radio Green Harbor, and Norfolk Marine Operator after their scheduled Marine Information broadcasts. The voice broadcasts list the locations of the fixed gear in LORAN A coordinates. Both the radiotelegraphy and voice broadcasts are numbered sequentially by month, day, and year. A printed monthly summary of fixed gear information is available by contacting: COOPERATIVE (AOL), U.S. Coast Guard, Atlantic Area, Governors Island, New York, N.Y., 10004; Telephone: (212) 264-0644 or (212) 264-0645. All operators of foreign fishing vessels shall copy such daily fixed gear broadcasts and shall maintain on the bridge of such vessel a chart showing the current location of fixed gear in areas where it will be fishing.

5. Sanctions

If any foreign fishing vessel, for which a permit has been issued, fails to pay any civil or criminal monetary penalty imposed pursuant to the Act, the Secretary shall:

(a) revoke such permit, with or without prejudice to the right of the foreign nation involved to obtain a permit for such vessel in any subsequent year;

(b) suspend such permit for the period of time deemed appropriate; or

(c) impose additional conditions and restrictions on the approved application of the foreign nation involved and on any permit issued under such application.

Provided however that any permit which is suspended pursuant to this paragraph for nonpayment of a civil penalty shall be reinstated by the Secretary upon the payment of such civil penalty together with interest thereon at the prevailing rate.

Coastal State Fishery Conservation and Management Measures Recommended for Incorporation into this Plan

Other Measures

Relationship of Conservation and Management Measures to Conservation Goals

The proposed management plan contains catch restrictions deemed necessary to meet the conservation requirements of Illex and Loligo in SA 5 and 6. A total allowable surplus catch limitation, based on the best scientific evidence presently available, has been incorporated to prevent the possible overexploitation of squid and promote the orderly development of the fishery, recognizing that review and readjustments of the GV's may be necessary when additional data are available for analysis. An additional important consideration of the plan is the inclusion of data collection
requirements, which will provide vital data (presently a limiting factor) to update and refine assessment models required to establish more precise OY limitations. Another essential requirement also limits foreign fishing activity spatially and temporally to minimize conflicts between the offshore lobster pot fishery and the foreign squid fishery in SA 5 and 6.

Relationship of Conservation and Management Measures to National Standards (201)(g)(1)(A)

The proposed conservation and management measures for squid subscribe to the national standards of the Fishery and Conservation Management Act of 1976. Since the best scientific information available indicates that neither Loligo nor Illex can be separated into any distinguishable stocks, both species were treated as a single stock. Also, since the total availability minus US capacity is designed to ensure optimum sustainable yield, no long-term overfishing of the species is expected.

Opening the fishing seasons during winter and summer accounts for the for the variation in the seasonality of the fisheries for the two species. The area regulations that accompany the seasonal regulations are designed to minimize losses of gear in the lobster pot fisheries.

No quotas have been recommended for the individual states within the USA, thus no state-based discriminatory policies are being incorporated into the plan. The efficient utilization of the resource is being fostered, by capping the seasons at those times when the catch per unit of effort is best. In addition, the OY of Illex is high enough that it might encourage a shifting of vessels from other less productive fisheries or from those fisheries in which the TAC has been reached, to the Illex fishery.

OFFICE OF THE SPECIAL REPRESENTATIVE FOR TRADE NEGOTIATIONS

GENERALIZED SYSTEM OF PREFERENCES

Results of Review of Proposals of Changes in Product Coverage
NOTICES

OFFICE OF THE SPECIAL REPRESENTATIVE FOR TRADE NEGOTIATIONS

GENERALIZED SYSTEM OF PREFERENCES

Results of Review of Proposals for Changes in Product Coverage of the Generalized System of Preferences

1. This publication describes the results of the second semi-annual review of proposals for changes in the list of imported articles eligible for duty-free treatment under the Generalized System of Preferences (GSP), provided for in Title V of the Trade Act of 1974, 19 U.S.C. 2461-2465, 88 Stat. 2960-2971.

The review was conducted pursuant to regulations that are codified at 15 C.F.R. Ch. XX, Part 2007. As a result of this review 25 articles, which are listed in part 4 of this notice, were designated as eligible for GSP benefits by Executive Order No. 11960, of January 19, 1977, (42 FR 4317, January 24, 1977).

This review included (1) consideration by the interagency Trade Policy Staff Committee (TFSC) of actions requested in petitions to the TFSC from interested parties; and (2) consideration of articles that were proposed for GSP eligibility by the TFSC on its own motion.

2. Petitions. Petitions from interested parties, which were accepted for consideration by the TFSC in connection with this review, were listed in the Federal Register issues of November 19 and November 29, 1976, and were included in the public hearings held from December 14 to 21, 1976. The TFSC recommended action (which was taken by Executive Order No. 11960) on some of these petitions, denied other petitions, and deferred action on still others. In addition, Executive Order No. 11960 took action with respect to one petition (covering artificial flowers) that was held over from the first semi-annual review, and the TFSC terminated its review of another petition (covering electric motors) that had been held over from that first review, by denying the petition.

Petitions on which final decisions were made are listed in Annex I(A). Annex I(A) also lists certain petitions that were withdrawn by the petitioners, the withdrawal of which had not previously been announced in a public notice.

3. TFSC Proposals. Some of the articles in petitions or designated by the TFSC on its own motion were listed in the Federal Register issue of May 14, 1976, and others were listed in the Federal Register issue of November 19, 1976. The articles listed in the Federal Register issue of May 14 were included in public hearings held by the TFSC June 1-4, 1976, and were the subject of advice from the U.S. International Trade Commission (USITC) as to the probable economic effects of designating them for GSP benefits. Several of these articles were designated by Executive Order No. 11960 as eligible for GSP benefits.

The articles listed in the Federal Register issue of November 19 as being proposed for GSP eligibility by the TFSC on its own motion were included in public hearings held December 14-21, 1976. Some of these articles were not considered further at this time, however, because they had not been the subject of USITC advice as to the probable economic effects of designating them for GSP benefits, as is required by sections 503(a) and 131 of the Trade Act of 1974. Annex I(B) lists articles proposed by the TFSC on its own motion that either (1) were designated for GSP benefits by Executive Order No. 11960, or (2) were not recommended for such designation by the TFSC. Annex II(B) lists articles proposed by the TFSC on its own motion that remain pending.

The USITC was in the process of preparing advice on the articles described in the preceding paragraph, and on certain articles that were the subjects of petitions, while the review reported herein was being conducted. This advice was received on January 22, 1977, after the conclusion of this review. The articles covered by this advice will be considered by the TFSC in the future.

4. Disposition of petitions and other proposals. The 28 articles designated by Executive Order No. 11960 as eligible for GSP benefits are listed below. Executive Order No. 11969 took no other action with respect to the GSP. All petitions or TFSC proposals with respect to other articles, not listed below, either were denied or continue to be pending. A complete listing showing the disposition of each petition and proposal is set forth in the Annexes to this notice.

ARTICLES DESIGNATED BY EO. 11960, AS ELIGIBLE FOR THE GSP

Tariff No. Article
100.73 Horses valued not over $150 per head
111.10 Dried, salted, or pickled n.a.p.f. in air-tight containers and weighing not over 150 pounds
111.60 Fish, salted or pickled n.a.p.f. in air-tight containers and weighing not over 150 pounds
121.35 Salt and kip lining leather
121.55 Buffalo leather
125.01 Artificial n.g. specifically provided for in the Tariff Schedules
125.10 Lily bulbs
125.15 Narcissus bulbs
125.20 Crocus corms
125.50 Fruit trees, grafted or budded; fruit plant cuttings and seedlings
136.00 Millied grain products, n.a.p.f., not fit for human consumption
136.41 Carrots, fresh, chilled or frozen, under 4 inches long
136.60 Celery, fresh, chilled or frozen, imported from April 15-July 31
136.10 Endive, including Whitleaf chicory, fresh, chilled or frozen
136.40 Hazardsad, fresh, chilled or frozen
136.50 Lentils fresh, chilled or frozen
137.71 Brussels sprouts, fresh, chilled or frozen
140.21 Chickpeas, or garbanzos, dried, desalted or dehydrated, not split
176.49 Sesam oil, unit for use as food
177.40 Marine animal oils n.e.s.
389.61 Artificial flowers of man-made fibers
403.86 Ethoxyquin
404.81 Mecaphos
642.09 Wire strand of copper
642.80 Wire strand of copper
702.70 Natural sponge articles
709.50 Articles not specifically provided for in the Tariff Schedules

All designations, listed above become effective with respect to articles that are both (1) imported on or after January 1, 1976, and (2) entered, or withdrawn from warehouse for consumption, on or after March 1, 1977. As used in the preceding sentence, "imported" means physically arrived at the port, and "entered, or withdrawn from warehouse for consumption", means cleared through customs procedures.

WILLIAM B. KELLY, JR.,
Chairman, Trade Policy
Staff Committee.

DEPARTMENT OF TRANSPORTATION

Urban Mass Transportation Administration

TRANSPORTATION FOR ELDERLY AND HANDICAPPED PERSONS

Transit Bus Requirements
CHAPTER VI—URBAN MASS TRANSPORTATION, ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[OST Docket No. 51; Notice 77-7]

PART 609—TRANSPORTATION FOR ELDERLY AND HANDICAPPED PERSONS

Amendments to Transit Bus Requirements

AGENCY: Urban Mass Transportation Administration, Department of Transportation.

SUMMARY: One purpose of this document is to amend recently adopted regulations establishing bus design standards for transportation of elderly and handicapped persons. (See 41 FR 45842.) Those regulations require, among other things, that after February 15, 1977 all new, standard, full-size urban transit buses for which a recipient of Urban Mass Transportation Administration (“UMTA”) funds issues a bid solicitation must have a 24-inch effective floor height and 8-inch high front door steps. The purpose of this amendment is to postpone the effective date of only these requirements until March 15, 1977.

A second purpose of this document is to notify the public that the Department of Transportation (DOT) will hold a public hearing on March 15, 1977 in Washington, D.C. to obtain advice with respect to advanced design bus development and the Transbus program. The specific issues to be addressed at the March 15, 1977 public hearing are set out below under the heading “Supplementary Information.”

The third purpose of this document is to announce the adoption of specific policies to enable recipients of UMTA funds to issue bid solicitations for current and advanced design transit buses under appropriate procurement policies until such time as a final decision is reached and that decision is implemented. The fourth purpose is to solicit advice on such procurement procedures.

DATES: 1. The policies for the procurement of advanced design buses set forth in this document will become effective on February 14, 1977; 2. The Public Hearing on Transbus will be held in Washington, D.C. on March 15, 1977. Written submissions will be accepted until April 1, 1977. A final decision on Transbus and the related questions of provisions for the elderly and handicapped will be announced not later than May 27, 1977; 3. Comments and advice on bus procurement procedures may be submitted on or before February 24, 1977.

ADDRESSES: Comments on the issues may be submitted to the following address:

Docket Clerk, Office of the General Counsel, TGC-10, ATTN: Docket No. 51, Department of Transportation, 400 7th Street, S.W., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

David A. Jewell, Director of Public Affairs, Office of the Secretary of Transportation, 400 7th Street, S.W., Washington, D.C. 20590. (202) 426-4570.

SUPPLEMENTARY INFORMATION:

1. Introduction. UMTA funds 80 percent of the cost of transit buses and reviews specifications for such buses. On August 2, 1976 an UMTA policy statement requiring improvements in transit bus design to facilitate transportation of the elderly and handicapped and allowing purchase of advanced design buses was issued. The Secretary is concerned about whether this policy is adequate to meet the needs of the elderly and handicapped, encourages development of new technology and promotes a viable and competitive bus manufacturing industry.

Central to these issues is the federally-funded Transbus program which began in 1971 with the objectives of developing a new generation of better and more attractive transit buses, providing elderly and handicapped passengers better access to mass transportation and encouraging competition in the bus manufacturing industry. In 1976 a decision was made not to proceed further with the Transbus program.

This decision, as well as the corporate decisions of each of the three transit bus manufacturers, placed the manufacturers in different competitive positions. One manufacturer has stated that it is in the manufacturing industry’s best interests to have a program which will encourage the use of advanced design buses purchased after a certain date. The Secretary determined that the program, as established, does not meet the objectives of providing a viable and competitive bus manufacturing industry.

2. Amendments to regulations on transportation for elderly and handicapped persons. This amendment (set forth at the end of this document) delays the February 15 effective date for the requirements on floor and step heights and tread depth, but does not delay the wheelchair accessibility option requirement.

3. Public hearing on transbus and related issues. With regard to the Transbus program and related issues, the views of transit bus manufacturers, transit operators, elderly and handicapped persons and other members of the public are desired to assist the Secretary in resolving the following issues:

A. Should the Secretary (i) require or (ii) encourage the use of a Transbus performance specification for all new transit buses purchased after a certain date?

B. If Transbus is required: (i) what should be the effective date of that requirement? (ii) what should be its floor height? (iii) what equipment at what location should be specified or optional to assist non-ambulatory and semi-ambulatory passengers? (iv) what further research and development efforts, if any, are necessary? (v) what should be the Federal role (including financing) in bringing Transbus into production and accomplishing these objectives?

C. If the Secretary determines only to encourage (rather than require) Transbus, what should be the Federal role in accomplishing that goal?

The first in the resolution of these issues, a public hearing will be held on March 15, 1977 from 9:30 a.m. to 12:00 noon and 2:00 p.m. to 5:00 p.m. at the DOT Headquarters, 400 7th Street, S.W., Washington, D.C. in Room 2230. The hearing will seek to assure a fair opportunity for all interested parties to present their views.

Requests to testify will be accepted from public officials, representatives of recognized organizations and manufacturers. Time allotments will be governed by the number of requests received. Prospective witnesses with similar views may be asked to combine their presentations. In the event that accommodation cannot be made, assignment will be by lot.

Any public official or representative of an organization desiring to participate at the hearing should write directly to the General Counsel (marking “Transbus hearing” on the envelope) at the above address before March 1, 1977 giving the following information:

1. Name and address.

2. Telephone number during normal working hours.

3. Capacity in which presentation will be made.

4. Principal issue to be addressed.

5. Time desired.

Written comments should be received on or before April 1, 1977. The Secretary will make a decision on these issues no later than May 27, 1977.

4. Policies and procedures. Until such time as a final decision is reached and implemented, a recipient of UMTA funds may proceed, at its choice, with the procurement of either a current or advanced design bus, which offers the wheelchair option and which receives UMTA project approval. In either case, UMTA will continue to provide 80 per-
RULES AND REGULATIONS

Accordingly, 49 CFR Part 609 is amended by revising §609.15(a) to read as set forth below.

Effective date: This revision is effective on February 14, 1977.

Issued in Washington, D.C., on February 14, 1977.

Brock Adams,
Secretary of Transportation.

49 CFR 609.15(a) is revised to read as follows:

§ 609.15 Buses.

(a) Paragraph (b) of this section applies to new, standard, full-size urban transit buses (of current or advanced design) for which a recipient of UMTA funds issues a procurement solicitation containing UMTA-approved vehicle specifications after February 14, 1977. Paragraph (c) of this section applies to new, standard full-size urban transit buses (of current or advanced design) for which an UMTA grantee issues a procurement solicitation containing UMTA-approved vehicle specifications after May 27, 1977. The remaining paragraphs of this section apply to these and all other transit buses exceeding 22 feet in length for which an UMTA grantee issues, on or after May 27, 1977, a procurement solicitation containing UMTA-approved vehicle specifications. For any transit bus exceeding 22 feet in length, but not otherwise described above, requirements concerning wheelchair accessibility, floor height, or step height will be handled on a case-by-case basis as part of the project approval process.
