
Statement of the case.

forever, or for a very indefinite time. This could not have been the intention of the parties.

We are of opinion that the testimony shows, in any view that can be taken of it, that the condition was fully complied with and performed, and with it passed all right of reversion to the grantor or his heirs.

The rulings of the Circuit Court to which exceptions were taken were in conformity to these views, and its

JUDGMENT IS AFFIRMED.

JACOBS v. BAKER.

1. *Semble* that an improvement in the plan of constructing a jail, is not a subject of patent within the Patent Acts of 1836 or 1842.
2. Jacobs was not the first inventor of the improvements patented to him in 1859 and 1860, for improvements in the construction of jails.

JACOBS filed a bill in the Circuit Court for Southern Ohio against Baker, seeking relief for the infringement of four separate patents, which had been granted to him, Jacobs, *for improvements in the construction of prisons*. The bill set forth the different patents.

The first, dated January 7th, 1859, was for an improvement in the construction of prisons, which the complainant set forth in his specification with very numerous plates and designs. The claim concluded thus: "What I claim as my invention, and desire to secure by letters patent, is a secret passage, or guard-chamber, around the outside of an iron-plate jail, and between said jail and a surrounding inclosure, constructed and arranged, substantially as described, for the purpose set forth." [The purpose was to allow the keeper to oversee and overhear the prisoners, without their being conscious of his presence.]

The next patent was dated 20th December, 1859, and purported to be for an "improvement in iron-plate jails." The claim was for "the improved iron walls for the same, con-

Statement of the case.

sisting of the following parts, arranged and united as set forth, to wit: the entire wall plates (A) having their edges closely abutting; the joint plates (e) united to and uniting the plate A, by rivets (i), which have their riveted ends inwards, and countersunk to the depth of the thickness of the plate A, in the manner and for the purposes herein set forth." This specification was also accompanied by numerous plates.

The third patent, dated 21st February, 1860, was for an "improvement in joining plates of metal," and was stated to be specially applicable to prisons. The claim was for "the construction of the joint, made by means of the closely abutting plates (A A), and the flat and semicylindrical plates B B, and rivets (c), substantially in the manner and for the purpose set forth." This, too, had numerous drawings.

The fourth patent, dated 24th July, 1860, was for an "improvement in iron prisons." The claim was for "constructing and arranging plate-iron cells in jails, separately from each other, with vertical spaces (e), between the cells, upon the same level, and horizontal spaces, between cells, arranged one above another, substantially as and for the purpose described." This was also profusely illustrated by drawings.

The bill, which averred that the complainant was the original and first inventor of all these improvements, and that the defendant was an infringer of his patents, asked that the defendant might answer the bill under oath, and be compelled to state how extensively, and where he had sold the improvements patented, and to describe his modes of construction, &c.

The defendant did answer on oath, denying that the improvements were original with the complainant or new, but averring that they had been long in use; and setting out various jails in different parts of the country where they had been used in 1855, 1857, 1858, &c., all before the date of the patents relied on.

A large amount of testimony was taken on both sides, upon which the court below, considering that the defendant had established his case, dismissed the bill with costs. The case was now here on an appeal by the patentee.

Opinion of the court.

Mr. Fisher, for the appellant, assuming that the matters embraced by the patents were the proper subjects of patents within the Patent Acts, went into an elaborate examination of the testimony to show that the inventions were original with the patentee.

No opposing counsel.

Mr. Justice GRIER delivered the opinion of the court.

The patent act of 1836* enumerated the discoveries or inventions for which patents shall be issued, and describes them as "any new and useful art, machine, manufacture, or composition of matter."

We have been at some loss to discover under which category to class the four patents which are the subjects of this bill. The complainant alleges that he has invented a new and useful improvement in the construction of *jails*. Now a jail can hardly come under the denomination of "a machine;" nor, though made by hands, can it well be classed with "manufactures;" nor, although compounded of matter, can it be termed a "composition of matter," in the meaning of the patent act. "But if the subject-matter be neither a machine nor a manufacture, nor a composition of matter, then," says an author on the subject of patents,† "it *must* be an art, for there can be no valid patent except it be for *a thing made*, or for the art or *process of making* a thing." Now, without attempting to define the term "art" with logical accuracy, we take as examples of it, some things which, in their concrete form, exhibit what we all concede to come within a correct definition, such as the art of printing, that of telegraphy, or that of photography. The art of tanning leather might also come within the category, because it requires various processes and manipulations. The difficulty still exists, however, under which category of the patent act an improvement in the construction of jails is to be classed, or whether under any.

The patent act of 1842‡ gives a copyright for "new and

Opinion of the court.

original designs for manufacture, whether of metal or other material, for bust, statue, &c., or any new and original shape or configuration of any article of manufacture, to any inventor who shall desire to obtain an exclusive property, to make, use, and vend the same, or *copies* of the same."

Now, although the complainant might contend (as one would suppose from the immense number of plans, designs, and drawings with which the record in the case has been incumbered) that his patent could be supported under this act, yet still the difficulty remains whether the erection of a jail can be treated as the infringement of a *copyright*.

But waiving all these difficulties as hypercritical, and assuming the correctness of the positions taken, that whatever is neither a machine, nor a manufacture, nor a composition of matter, must (*ex necessitate*) be "an art;" that a jail is a thing "made;" and that the patent is for the "*process* of making it," let us examine the case as presented by the bill and answer.

The bill relies upon four several patents which it sets forth. They are dated January 7th and 20th December, 1859; 21st February and 24th July, 1860. It would seem from the quick succession of these patents and before the plans for building jails which they severally suggested could well be put practically into operation, and before any inquiry was made as to how other persons constructed jails, that as a new idea came into the complainant's mind, he immediately proceeded to the Patent Office to get it patented.

It is not necessary to the decision of this case to examine whether all or any of the suggestions made by the complainant were proper subjects of patent. The bill presents a number of interrogatories to the defendant and requires him to answer them under oath. The answer of the defendant denies that the complainant was the original and first inventor of the several inventions claimed, or of any of them, and avers that the devices described in the complainant's patents were well known, and in use prior to the pretended invention of them by the complainant. And it enumerates many persons who had used the devices before the complainant.

Statement of the case.

The record presents no question of law as to the construction of these patents. The only issues were of fact. It would be a tedious as well as an unprofitable task to attempt to vindicate the correctness of our decision of this case by quoting the testimony and examining the volume of plates annexed to it. The decision could never be a precedent in any other case. It is enough to say that we see no reason to doubt the correctness of the decision of the Circuit Court on the issues made, or the pleadings.

DECREE AFFIRMED.

DRURY v. CROSS.

1. A sale, far below value, of a railroad, with its franchises, rolling stock, &c., under a decree of foreclosure, set aside as fraudulent against creditors; the sale having been made under a scheme between the directors of the road and the purchasers, by which the directors escaped liability on indorsements which they had made for the railroad company. And the purchasers held to be trustees to the creditors complainant, for the full value of the property purchased, less a sum which the purchasers had actually paid for a large lien claim, presented as for its apparent amount, but which they had bought at a large discount. Interest on the balance, from the day of purchase to the day of final decree in the suit, to be added.
2. But because the full value of the property sold was not shown with sufficient certainty, the case was sent back for ascertainment of it by a master.

APPEAL from the Circuit Court for Wisconsin.

The case was this: Bailey & Co., of Liverpool, England, held notes against the Milwaukee and Superior Railroad Company, indorsed by four of its directors, for about \$21,000 (the price of iron furnished to lay the road), and as collateral security for payment, \$42,000 in mortgage bonds of the road. Two hundred and eighty thousand dollars in similar bonds, but which had never been *issued*, were sealed up and deposited with M. K. Jesup & Co., *not to be issued* until the debt to Bailey & Co. was paid, and twenty-seven miles of the road were built. The company was managed by a board of seven directors; of whom four made a quorum.
