

RECORD RAWINSONDE  
(con't from page 1)

failure in the flight instrument or ground equipment resulting in loss of signal. Other high soundings reached by this activity since the beginning of the International Geophysical Year on 1 July, 1957 and since the use of special 800 gram balloons have been to 136,000 and 131,000 feet with several others above 110,000 feet.

Personnel in the upper air section of the Navy Weather Service Office on Adak who made this noteworthy observation are Dale R. Barnett, Aerographers Mate First Class, USN, (RAWINSONDE Supervisor) of Marshall, Illinois, James E. Gadow, Aerographers Mate First Class, USN (RAWINSONDE Observer) of Preston, Maryland and Dale A. Clay, Aerographers Mate Second Class, USN, (RAWINSONDE Observer) of Hemet, California. Since there is a high competitive spirit in the Navy and other weather services in reaching the highest average and maximum altitude in RAWINSONDE Observations, the personnel who made this observation and this Command are proud of this apparent record altitude observation.

WHO WANTS A TRANSFER??

San Diego (AFPS)- Something new has been added to the Long Beach-based destroyer tender Frontier-and it's not a missile.

It's a second mess line.

Here are the details as they were recently proposed in several plans of the day.

"A new system will take effect in your General Mess. Two lines will be used. The starboard line will continue to serve the regular menu as posted weekly. The port line will serve frankfurters, hamburgers, potato chips and rolls at all meals.

"The salad and dessert bar will be available to all hands. Complete self-service will be in effect, but you will be required to eat all that you place on your tray. The procedure will be in effect at all noon and evening meals. . ."

"FLEET RESERVE ASSOCIATION"

Once again we wish to bring to the attention of all that an organization can function only when it has membership.

Here on Adak there are a great number who are eligible to belong to the F.R.A. but have not joined because those --who belong have forgotten that the club can only do its best when its membership is large; However even with a large membership the club will not function if all are not behind it. This club is like any other club and we can make it a place where all want to go if we get behind it. We have elected new Officers and we are sure that they will do their best to make the club what we all want if everyone of us help them, It is of course up to the officers to do the work, but it is every members job to attend meetings and to come to the club when it is open as it can only operate when it has sufficient customers. We now wish to extend to all members of the F.R.A., their ladies, and their guests, and invitation to a Banquet for the Installation of Officers to be held on 2 June 1958. The club will open at 1800. The Installation ceremonies will be at 1900. The Dinner will then follow --at approximately 1930. We have gone to the great length to bring to all a very wonderful evening which will include dancing, now then just let me say once again "Lets all come and enjoy ourself and get behind our club to make this coming year the best year here on the Rock! Yes, it is all free. See you at the F.R.A.

-----  
Firemen in Battle Creek, Mich., were given permission to set fire to a condemned house so they could practice the latest firefighting techniques; it took them two hours and 7 cans of kerosene to get the blaze started.

-----  
In Dallas, Texas, a nurse proprietor reported to police that someone had stolen \$480.00 from his safe. When the police went to investigate, they found the safe's combination on the wall above the safe. "Neatly pasted".
