NORTHERN REPAIRS ALLEYS

Steel Shavings Used for Cleaning and Polishing the Floor.

The Northern is busily engaged in putting the bowling alleys in good shape for the winter's games. After long use the alleys become dirty and gummed. In order to remove this steel shavings are used which the workmen place beneath their feet, and then by foot and leg power the alleys are cleaned and at the same time polished, after which a coating of shellac varnish is applied.

The bowling alleys of the Northern were in constant use during the winter and summer. At the present time there is a lull between the two seasons, advantage of which is being taken in order to put the alleys in shape for the better times which will be ushered in with the announcement of the presidential election returns next Tuesday evening.

Alaska Game Field of World

J. A. McGuire, editor and owner of the Outdoor Life Magazine, of Denver, says:

"In fifteen years from now Alaska and British Columbia will be the stamping ground of the sportsmen of this continent.

"Alaska not only grows the largest bears in the world, but also the largest moose, and these two facts will invite the attention of the whole world to this great land.
