

# The HOMER HOMESTEADER

Vol. 4 No. 30

Homer

Alaska

Nov. 10--1947

## FACTS ABOUT HOMER

For those who receive the Homesteader in far away places, we might tell you that to date we have had only a few killing frosts.

We went out and picked a nice bunch of romanes today and only yesterday we brought in our cabbage and celery.

There is no frost in the ground and we have had very little snow. At present the ground is bare and even the hill is still brown.

So far it has been an old fashioned winter as when Homer was likened to the banana belt of Alaska.

Our summer deficiency in moisture, which by the way, broke records, has been followed by an above the average precipitation.

### New Mail Schedule

Mail days: \_\_\_\_\_ Sunday--Tuesday--Thursday--Saturday---each week.  
On Mondays and Fridays P.M. U.C.-3s will fly to Naktmek  
Small plane will make local run on Wednesday.

We have had no word as to any change in the Alaska Airline schedule.

### Notice
