Facts About Arizona.

The Territory of Arizona was organized February 24, 1863.

It contains about 70,000,000 acres.

It is what may be termed a mountainous region, although there are immense valleys on many streams; also between its hills and mountains.

The principal ranges of mountains are the San Francisco, Bill Williams, Mogollon, Sierra Blanca, Sierra Prieta, Pinal, Apache, Cordilleras de Gila, Natanes, Chiricahua, Dragoon, Santa Rita, Graham, Aztec, Wallapai, Antelope, Cerbat and Hacquehilla.

The principal peaks are, the San Francisco, about 14,000 feet above the level of the sea; Sierra Blanca, about 12,000; Bill Williams, about 11,000, and Mount Union, about 10,000. The highest mountains are in Northern Arizona.

The mountain ranges and their foot-hills are covered with pine, oak, cedar, juniper, poplar and other timber; and we feel safe in asserting that one-third of the Territory is timber land. As most of this timber is large and of fair quality, it will, in time, prove a vast source of wealth.

The principal rivers are, the Colorado, which is navigable for hundreds of miles; the Gila, Salt, Verde, Bonita, Prieta, San Pedro, Beaver, Santa Cruz, White, Sipicue, Bill Williams, and Little Colorado. Creeks and springs are numerous, and water is found everywhere by digging.

The principal towns are, Yuma, Ehrenberg, and Hardyville, on the Colorado; Wickenburg, on Hassayampa creek; Prescott, on Granite creek; Phœnix, on Salt river; Florence, Pima Villages, Maricopa Wells, and Adamsville, on the Gila; Tucson, on the Santa Cruz; Cerbat, Mineral Park and Chloride, in Wallapai mining district.

The Military posts are, Whipple, near Prescott; Verde, on Upper Verde River; McDowell, near junction of Verde with Salt [illegible] a short distance above Phœnix; Camp Apache, on White river, in White mountains; [illegible], (Apache Pass) in Chiricahua range; Lowell, near Tucson; Grant, on San Carlos; Mojave, on the Colorado; Beale Springs, in the Wallapai country. These posts receive supplies from Yuma Depot.

Counties—Yavapai, which has a greater number of white inhabitants, a larger area, more mountain ranges, streams, timber and mineral deposits than any other county in the Territory.

Pima—which has the largest town in the Territory—Tucson—and the largest population, two-thirds of whom are Mexicans and semi-civilized Indians.

Maricopa county lies between Pima and Yavapai, and is noted for its agricultural productions, which far exceed those of any other county in the Territory.

Yuma county contains much choice farming and grazing lands. Her chief towns—Yuma and Ehrenberg—have extensive trade with the people of the interior.

Mohave county is now gaining rapidly on her sisters, in wealth and population. She has mines, grazing and farming lands that are among the best on the continent.

The territory formerly known as Pah-Ute county, has been handed over to the State of Nevada.

As a correct census of "whites" and Indians has never been taken, we will take the responsibility of placing the number of whites at about 10,000, and the number of Indians at about 20,000, which gives the Territory a population of about 30,000. This estimate includes Mexicans and tame Indians.

The principal lines of travel are from East to West, near the thirty-fifth and thirty-second parallels of latitude, and it is confident, expected that a railroad will soon be built on each of these routes.

The Territory is well provided with climate—or rather climates—and all persons can suit themselves in this matter, for while there are portions of Arizona hotter than the hinges of—a smelting furnace in full blast, there are other places as cold as New England. Then, there is a medium between these two extremes, and this medium is to be found in places in every county of the Territory.

It has been demonstrated that most of the agricultural land of the Territory is capable of producing two crops a year, and every kind of crop. Grass grows everywhere, save upon a few deserts, and no better country for raising stock is known to the writer.

But the crowning glory of Arizona lies in her mines of gold, silver, copper, salt and coal, which crop out all over her surface, and causes us to feel that 'we may be happy yet,' and rich, too.

The Territory is bounded on the north by Utah, and on the east by New Mexico, on the south by the Mexican State of Sonora, and on the west by California and Nevada.

The settled portion of Arizona is not very near any place; in fact, to get here from any outside point, long stretches of uninhabited country have to be passed over.

From San Bernardino, California, to Prescott, is 421 miles by the stage road. A mail wagon runs each way twice a week.

From Pioche, Nevada, to Prescott, is 405 miles; no public conveyance.

From Albuquerque, New Mexico, to Prescott, is 400 miles; no public conveyance; no mail.

From Salt Lake City to Prescott, is 500 miles; mail once a week; no public conveyance.

From San Diego, California, to Yuma, is 180 miles; from Yuma to Tucson, 300 miles; stages carrying mail, three times a week.

From Mesilla, New Mexico, to Tucson, is about 300 miles; mail wagon twice a week.

From Altar, New Mexico, to Tucson, is about 150 miles; mail once a week; no public conveyance.

Travel to and fro on all the routes mentioned is constantly increasing. Many are coming into Arizona to make their homes here, and since the subjugation of the Apaches by General Crook, men who left here in years past, are returning to Arizona as to the home of their adoption.

EXPORT OF PRECIOUS METALS.—The statement of the general superintendant of Wells, Fargo & Co., furnished to the Alta, shows that the production of precious metals west of the Missouri was larger in 1873 than any previous year, and $10,000,000 larger than in 1872, and states the total product at $72,250,693. The report says the figures do not furnish a correct basis for estimating the product of Arizona, as W. F. & Co. have no office in the Territory and no means of arriving at facts in the case; but the report gives the production of the Territory at $47,778. Evidently only a small portion of the gold and silver exported from Arizona passed through W. F. & Co.'s hands, as the report of the assessor of Mohave county shows that county alone sent out $66,500, mostly silver ore, and the yield of Yavapai county, in gold and silver, is estimated at not less than $125,000. The yield of California foots up $18,025,700, and that of Nevada, $35,524,400.

Feed is becoming excellent and abundant everywhere in southern California.

Railroads.

The San Diego World, refering to the resumption of work on the west end of the Texas Pacific railroad, says there is no doubt that the first section of ten miles will be fully completed within the time required by law. The World very pertinently suggests that the Southern Utah road, now being built, should not stop at Callville, its proposed terminus, but should be continued on to the Needles, the proposed crossing of the Atlantic & Pacific railroad.

We believe that the Utah southern will reach the boundaries of Arizona sooner than any other railroad, and also believe that when it reaches the Colorado at Callville, unless prior to that time the obstructions in the river below Callville are removed by congressional aid, the necessities of the case will cause its construction down the river as far as Hardyville, thirty-five miles above the Needles, to which point steamers ascend the river at all seasons of the year.

While we agree with the World that San Diego is the port which should, and will eventually, control the trade of Arizona, it seems now that the Southern Pacific is likely to reach our borders and divert most of our trade to San Francisco and keep it there for some years before any road from San Diego will connect Arizona with that port.

TWELVE THOUSAND WORDS IN TWENTY-TWO AND A HALF MINUTES.—P. M. Gen. Creswell having been taken to task for the complimentary expression in his report concerning the automatic telegraph, last evening resolved to make good all he had said, arranged with the company for the transmission of the President's message from Washington to this city. Accordingly, accompanied by Messrs Ramsdell and Garfield, he took station at the company's office at Washington, while Postmaster James represented him at this terminus. Some preliminary messages of greeting and arrangements were first sent, then at precisely 9:56 o'clock the President's message was announced to be coming, and a very loud whiz filled one office as a wheel began to revolve, turning "take" after "take" of the document. The whiz continued, broken only by short intermissions to supply new type, until 18 minutes and 30 seconds beyond the hour, when it stopped as suddenly as it began, and the President's message of 12,000 words was in the office in the form of 23 bundles of narrow paper hung on as many hooks. The time occupied in transmission was 22½ minutes, and this on a single wire. The number of words sent a minute was 500. The message was then transmitted to Washington in about the same time it had taken to come, and then Postmaster James bade "good night" to the Postmaster-General, and Puck's promise to girdle the earth in 40 minutes was put to shame.—[N. Y. World, Dec. 15.

OTHER "FRIENDLY DIGS."—The following is from the San Diego World:

We have lying before us the seventh number of the Daily Arizona MINER. We have refrained from noticing this journal until to-day on account of a press of matter. It is an exceedingly neat sheet typographically, is a credit to the Territory, and a brave enterprise that should succeed. Its publishers have infused new blood into their paper, and it is highly interesting with its chronicle of the events of the day in Arizona, and its crisp, terse paragraphs. The Arizonans should be proud of their young daily and support it liberally.

And this from the Messilla (New Mexico) News:

The Daily Arizona MINER, John H. Marion, Editor, two copies of which were received yesterday we are glad to welcome, and hereby extend our sincere wishes to the MINER for success and prosperity in publishing a daily. It is neatly and cleanly printed, edited with ability, and shows so much energy and western grit, that it is deserving of a generous patronage, and we trust never to hear that it is "unhappy."

The Weekly "Arizona Miner,"

(Now in the Eleventh Year of its existence,)

Is the OLDEST, LARGEST and HANDSOMEST News paper printed and published in the Territory of Arizona,

And nothing that its proprietors can do in the way of adding to its usefulness, as the

Organ of the White People of Arizona,

And the exponent of Truth, Justice and Sound Morality, will be left undone.

Relying, solely, upon the patronage of the honest, hard-working and thinking people of the Territory, for a continuance of that support which, in the past, has enabled us to publish a creditable, free and independent journal, not trammelled by this or that political schemer, office-seeker, or office-holder, we shall labor, faithfully, to keep the MINER in its old place, at the head of its contemporaries.

Although the paper is considerably increased in size, the subscription rates remain as before, that is:

One Year.....	$7 00, Currency.
Six Months.....	4 00, "
Three Months.....	2 50 "

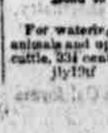
To the Unfortunate!

NEW REMEDIES! NEW REMEDIES!

DR. GIBBON'S DISPENSARY



NO. 623 KEARNY STREET, CORNER Commercial, San Francisco. Private entrance on Commercial Street. Established 1854, for the treatment of Sexual and Seminal Diseases, such as Gonorrhea, Gleet, Stricture, Syphilis in all its forms, Seminal Weakness, Impotency, etc., etc. Skin diseases of years standing, and Ulcers, Legs, etc., successfully treated.

DR. GIBBON has the pleasure of announcing that he has returned from visiting the principal Hospitals of Europe, and has resumed practice.

The Doctor has spared neither time nor money in making out new remedies, and has returned with increased facilities for the alleviation of human suffering.

Seminal Weakness.

Seminal emission is the consequence of self-abuse. The solitary vice, or depraved sexual indulgence, is practiced by the youth of both sexes to an almost unlimited extent, producing with unerring certainty the following most direful symptoms, unless combatted by scientific medical measures viz: Sallow countenance, dark spots under the eyes, pain in the head, ringing in the ears, noise like the rushing of leaves or rattling of chariots, unsteadiness about the loins, weakness of the limbs, confused vision, blunted intellect, loss of confidence, diffidence in approaching strangers, a dislike to form new acquaintances, a disposition to shun society, loss of memory, pimples and various eruptions about the face, hectic flushes, furred tongue, offensive breath, coughs, consumption, night sweats, premature old age and frequent insanity. If relief be not obtained, the patient should apply immediately, either in person or by letter, and have a cure effected by his new and scientific method of treating this disease, which never fails of effecting a speedy and radical cure.

Cured at Home.

Persons at a distance may be CURED AT HOME by addressing a letter to Dr. Gibbon, stating cases
