

## The Copper Queen Store.

### The Best Sorts of Toilet Soaps

When buying toilet soaps, don't economize too much. To do so isn't economy at all; it's almost foolish—foolish when you stop to think what is apt to result from the use of cheap soaps.

Rough, chapped skin, smarting sensations, pimples, and other skin eruptions—nearly all due to impure soaps.

The best is the cheapest is never so true as when applied to soaps.

The kinds told of below stand head and shoulders above the rest of the worlds of soaps. Each has become famous because of some particular virtue—and each is absolutely pure.

### Cudoma Soap

Delicate fabric and laces won't stand washing in the ordinary manner and with the ordinary soap. Rubbing wears them out and poor soap rots them.

CUDOMA—a new soap—is made just especially for dainty delicate fabrics.

For the asking you can get at the Drug Counter a booklet telling all about CUDOMA soap—but better than any number of booklets is a trial of the soap itself.

DRUG COUNTER

### This is no Fairy Tale . . .

YOU will be as agreeably surprised upon examining our stock of

### Cents' Furnishing Goods

as the traveling man was to find clean sheets on his bed in a country hotel. Everything is clean and brand new. Our Holiday Trade was so heavy that we were unable to offer a sacrificing sale of Overstocked Goods and we have been more than busy getting in New Novelties and Staples ever since. If you need a new hat, pair of shoes, gloves, suspenders, working shirts, overalls, or in fact anything in the Furnishing Goods line or miners' supplies, come in and see our goods before you buy. It isn't any trouble to show goods when your stock is clean, complete and up-to-date. A. P. SKINNER, Main St.

## MAKE A NOTE OF IT.

We mean our address. It will pay you to remember it in case you need anything in the way of SHIRTS, UNDERWEAR, HOSIERY, NECKWEAR, HATS, ETC. Our store should appeal to you in particular from the fact that our stock is new, clean and up-to-date. We mean to save you something on every purchase and

WHAT WE SAY WE DO, WE DO DO.

## Admiral Sampson Retires from Service.

Washington, Feb. 8.—Rear Admiral Sampson made famous through Santiago victory and later through the Sampson-Schley controversy, retired today after forty-five years active navy service. Today is his sixty-second birthday. From this time on he gets a yearly income of \$4,781. Admiral Sampson has gradually failed for some months and is not expected to live long.

## American Girl Weds Swedish Count.

Paris, Feb. 8.—It is reported here today that Miss Helena Gorha Wild, an American resident in Paris is about to marry Prince Eugene, of Sweden if he can gain his father's consent and can arrange to resign his succession to the throne of Bernadotes as his elder brother Oscar did when he made a Morganic alliance. Prince Eugene is a painter.

### Big Ship Kronland Launched.

Philadelphia, Pa., Feb. 8.—The biggest ship ever built in America, the Kronland, constructed at the Cramp shipyards for the International Navigation Company, and which is to ply between New York and Southampton, was successfully launched today. Though the event was attended with little ceremony it was witnessed by thousands of sightseers who thronged the shipyard.

The principal dimensions of the big vessel are, length over all, 640 feet, and from deckline to keelson 42 feet. The gross tonnage is 12,000, and on a displacement of 18,000 tons she will draw 25 feet of water. Her contract speed is 17 knots.

In building the Kronland and her sister ships, Finland, now on the ways at Cramp, and the Vanderland and Zeeand, built abroad, the International Navigation Company's officials have endeavored to get away from the ocean greyhound idea and to supply vessels which will cross the Atlantic comfortably in about eight days and allow the introduction of all sorts of conveniences in the make-up of the vessel.

### Carnival of Sports.

Boston, Mass., Feb. 8.—Some record performances are promised at the 13th annual indoor handicap meeting of the Boston Athletic Association to be held in Mechanics building tonight. The entry list of the meet is the largest ever seen hereabouts. The big special event of the meet will be the 40 yard scratch event (invitation) in which A. F. Duffey, of Georgetown University, who won last year in record time, will go against F. Scheuber, of Harvard, W. A. Shick, the crack Andover sprinter, and W. D. Eaton, of Amherst. The team relay races are also attracting much attention. In these events Harvard will race Pennsylvania, Cornell will go against Princeton, Dartmouth against Columbia, and Williams against Amherst.

### New Method for Extracting Ore

Salem, Ore., Feb. 8.—Wm. Long, who for the past six weeks has been here claims that he has discovered a new process for extracting gold ores which is much cheaper than the old method by producing three times the amount of gold which is gotten by the smelter. His claim is somewhat similar to that of Professor Wynne who recently died in Denver.

### Kansas Biennial Law Upheld

Topeka, Kas., Feb. 8.—The supreme court today upheld the biennial election law by which five circuit judges are nominated by the governor and take office by replacing the judges elected. The legislature passed the law for the stated purpose of producing a number of elections. The judges have hitherto been elected in off years.

### Teddy, Jr., is Better.

Groton, Mass., Feb. 8.—Teddy Roosevelt, Jr., is better this evening. The crisis is reached in six days. His mother is with him. The president has not come, but postponed his trip to Charleston for a few days.

### New Bills Passed

Washington, Feb. 8.—The House passed a number of "unanimous consent" bills today, also a bill requiring foreign steamers to submit to federal boiler inspection in United States ports.

### Gage Accepts Presidency

New York, Feb. 8.—It is rumored that Lyman T. Gage has decided to accept the presidency of the Continental Trust company of New York.

### Schley in Washington.

Washington, Feb. 8.—Admiral and Mrs. Schley arrived this morning.

## Glucose Starch Trust Formed.

New York, Feb. 8.—A Corporation was organized for the purpose of merging all the Glucose Starch manufacturing interest. The company is incorporated in New Jersey under the name of the Corn Production Company, capital eighty million dollars. It is understood that Morgan, Rockefeller, Marshall Field and Norman Ream are backers.

### Colored Champions Meet.

Philadelphia, Pa., Feb. 8.—The six round go between Frank Childs, of Chicago, and "Denver Ed" Martin, which is slated for the arena of the Industrial Athletic club tonight, has aroused lively interest in sporting circles. The two men have been matched several times in the past year but were prevented from coming together by legal proceedings. They are the rival claimants of the colored heavy-weight championship, but will hardly settle it in a six-round bout, particularly where no decision is given as in this city. Reports from their respective training quarters today indicate that both are in excellent condition for the go. Childs is an aggressive fighter of the hard-hitting type, but Martin is considered the more clever of the two and consequently is expected to win the decision on points.

### South Carolina Y. M. C. A.

Columbia, S. C., Feb. 8.—Delegates and visitors from all parts of the state have arrived for the annual convention of the South Carolina Y. M. C. A., which will be in session here during the next three days. A formal welcoming meeting has been arranged for this evening, at which addresses of greeting will be delivered on behalf of the city, the churches and the local branch of the association. Tomorrow is to be given over to religious services when the pulpits of the leading churches of the city will be occupied by eminent divines who are among the visitors. Judging by the large number and prominence of the arrivals the convention will be the most notable in the history of the state organization.

### Memorial of Lincoln.

New York, Feb. 8.—Congregational churches throughout the country are expected to observe tomorrow as a memorial to Abraham Lincoln in response to an appeal issued by the American Missionary Association. "Abraham Lincoln," says this appeal, "was born in the mountains of the South, where schools and churches have been established by this association. The Negroes have grown into a great multitude of more than eight millions, among whom this association has planted its institutions and missions. Through its missionaries the colored people are being trained in the shop, on the farm, in the school and church and home for Christian responsibility."

### 100 Pastors to See Palestine.

New York, Feb. 8.—The White Star liner Celtic, which sailed for Europe today, has among its passengers 100 clergymen and others from various parts of Pennsylvania, who are bound on a pilgrimage to Palestine. The party is one of the largest of its kind that ever left this city, rivaling in numbers the Catholic pilgrimages made to Rome each spring. The tour is under the direction of Rev. Dr. Edwin S. Wallace, of Greensburg, Pa.

### Indians Meet the President

Washington, Feb. 8.—Half a dozen of the Kiowa tribe of Indians called at the White House today and were presented to Roosevelt by Curtis, of Kansas. The Indians were led by Chief Washuna dressed in full Indian costume, from feathers to moccasins. Washuna told the reporters he was 107 years old.

### Skeletons Unearthed by Graders.

St. Joseph, Mo., Feb. 8.—Graders unearthed three skeletons in the heart of the city today, undoubtedly recently buried, as hair was growing on the heads. There are no indications of murder yet.

### Metal Reports.

New York, Feb. 8.—Copper, 15; lead, \$4.00; silver, 55 1/4.

## LEADING PURSUITS

### Copper Queen Hotel Now Open.

A Magnificent Hostelry Unsurpassed in the Territory With Every Equipment And Excellent Management.

One of the magnificent acquisitions to the numerous departments of Bisbee's commercial life and one of the indispensable institutions that meets the demands of a much felt need is the new hotel that is past completion and now open to the public. No city is complete without a first-class up-to-date hotel and certainly this may be said of the Copper Queen—it is at once suggestive of the great industry from which it takes its name.

The new Copper Queen Hotel is of the old Mission style which is entirely appropriate to the great southwest. The Mission fathers have left monuments of their work dotting this entire section and anything suggestive of that great civilizing work certainly has a fitting place.

After a year and a half of unremitting work and the expenditure of upwards of \$75,000 the hotel is complete and practically finished. This seems like a big amount laid out for the building alone but when we think of the expense of everything when laid down

C. C. ROUZER, Manager Copper Queen Hotel.

here and the liberal wages paid to labor in every department it doesn't require much thought to see where the money goes.

We enter the office after passing an easy flight of stairs to find it beautifully finished with California redwood and attractively paneled. A large mantle over the fire place is one of the best obtainable. Almost all the other rooms lead off from the office. The ladies parlor to the right occupying a very slightly position is exceptionally fine and tastefully arranged in mahogany with rich green silk plush and satins. The effects of the blind is charming. Beyond the parlor and leading into the office is a large and commodious billiard parlor substantially arranged with tables and chairs and other equipments. Beyond this is a buffet, a barber shop, wash room, bath rooms, etc., all thoroughly furnished and up-to-date. To the left of the office is the large dining hall beautifully lighted, having a seating capacity of seventy-eight persons. In the rear of the dining room are two private dining rooms for families or private parties where thirty-six plates may be laid. The dining room is one of the most cheerful and attractive to be seen anywhere. The china and silverware is all of especial design having a monogram of the hotel on every piece. The glassware in the buffet is composed of a selection of very rare and some of unusual design. Every piece is cut glass with the monogram C. Q. etched upon it and many designs. Lave never been used in any hotel before. The silver wine coolers are of unique design.

The pantry is furnished with all modern appliances including steam dishwashing machinery, entirely novel, water, steam and air wash and dry the dishes—not even a towel is applied. Here are also coffee urns in which coffee is made and kept hot by steam as well as other up-to-date appliances. A six foot shaft way leads into the kitchen. The kitchen is thirty feet square and is especially designed. Every modern appliance for this department is found here. The entire outfit was selected by Manager Rouzer from the Boston Street Range company of Cincinnati. Much of the cooking is done by steam. The pastry room is equipped with Burton's improved bakermans which look very much like a steam boiler. This has a capacity far beyond the needs of the hotel. There are long refrigerators in plenty besides a large cold storage plant that is being placed in the kitchen where meat, eggs, etc., may be kept indefinitely.

There are forty-four rooms beautifully furnished with large brass and iron bedsteads with large box spring mattresses and is especially designed. Every modern appliance for this department is found here. The entire outfit was selected by Manager Rouzer from the Boston Street Range company of Cincinnati. Much of the cooking is done by steam. The pastry room is equipped with Burton's improved bakermans which look very much like a steam boiler. This has a capacity far beyond the needs of the hotel. There are long refrigerators in plenty besides a large cold storage plant that is being placed in the kitchen where meat, eggs, etc., may be kept indefinitely.

There are forty-four rooms beautifully furnished with large brass and iron bedsteads with large box spring mattresses and is especially designed. There are long refrigerators in plenty besides a large cold storage plant that is being placed in the kitchen where meat, eggs, etc., may be kept indefinitely.

The manager of this hotel is Charles Rouzer, who came here last November and has labored faithfully since then to get the hotel opened. Mr. Rouzer is eminently competent and has had broad experience in this particular line. For five years he was the manager of the Columbia Club at Indianapolis, the most popular club of that city. The club has a membership of 1200 comprising all the popular and prominent men of that city. Ex-President Harrison, Gen. Lew Wallace, Jas. Whitcomb Riley, and Senator Beveridge are some of the Columbia Club. Mr. Rouzer is very enthusiastic over the success of the hotel and says the only objection is it is too small.

Mr. Edward Rouzer, son of Manager Rouzer, is day clerk and Robert J. Wilson is night clerk, both being entirely efficient and acquainted with the business. The first dinner will be served at the Copper Queen Monday night.

## POST OFFICE ROBBERS.

### Make Good Their Escape at Morenci.

Better Feeling in Graham County. A Railroad Accident.—The Morenci Standard.

Morenci, Feb'y. 6. Special Correspondence.

There have been no definite results so far from the investigation of the postoffice robbery which occurred here last Thursday. Deputy Sheriff Gus Hobbs and Postoffice Inspector J. I. Driscoll, have been at work running down every possible clue, but so far no arrests have been made. The registered letter pouches which were taken in the robbery were found yesterday by the officers in the canyon below town, also a few postage stamps were picked up in the road. The stamps were believed to have been included in the robbery and the finding of them points to the fact that the burglars did not at once leave town after doing their work. The safe was not a modern one nor of the time clock variety. It was not blown open as reported at first. The knob was knocked off and the door forced by means of a "Jimmy" which had been taken from a tool chest belonging to Lyman Dodge a carpenter who is working on the new gymnasium building. The officers may have made more important discoveries than they are giving to the public and the fact that Postoffice Inspector Driscoll is still here would encourage that belief. The loss amounts to about \$1000 in cash and stamps. Mr. H. S. Van Gorder, store manager for the Detroit Copper Company is the postmaster.

There is decidedly better feeling now noticeable among all classes in Graham county, than existed two weeks ago when the price of copper was dropping from one to two points every day, and the farmers of the Gila valley were uneasy because of the dryness of the winter season. Now everybody in the mining camps have taken a new hold on confidence as the price of copper steadily advances and the recent rains and snow storms have made the farmer jubilant over the better prospects of a sufficient supply of water during the season when the crops will need irrigating.

During the past week there has been a dozen or more new cases of smallpox developed in Morenci and the pest house is crowded. Several cases were found in the company lodging house which caused general uneasiness in that quarter. All the cases are very mild and there seems to be no expectation of fatality from the disease. Supt. Mills and the company physicians are doing everything possible to check a further spread of smallpox. A year or more ago when this disease first appeared at Duncan, in this county, and at Lordsburg, New Mexico, there was a difference of opinion as to whether it was really smallpox or not, but now the physicians here and at Clifton and Dr. Lacy, the county physician at Solomonville agree that it is smallpox.

The first issue of the Morenci Standard will make its appearance on Monday next. It will be a 4-column quarto. The paper will start with an unusual amount of advertising patronage. The people of Morenci are giving to the new enterprise a very hearty support and a large circulation is assured from the start. The Standard has a complete plant for newspaper and job printing of all kinds.

A man named Guy Thomas, who works in the Arizona Copper Compuls concentrator was run over in one of the little railroad tunnels here several days ago. His foot was so badly crushed that amputation was necessary. He is getting along nicely now.

### Snowstorm in London

London, Feb. 8.—Snowstorms envelop the whole of England in darkness and prevents navigation at London. The weather is the severest in twenty years.

## IN THE MINES.

### Operations in And About This District.

Noticeable Activity Owing to the Advance in Copper—The Big Companies Making Plans for the Future.

There is a better feeling among mining men, generally, and the smaller stock companies this week, than has been evidenced during the past thirty days, or since the telegraph wires ticked off the steady decline in copper. This condition has been brought about by the encouraging reports received from the East and later in the week was substantiated by rising market reports.

The smaller companies, who have promising prospects, and were depending on the sale of stock for the development of their property, were suddenly confronted with a declining copper market, and a falling off in the demand for copper properties. With the rise of the market, the investors naturally begin to turn their attention to this field again.

Locally, the topic of conversation this week, was the announcement by the Copper Queen company of the ultimate removal of the smelters from Bisbee to Douglas. This has been hinted at and surmised for the past three months but the information, or fact, was not made public until this week. Supt. Walter Douglas was asked this week by a REVIEW reporter as to the effect of the removal of the smelters from Bisbee to Douglas, smelters from a business standpoint. Mr. Douglas very candidly stated the removal of the smelters from Bisbee would not effect the future of Bisbee. "The places of the smeltermen will be filled by an increased mining force long before the day for the removal of the smelters arrives," said the Superintendent. This opinion is shared by the leading business men and the announcement has caused no flurry in Bisbee real estate.

## STABBED

### Nicholas Fuentes Narrowly Escapes Death From The Knife of Jesus Cierras

At a late hour last night Nicholas Fuentes, a Mexican, was found about a mile and a half up Brewery Gulch stabbed. The officers were at once notified and went in search of the one committing the crime. Fuentes told the officers that a gang of wood choppers just over the hill were the offenders and that one Jesus Cierra was the one who did the stabbing. Officer Doyle brought the gang in and locked them up.

Dr. Caven was sent for and upon an examination of the wound stated that it was not serious and the injured man would recover.

### Robins-Knight.

The many friends of Mr. Joseph Robins will be pleased to learn of the very happy wedding that took place at Tucson last Tuesday when Mr. Robins married Miss Bessie Knight of San Francisco. Mr. Robins came to Bisbee about a year ago and has been in the employ of the El Paso & Southwestern Railway since that time. He has made many friends here who wish him much happiness in the future. The bride is a delightful young lady who carries the distinction of being a native daughter of the Golden West. She came from a good home where she was extremely popular. The newly married couple returned from their wedding trip Wednesday and are now living in the new house recently erected by Johnnie Twomey. The REVIEW joins many friends in wishing the couple much happiness and prosperity.

### Cactus Club Dance

The Cactus Club held its regular monthly hop Friday night with the usual good result. There was about the right number present to enjoy themselves upon the floor.

The dance was given earlier than usual this month on account of the near approach of Lent, which some members observe. The music was better than usual and refreshments were served throughout the evening. The evening dresses worn by the ladies were especially attractive. All expressed themselves as having one of the most pleasant evenings of all the dances.

### \$300,000 Fire in Illinois.

Wappella, Ill., Feb. 8.—Fire starting in the elevators swept the business district today and also consumed residences. There is no fire department. Three hundred thousand dollars was the estimated loss.
