

The farmer, the parson, the storekeeper, the judge and the blacksmith all agree that they owe their youthfulness, health and happiness to the regular use of Duffy's Pure Malt Whiskey as prescribed.

THIS IS THE WAY TY COBB VIEWS IT

These remarks will not be the important factor in the world's series... This is a statement made by Ty Cobb of the Detroit team, a man who should be qualified to give an opinion...

"This is why I say that the records of the Detroit team have piled up... You must play the game reasonably safe, and depend on your hitting and your pitching, because the loss of any one single game may result in the loss of the world's championship...

MUCH DEPENDS ON MANAGERS' SKILL

The American League pennant winners are confident that they can put away the Giants this year, just like they did the Cubs last fall, but it promises to be an exceptional series with the baseball of higher grade than last year.

Connie Mack of the Athletics and John McGraw of the Giants are admittedly two of the greatest and most successful leaders that baseball has known in the last twenty years.

Both Mack and McGraw represent the best there is in baseball, but their methods are today different. McGraw, with his cocksure bearing, likes the center of the stage.

Mack is different. His gaunt form never under any circumstances allows itself to the spectator. There are thousands of fans who attend games regularly at Shibe Park who have never seen Mack.

Mack, retiring, shrinks from all publicity. The quiet of home best appeals to him. McGraw is a mixer. He goes in for notoriety for all that it is worth.

Mack has a policy of what might be called kindly strictness on the ball field. He runs his team with an iron hand, but the iron hand is covered with a soft glove, and the players with a soft glove and the players forget that it is an iron hand.

In a way, Mack is the sternest disciplinarian in the game, although the Athletics play themselves as if they did not believe in discipline. The same is true of a certain extent, says the old-timer of Benay Murphy.

Mack is sharp-shooter's eye. He detects on the bench with the famous scolding voice, and watches every ball pitched like a hawk. When Bender comes from the box at the end of the inning Mack will say: "You are pitching too high to be satisfactory. Get them lower, Melins, when a right-handed hitter is at bat, don't mind the base runner on first, but play back or the fellow will shoot a triple through you."

Mack likes baseball. When he takes the team south in the spring he puts on the baseball cloak and keeps it on until the last game is played. He is the greatest organizer and tutor in the game. That's what gives Mack such an immense advantage over the average manager.

They call it Mack luck because the ball manager took an 18-year-old kid named Melins and in two years made him one of the greatest first basemen in the country. Yet Melins might have gone to another major league club and been released in less than a season.

The same thing applies to Collins and Barry. If there are any more surprising players when they made their first appearance here than this pair, they are not on record.

Collins was a student at Columbia, he was "tipped off" to several big leagues, but one look at Collins' athletic form was enough, and they left in disgust.

Mack took one look at Collins. He watched his actions, and said: "There is the making of a great ball player." He didn't leave New York until he had Eddie's contract.

Collins was sure a joke of an infielder when he first joined the Athletics. He couldn't throw, one thing he could do and that was hit. Mac experimented with Collins, shifting about the infield. Illness also handicapped the young Columbia youth, but Eddie was a hustler, and out every day practicing and drilling.

Collins was a hustler, and out every day practicing and drilling. One day Mack placed Collins at second base, and in five minutes had the absolute king of the position.

The supposed delicate-looking Columbia youth today is the greatest infielder in baseball. No infielder in

the game can cover the ground that Eddie does, and added to this ability is his wonderful batting and base-running ability. Yet Collins' career might have been ruined had he not fallen into such able and patient hands as Mack.

Mack's infield is today conceded by all to be the best in baseball. Every one of the four is a product of Mack. Collins and Barry never played one game of professional ball before joining the Athletics. They came direct from their colleges.

Through Jealous Eyes—A beautiful drama of life, not a dull moment in it. Illustrated Song—"It's the Same Old Me but not the Same Old Girl"—Miss McGrath.

"Her Dad—the Constable"—A love comedy—full of life and vim—just the kind to drive away the blues.

WIGWAM THEATER. Program. The Capture of Fort Ticonderoga, a terrific battle scene of the war of 1812. Song—"Dreaming Love of You"—Miss Carrie McGrath.

At The Gringo Mines—a dramatic picture of the striking miners and a romance that ends in peace.

Through Jealous Eyes—A beautiful drama of life, not a dull moment in it. Illustrated Song—"It's the Same Old Me but not the Same Old Girl"—Miss McGrath.

"Her Dad—the Constable"—A love comedy—full of life and vim—just the kind to drive away the blues.

GIRARD WILL SPEAK AT ROAD CONGRESS. He Will Represent Arizona in the Gathering at Richmond, Va.

J. R. Girard territorial engineer, has been appointed by Governor R. E. Sloan, a delegate to the first annual road congress of the American Association for Highway Improvement, which is to be held in Richmond, Va., November 29 to November 27.

The president of the association which called the congress, is L. W. Fane, director of the United States office of public roads, a bureau of the agricultural department. He has addressed a highly complimentary letter to Mr. Girard who has had charge of the building of the territorial highway in Arizona, and has asked him to address the congress on the second day of its session.

Finances and Markets. NEW YORK, Oct. 13.—Moderately higher prices prevailed at the close of today's stock market, which was characterized by the same firm tone as the past five or six days.

Not a move in essential features. Price movements were nominal and trading dull. A vigorous upward movement for the last half hour made a higher range of prices. Harriman's, Reading, Lehigh Valley, Northern Pacific, Atchafson and Amalgamated Copper all gained a point or more and Steel nearly a point.

Trading in American Tobacco was a conspicuous feature. Dealings in four per cent bonds amounted to \$5,500,000. Four per cent 2-4 to 2-3-4, and four per cent certificates for \$9 1/2 to 9 1/4. General Electric responded to the dissolution decree of the federal court by gaining a point, though subsequently it fell back.

American Beet Sugar reached a new high record in its upward movement. Because of large trading in Tobacco securities, bond trading was the largest of any day in two years. Prices generally were higher and there was more inquiry for investments. The total sales, par value, were \$5,322,000. Government bonds unchanged.

STOCKS. Amalgamated, 5 1/2; Smelting, 61 1/8; Atchafson, 10 1/2; St. Paul, 108 1/2; New York Central, 105 1/8; Pennsylvania, 12 1/2; Reading, 117 1/2; Southern Pacific, 108 1/2; Union Pacific 16 1/4; Steel, 60; Steel, preferred, 109 1/4; Silver, 52 1/2.

METALS. Copper unchanged, quiet.

BIG LEAGUE BASEBALL. At Chicago—R. H. E. Cubs 3 5 6; White Sox 4 12 2; Batteries—Brown and Archer; Walsh and Sullivan.

At Cincinnati—R. H. E. Cincinnati, Nationals 10 11 0; Cleveland, Americans 2 8 3; Batteries—Benton and Clark; Kaser, Mitchell, Valkenberg and O'Neill.

COAST LEAGUE. At Portland—R. H. E. Portland 3 12 1; Los Angeles 5 11 1; Batteries—Harkness and LaLoon; Dahl and Brooks.

At San Francisco—R. H. E. San Francisco 6 11 4; Sacramento 2 6 3; Batteries—Henley and Carman; Hunt Byram, Kerns and Thomas.

At Vernon—R. H. E. Vernon 1 3 3; Oakland 14 19 5; Batteries—Raleigh and Brown; Flatler and Pearce.

'FRISCO HAS A HOLIDAY

Most Elaborate Exercises Will Be Held

GETS READY FOR THE FAIR

Spectacular Scenes Will Attend the Ground Breaking Exercises at Which President Taft Will be a Central Figure.

SAN FRANCISCO, Oct. 12.—Elaborate preparations for the actual construction work for the Panama-Pacific International exposition of 1915, which will be set going tomorrow by President Taft, were completed today, and everything is in readiness for San Francisco's great day. Ships of the Pacific fleet are anchored in the bay.

The line of march for the spectacular military parade has been plotted and roped off. The city is gayly decorated and generally ready to show its enthusiasm. Groundbreaking will take place at the Stadium in Golden Gate park, which occupies part of the site for the great fair.

Tickets for the grand stand are almost unobtainable tonight, and hours before the ceremony is scheduled to begin there is not expected to be a single foot of unoccupied ground in the big enclosure. Many thousands of soldiers, regulars and militia, and crews from the warships in the bay will lead the way for the president's carriage from his hotel to the park.

A battery of field guns from the President will be stationed on the hill overlooking the stadium, and when the president holds the national colors to the top of the tall flagstaff, the national salute of twenty-one guns will be fired. Immediately afterward Mr. Taft, with a silver shovel, will turn the first shovelful of earth. This will be kept as a historical memento of the state.

The president, Mayor McCarthy and Governor Johnson are scheduled to speak. Madame Lillian Nordica will sing, the Pacific Seaman's guild assisting. At the conclusion of the ceremonies all present will sing the national anthem.

A feature of the ceremony will be the setting loose of hundreds of carrier pigeons gathered from all parts of the western half of the continent. These will be liberated when the earth is broken. The birds, bearing tiny notes of announcement, will carry the news up and down the coast and into the interior. Daylight fireworks, provided by Chinese residents of the city, will be exploded.

UNCLE SAM'S FOOLISH BILL. There are no trustworthy statistics as to wages. The average yearly earnings of all persons, from day laborers to presidents, is estimated at \$200, but as not more than three-fourths of the people are actual workers, three-fourths of this amount, or \$225, is taken as the average wage, writes Mary Huston Gregory in "Checking the Waste."

From these figures the money earned of a person under 5 years is given as \$95; from 5 to 10 years as \$250; from 10 to 20 years as \$2,000; from 20 to 30 years as \$4,000; from 30 to 40 years as \$2,000; and over 40 years as \$1,000. The average value of life at all ages is \$2,200 and the 22,000,000 persons living in this country would be worth in earning power the vast sum of \$27,000,000,000. This is probably a low estimate, but is more than double all our other wealth combined.

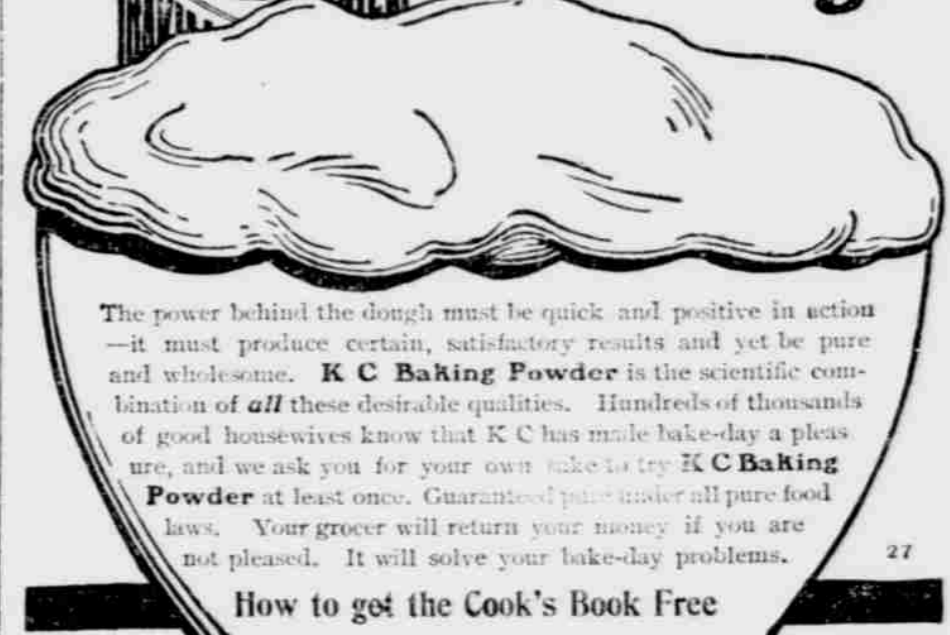

Now let us see how much of this vital wealth is wasted. As the average death rate is at least 18 out of each 1,000, we have 1,500,000 as the number of deaths in the United States each year. Of these, 42 per cent, or 630,000, is caused as preventable—so that a number equal to the entire population of the city of Boston die each year whose deaths are as unnecessary as is the waste of our forests by fire.

If some great plague should carry off all the people of Boston, not the people of the United States only, but the people of the whole world would be roused by the appalling calamity, and every possible means would be employed to prevent other cities from sharing such a fate; but because these preventable deaths are not in one city, but are widely scattered, we have long remained indifferent to this terrible and needless waste.

Then there are always 3,000,000 persons ill, 1,000,000 of whom are of working age. If, as before, we count only three-fourths of them as actual workers, we find a yearly direct loss from sickness of \$500,000,000 in wages. The daily cost of nursing, doctor bills, and medicine is counted at \$150, which makes for the 9,000,000 sick, a yearly cost for these items of more than \$1,500,000,000. What should we think if nearly all of the people of the city of New York were constantly sick, and were depending for doctors, nurses, and medicine as much money as congress appropriates to run every department of the government?

It is estimated that sickness and death cost the United States \$2,000,000,000 annually, of which at least a third, probably one-half, is preventable. Is it not well worth while, then, from a money standpoint alone, to use every effort to conserve our national health? Conservation of health and life, going hand in hand with

The Power behind the dough

The power behind the dough must be quick and positive in action—it must produce certain, satisfactory results and yet be pure and wholesome. K C Baking Powder is the scientific combination of all these desirable qualities. Hundreds of thousands of good housewives know that K C has made bake-day a pleasure, and we ask you for your own sake to try K C Baking Powder at least once. Guaranteed pure—under all pure food laws. Your grocer will return your money if you are not pleased. It will solve your bake-day problems.

How to get the Cook's Book Free. The K C Cook's Book, containing 90 tested, easily-made recipes, sent free upon receipt of the colored certificate packed in the 25-cent can. Send it today. Jaques Mfg. Co., Chicago

conservation of national resources will give us not only a better America, but better, stronger, happier, more enlightened Americans. What a new world would be opened to us if we could have a nation with no sickness or suffering! That is the ideal, and everything that can do toward realizing that ideal is a great step in human progress.

FATHER LIBERAL. He—I told your father I could not live without you. She—And what did he say? He—Oh, he offered to pay my funeral expenses.—Boston Transcript.

WHY THE LEAVES FALL. It is not excessive, even in these days of close nature study, who knows that leaves fall because they are actually cut off from the stem by a layer of cork that forms across the base of their stalks. This process is explained very strikingly by Professor Boulenger in Knowledge, and what is more he points out that no nourishment is left in the dead leaf, but only the waste products of vitality, of which the tree is well rid. A very promising investigation is suggested by the illustrations, which show that in some trees the end leaf of a twig is the first to fall while in others it is the last.—From the Pittsburgh Dispatch.

SUITS Cut, Fit and Built by me are the creation of the art of fine tailoring.

You are invited to step in and let me show you the correct New York novelties for this season's wear.
