MISCELLANEOUS.

We have been at the trouble of obtaining data regarding the yields of our mines and average of ore. And as a result of our inquiry, find that nineteen different lots of ore, from as many mines, aggregating one hundred eighty and a quarter tons have been reduced in the Isabella a five-stamp mill, which gave a gross yield of \$20,047.50.

A party of prospectors came in this morning with a lot of fine looking rock which they claim to have found in a new strike near the Clencys. They are confident they have a good thing; but as yet they are reticent as to the whereabouts of their discovery.
