CALEXICO, Cal., May 13.—Governor Estaban Cantu, Lower California, tonight sent to the American commander at Camp Beacon here a request to take heed of threatening conditions and rumors so that Calisto might have protection in case trouble comes.

The troops of Governor Cantu, who has remained loyal to President Carranza, were reported sleeping on their arms in Mexicali, across the border from here, following circulation of reports that they were to be attacked during the night.

Police kept civilians off the streets of Mexicali during the night and American immigration and customs inspectors closed the border and refused to honor passports after 7 o'clock.

Captain Rostenhausen, commanding Camp Beacon, announced he was fully prepared to meet any emergency.

Several persons were arrested here after they had attracted attention by persistent efforts to obtain permits to cross to Mexicali. A party of immigration officials is here from San Diego, Cal., in response to a request from W. A. Brazie, inspector in charge here.

Governor Cantu's garrison at Mexicali was said to number 250 cavalry and 300 infantry.

Inspiration Mess Hall Burns

MIAMI—Fire which broke out at 4:30 Monday afternoon in the old mess hall near the main shaft of the Inspiration mine resulted in the practical destruction of the building. The mess hall was of frame construction, two stories in height, and measured 60x110 feet. It adjoined the old dormitory on the mine grounds.

The origin of the fire is not positively known, although it is believed that it was started from the electric wiring in one of the upper rooms. The Miami fire department answered the call and rendered valuable assistance to the volunteer fire department of the Inspiration mine, which was already combating the flames when the Miami fire crew arrived on the scene.

The estimated value of the burned building is around \$20,000.—Daily Silver Belt.

DOLLAR DROPS IN EXCHANGE

PARIS, May 13.—The prospect of a bumper crop this year, the improved condition of the French treasury, due to the growing excess of tax receipts over the estimates, and the purchase of French mining and other industrial shares by American and British investors are given in the best informed circles as the principal reasons for the

sharp decline in the value of the dollar from 17 to 15 francs. Another influential element was the covering by Bourse operators, who had been speculating against the franc and found it advisable no longer to take risks against growing confidence in a French financial recovery.
