THE ARIZONA REPUBLICAN

SUNDAY MORNING, DECEMBER 11, 1921

I once met a man who had forgiven an injury. I hope some day to meet the man who has forgiven an insult. -Charles Buxton.

The Colorado

Inasmuch as the control of the waters of the Colorado river was the principal if not the only subject before the Riverside conference of the League of the Southwest the developments of Friday leave nothing to be considered by the conference except the dispute between California and the other states of the league as to the manner of voting. But since there is nothing to vote upon, that becomes an im-

The Gordian knot which the private power companies, and the city of Los Angeles had been painstakingly and industriously tying was suddenly cut by Secretary Fall in his announcement that the government would retain control over the waters of the river of seven states; that the tentative contract between officials of the reclamation service and Los Angeles was "not in force and never would be in force," and that the rights of the states would be adjudicated, not by any preponderance of votes but by the federal commission of which Mr. Herbert Hoover will be chairman. In the meantime no permits will be granted by the government.

That is as much as is now known but we are given a promise by Secretary Fall that the policy of the government will be made known by him at the forthcoming San Diego conference, when we will probably be afforded information as to the time when the machinery of government may be put into opera-

We do not believe that the delay will be great now that the attention of the government has been invited and has been given. For that the League of the Southwest must be credited, and in part, the activity of private power companies. It has thus been put up to the government, either to bring about the control of the river and the turning of its waters to beneficial uses, or to permit that to be brought about by some other agency. Secretary Fall has plainly pronounced in favor of the government as the only instrumentality to carry on this great work,-the greatest that has ever been undertaken in this continent. There could be no other in which such vast numbers of citizens would be so directly concerned and none in whose results there would be so many conflicting interests to be adjusted for the benefit

This great undertaking, reaching as it does into seven states and covering an area, larger than empires, with millions of people affected by its operation should be under the construction and control exclusively of the United States with its resources of men and money. It may be urged that the governi is at present without funds, whereas, there have been offers of ample funds for the taking up of the work by private agencies; and by municipalities proposing to co-operate with the government.

The proceedings of the conference at Riverside have however developed popular or sectional opposition to both proposals, from which we may easily forecast the turmoil into which the enterprise would be thrown if the government should relinquish control either in whole or in part.

The enormous resources of water and power of the Colorado constitute the last great heritage of the American people. That they be developed for and be utilized for the greatest good for the greatest number is the desire of those men throughout the nation who are struggling with the country's problems today. Not for the present hour, but for the days to come must the problem of this great river be considered and decided.

Undoubtedly the money will be forthcoming for this great enterprise. We live in a time different from that when President Roosevelt with his great vision of the West had to impose his will upon a reluctant congress to pass the reclamation act. Then, too, only comparatively small and isolated regions were to be benefitted. In this case the whole country west of the Rocky mountains, including much of the mountain region itself, is to be the beneficiary,

The Restoration of the Home

The fact announced on Friday by Mrs. Barrett, national president of the Florence Crittenton Home, of the present average age of girls admitted to the homes now, 16 years in comparison with the earlier average of 28 is startling and confirmatory of all the warning which has been given of the effect of the modern Jazz craze upon the young girls of this

The lowering of the average age of admission is we believe the direct result of the laxity of discipline in American homes.

Inmates of Florence Crittenton and other rescue homes formerly were for the most part broken-down women or girls aged before their time, by their manner of living. There was, too, among them a preponderating number of low mentality.

The younger girls were generally kept for a time out of the paths which lead to rescue homes, the brothel or the grave of the suicide. There was a girl's greatest danger when she reached the age of twenty. for though at age of eighteen, girls did not often avail themselves of the freedom which the law gave them but remained under parental restraint or rather parental protection until marriage or until they teft home to seek employment.

It is hard to fix the beginning of the jazz craze or to follow the course of it over the country. It seems to have had its origin in New York a dozen years ago when the new dances starting whence nobody knew, were adopted by society which also adopted into lis slightly less exclusive circles professional dancers of unknown or disregarded antecedents, some of them having come up rather recently from

In every community in the land the change is ob-

ago young girls were seldom seen on the street at night without parent, guardian or trusted friend. Now on any night they may be seen in pairs, or alone or standing at late hours in the company of young men of unknown or doubtful morals.

They are usually ill clad, in the sense that they are half clad, rouged and otherwise presenting a tout ensemble that fiftee nyears ago the police regarded as evidence that the girl so arrayed and bedizened had strayed off the reservation and she was hustled back with a warning.

Mrs. Gene Stratton-Porter, the famous author of "Freckles" and "The Girl of the Limberlost," has an article in January McCall's dealing with the subject of the laxity of parental discipline. There is something, says Mrs. Stratton-Porter, much more needed and important than the return of financial and industrial normaley.

"It is very well to fight for the restoration of normal prices and wages. It is infinitely more necessary that a fight should be begun for a return to hormal home life. If the mature women of the coming year can do something to save the young girls from becoming blase society women in their early teens, if they can interest them in school and college work, in church work, in benevolences, in nature study, in sane and reasonable athletics, in interesting and wholesome amusements, it will be the most beneficial work that

can possibly be performed for our country as a whole. What we need most as a nation is perfect physical specimens of girlhood, full breasted, red lipped, rosy cheeked by the grace of God. On every hand one sees today underdeveloped, painted, anaemic, over sophisticated girls, half clothed, dancing risque dances, and carrying cirgarette cases and even flasks.

"If the mature women of 1922 can institute a movement to save and to restore healthful innocent girlhood, they will have done the greatest work that

can be done in America today.
"I can visualize many wonderful, beneficial, and very necessary things that the women of this land can do for their country, for their homes, and for themselves, politically, economically, and socially, during the coming year. I can see no one thing that any woman can do that will be of more ultimate benefit to her country than to work for the restoration of home life, for the bearing and the rearing of children to sane and useful citizenship.

Nor is this to be the work of organizations though organizations of noble women may be helpful. The work of the restoration of the home must begin in the home. Only fathers and mothers can safeguard telr young daughters, from the pitfalls and nets which modern jazz has spread all about

Admirala

We see by the dispatches that the daughter of Admiral Horthy has been engaged to a Lieutenant Fay. We had intended to speak of this before-not of the engagement, for we are not concerned with social events, but of Admiral Horthy, who is now and has been since Bela Kun was overthrown, the chief man of Hungary and we intended to inquire of what he was admiral.

We are accustomed to associate admirals with navies, and navies with the sea. Hungary is without a navy and is likely to be so deprived for some time. It is situated like Sancho Panza's isle, many miles inland, it is impartially distant almost equidistant, from the Black, the Baltic and the Adriatic

Admiral Horthy may have had some connection with the sea when Hungary was a part of the dual monarchy and had access to the Adriatic, but that maritime relation was not necessary to his assumption of the title or the investment of him with it. There have been admirals without navies as well as navies without admirals.

The word in the first place had no relation to the naval service. It was derived from an Arabic word meaning "lord" or chief.

Thus even the Swiss, if Switzerland were not a republic, might have an admiral if it wanted one, much more substantial than the navy which Josephus Daniels either ignorantly or with national politeness once invited to participate in a great naval review off our Atlantic coast.

For a Better Government

The Republican has received from many of its readers and friends, Arizona members of the National Economic League, the result of a compilation of returns from a questionnaire sent out by the league to ascertain the views of representative business and professional men in every state, as to needed changes in the rules of congress so that there may be responsible and visible executive leadership-to secure a more efficient federal administration. There were included propositions for an executive budget; a proposition to give the cabinet the privilege of the floor to defend it and to participate in questions relating to finance and administrations.

There were eight of these propositions relating to various phases of legislation concerning finance and administration. The eighth suggested a referendum in case of a dispute between president and congress.

More than 1000 replies were received. All the proposed changes were endorsed and all of them except the eighth most overwhelmingly endorsed by percentages ranging to 96 for visible and responsible leadership and 95 for the executive budget.

THE UNKNOWN SOLDIER

(Copyright, 1921, by Frank Crane)

A very impressive ceremony took place in October in Westminster Abbey, when General Pershing, the head of the United States army, laid the Medal of Congress upon the grave of the Unknown British Soldier buried there.

This incident needs to be widely noted in the United States.

There are two forces constantly at work in our country, as in all countries.

One of these forces is Dissension. It is the natural tendency of nations to suspect, distrust, and dislike one another. It is the sentiment which is the little seed out

of which war grows. There are many agencies at work cultivating this sentiment among us. Most of them do it unconsciously and from what they consider the best of motives. But nevertheless they are steadily injecting poison into the

The other force is the spirit of Unity, of Brotherhood. It is the duty of all men who have any sort of vision and who really desire the welfare of the human race to promote this spirit as much as possible.

When the war came the allied nations were drawn together in a very strong and wholesome sentiment of brotherhood. Every effort should be put forth to keep alive this sentiment. And the act of General Pershing

is the kind of thing that helps in this direction. This idea was expressed by King George upon this occasion in a letter which he wrote to the general. He expressed his heartfelt good wishes for the International Conference to be held at Washington, and his hope that the statesmen who gathered there would bring their labors to a satisfactory conclusion. And he added these

"May they do all that practical statemanship can achieve to perpetuate the comradeship of the war in the maintenance of peace."

The same sentiment was expressed in a London newspaper as follows:

Such an act of knightly homage as General Pershing performed at the tomb of the Unknown Warrior in Westminster Abbey yesterday recalls the victorious comradeship in the world peace which is yet to win."

And this ought to be the aim of the populations, both of Great-Britain and the United States, to allow no bitterness to estrange them. For upon the unity of the two English speaking governments depends the peace of

Of course, the English government has made misthe same. They are both human and it is right to criticize them and to correct them. But to allow the inevitable errors of government to make enemies of the two great peoples would be an unspeakable calamity.

Sir L. Worthington-Evans, at the banquet given to General Pershing, used these eloquent words:

"A great forward step has been taken by the summoning of the Washington conference. May the same spirit of mutual accommodation and fraternal affection as that with which we stood together in the great war animate the representatives of our nations to carry out the high resolve, that our dead shall not have died in

It is to be hoped that the common sense of the two great nations will go forward in this spirit and insist that Great Britain and the United States shall go forward hand in hand to fulfil the purposes of destiny.

And it is to be hoped that this will find expression not only in words but in deeds. General Pershing said

in his speech on the same question: "I, for one, have arrived at the conclusion that the time for the exchange of compliments is about over, and

that all that now seems to be necessary is to reach some sort of understanding that will guide us in the future."
