

# MAY FIGHT STEEL TRUST

DISSOLUTION AND CRIMINAL PROSECUTION OF INDIVIDUALS EXPECTED.

## MR. TAFT TO DECIDE

STEPS TO BE TAKEN ARE LEFT WITH PRESIDENT AND ATTORNEY GENERAL.

Washington.—The United States Steel Corporation is to put upon the anti-trust grill at last.

Not only will the government move to dissolve it as an illegal combination, but its principal officers are in danger of criminal prosecution.

In view of the decisions of the United States Supreme Court in the Standard Oil and Tobacco trust cases, the officials of the administration are confident the proposed proceedings will be attended with success.

Within a comparatively short time Elbert H. Gary, chairman of the board of directors of the United States Steel Corporation, will have direct and positive information as to whether the Sherman anti-trust law is "archaic," as he contends, and will know whether the policy of "co-operation" among the steel interests, for which he is responsible, is legal.

Within about ten days the results of investigation by the bureau of corporations into the organization and the conduct of the United States Steel Corporation will be placed on the desk of President Taft.

WILLIAM E. LORIMER.

United States Senator from Illinois. In Connection With Whose Election Bribery Has Been Charged. A Committee Is Now Conducting an Investigation in the Senate at Washington.

The hastening of the report is the result of directions issued by the President himself to Secretary of Commerce and Labor Nagel. It is reported the information gathered by the bureau will be turned over to the House committee now conducting a steel trust inquiry.

The alleged activity of the administration since the House committee instituted its inquiry drew from Chairman Stanley a statement in which he said:

"Senator Culberson, myself and others who have studied this question, have long harbored the suspicion that somewhere in the archives of the government there was evidence that would throw a flood of light upon the acts and doings of the United States Steel corporation.

"The judiciary committee of the Senate made the most strenuous efforts to ascertain these facts at a time when the absorption of the Tennessee Coal & Iron Company by the Steel corporation could hardly have been called consummated.

"One year ago I was advised by Representative Parker of New Jersey, then chairman of the House judiciary committee, that neither the President nor the attorney general favored a resolution of inquiry into the United States Steel corporation. When the resolution to have the department of justice advise Congress as to the conditions into which we are now inquiring was favorably reported, the attorney general, with the advice and approval of the President, so I am informed, flatly refused to furnish this information on the ground that it was not compatible with public policy.

"It was well known that this resolution, although heartily approved by the people and the press, was, over my repeated protests, pigeon-holed in the rules committee in the last Congress.

Washington.—The wool tariff revision bill has been introduced in the House by Chairman Underwood of the ways and means committee and debate on it begun. The measure was accompanied by a report from the Democrats of the committee in its favor, while Republicans unanimously reported against it.
