Cottolene at Cake-baking time

It is mighty hard to obtain uniform results in cake making—If you use butter or lard—because both of these products vary so in quality.

Cottolene is always uniform—always produces good results. With its use, you can count on a certain kind of cake being the same every time.

Cottolene sells at about the price of lard, and is so rich that one-third less is required than either butter or lard.

Cottolene is never sold in bulk—always in air-tight tin-pails, which protect it from dirt, dust and odors. It is always uniform and dependable.
