INLAND WATERWAYS.

In the scheme of building an interior waterway from the rugged rocks of Maine to the sand pits of Florida, Congress early recognized the necessity of connecting up well defined water avenues along the Atlantic coast to the end that the perils of Hatteras and other danger spots along the Atlantic shores might be avoided.

As a part of the project the Chesapeake and Albemarle canal was purchased by the Federal government at an upset price of \$10,000,000, the same having passed to the United States within the past sixty days. This is a connecting waterway between Norfolk, Va., and Beaufort, N. C., being a part of the Boston to Beaufort Inlet, N. C., section of the proposed continuous inland waterway from New England to the Rio Grande. The purchase of the canal having been accomplished, the Engineer Corps will shortly advertise for bids to deepen this waterway 12 feet, with a width of 300 feet. To aid in the work of excavation, a dredge will also be contracted for.

WALL STREET TODAY

New York, Aug. 6.—10:45 a. m.—Although inclined towards irregularity, early dealings in today's stock market pointed to a continuance of the upward movement. Union Pacific, Southern Pacific, Great Northern Pacific, Reading, New York Central and St. Paul all rose over yesterday's closing prices, while Virginia Union gained a point. Trading was in moderate volume and lacked the preceding day's breadth.

Non-Union Pacific continued the feature of the early session, though adding nothing to its rise. Other market leaders were Lazard's, Steel, Amalgamated and Reading making very slight improvement from early recession. The movement brought out some inconspicuous issues. Colorado and Southern Pacific preferred and American Locomotive gained 2 points. Virginia-Carolina Chemical preferred fell 2. Profit taking followed the rise and much of the advance was lost before noon, when the market became very dull. Bonds were steady.

It is strange how many more sick friends there are to be visited Sunday morning after you get an automobile, particularly when the dust has been laid.

\$8,000,000 OWED BY INVENTOR OF AIRSHIP IN PARIS

Paris, Aug. 6.—Debts amounting to \$8,000,000 are owed to various people by Armand Deperdussin, the aeroplane inventor who was arrested here, yesterday, on charges of breach of trust and forgery. Against these liabilities his assets, which are somewhat vague, are estimated at \$4,000,000. His bankers hold his paper for \$6,400,000, while other creditors claim \$1,600,000. The newspapers here recount many stories of Deperdussin's personal extravagance. He was the foremost patron of aviation in France and spent money with the utmost prodigality, always feeling confident that aviation would develop much more extensively than it has done.

REVISED DRAFT OF CURRENCY BILL UNDER SCRUTINY

Washington, Aug. 6.—Copies of the revised draft of the Glass currency bill containing amendments adopted, late yesterday, by Democrats of the House currency committee, were in circulation about the capitol, today, and were the subject of careful scrutiny by friends and opponents of the President's currency reform plan. One of the amendments, making the federal reserve board to a partial extent by-partisan by having the appointive members divided between political parties, is expected to ally somewhat opposition based on fear of "political control" of the proposed new currency system.

Letters From Higgins And Davenport Read In Mulhall Probe

Also One From Lawyer Emery With Reference to Brandegee

Washington, Aug. 6.—The House Lobby Committee took up the work for which they were appointed yesterday. Among the first letters presented for identification by Mr. James A. Emery, local attorney for the National Manufacturers' Association, was one from former Congressman Higgins of Connecticut, addressed to Barnhart Brothers & Spindler, of Chicago, acknowledging the receipt of their views on the "Moon Bill," and their reply to Mr. Higgins. Several letters written by Daniel Davenport, of Bridgeport, to Mr. Emery were also read into the record. These related to the anti-injunction bills pending before Congress two years ago. In a letter written by Mr. Emery to the president of the Manufacturers' Association he said that he had that day been before the committee of Interstate Commerce of the Senate, and had been subjected to a "pretty sharp examination from Senators Brandegee and Cummins."

NEW TOWN

The barn ice-house and silos of A. C. McArthur of Palestine took fire about noon yesterday and were burned to the ground with all of his summer crops of hay, oats, besides tools and machinery and his team of horses. The total loss is estimated at \$500 with only \$250 of insurance. The cause of the fire is unknown. His house was unharmed.

Fire Loss.

Mrs. P. Mahoney Bedford while assisting in work in the family of Mr. W. A. Leonard of the borough one day last week was taken violently ill, and had to be removed to her home. This was done by Mr. Leonard in his auto. The family physician was called in who recommended her removal to St. Vincent's hospital. Bridgeport. Her benefactor came to the rescue and she was conveyed there by auto. She was found to be suffering from gall stones and an operation was immediately performed. Dayton Family Reunion.

At the home of Mrs. C. W. Dayton in Sandy Hook, Sunday, the absent members of the family came to the home nest and met in the annual reunion. From Bethel came Mr. and Mrs. Joseph Dayton and grandchild, and John W. Dayton, from Danbury, George and William Dayton, from Passaic, N. J., George Kahn and from New Haven Mr. and Mrs. Martin Wents and family. The mother promised to welcome them in 1914.

Middle District Muddle.

The Middle District school meeting last night voted that the district committee repair both school houses at an expense not to exceed \$500, but failed to make a corresponding reduction in the tax rate. The previous meeting voted to lay a two mill tax to cover an estimated cost of \$1,000 for repairs, and it now looks as though another meeting will be necessary to straighten the affair out. The law distinctly states that no greater sum may be raised for school taxes than the cost of the work for which such tax is levied.
