WOULD BAR ALL LINES OF TEUTON INSURANCE FIRMS

Maintained German Companies Strengthen Empire Financially.

New York, Aug. 21—Richard M. Hurd, chairman of the board of trustees of the American Defense society, has written President Wilson asking him to extend the terms of his proclamation barring Germans from the marine and war risk insurance field to cover all lines of insurance.

INSECTS INJURING STORED PRODUCTS IN CONNECTICUT

Both during the present season and during the war it is of the greatest importance not only to raise more food but to conserve to the utmost those food supplies already grown. To this end we should prevent the ravages of insect pests, many of which attack and destroy a large amount of food materials each year in Connecticut.

Much damage results each year in Connecticut to cereals and other stored food products from the attacks of insects. This injury has been estimated at five per cent. of the total value of the products, or \$200,000,000 each year for the United States, and is wholly preventable.

The insects are chiefly beetles (Coleoptera) and moths (Lepidoptera). The former include the meal worms, cadale, pea and bean weevils, drug store beetle, confused flour beetle, rust-red flour beetle, saw-toothed grain beetle, granary weevil, rice weevil, large and small cabinet beetles, black carpet beetle, larger beetle, red-legged ham beetle, and cigarette beetle. The latter include the Indian meal moth, Mediterranean flour moth, meal moth, Angoumois grain moth, and European grain moth.

Most of these insects may be destroyed by heating to a point between 120 and 140 degrees F. for five or six hours. The vitality of seeds is en-

ONLY FEAR KEPT GREEK KING FROM JOINING KAISER

Constantine's Message on Subject Disclosed in Documents Seized.

London, Aug. 21.—An Athens dispatch to the Exchange Telegraph Co. says that among the diplomatic documents found in Athens since the change in government is a dispatch of former King Constantine, written a few days after the war began, in response to a message from Emperor William, who proposed that Greece should range herself on the side of the Central powers.

The emperor well knows my personal sympathies, as well as my military opinions, attract me to his side. Nevertheless it is impossible for me to understand in what manner I could be useful to him in mobilizing my army. The Mediterranean is at the mercy of the united fleets of England and France, which could destroy our navy and marooned marines, occupy our island, and above all prevent concentration of my army.

Gottlieb von Jagow, then German foreign secretary, replied to Constantine that Emperor William would understand the necessity of maintaining neutrality for the present. He advised Constantine to reach an understanding with Sofia and Constantinople.

AVIATORS GIVEN A SALARY RAISE OF \$10 A MONTH

Massachusetts Flyers Now Receive \$110 As Well As Their Keep.

The Aeronautical Department announced today that all Massachusetts men will be paid \$10 per month by the State during their period of training as aviators and observation balloon pilots in addition to the \$100 per month and rations and sleeping accommodations allowed by the Government.

The total number of applications to date is 1,400 or only 200 short of New England's quota to the 25,000 but New England will not stop here but continue until 5000 applications are secured as there is no reason why New England should not furnish one-fifth of the Aviation Army.

Eight Million Feet Of Film To Be Shown By Y. M. C. A. Camps

To provide recreation for the troops in camp, the National War Work Council of the Young Men's Christian Associations in the United States made provision for the presentation of eight million feet of film per week.

Of course the great demands will be in connection with the camps of the National Guard and the National Army, 32 in number, but arrangements have been made to take care of many smaller points. In the Southern Department for instance, two movie trucks will be used to carry entertainment to troops in out of the way places.

In order that the layman may understand that eight million feet of film a week means, it may be explained that a second is required to run a foot of film through a machine. This means that eight million feet of film represent eight million seconds, or two thousand two hundred and twenty-eight hours of solid entertainment.

As a result of a careful study of the pictures presented by the Young Men's Christian Association at the various camps along the border and in the camps established since the war began, Mr. Warren Dunham, Director of the Community Motion Picture Bureau which is supplying the pictures for the Young Men's Christian Association, has pretty good ideas as to the kind of pictures the men like.

On the other hand they like romances. Little Mary Pickford is just as popular with the men in the camps as she is with the millions of movie fans. The men like real war pictures. They like farces. In fact they are working hard and they want entertainment.

BIG INDUSTRIAL INTEREST FORCED GEN. GROENER OUT

Amsterdam, Aug. 21.—Commenting on the retirement from the Prussian war department of Gen. Groener, who, it is reported, will take a command at the front, the Leipziger Volks Zeitung, an organ of the minority socialists, says: "According to rumors Gen. Groener's fall was compassed by a powerful group of interests in the army of big industrialists for whom the auxiliary service law is too liberal."

More than 350 military workers were called out on strike in Boston. Their demands for shorter working hours and more wages were refused.

WANT MISSION TO BUY BOOKS FOR 'ROOKIES'

Men at Cantonments Will be in Need of Reading Material

Washington, Aug. 21.—One of the most interesting developments of war times was announced today to the War Service Committee of the American Library Association in a letter from a "rookie" in a camp "somewhere on the map," telling of a revolutionary innovation in the game of poker.

A good book beats a "royal flush," writes this rookie, "and is the only thing known that can beat this combination of cards. Old regulars had told us this when we first came to camp, but we thought they were merely spouting. Now, among a lot of other things, we've learned that they were right about the books."

The American Library Association's plans comprehend the erection of a library building in each of the cantonments, with the Y. M. C. A. buildings and the Knights of Columbus buildings as distributive points. To put up these buildings and obtain the necessary books and magazines will cost approximately \$1,000,000, and the American Library Association will assume entire responsibility for raising this sum.

As is the case in and around Washington, a need of books for the soldiers may be seen in any camp or detachment. A detachment of men is standing guard over bridges, or waterways or other property. The "boys" at the score of such guard camps around the national capital are cheerful and optimistic.

Frank A. Munsey, Once An 'Easy Mark'

Few American millionaires have had a harder climb to the heights of success than Frank Andrew Munsey, owner of magazines and newspapers, who will today round out the sixty-third year of his life.

Mr. Munsey was born in Mercer, Me., Aug. 21, 1854, and was a country store clerk and telegraph operator in his youth.

As a lad of seventeen, while trying to make his way through business college, young Munsey worked in the summer as telegraph operator. It was at this period of his life that he became a victim to the "great-rich-quick" fever.

One day a number of my distinguished patrons were lounging in the room and I stepped back from my instrument and faced the group. Mr. Munsey then tells how he asked for "tips on the market," and received several. He selected the one which sounded best to him and invested those precious one hundred dollars.

Amusements POLPS

Honors are about evenly divided at Polli's, the first half of the week, between the vaudeville and photoplay features. In both parts of the program there are headlines of real merit and the entire bill makes up an entertainment of diversity.

Harry Cooper, the famous comedian, is back again, assisted by Jim Reaney. They present a comedy entitled "Secret Service," a concoction of fun that brings laughter after laughter. They are both capable performers and handle their really interesting material in a most enjoyable way.

"Mary Jane's Pa," that play made famous by Henry W. Dixon, loses none of its interest in its picturized form. The production by Vitagraph features Marc MacDermott and Mildred Manning, supported by a big company of favorites.

The Riels, distinguished aerialists, who have appeared here and abroad as headliners in the bigger circuses, have an important place in the program with their aerial acrobatics.

PLAZA

The initial presentation of Douglas Fairbanks' most laughable farce, "Wild and Woolly," drew big crowds from the moment he stepped on the stage, there is plenty in attendance the remainder of the week.

"Wild and Woolly" is a corking good picture and it certainly makes your blood boil in more than one spot. "Jeff," son of an Eastern railroad president, loves the West though he's never seen it and his ideas of Arizona would have served him well in "Seventy-Six," but not now.

ALL RUSSIA WILL BE REPRESENTED AT MOSCOW MEETING

London, Aug. 21.—The composition of the conference to be held in Moscow August 25-27 to consider the political situation and plans for the new national government is given in an Exchange Telegraph dispatch from Petrograd as follows: "Petrograd and Moscow town councils, 15 delegates each; other large towns seven each; council of soldiers and workmen's delegates 100; peasants, 100; town zemstvos, 400; cooperative societies, 300; industry, 120; agricultural societies, 100; representatives of science, 100; diploma, 400."

WISE AND OTHERWISE

The Dutch take pains to look the other way, so as to be able to declare truthfully that they don't now Saturday any supplies going to Germany.

It is noticed that those fellows who can't go to war on account of their weak eyes and bad teeth are not so apt to be named Cadmus and Salkinski as Smith and Jones.

It is hoped that future politicians looking for pork will not be able to get pensions for their friends who were drafted but were exempted.

Now if President Wilson is going to set an example in favor of the carry over their lines, the baggage men in order for him to walk up Pennsylvania avenue with a peck of potatoes and three pounds of butter.

The American soldiers in France object to the name "Sammy," but our old uncle with the striped trousers hasn't asked yet to have his name changed.
