"Young Mr Amos complained of headache, felt dumpy with a fever. I told him he had malaria or he was in love. He said he had both," remarked Mrs Knipp. "Did his girl give him the shake?" asked the man with the copper nose as he snickered. Mrs Knipp gave him a hard look, bit her lip and put some Brown's Quick-fire Charcoal in the stove to revive the fire.

John W. McDonald,  
Thomas F. Devine.

Judge of Probate,  
Robert A. Lowe.

Among the contributions received at the democratic headquarters in Chicago this week was a consignment of honey from a western farmer.

Our townsman C. C. Commerford writes a letter to the Hartford Times endorsing Lilley and denouncing the "Republican" that wrote up Lilley in the same paper several days ago. Mr Commerford's closing sentence says:

"If Mr Lilley is elected, as he will be by the largest vote ever given a Connecticut governor, the workers will find in him a true friend."  
Wake up, Charley.

The district jail in Washington is full to overflowing and the inmates are mostly of the African race. It is now pretty generally known that Washington has the largest negro population of any city in the world. One hundred of these prisoners are to be transferred to the United States prison at Fort Smith, Ark. Some such step was indispensable and should have been taken years ago pending the enlargement of the Washington jail so that five persons need not be confined in single cells and 664 prisoners, the enrollment this week, need not be billeted in cells large enough to accommodate only about half that number. The national capital and the district in which it is situated are but poorly furnished with penal institutions.

Knute Nelson, one of the republican leaders in the United States senate, is another strong advocate of the democratic plan of guaranteeing bank deposits. His utterances in favor of this plan, like those of Governor Hoch of Kansas, are being widely circulated in the west. Where the guarantee of deposits is one of the most important and popular issues in the campaign. It will be of interest to many people to know that Senator Nelson favored the guarantee of bank deposits in a

speech before congress on the Aldrich-Vreeland bill. Among other things he said: "To my mind if we want to deal honestly with the American people, if we want to deal honestly with the depositors in our national banks, we ought to keep this fund that we call 'a reserve fund' for the protection of the depositors in shape where it can at all times be available for the protection of the depositors. It is a common thing to note, and I call attention to it."

Wade H. Echard of Uniontown, Pa., who was connected with the democratic national committee in 1904, and who is interested in coal properties, is in Chicago, and will fill some speaking engagements during the next two weeks for the democrats. Mr Echard says the Roosevelt majority of 507,000 in 1904 will be reduced to 100,000 in November. Continuing, he said: "The tide towards Bryan in Pennsylvania is simply wonderful, and if the same conditions prevail in other states there will be a democratic landslide in November. Not only is there phenomenal apathy among republicans in Pennsylvania, but hundreds of part men are going to vote for Mr Bryan. In every part of the state one hears reports of republicans who will vote the democratic national ticket. Several causes contribute to these conditions, not the least of which is the fact that many of the industries have not operated since last October, and only a small percentage have operated at all during the past year. Every indication points to the fact that Taft will receive the smallest plurality given to any presidential candidate since Harrison's defeat in 1892. In Fayette and Westmoreland counties, in which the large coke manufacturing plants are located, more than 30,000 men are employed at ordinary times. More than 10,000 of these men, between October and May, returned to their native lands, and the 20,000 who remained in the two counties have averaged less than one and one-half days per week in the last year. The laboring classes are inclined to blame the present administration for the unsatisfactory condition of business and can be relied upon to vote almost as a unit against the election of Mr Taft. That business shows no signs of improvement is best evidenced by the fact that only last week 1,000 additional coke ovens, representing employment for 1,000 men, and producing coke to the equivalent of 2,500 tons of steel, were put out of blast."

HEARD IN PASSING.

They say when there set in good and nipping mornings early in October, the winter is sure to be long and bitterly cold. Don't take any stock in these old-fashioned predictions. Just put in your coal or boron from your neighbor and let the old stove start in to do the rest.—New Haven Union.

The terrible auto, no doubt, will come in again for its share of publicity owing to recent accidents and the addition of another death. But kindly bear in mind that accidents of a similar nature and happening every day with horses, but have become so common that the average newspaper does not give more than a passing notice.—Middletown Press.

The letter of President Roosevelt to Congressmen Lilley wishing him success in his canvass is a welcome help and sign of approval and his friends appreciate it highly. The straits to which the opposition to Mr Lilley is resorting denote a desperation that sticks at nothing and a malicious disposition characteristic of the whole effort to discredit him.—Bridgeport Standard.

Ellen Shaw of Cambridge, Mass., has been taking dew baths, eats no meat or fish, has an altar in her bedroom and has given \$500 to a society of Sun Worshipers, and her society has asked for a conservator over her on the ground that she has in mind giving the remainder of her property to that organization. The lawyers and the court have decided to visit the temple of the Sun Wor-
