National University Is Realization of George Washington's Dream

President Regretted Lack Of American Colleges
Early Faculty and Graduates Include Many Persons Of Distinction

By John Claytion Painter.

Former Librarian "...and I ..."

It was the worry's privilege to introduce Prof. John Claytion Painter in the Library of Congress and the Library of the National University. The scholar and the author of the National University was a young man with a passion for learning and the desire to pursue his education.

The National University was founded in 1889 and was the first institution of higher education to be established in the United States. The University was established by the Federal Government and was funded by the Morrill Act of 1862, which provided land grants to states to establish land-grant colleges.

The University was founded in the District of Columbia and was the first major research university in the United States. The school was established to provide education and research opportunities for students and faculty.

The University has grown significantly over the years, and today it is one of the largest and most respected institutions of higher education in the world. It has over 30,000 students and offers a wide range of undergraduate and graduate programs in a variety of fields.

The University is home to many of the nation's most distinguished scholars and researchers, and it is consistently ranked among the top universities in the world. It has received numerous accolades and awards, including recognition as one of the "most innovative" universities in the United States.

The University is located in the nation's capital and is the site of many important events and activities. It is also a center for cultural and artistic activity, and it is home to a number of museums and galleries.

The University is a symbol of the nation's commitment to education and research, and it plays a vital role in the nation's future. It is an institution of excellence and a beacon of knowledge and innovation.

National University, Washington, D.C., April 9, 1889—Part Two.
