Expert Predicts Bumper Crop Will Lower Food Prices

Statistician of Commerce Chamber Takes Optimistic View of Prospect for Grain Here and Abroad

From The Tribune's Washington Bureau

WASHINGTON, Aug. 13. — Lower food prices as the result of bumper crops in all parts of the United States were predicted to-day by A. W. Douglas, chairman of the committee on statistics and standards of the Chamber of Commerce of the United States, in his monthly bulletin on crop and business conditions.

Receipts of grains at primary points have not been heavy, Mr. Douglas reports, largely because of the lack of cars, but he contends that prices have been on the toboggan slide because of a great surplus, which sooner or later must find not only a domestic but a foreign market.

"There is no longer any question as to an abounding harvest in all manner of agricultural products," the Douglas report said. "The winter wheat crop will be about 535,000,000 bushels and the spring wheat not less than 275,000,000 bushels, despite severe local damage by black rust in some states in the Northwest. With a few more timely rains there will be 3,000,000,000 bushels of corn, of which the Southern states will furnish about one-third.

"There will be a plentiful supply of other products — grain, tuber-forage, fruits and vegetables for man and beast. The wheat surplus in Kansas alone, taking into account that carried over from last season, is more than 100,000,000 bushels.

"The promise now is for a production of 12,300,000 bales of cotton, barring those fifty-seven varieties of things which may happen in the next three months.

"It is a great season for watermelons, with shipments close upon 30,000 cars before the season is ended. About 1,000 cars are received daily, not only from the Southern states but even from far away California. Georgia leads with nearly 10,000 carloads, with South Carolina and Florida each approximating about 4,000 cars."

Touching on business conditions, Mr. Douglas said:

"Indecision and hesitancy still characterize textiles and some leather products. Reduced working days and sometimes entire closing down of the mills mark textiles in some localities. Lack of transportation is the principal hindrance to better and larger distribution.

"Building operations are much hampered by almost everything that can happen to them, scarcity and the high price of labor and material and difficulty of financing loans on construction projects."
