the day. The early sales were at 114@114, but under the combined influence of slightly reduced bond quotations in London, the advance in the Bank of England discount rate to 4 per cent, and the fact that the Treasury sold only a million gold, there was a subsequent advance to 115, though the chief dealings were at 114. It would seem now that the clique having checkmated, for this week's turn at least, the Treasury Department, are now able at will to make call gold and currency worth whatever considerations for use they may choose. Cash gold, to-day, was much less difficult than at any time this week, the "let up" being doubtless to prevent Treasury interference. The rates were 1-16 and 1-64 per cent, per diem, and 2 and 3 per cent to flat for borrowing; a being bid for the use of gold to-morrow. The bids for the Treasury gold amounted to $4,300,000 at 113 to 114.57. The million accepted went to the clique at 114.57, about full open market prices. Of this amount Messrs. Joslyn, Bach & Co. took $500,000, and Deforest & Marston the remaining portion. The Assistant Treasurer paid out in called bonds $5,000, and $101,000 in coin interest on the public debt. The Thuringia sailed with $64,000 in silver coin. The day's business at the Gold Exchange Bank was as follows: Gold cleared, $58,302,000; gold balances, $1,206,000; currency balances, $1,532,343. The following were the quotations:

The day's business at the U. S Sub-Treasury was:

The Bank of England lost £556,000 sterling during the week.

The monetary situation, notwithstanding the attempts of the Treasurer to relieve the situation yesterday by buying $3,000,000 bonds for greenbacks, is still in a perturbed condition, and borrowers are subjected to much suffering in getting accommodations. As a rule it has cost a sixteenth to have stocks turned, call loans ranging at a thirty-second to an eighth plus the legal currency rate. There was little relaxation at any time, the final rate being 7 gold. Of course the lack of operations of the clique have much to do with this continued stringency, but the banks are in such poor shape, that the natural order of affairs is bad enough. They are running very short of national bank notes owing to their continued absorption by the Western demand, and this class of currency is in very urgent demand. There is nothing new to note in discounts, the best double named paper being quoted at 12 per cent. The amount of Clearing-house certificates for which legal tenders have been issued is now $14,540,000.

Government bonds have been quiet and lower, closing on the basis of 114@114 for 1867s. Fisk & Hatch report as follows at 4 p. m.:
