Library Bureau advertisement. And then one day he woke up— He had purchased the last lot of cards for his card records at what seemed like a very low price. Being human, he rather prided himself on finding a bargain. Until— One day he noticed that his clerk couldn't get through with the day's work. He asked—"Why?" "I'm working just as hard," she said earnestly, "but I can't handle that last lot of cards very fast. They are uneven and they vary so in size that they aren't easily fingered. They are different weights, too, and stick together—so I lose time." That was all there was to the conversation. But this man-who-thought-he-had-a-bargain did some thinking—and concluded that what he had "saved" in price had cost him ten times as much in wasted minutes. The moral of the story is this:—Buy good cards—the cards best suited to your own particular purpose. L. B. Cards are made up in many forms and carried in stock for all classes of business:—cards for sales records, stock records, purchase records, card ledgers, insurance records, credit records, quotation records, follow-up records, etc. Write for sample cards and literature. Library Bureau. Card and filing systems. Founded 1876. Filing cabinets wood and steel. O. H. RICE, Manager. 316 Broadway, New York.
