MEDICAL AND SURGICAL NOTES.

NITRIC ACID IN WHOOPING COUGH.—A foreign medical journal contains an account of the successful treatment of uncomplicated whooping cough with diluted nitric acid, in doses of from 5 to 15 minims, according to age, with simple syrup, given every 3 or 4 hours; the effect being to alleviate the cough and spasm, and apparently cutting short the disease. The operation of this remedy is believed to be that of a tonic sedative and antiseptic, its refrigerating properties being also of some account. An aperient combined with an alterative is given in all cases where required by the state of the digestive organs.

A NOVEL FRENCH THEORY.—M. Robing, an eminent French chemist, announces to the French Academy of Medicine his belief that life exists only in combustion, but the combustion which occurs in our bodies—like that which takes place in chimneys—leaves a detritus which is fatal to life. To remove this, he would administer lactic acid with ordinary food. This acid is known to possess the power of removing or destroying the incrustations which form on the arteries, cartilages, and valves of the heart; and, as buttermilk abounds in such acid, and is, moreover, an acceptable kind of food, its habitual use, it is urged by M. Robing, will free the system from these causes, which inevitably cause death between the seventy-fifth and the hundredth year.

DISEASE A HELP TO THE INTELLECT—In his "Enigmas of Life," Mr. Greg, the well known English essayist, takes the ground that bodily pain and disease are not only compatible with, but may directly contribute to the loftiest efforts of the intellect, sometimes positively enhancing its powers,—that the effect of some disorders and of certain sorts of pain upon the nerves is to produce a cerebral excitation, and that the stimulus thus communicated to the material organ of thought renders it for the time capable of unusual effort. Mr. Greg asserts that men under the stirring influence of severe pain are capable of a degree of luminative and ratiocinative brilliancy which astonishes themselves and all who have known them only in ordinary moods of comfort; torpid faculties becoming vigorous and sparkling, forgotten knowledge being recovered, and marvellous gleams of insight being vouchsafed them. The wonderful eloquence of Robert Hall is believed to have been greatly owing to the stimulating influence of a terrible spinal malady. Dr. Conolly mentions a gentleman whose mental faculties never reached their full power except under the irritation of a blister. Such instances as these are regarded by Mr. Greg as fully corroborative of his theory.

New Publications.
