Wheel Knowledge is Safety Factor

By J. Leo Burges,
Times Automobile Editor.

Of all the units of the automobile, none are more important nor more neglected than the wheels. Brakes are vital, considerations necessary and steering essential. But the wheels are the driver's only contact with the road, and to him they are everything. And in this process it isn't at all necessary for anything to break. The point service tires frequently serve when the wheels are doing exactly what any one would expect of them under the circumstances.

However, it isn't always fatal when the wheels go out of true, as "true" would be the technical term. Sometimes, if the car isn't intended to carry heavy loads, the wheels simply won't be balanced. But when the car is intended to carry heavy loads, such a condition is likely to cause serious trouble. The trouble may not be immediately noticeable, but it may be present for a long time, and it may end in a serious accident.

Effect on Weight-

One of the most important factors in the proper operation of a car is the balance of the wheels. When the wheels are out of balance, they will feel insecure and will lose all stability. This condition is particularly noticeable when the car is driven at high speeds, and it is likely to cause serious accidents.

The application of this principle is evident in the behavior of the rear wheel. When the rear wheel is unbalanced, it will be thrown out of true, and will be difficult to control. It will also be difficult to control the car when the rear wheel is unbalanced.

In the case of a car that is driven on a road, the unbalance of the rear wheel will be felt in the handling of the car. The car will be difficult to control, and it will be difficult to drive. The car will also be difficult to control when the rear wheel is unbalanced.

With the right performance assured, pick your closed car with the idea of utility and comfort uppermost.

On that basis examine the good Maxwell Club Sedan. Try all the seats. Stretch your legs. See how easy it is to get in and out.

Then drive it on the road and experience its driving and riding comfort.

Of course, since it is a good Maxwell, you know you can count on care-free, economical performance.

An ideal car for the family, for the busy man or busy woman; and, by long odds, the best value in the four-cylinder field.

Motor Briefs

WASHINGTON Will See Annual Work Under Supervision of Local Editors.

The National Chevrolet Turnover committee and manufacturers call which is being engaged by over 1,000 dealers throughout the United States in Washington during the winter is scheduled.

The party consists of various models of the Chevrolet, and is composed of three distinct elements:

1. The Chevrolet employees and salesmen call which is being made by the manager of the Chevrolet, as well as the members of the management of the Chevrolet, for the purpose of checking the performance of the Chevrolet dealers, and of determining the efficiency of the Chevrolet.

2. The Chevrolet employees and salesmen call which is being engaged by the manager of the Chevrolet, as well as the members of the management of the Chevrolet, for the purpose of checking the performance of the Chevrolet dealers, and of determining the efficiency of the Chevrolet.

3. The Chevrolet employees and salesmen call which is being engaged by the manager of the Chevrolet, as well as the members of the management of the Chevrolet, for the purpose of checking the performance of the Chevrolet dealers, and of determining the efficiency of the Chevrolet.

Traffic Rules Should Be Revised

Car's Design and Durability Ought to Be Considered, Says Captain Horton.

The car's design and durability ought to be considered, says Captain Horton, in determining the weight of the car.
