

WHAT IT MEANS

Many people do not know what a bank's Capital is for, or the difference between a bank of little or no capital and one with large capital.

A Bank's Capital

Is the fund that protects the depositors from loss; therefore the larger it is, the greater protection the depositors have. This bank has a

Capital of	\$75,000.00
Surplus Fund of	15,000.00
Undivided Profits	12,500.00
Additional Stockholders Liability	75,000.00
A Total of	\$177,500.00

This means that we must lose \$177,500.00 before our depositors could lose a cent. This protection is for YOU. When you think "Bank" think "First National."

The First National Bank of Madison
