Cartridge Kodaks.

They are hardly more than half the thickness of other cameras; they are adapted for films or plates, and possess the daylight loading feature. These cameras are provided with the rising, sliding and falling front, two view finders, has Eastman's patent bellows and is equally perfect as a hand or tripod camera. It has an index for focusing and when used with plates may be focused on the ground glass.

These new folding Kodaks are the most compact, practical, instruments on the market. Every lens in these cameras are carefully tested, and samples of their work can be seen. It is really a surprise that a Kodak that will take a 4 by 5 picture, with such improvements can be sold for \$25. We are always pleased to show goods. Developing and printing done by experienced man.

No dead stock is wanted or bought by us, no matter what the inducements. Still goods will sometimes accumulate faster than anticipated—they must be disposed of even at a sacrifice—that what we are doing now—sacrificing a few dollars—you derive the benefit.
