

So, this is what has helped your nerves so much

RENEWED health and strength—won back through the beneficent help of Sanatogen—has been the happy and satisfying experience of thousands of men and women. They have written and told how it succeeded them when their nerves—broken down through illness, over-work or worry—were starved out and drained of their vitality.

And if your nerves have given way under stress and trial—if your digestion is upset—if your sleep is restless and disturbed—if you are fretful and irritable—if your work is a burden—you may well consider whether Sanatogen will do for you what these thousands of other men and women say it has done for them.

Prof. Thomas B. Stillman, M.S., Ph.D.

The well-known research chemist of Cornell University, writes: "The chemical analysis of the constituents of Sanatogen is a first class, representative of the highest quality of a product containing phosphorus, iron, and calcium in a form which is easily digested and assimilated, and is especially adapted to the needs of the nervous system."

John Burroughs

"I am sure I have been greatly benefited by Sanatogen. My sleep is better, my nerves are stronger, and my work is done with much more ease."

Prof. C. van Nostrand

"Sanatogen is an excellent tonic for the nervous system, and is especially adapted to the needs of the nervous system. It is an excellent tonic for the nervous system."

Charles D. Gleason

"After a thorough trial of Sanatogen, I am convinced of its value as a food tonic. Its beneficial effects are beyond question."

His Excellency the Hon. Mr. W. D. Hoole

"I use Sanatogen every day and find it a most beneficial tonic for the nervous system. It is an excellent tonic for the nervous system."

Specifically intended as a natural upbuilding food-force for debilitated, exhausted nerves—Sanatogen offers a scientific union of the necessary nerve-food elements—purest protein and organic phosphorus. These elements are in an easily digestible form—readily assimilated—and imposing no strain or stimulation. Sanatogen is a natural nerve-food—actually carried to the nerve cells—and so becoming a powerful force in renewing nerve strength and vitality and helping restore the balance of health to other bodily functions.

Over 16,000 physicians heartily endorse Sanatogen, in writing, as a real help for the tired-out and nervous—for the weak and debilitated. YOU may find the answer to your troubles in the use of Sanatogen.

This Remarkable Book FREE

We ask you earnestly to get acquainted with Sanatogen. Investigate our claims first if you like, and we will see that you are not disappointed. Write for our free book, "How to Obtain the Best Results from Sanatogen." It contains a full and complete description of the scientific basis of Sanatogen, and also contains evidence of the value of Sanatogen which is as remarkable as it is conclusive.

Sanatogen is sold in three sizes, \$1.00, \$1.50, \$3.00

Get Sanatogen from your druggist—if not obtainable from him, sent upon receipt of price.

THE BAUER CHEMICAL COMPANY, NEW YORK CITY

DOMESTIC AND FOREIGN TRADE OF HAWAII IS INCREASING

Statistics for August and the eight months ended August, just received from the Department of Commerce and Labor, indicate that Hawaii's trade is growing both with the U. S. mainland and with foreign countries. In August the shipments of domestic merchandise from the States to Hawaii amounted in value to \$2,364,927, which was \$246,042 in excess of the amount for August last year. In the eight months ended August the shipments of domestic merchandise from the mainland to Hawaii amounted to \$17,817,202, which was \$3,552,341 more than for the corresponding period of last year. Hawaii shipped to the United States in August this year domestic merchandise to the value of \$4,798,163, being \$627,040 ahead of August, 1911. Shipments of domestic merchandise from Hawaii for the eight months ended August, to the mainland, amounted to \$41,871,116, being the very large advance of \$6,829,934 over the corresponding period last year. Of these shipments \$41,085,520 were the products of Hawaii, and the increase of these was \$6,599,404 over 1911. Imports from foreign countries to Hawaii direct for the eight months in question were \$4,139,892, being an increase of \$959,996 over the same period last year, but the exports to foreign countries of domestic merchandise, \$249,110 represent a decline of \$367,511. The net increase in Hawaii's foreign trade, not including exports of foreign goods, is \$692,485. However, the remaining four months of the year will probably pull up the Hawaiian exports to foreign countries, as there are coffee, pineapples and pineapple juice to ship the end of the year. Import Items. Hawaii imported meat and dairy products from the mainland for the

eight months ended August to the tune of \$780,169, or an increase of \$143,750 over the same time last year. Of iron and steel manufactures, including machinery, \$3,445,078, an increase of \$1,213,274. Of breadstuffs, including animal feed, \$1,602,848, an increase of \$212,699. Of automobiles, \$628,022; an increase of \$71,147; of automobile parts, \$37,446, a decrease of \$11,327. Of wine and liquor, \$496,069, an increase of about \$90,000. Export Items. Hawaii shipped \$37,562,352 worth of raw sugar to the mainland in the eight months under review, an increase of \$5,955,609, and of refined sugar, \$1,652,376, an increase of \$333,911; of molasses, \$70,981, an increase of \$9003. Of fruits and nuts to the mainland, an increase of \$444,710. Bananas account for \$88,028 of the total, increasing by \$21,645; canned pineapples, \$1,071,840, an increase of \$406,521; raw pineapples, \$40,787, a gain of \$18,479. Pineapple juice to the value of \$48,183 is a decline of \$76,511. Tobacco was shipped to the value of \$29,548, an increase of \$29,373. Of Wood and its manufactures, \$17,713, a decrease of \$27,736. Wool, raw, \$43,255, a gain of \$21,732. Honey, \$22,644, an increase of \$6304. Coffee, \$129,969, a decrease of \$3483. Rice, \$123,888, a decline of \$20,424. Shipments to the States of pineapples, coffee and rice are not a full criterion of the condition of those industries, as a great deal of canned pineapples and coffee go direct to foreign countries and much of the domestic crop of rice is consumed at home. Honey is also an article of export to foreign countries. Unfortunately, there is no repository of com-

WILDER BOOMS BOY SCOUTS IN LOCAL PATROLS

The Boy Scout organization of Honolulu still continues to receive a large amount of publicity. The Scout headquarters in New York City sends out news items every now and then to the leading newspapers throughout the United States, as well as those in other countries, of the doings of the Boy Scouts all over the world. Among the latest articles received appears the following item: James E. West, Chief Scout Executive, has received many interesting reports of the development of the Boy Scouts of America organizations in the island areas under the American flag. In a recent letter, J. A. Wilder, Scout Commissioner in Honolulu, Hawaii, writes: "For the first time in this generation a Hawaiian boy, a scout, has made fire without matches, using only Hawaiian materials. From the native wilder-ness. The scouts under Wilder's jurisdiction have just completed their annual hike of forty miles, the expenses of which were paid from the proceeds of an exhibition and demonstration of scout-craft. Three cases of urgent first aid were accomplished by boys on this trip. The Court of Honor of the Local Council is about to recommend one scout, Eddie Apan, for an honor medal for bravery. New boys are fast being enrolled, and four additional scout-masters have applied for commissions. There are many friends of the Scout movement in Hawaii and pledges of \$50.00 per year for the Hawaiian area have been promised to the National Council of the Boy Scouts of America."

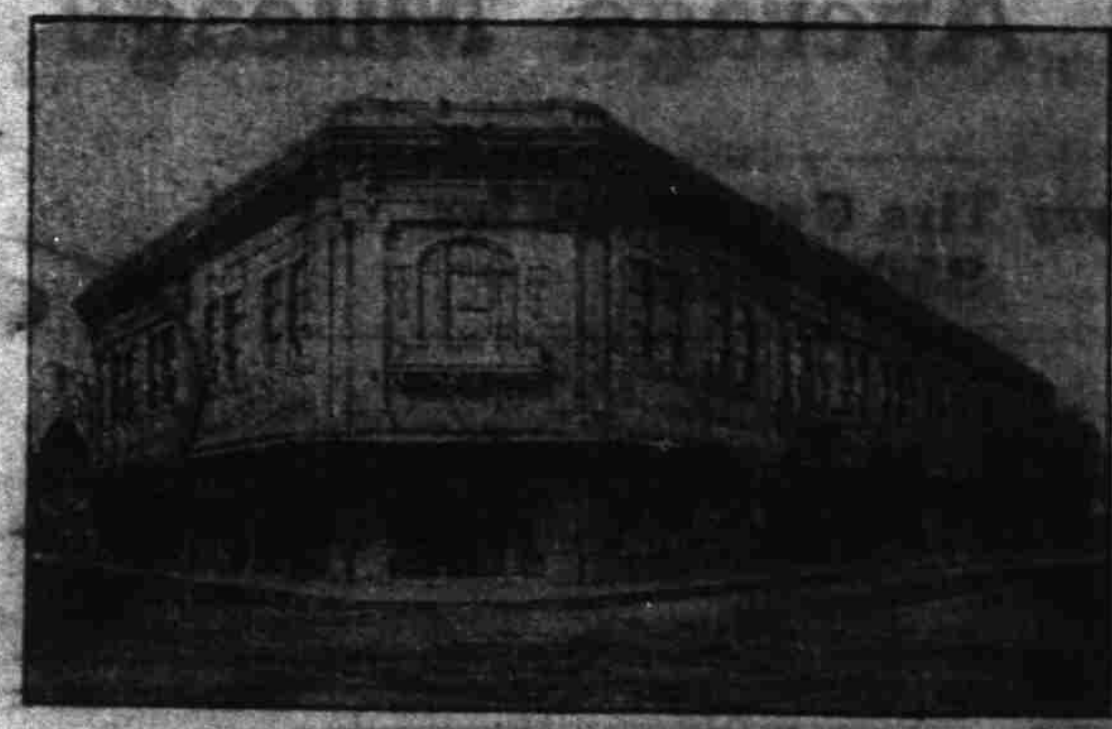

IRISH BOY SCOUTS DISPLEASE LEADER

General Sir Baden-Powell is Shocked When Band Plays "Garryowen" with an Irish Tune. LONDON, Oct. 25.—General Sir Baden-Powell, with his usual considerable amount of common sense, has expressed his disapproval of the success of the Boy Scout movement in Ireland. On his return recently from his trip to the United States and Canada he found to his amazement that the objects of the English and Irish scouts were by no means identical. He discovered that while the British section were true and patriotic Britons, the Irish scouts were a band of young rebels who cared nothing about the military glories or achievements of England. Many persons besides the founder of the scout movement find it difficult to understand how the Irish lads can be anything else than true Britons. But the fact is, they are a product of the Gaelic legend and Celtic mythology, and are not the same as the British. Their motto is "Rule Britannia" and "God Save the King" and "Rule Britannia." It is this that has particularly brought them under the displeasure of Sir Baden-Powell, whose patriotic sentiments were badly jarred when he found a squad of them marching recently to the tune of "Garryowen." He questions their right to use the title "Scout," and is said to be contemplating action to prevent it for the future.

CONSERVATION OF VITAL ENERGY IN NEW YORK

Conservation of the potential vital energy of the nation as embodied in women and children has been the theme of much discussion of late. The attainment of that end through legislation regulating industrial operations is aimed at in a series of laws enacted by the New York legislature at its last session and which went into operation on Tuesday last. One of these laws provides that no woman shall be employed in any factory of the state for more than nine hours in any one day or more than fifty-four hours a week, and that any violation of the law by an employer shall be regarded as a misdemeanor. Another law prohibits the employment of any woman in a factory within a period of four weeks after she has borne a child. Still another statute provides that before a child fourteen years of age shall be permitted to be employed in a factory, he or she must be subjected to a thorough physical examination to determine his or her fitness for the work to be undertaken. By another measure the registration of all factories or manufacturing establishments with the commissioner of labor is required so as to render feasible prompt and thorough inspection and the remedying of unlawful conditions, and in line with this is a fourth measure which gives the commissioner summary power practically to close up factories where unclean and insanitary conditions prevail. A fifth measure requires adequate provision for hot and cold water facilities and individual towels for workers engaged in industries where poisonous dusts, gases or fumes are generated, and prohibits the eating of meals in factories in which such industries are carried on. Additional measures along the same lines are looked for from the State Factory Commission, which has under consideration the general subject of industrial regulation from the hygienic and sanitary standpoint.—Bradstreet's.

LONGEST NAME IN WORLD. PORT WORTH, Tex., Oct. 26.—The man with what is said to be the longest name in the world has been realized here. You can't pronounce it, but you can sing it. The name contains 32 letters, and follows: Paphouhheouhoumuryouwhopolos. His first name is Gus.

PANTHEON BLOCK, HONOLULU. PAINTED WITH TRUS-CON STONE TEX.

Trus-Con Paints

A Special Paint For Every Purpose

Don't imagine that a good interior paint is good for the exterior, nor vice versa; or that a good paint for wood work is also good for iron; or a concrete paint good for wood work, etc.

TRUS-CON PAINTS SPECIALIZE

They provide a proper paint for the kind of work you want to do.

By using the right kind of paint you get greater satisfaction and find it less expensive.

Our expert advice on the proper paint to use will cost you nothing extra.

Here are some of the different kinds of TRUS-CON Paints we carry in stock

- Stone Tex Dampproofing Exterior Paints—For Concrete and Brick.
- Asepticote Dampproofing Interior Paints—For Concrete, Brick and Wood.
- High-Class Enamels—For Concrete and Wooden Walls.
- Floor Enamel—For Concrete Floors. Makes the floors dust free, and gives a hard elastic finish.
- Bituminous Paints—For exterior and interior water-proofing.
- Plaster Bond—Apply it on a brick wall and you can plaster over it. Is waterproof.
- Waterproofing Paste—Mixed with the water will make concrete waterproof against the highest pressure.
- Bar-Ox—A product scientifically manufactured in strict compliance with the most advanced theories of protecting iron and steel surfaces against corrosion.
