Fire and Water. Legitimate insurance against loss by conflagration is financial protection to owners of property who employ practical means to save themselves. Water coming out of a hose nozzle at the moment and on the spot, is the ideal help against destruction. Honolulu business properties should have 100 Paris Gasoline Turbines connected with Water Hoses as due support to the Fire Department and to make reasonable insurance rates possible. GEO. H. PARIS

RE PREPARED! CHRISTMAS IS COMING! Mr. Merchant, suppose your store were burned out a week before Christmas. What part of your loss would your insurance cover? When you say that you are fully insured, how near the truth are you? Your store and your stock of goods comprise just about one-half of your business. No insurance will protect you from the loss of your trade. A fire in your store may prevent your meeting the wants of those accustomed to buy of you, for a period of three or four weeks. That period is crucial. You are attacked in an unprotected point, and trade friendships formed during your enforced closing may mean that some business will never come back. You may be confronted with such a disaster within the next twenty-four hours. ONE REASON FOR THESE FIRES IS YOUR FEELING THAT THERE IS NO REASON WHY A FIRE SHOULD HAPPEN TO YOU. But why shouldn't a fire occur in your store? What have you done, what are you doing that would make it difficult for a fire to start in your store? What would you do if it did come? Ask the Denio Company, Phone 3050. They will show you what to do.—advertisement.

A FAILURE

Portland, Ore., Nov. 22, 1911. John J. Fulton Company. Gentlemen: You no doubt remember my writing you that I had put a patient on your Renal Compound after he had been given up by five physicians. I am sorry to say he passed away, but not from Bright's Disease. He was suffering from heart trouble and his other trouble seemed to have weakened his heart so that he could not revive. When he started on the compound he was an awful sight. His feet, legs and hands were swollen terribly, his kidneys did not act and his brain was not clear. Before he died (two weeks) this entirely left him and not a trace of albumen could be found. The above was told me by his wife, who was feeling very much encouraged as he was getting his old self. She would do anything for him one morning, but he had passed peacefully away during the night. She regretted that she had not known of it in time to start him on the Renal Compound before. Respectfully, E. T. HIBBARD, 9032 Oregon Street.

In our judgment the death was due secondary to the obstructed kidney. There is nothing in the treatment for the heart and as we have repeatedly said, when it is withheld until the heart is nearly exhausted in its efforts to force circulation through the choked kidney, failures can be expected, but even these cases occasionally recover where competent physicians aid the Renal Compound by holding the heart up to its work with appropriate heart and eliminative treatment. Fulton's Renal Compound can be had at Honolulu Drug Co. Ask for pamphlet.
