DEMENTED COOK TAKES LIFE BY LEAPING FROM S. S. SANTA RITA

Chen Chee, an Hawaiian Chinese, well known in this city, took his life on Sunday morning by leaping from the American liner Santa Rita into the sea, his body not having been recovered owing to the fact that the demented man was on the ship for some hours following the suicide.

Captain F. A. Grant reported the death of his cook to the federal quarantine and customs officers on arrival from San Francisco this morning. The cook had gone about the work of preparing the Sunday morning breakfast, which had been served, when an officer falling to receive a response to a summons sent the cook, visited the galley only to find the place deserted.

A general search was then instituted aboard the vessel, which proved fruitless. According to a declaration made by Captain Grant, borne out by other officers in the tanker, the Chinese had been acting in a rather peculiar manner for some time past. It was the skipper's intention to leave his cook behind on this trip to the islands owing to his peculiar mental condition. From statements made on board, no hall or entry was heard at the time the Chinese is supposed to have left the ship. The weather was reported such as to preclude any possibility of the man having been washed overboard. The vessel, with its inevitable white smoke, was on the entire trip from the coast to the islands.

The Santa Rita is expected to come to her berth this afternoon to be discharged of 42,000 barrels of fuel oil and 1200 drums of distillate.

Four New Steamers For Australian Trade
MELBOURNE, Oct. 22.—So rapidly has the Australian trade, managed by the Pacific and Oriental Company, grown in recent years that the company has been obliged to place an order for four new liners. The new vessels will be of 5000 tons and equipped with the best and most up-to-date of their class.

Harbor Notes
Sailed from Honolulu on Oct. 28 the Oceanic liner Sonoma arrived at Sydney N. S. W. on last Monday. A dredge is at work at the foot of Fort Street removing piles which supported the old Fort street wharf.

KUKUI TO REMAIN
Official assurance that the light-house tender Kukui will not be transferred from Honolulu to another station in perhaps the most important matter that will come before the trustees of the chamber of commerce this afternoon. Many communications have been received since last meeting, mostly relating to various congresses in different places. It is uncertain whether there will be a general meeting of the chamber this month.

OLAIA THE ONLY RISING SUGAR STOCK
Oahu was hammered down another quarter-point since yesterday at today's board, 85 shares selling at 22.37 1/2 and 100 at 23.35, all divided between eight uneven lots, of which two were of 75 shares each. Hawaii Commercial fell a point to 33 for 40 and 10 shares reported, and Oahu half a point to 35 for 10 shares. Oia is the only sugar stock in demand on an upward scale. Recent sales of 200 and 100 shares of it at 5.75 show a gain of one-eighth and another eighth is asked. Pineapple is still on the rise, 40, 150 and 50 shares at 47.50, an advance of a half-point, being reported sold and a quarter-point more asked.

URGES SERVICE COMMISSION BE GIVEN POWERS

That a public utility or public service commission in Hawaii will go on the rocks and cause serious trouble here unless it is a commission clothed with such ample powers that it will be analogous to the Interstate Commerce Commission in its own sphere, and that the commissioners should be men who will give their entire time to the work is the opinion of J. R. Galt of the Hawaiian Trust Company, who has devoted some study to this question long before the people of Hawaii.

In the following summary of the New York commission's work and powers, Mr. Galt points out forcefully some of the things that Hawaii should reckon with in forming a public service commission:

- 1. A commission of five is appointed by the Governor.
2. The term of office is for five years.
3. Any commissioner may be removed by the Governor for inefficiency, neglect of duty, or misconduct in office, an opportunity being given for a public hearing.
4. The commissioners are given almost unlimited powers in the control of the railroads, street railways, gas, light, heat or power plants, and any common carrier.
5. The commission appoints its own attorney.
6. The commission appoints its own secretary, also clerks, inspectors, experts, etc.
7. No one is eligible to serve on the commission if in any way actively connected with, or stockholder in, any company subject to supervision by the commission.
8. The commission has to keep an office open for business daily, between the hours of 7 a. m. and 11 p. m.
9. Commissioners receive an annual salary each of \$15,000; commission's attorney, \$10,000 per annum; commission's secretary, \$6,000; all other salaries being based by the commission.
10. The commission itself, attorney, secretary, and employees are reimbursed for all necessary traveling and necessary expenses in the discharge of their duties.
11. Strict provisions are made to prevent any commissioner or employee of course from receiving any free pass or reduction in fare, or present or gift of any kind.
12. Failure to obey a subpoena issued by the commissioner is a misdemeanor.
13. Witness fees are fixed at \$2.00 a day and five cents per mile.
14. Cost of service and witness fees have to be paid by complainant in any cases being tried on account of complainant.
15. Failure to produce records and to answer questions are punishable by a jail sentence through a Justice of the Supreme Court.
16. The Commissioners are not bound by technical rules of evidence in hearings.
17. All actions and proceedings under the commission shall be preferred over all other civil cases except election cases in all courts.
18. The Commissioners' duties are specifically provided for along the following lines:
Re: Rating to Common Carriers, Railroads, and Street Railways:
Section 45: General powers and duties of commissions in respect to common carriers, railroads and street railroads.
46. Reports of common carriers, railroad corporations and street railroad corporations.
47. Investigation of accidents.
48. Investigation by commission.
49. Rates and service to be fixed by the commission.
50. Power of commissions to order repairs or changes.
51. Power of commissions to order changes in time schedules; running of additional cars and trains.
52. Uniform system of accounts, access to accounts, etc., fortification.
53. Franchises and privileges.
54. Transfer of franchises or stocks.
55. Approval of issues of stock, bonds and other forms of indebtedness.
Section 5. Forfeiture penalties.
57. Summary proceedings.
58. Penalties for other than common carriers.
59. Duties of commission to the interstate traffic.
Relating to Gas and Electrical Corporations:
Section 64. Application of article.
Section 65. Safe and adequate service; just and reasonable charges; unjust discrimination; unreasonable preference.
66. General powers of commissions in respect to gas and electricity.
67. Inspection of gas and electric

SHERMAN HAS NEW LIFEBOATS

New lifeboats to accommodate the prescribed number of passengers as well as officers and crew were installed on the United States army transport Sherman during her stay at the coast.

The enforcement of federal regulations on commercial liners, the quartermaster department of the army has also taken notice of an alleged deficiency of lifeboat accommodation formerly existing on some of the troopships that ply the Pacific.

All this comes about in accordance with the law that there shall be lifeboat service for every person on board. It is not now possible with the lifeboat capacity of the transports to provide for their full passenger capacity. For example, the transports will carry 1900 passengers, whereas there is lifeboat room for only about 750.

The Sherman arrived from San Francisco last evening with a new quartermaster in the person of Captain E. J. Hall, who has relieved Captain Ely. Captain Hall is making his first voyage across the Pacific in charge of the office in the troopship. Captain Frank Hall still retains his title as chief navigating officer in the Sherman.

The Sherman left the coast crowded to the limit with first and second-class passengers. The pressure on the accommodation was so heavy that several military officers and their wives were compelled to take passage in the Sierra for Honolulu. They expect to join the transport at this port as a number of troopship passengers left the Sherman on arrival here.

The vessel has considerable cargo to be left at Guam and Manila. The Sherman sailed from San Francisco but one hour in advance of the Sierra, consequently "ain't" got a great amount of mail for the islands.

NEARLY MILE OF NAMES ON THIS BIG PETITION

SAN FRANCISCO, Nov. 4.—The Liberty Bell petition reel, which now contains three-quarters of a mile of petitions and which was signed by the children of San Francisco, is on exhibition in the Exposition Building.

The children of the public and parochial schools of this city, numbering in the neighborhood of 70,000 have affixed their names. Petitioners are coming in from the public, parochial and private schools of the State of California. When they are pasted together and placed on the reel it will be sent to Philadelphia for presentation to the Mayor and City Council of that city. It is expected that there will be one million signatures attached to this petition.

Wilson Gets Contract
The Maui loan fund commission, at its meeting last Saturday awarded the contract for constructing the bridge across the Kapioluli gulch to A. A. Wilson at \$31,500. J. H. Wilson was given the contract for building the Nahiku-Keanae section of the Maui belt road, his figure being \$83,750.

FOUR HUNDRED ORIENTALS LAND

Four hundred and seven orientals stowage passengers stepped from the Pacific Mail liner Mongolia yesterday afternoon, with the intention of making the Hawaiian islands their home for the time being at least.

One of the largest delegations of Asiatics to arrive here in many months was included in the list of passengers brought from the Philippines, China and Japan in the big Pacific Mailer.

Representatives from the Hawaiian Sugar Planters' Association met the liner at Alakea wharf to take care of 174 Filipinos, who have been recruited to take up work on island sugar estates.

Japanese figured largely in the complexion of the crowd of new arrivals that thronged the main decks of the vessel awaiting the final disposition of the Federal authorities whose business it was to pass upon their eligibility to land on American soil.

In addition to the small number of cabin travelers who joined the Mongolia at Honolulu, the through list included 56 Cabin, 235 second-class and 371 Asiatic stowage passengers.

Twenty-four hundred tons oriental cargo were discharged here during the all night lay over of the vessel. It was a thank job that the local stevedores completed in the handling of the Mongolia in order that the liner might sail for San Francisco at noon hour today.

A MOUNTAIN OF ORIENTAL CARGO

Alakea wharf this morning presented an unusual sight with its hills and mountain ranges composed of oriental merchandise and supplies, which for the past twenty-four hours have been pouring from all harbors and side ports in the Pacific Mail liner Mongolia in a continuous stream.

It has been many months that such a collection of miscellaneous cargo has been piled high on the big wharf as is found there with the departure of the Mongolia for San Francisco at noon today.

From ten to eighteen gangs of men working throughout the night in the effort to remove the accumulation of freight from ship to wharf. In addition to this labor performed by local stevedores, one hundred and fifty tons rice and other Hawaiian products were safely stored aboard the vessel before the time of departure.
