MRS. HALL WILL SING AT CONCERT

The Honolulu Symphony Orchestra Society will present a soloist at its concert at the Opera House next Tuesday night a soprano born in the islands and who has received her musical education here—Mrs. Charles L. Hall.

Mrs. Hall, who is a pupil of Mrs. Bruce McV. Mackall, was educated at Kamehameha school and is credited with marked artistic temperament combined with a subtle Hawaiian quality of tone. All of her musical education has been received here. She has a lyric soprano voice developed evenly throughout, not especially to favor high tones. She sings with ease and those who have heard her have commented on her wide range of ability, as her repertoire includes English, French, Italian and Hawaiian. Mrs. Hall, say the musical critics here, should be an example of greatest encouragement to local students.

The symphony concert next Tuesday night will have an attractive program. Among Mrs. Hall's numbers are "Recit. and Air 'Belliste'" from Leoncavallo's "Pagliacci," "Gavotte" from Puccini's "Manon," and "Chant de Bacchante" by Bemberg.

MRS. DILLINGHAM DROPS ACTIVE Y. W. C. A. WORK

The monthly meeting of the board of directors of the Y. W. C. A. was held last night, at which officers were elected for the coming year. Mrs. E. P. Dillingham informed the board that she would be unable to continue her work as active president, and she was appointed honorary president. Other officers were elected as follows: Mrs. Harmon Hendrick, first vice president; Mrs. A. F. Cooke, second vice president; Mrs. W. C. Weedon, third vice president; Mrs. Arthur Jones, recording secretary; Mrs. Charles Pitts, corresponding secretary. Mrs. A. F. Cooke was appointed to take the place of Mrs. Hohdy, who, as chairman of the physical committee, did much to arouse interest in the classes.

Miss Esther Ericson, the general secretary of the association, read a report which showed a marked increase in the membership, the total now being 236. There are 29 members in the educational classes and 110 in the physical culture classes. Two hundred and twenty-seven girls have attended the four social affairs that have been given by the association at the Homestead on King street, and the total attendance at the year services during the past month was ninety-seven.

HILO SUPERVISORS TO PROBE FAULTY WORK

[Special Star-Bulletin Telegram]
HILO, Hawaii, Nov. 31.—At the meeting of the Board of Supervisors yesterday the matter of poor construction of Front street was taken up on the motion of Chairman Jim Lewis. Owing to the absence of two members, as the result of the resignation of Norman Lyman and the fact that Henry Beckley had been compelled to return to Kohala on business, the matter was made a special order of business to be brought before the Board at the next meeting. According to several members of the Board the person responsible for the bad work will probably be summarily removed from office.

LIBERTY BILL IS MONEY-MAKER

Without question the three acts now "holding the boards" at the Liberty theater are presenting one of the most refined, artistic programs ever seen or heard, at this house, and are a credit to the Consolidated Amusement Company, which, it was at first feared by local theater patrons, would lower the standard of their programs as soon as the recent merger of the various theaters became a fact, but with such acts on the bill as the Pia Trio, Marta Golden and the three European gentlemen with the "musical" names, certainly no complaint as to the quality of vaudeville can be made; on the contrary, the management and performers are to be complimented upon the excellent nature of this part of the program.

The class of pictures shown at the Liberty recently have not been anything exceptionally brilliant, both in fact and figuratively speaking, although the present program contains one picture that is extremely interesting, it being an American "Vivagraph" weekly and contains a score of highly interesting subjects, particularly scenes of the New York lodge of Elks picnic, the Yale-Princeton 1911 football game, and several other views that hold the watchers' attention of European manufacture and usually depicting happenings of European interest, but as a whole the present Liberty bill is well worth while, particularly the vaudeville.

PLAN A PRACTICAL MEMORIAL TO DEAD

It has been suggested that had there been a "pulmotor" to be secured at Walkiki beach as soon as his body was found, that the life of the late Robert Sinclair, who was drowned at Walkiki last Saturday, might have been saved, and the buying of one of these machines for use at the beach is now being discussed by his friends. The idea is to install the machine as a memorial.
During the last six months a Chicago concern has saved two hundred lives by the use of a pulmotor. The pulmotor produces artificial breathing of oxygen and will restore anyone who is apparently drowned, electrocuted, or asphyxiated, who has the least bit of life remaining. If such a machine is secured for use at the beach it is thought that the local physicians will at once familiarize themselves with it and there would always be someone at Walkiki that could use it in case of drowning.
The expense of the pulmotor will be covered by the friends of Sinclair.

A CAUSE TO EVERY FIRE

In relation to fire, the first move is to study your place alone. Consider that you are a stranger, see it from that point of view, use your common sense and make note of all the things you would do to improve the place so a fire could not start, and if it did, the things you would do to fight it. Write these things down.

In every place there is what is called the "principal hazard". In a dwelling it may be unprotected matches in an office the waste basket or store room. In a manufacturing establishment, the principal hazard is usually connected with some mechanical process. A specific case will serve as a suggestion.
A woman poured a quart of gasoline in the marble wash bowl of the toilet room and placed a silk waist in it. She closed the door and returned in about ten minutes. She rubbed the silk between her hands. This generated sufficient electricity to make a spark. The gasoline exploded, the house burned and the woman lost her life. Gasoline evaporates rapidly, and the gas it makes is SEVEN TIMES MORE DANGEROUS THAN GUNPOWDER.
These are principal hazards. They must have special attention and protection. Every place has its peculiar conditions, but each represents a definite fire danger and must be guarded against. Reduce this fire hazard by installing the Denis telephone fire alarm system at your place—advertisement.
