That Little Hacking Cough

Hard coughs are bad enough, to be sure. But it's often the little, hacking, tickling, persistent cough that means the most, especially when there is a history of weak lungs in the family. What should be done? Ask your doctor. He knows. Ask him about the formula on the label of every bottle of Ayer's Cherry Pectoral. Ask him if this medicine has his full approval for throat and lung troubles. Then do as he says.

Ayer's Cherry Pectoral

Prepared by Dr. J. C. Ayer & Co., Lowell, Mass., U. S. A.

DIRECTORS OF AFFAIRS EDUCATIONAL IN HAWAII

Reading from left to right—Miss Harriet E. Wolfe, stenographer; W. R. Farrington, W. O. Allen, Mrs. M. T. Wilcox, Superintendent W. T. Pope, Mrs. R. B. Bond, W. H. Rice and Mrs. D. Smith, secretary.

The above picture shows the territory's newly organized commission of public instruction, with the exception of one new member, Attorney W. H. Smith, of Hilo, who was unable to attend the commission's sessions in Honolulu early this week. Though the recent meetings were only preliminary in nature, important work tending to the betterment of educational conditions in the islands was accomplished. By no means the least interesting feature of the opening sessions was the indication that the new body will plan and act together in perfect harmony — something which has been woefully lacking at times in the past. Another good feature was the announcement of a definite and strong policy with regard to morality in the department, and the method in which laxity in this respect will be handled by the commission. A thorough, practical, working organization was perfected for conducting the business of the territory's education during the next two years. Tentative figures were prepared on the school budget to be presented to the coming legislature, when an appropriation for the maintenance of the department for the next biennium will be asked, and the final meeting, to all these figures definitely, will be held beginning December 2. The three new members of the commission are Attorney W. H. Smith, of Hilo, representing East Hawaii; Mrs. B. D. Bond, of Kohala, representing West Hawaii, and W. R. Farrington, who will serve as one of Oahu's two commissioners.

LABELING SCHOOLHOUSES TO GET THEM UP TO STANDARD

Labeling country schoolhouses so that every citizen may know whether his school is up to standard is the device of the Illinois state school authorities, according to information received at the United States bureau of education.

The schools are inspected as to grounds, building, furnishings, heating, ventilation, library, water supply, sanitation, and qualifications of the teachers. If the essentials of a good school are found present a diploma is granted the district and a plate is placed above the door of the schoolhouse designating it as a "Standard School". Upon fulfillment of certain further requirements a higher diploma will be issued and the plate will read "Superior School".

Already 657 of the 10,532 one-room schoolhouses in Illinois have earned the right to be called standard schools and to display the plate accordingly. This interesting device is part of a vigorous campaign waged by the state of Illinois in behalf of rural schools. Two experts on rural education, U. J. Hoffman and W. S. Booth, under the direction of Hon. F. G. Blair, state superintendent of public instruction, are devoting their entire time to the country and village schools.

Illinois does not merely ask that the schools be brought up to standard; the state tells how it can be done. In a bulletin sent to every teacher in the state the requirements for a standard school are set forth. Among the specifications are: An ample playground; good approaches to the school; convenient fuel houses; the building sound, in good repair, and painted; improved heating arrangements — a jacketed stove in the corner of the room instead of an unprotected stove in the center; floor and interior of the building clean and tidy; suitable desks for children of all ages properly placed; a good collection of juvenile books, maps, and dictionaries; a sanitary water supply; the school well organized with regular attendance and at least seven months' schooling every year; the teacher must have not less than a high-school education, receive a salary of at least \$300 per annum, and be ranked by the country superintendent as a good or superior teacher.

The more ambitious districts, aspiring to the "superior" diploma, will have to meet the following additional

requirements: A playground of at least one-half an acre, level, covered with good grass, and provided with trees and shrubs; sanitary drinking appliance; separate cloakrooms for boys and girls; room lighted from one side or from one side and rear; adjustable windows fitted with good shades; heat provided by basement or room furnace, with proper arrangements for removal of bad air and admission of pure air; at least eighty library books, ten suitable for each grade; two good pictures on the wall; provision for instruction in agriculture, manual training, and domestic arts; the teacher to be a high-school graduate with normal-school training and to receive at least \$480 per annum; the work outlined in the state course of study to be well done.

The Illinois authorities do not expect to see this movement for betterment of the one-room schools interfere in any way with the natural development of consolidated schools; but believing, as they do, that because of the scattered farming population of Illinois one-room schools will be necessary for many years, they seek to make this type so efficient for the community that a desire will be created among the citizens in rural communities for greater educational advantages for their children.

ROYAL HAWAIIAN GETS DELIVERIES

The Royal Hawaiian Garage is receiving by steamer, and distributing them almost as fast as they touch Hawaiian soil. By the Manchuria, which arrived here November 15, came a 6-cylinder Alco touring car for R. W. Shingle. The same steamer brought two Reo touring cars for H. Meyers, of Maui and one of the same model, which was snapped up by Dr. Rogers.

Mrs. Angus—Do you vote the same as your husband? Mrs. Daton—Heavens, no! What do you suppose we'd have to argue about?

MOTOR RACING LIKE BASEBALL

MOTOR RACING LIKE BASEBALL

When the Packard Motor Car Co. began to consider the "38," there were two fundamental propositions before them: the first and most important one being "What is the '38,'" and the second "Why they were going to be able to convince a large portion of the automobile-buying public that it must own a Packard '38' in order to complete its happiness. A great many times the question has come up "Why does not the Packard Company enter competitions

or races? Why do they, however, advertise such runs as Philadelphia to Pittsburgh, and Ocean to Ocean?" The man from Mexico, Mr. Wright, said that the best illustration he knew was a ball game. He said "There were three men on base and the home team is three runs behind, with no outs. A good .300 hitter comes up, and strikes out; he is followed by another .300 hitter, who knocks a little fly which is caught by the pitcher. It comes a man with a batting average of .040; he is lucky and knocks a home run. All the crowd goes crazy and says he is a wonder because he won the game. All during the season this is the only thing he does and every time he speaks he says something about his wonderful hit. By getting the lucky hit, he did not prove anything, nor improve his everyday ability. On the day of this game he

was lucky and the pitcher gave him just the ball he wanted. He won. His batting average increased on this special day and then went back to .040. On the other hand, the .300 hitter who struck out this day went along batting .300 all the season, and when the next season came he was still with the team and still batting .300 and had a steady popularity with the fans. The home run maker, however, was adorning the benches in a hush league — forgotten. And so it is with the racing car. It is very easy to build you a car that will bat .300 for one day, but the car that stays with its month after month and season after season is the one that bats .300 all the time. By going from Ocean to Ocean you cannot make a lucky hit and be a hero by chance. You must be a genuine .300 hitter.

When Automobiles are Built BUICK Will Build Them

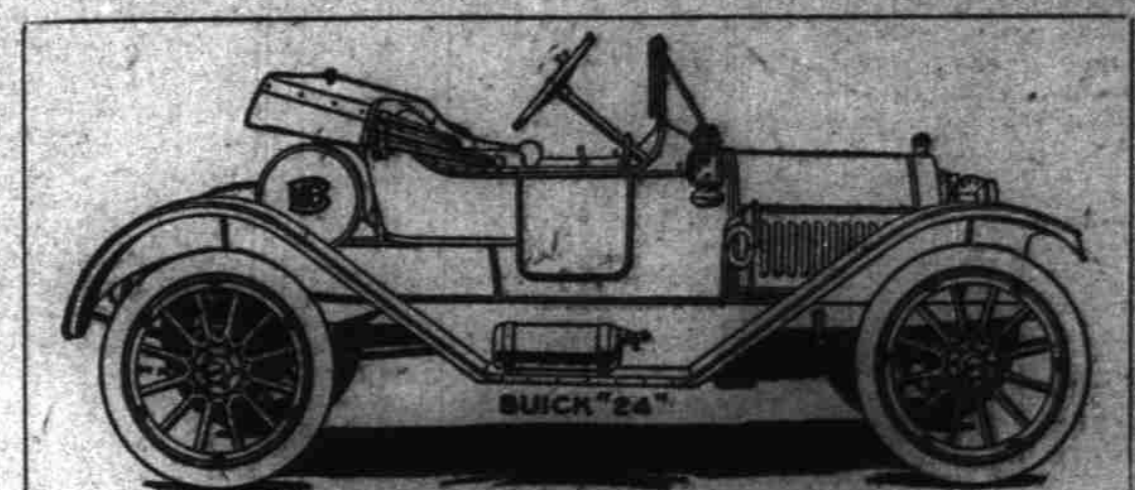

Motor Cars

TWO ROADSTERS AND THREE TOURING CARS CONSTITUTE THE BUICK LINE FOR 1913, AND WHILE THE SAME CHARACTERISTICS ARE GENERAL IN THE CONSTRUCTION OF EACH, YET ENOUGH VARIATION IS PROVIDED TO SATISFY THE REQUIREMENTS OF ANY BUYER.

THE BUICK PRINCIPLES OF CONSTRUCTION WHICH HAVE BEEN SO SUCCESSFUL IN THE PAST ARE MAINTAINED, AND WHILE IMPROVEMENTS HAVE BEEN MADE, NO RADICAL CHANGES HAVE TAKEN PLACE.

THE IDEA OF SERVICE AND DURABILITY ALWAYS SO MUCH A PART OF BUICK CARS, IS STILL UPPERMOST AND EVERY EFFORT HAS BEEN MADE TO INCREASE THE ALREADY HIGH BUICK EFFICIENCY IN EACH OF THE 1913 MODELS.

MODEL 24, TWO PASSENGER ROADSTER TYPE, UNDIVIDED SEAT. PRICE, FULLY EQUIPPED, \$1135.00, F. O. B. HONOLULU.
