

Tomorrow Morning, Wednesday, Sept. 4th, The Great QUIT SALE BEGINS

Our entire stock of Dress Materials marked down to close out the Department altogether

AS PREVIOUSLY ANNOUNCED, WANT OF ROOM COMPELS US TO TAKE THIS ACTION. EVERY YARD OF DRESS GOODS WE HAVE IS TO BE CLOSED OUT. WE WILL STILL CONTINUE TO CARRY DOMESTIC GOODS, BUT NOTHING IN THE WAY OF SILKS, WOOL GOODS AND COLORED WASH GOODS. WHITE WASH GOODS WILL BE CARRIED IN OUR DOMESTIC DEPARTMENT, BUT THE PRESENT STOCK OF WHITE GOODS IS INCLUDED IN THE BIG SALE.

THE FOLLOWING QUOTATIONS ARE COST PRICES AT LEAST, WITH SOME MUCH LESS. NONE OF THESE BARGAINS WILL BE SHOWN IN OUR WINDOWS, AS WE PREFER YOU SHOULD SEE THE FULL ASSORTMENT AND JUDGE THE VALUES BY EXAMINING THE MERCHANDISE.

Undoubtedly the Greatest Piece Goods opportunity ever known in Honolulu

OUR GUARANTEE BACK OF THE MERCHANDISE, VIZ.: MONEY REFUNDED IF NOT SATISFIED

Sale begins Tomorrow and continues until all Dress Materials are sold

JORDAN'S

10,000 MANILA CHILDREN GET DAILY MEALS AT SCHOOL

MANILA, July 31.—More than ten thousand Manila school children each day of the school week eat a substantial lunch of soup, bread, and meat, cooked and served by the children themselves. The lunches cost them a standard price of one centavo per unit for each item on the bill of fare. For three centavos they are served with a meal, which, for actual cooking qualities, cannot be equaled in any commercial restaurant in Manila for twenty times its cost to the children. Each public school in the city serves a midday lunch to the pupils attending that school, the meals being served at actual cost price of the materials used, and the cooking and serving of the lunches is one of the branches of the domestic science course, which every girl student must take. The marketing is arranged for

daily by the committee of cooks, who are changed at stated intervals and the income is made to correspond to the expenditures, with the exception of a small profit, which is applied to the purchase of fuel. This is one of the most important branches of the school course, in that a well fed and nourished child has a much greater ability and aptitude for the absorption of knowledge, than an ill nourished one. Statistics from the United States, and those collected since the beginning of the lunch system in Manila, show without question that this is the case. Especially among the poorer classes the difference is noticed within a few weeks, between the children who are nourished by the substantial food served at the schools, and those who are not, not only in their appearance, but in their aptitude for study.

SOUTH SEA TRADE IS INCONSEQUENTIAL

(From Consul General George E. Anderson, Hongkong, China.) Trade to and from the South Sea Islands is likely to be no great factor of the near future, according to the report of a Hongkong business man who has recently toured that part of the world with a view of developing trade through Hongkong. For some time several Hongkong houses, chiefly German in their connections, have been endeavoring to develop trade in those islands of the Pacific which are reached by lines to and from Australia and also by German and Japanese lines to certain islands reached from Hongkong in a more or less regular service which has been supported by subsidies and special grants from the governments concerned. There has been considerable trade at times with these islands from Hongkong, chiefly in the way of exporting rice and cotton goods to the islands and importing copra, line phosphate, and other products from the islands. Efforts so far to increase the trade have not been very successful, and this representative of a German house (Mr. A. Lamperck, of Melchers & Co.), who has investigated the matter, seems to think that any great development in the immediate future is unlikely. The exports of copra, rubber, phosphate, and the like have been increasing for a number of years, but it is likely that this increase will soon stop, for the reason that the native races are rapidly dying out and the supply of native labor is failing; in fact, the lack of native labor is the greatest drawback to any development whatever of

that part of the world. This lack of population and failure of what now exists not only restricts possible demand for foreign goods, but the population now existing is such as to demand little. Clothing is next to nothing, foreign foodstuffs other than rice are practically unknown, and knowledge of other goods is practically nil. Phosphate and Copra Output of the Islands. The trade routes visited includes Anguar, on Puloa Island, which has a European population of about 20 persons serving in connection with the export of phosphate. The island is only about 4 by 5 miles in extent, but the deposits of phosphate are enormous, and there is an elaborate plant for handling the product, including sheds for drying the phosphate, one of which will accommodate 12,000 tons at a time. The phosphate is shipped chiefly to Japan and Australia. The labor in the phosphate establishments was recruited from neighboring islands, the chief plant employing about 200 men, who represented about 15 different tribes from as many different localities. The dying out of the natives seems to be due chiefly to intermarriage with members of their own tribes only. The tribes are small, generally inhabiting a small island. There is constant warfare, due to intertribal feuds, and the loss of life from this cause is large. A visit was paid to Yap and Maron coral islands devoted chiefly to the production of copra. All the islands in that vicinity are devoted to copra production. The chief point visited was Frederickshafen in German New Guinea, where trade and production are controlled by the New Guinea Co., a German corporation.

BLACK BASS AT WAHIAWA

Last year the Wahiawa Water Co., Ltd., of which E. D. Tenney is president, imported a quantity of black bass spawn to stock the Wahiawa stream and reservoir with that desirable food fish. Evidently the plant is a complete success, as the other day a five-pound specimen of the fish was pulled out. Quite a number of three-pound fellows have been caught, while, it is said, small fry black bass is in great abundance. Fishing for a few days has been allowed. There are thirty-three feet of water in the reservoir. It came up six feet after a recent shower, but went down again. Rains are expected now through all the tributary region, which will insure an abundant supply of water.

Photo-Engraving of highest grade can be secured from the Star-Bulletin people by the Star-Bulletin.

No Cordelia blondes are not necessarily light sleepers.

Labor Shortage—Shells Used for Money.

The exports of rubber, copra, coffee, cocoa, sago, and other tropical products are increasing and have reached a considerable volume. The labor situation in German New Guinea is similar to that in other islands, though the difficulty seems to lie more in the indisposition of the native to work on his native soil than to any actual deficiency in the supply. Labor is recruited from neighboring islands generally on short-term contracts, and nearly all the prominent planters have their own steamers for recruiting their employees. Demand for foreign goods is confined largely to strong American tobacco, the natives not appreciating their own product. Shells are used for money to a considerable extent as yet, though the colonial government is gradually forcing the use of real coins. The native workmen are generally paid for their services partly in money, partly in cheap calico, and partly in intertribal tobacco. The principal islands in all that portion of the Pacific are reached by wireless telegraph systems established by German interests. The steamer service to and from Hongkong is confined at present to one steamer every two months. There is a service of an alternate steamer every two months from Sydney. A Japanese company is preparing to establish a monthly service to the islands under subsidy from the Japanese Government. Hongkong firms trading to these islands include Melchers & Co., Gibb, Livingston & Co., Wolff & Co.

AN ENEMY OF YOUTH

Lack of Blood During Years of Growth Lays Foundation for Much Ill Health

Youth is the time to lay the foundation for health. Every boy and girl should have plenty of pure, red blood and strong nerves. With thin, impure blood, they start life with a handicap too great to win success and happiness. Pure, red blood means healthful growth, strong nerves, a clear brain and a good digestion. In a word pure blood is the foundation of health. The pale, irritable boy or girl, who has no appetite or ambition, is, nevertheless, always tired out, melancholy, short of breath and who does not grow strong, is the victim of bloodlessness, the greatest enemy of youth. There is just one thing to do for these boys and girls—build up the blood with Dr. Williams' Pink Pills for Pale People. You can't afford to experiment with unapproved remedies. Through neglect or wrong treatment anaemia gradually developed into the pernicious form, which is cured by Dr. Williams' Pink Pills work directly on the blood, cleansing it and giving it just the elements which it lacks. As the pure blood flows everywhere, the entire body, every nerve, muscle and tissue, shares in the health-giving properties of the pills. Miss Helen Mattis, of No. 232 West Fifth South Street, Salt Lake City, Utah, relates her experience gladly in the hope that others will be helped. She says: "I was all run down, thin, bloodless and had no color whatever. Two doctors treated me but did not help me that I could see. I kept losing in flesh and weight. I had severe palpitations of the heart and often had to gasp for breath. It seemed that I was being smothered, my heart would beat so fast, I had no appetite and the least exertion tired me all out. I got discouraged with taking so much medicine, but my mother urged me to try Dr. Williams' Pink Pills. I felt some improvement from the first box and as I continued to use them my strength and weight increased and my color returned. I became real healthy again and I shall always speak highly of Dr. Williams' Pink Pills. A free booklet, "Building Up the Blood," will be sent on request. Dr. Williams' Pink Pills are sold by all druggists, or will be sent, postpaid, on receipt of three cents per box; six boxes for \$2.00, by the Dr. Williams' Medical Co., Schenectady, N. Y."

HEALANI CLUB GETS NEW BARGE AT LAST

There was joy unconfined among the members of the Healani Boat Club for this morning the steamer Wilhelm safely landed the new racing barge that the club oarsmen have been waiting for for so long. The six-

MONEY WASTED.

of racing boats and shells, is a beauty, and drew the admiration of club members and others who were at the dock to see it slung over the side. Dampen a piece of flannel with it and water as soon as it is thoroughly over-hauled to see that it is in no way sprung from transit. Don't waste your money buying strengthening plasters. Chamberlain's Pain Balm is cheaper and better.
