

BIG ISLAND ADOPTS REPUBLICAN PLATFORM— ATTACK ON FREAR FAILED

(Special Bulletin Correspondence.)
HILA, Sept. 15.—The one bit of excitement which stirred the Hawaii county convention last Wednesday occurred when the committee on platform made its report. The minority report, submitted by Sam Kauhane, the chairman of the committee, came out strongly against endorsing the administration of Governor Frear, and while on the official announcement of the count of the vote thereon, the minority report was declared defeated, there can be but little doubt but that it would have carried had a polled vote been taken.

The platform which was adopted read as follows:

The Republican party of the county of Hawaii believes that the electors of this county are entitled to a full and free statement of the principles upon which we stand, and that these electors are entitled to a written declaration or pledge on behalf of its candidates upon all important issues now before this county. Reaffirming allegiance to the well-known principles and traditions of the Republican party of the United States of America, we hereby especially endorse the high-minded and statesmanlike platform adopted by the Republican Territorial convention assembled at Honolulu September 9, 1910. In addition to these principles and traditions we hereby announce to the electors of the county of Hawaii the following platform:

The President.
1. We heartily endorse the administration of President Taft.

The Governor.
2. We endorse the vigorous and successful administration of Governor Frear and are proud of the results thereby accomplished for the welfare of the Territory.

The Delegate.
3. We congratulate the Territory on the continued remarkable success of Delegate Kahanamoku in obtaining financial and other legislation by Congress for Hawaii. Such results call for his reelection as a matter of course.

County Officers.
4. We hereby heartily commend the work of the Republican officers of the county of Hawaii who have achieved splendid results in spite of tremendous obstacles which have been placed in their paths during the present biennial period.

County Road Work.
5. We heartily favor and pledge our candidates for supervisors to a new and more enlightened system of road construction and maintenance, and further pledge our supervisors to the policy whereby all county funds available for this purpose shall be devoted to the extension and improvement of the roads of the county of Hawaii. In this connection we pledge our Senators and Representatives to appropriate for the next biennial period not less than \$400,000 out of the general revenues in the Territorial treasury, for the construction of belt roads on the several islands, thereby assisting homesteaders and furnishing employment for citizen labor.

Liquor Law.
6. We believe that the laws governing the sale and use of intoxicating liquors as they stand upon our statute books at present are adequate to every immediate need, and we deprecate any substantial amendment thereof. To obtain the fullest measure of value from this wise legislation we favor and undertake a stricter and more efficient enforcement of these laws.

Public Health.
7. Leprosy.—The Republican party is proud of the effectiveness of the humane leprosy law which it advocated and passed in the last Legislature. The party has also brought about, through Congressional legislation, the establishment of a scientific investigation of this subject. The combined action thus made possible has already lessened the hardships of those suffering from this disease, also of their friends and relatives, and gives promise of the discovery of a cure for this disease.

Tuberculosis.—The party has also adopted and put into operation a policy to suppress and prevent the spread of tuberculosis, the most devastating of all diseases.

Board of Health.—We commend the successful efforts of the Territorial Board of Health to constantly improve the agencies guarding the public health and favor such legislation as will increase the efficiency of this most important branch of the public service.

Aid to Discharged Lepers.
8. We pledge the Republican party to work for the passage of such legislation as will provide a home-stead from the public lands of the Territory for each of the persons who has been discharged as cured from Kaula or from the Molokai settle-

ment, and to urge the approval of such legislation by Congress.

County Record Office.
9. We favor the establishment within each county of an office for the registration of conveyances and other instruments affecting property within each county and declare for such legislation as will effectively carry out this purpose.

Sidewalks.
10. Believing that the present law relative to the building of sidewalks, whereby the control is left in the hands of an officer residing in Honolulu, is a relic of the centralized form of government which existed before the establishment of county government, and should be immediately changed, we favor and pledge our Senators and Representatives to enact such legislation as shall remove from the control of the Superintendent of Public Works, the building and maintenance of sidewalks in the county of Hawaii, and to give such control to our Board of Supervisors.

Kilauea National Park.
11. We advocate that the Crater of Kilauea be reserved as a national park.

Wage Earners.
12. The wise policy which has been adopted and carried out by the Republican party to maintain protection to citizen labor is hereby adopted by this convention and we recognize the special needs of wage workers generally, for their well being means the well being of all, and we reaffirm our stand for the equality of labor and capital, and endorse the Territorial executive's action in the strict enforcement of the statute requiring that all labor on public works shall be performed by citizens of the United States or those eligible to become such.

Firmly believing that no party should be entitled to ask for the suffrage of the electors of the county of Hawaii unless such party should first declare itself upon the foregoing principles, we solemnly pledge ourselves and our candidates to the foregoing.

The text of the minority report was as follows:

"I hereby submit a minority report on the platform as recommended by the majority of the committee on platform, etc. I heartily endorse and support the report of the committee as a whole, with the exception of that portion of the platform wherein the committee recommends that this convention endorse and support the Governor in the administration of the affairs of this Territory."

This report was received with great applause, particularly from the West Hawaii delegation. Kamaooha moved that the minority report be adopted, and found a second in Oliver. Carvalho moved to adopt the majority report.

"I don't see how we can endorse Governor Frear and Kuhio both," said Rogers of Koo. "Frear's policy and that of Kuhio are as much different as day and night. Kuhio represents the people, while Governor Frear represents the President, and I don't believe that there are a dozen people in this house who approve of Governor Frear's policy. I move that we put it to a vote of the house whether we endorse Governor Frear or not. We have got to endorse Kuhio."

Moir remarked that if Rogers had only given the delegates a chance to vote, some time might have been saved. He then called for a standing vote.

It was significant that out of the entire West Hawaii delegation only three voted against the minority report. The secretary announced that the majority report had been adopted by a vote of 37 to 25. He stated after the meeting that he felt assured, as did many others, that had a polled vote been taken, the minority report would have been adopted. This is quite evident from the fact that a large number of proxies were held by the Kona and Kau delegates, and these would have been added to the vote for the Kauhane report.

NOTICE TO SUBSCRIBERS.
Every copy of the Evening Bulletin served on the city carriers' routes should reach the subscriber by 5:30 p. m. Subscribers who fail to receive the paper by this time will confer a favor upon the Bulletin circulation department by telephoning complaints to 2256. A special messenger will deliver the Bulletin after this hour when name and address of subscriber are given.

JORDAN'S

FEEDING AN EXCURSION

Partial List of Supplies Loaded in the S. S. Cleveland.

It may be of interest to some housekeepers, who get frustrated and considerably exercised over figuring out the food for a few boarders to know what was carried by the steamship Cleveland to feed her band of tourists and crew of 49. The following does not take into consideration to supplies purchased at different ports en route.

At the initial port the steward of the Cleveland stowed away in his larder: seventy tons of meat of various

varieties, besides some ten tons of fish, oysters and lobsters, 29,000 quarts of milk and cream, six tons of butter, 89,000 eggs, 150,000 oranges, lemons and grape fruit, sixty-five tons of flour and half a ton of yeast to raise it with, besides six tons of bread already baked, forty tons of potatoes, ten tons of salt to season them, over 160 tons of ice.

Teacher—An Indian's wife is called a squaw. Correct. Now, who can tell me what an Indian's baby is called? Bright Pupil—I know, miss—a squawker.—Boston Transcript.

Many believe statements in print which they would not believe if they were made orally, under oath.

BOSTON GIRLS SMARTER THAN MEN OF THE 'HUB'

BOSTON, Aug. 14.—Mayor John F. Fitzgerald has come out in the statement that the Boston girls do not "con- ton" to the men of the Hub, and the one principal reason is that the women are vastly much better educated than the men, and that in many cases their salaries far exceed that of the men who would mate with them.

The Mayor says: "The fact that there are so many women here, how- ever, is not the reason that there are so few marriages proportionately. The trouble is that the women and the men are not on a par mentally.

"All the opportunity a man has of

an education is along professional lines, so if he wants to be educated along business or trade lines he has no place in which to get his training.

"We have armies of unemployed men in our streets, men who have no trade and who cannot get work because there seems to be no work for them.

"These girls have the opportunities of the nearby colleges, which all train their students for some particular line of work.

"These women are obviously higher skilled than the untrained man who graduates from our schools without the one with any one individual phase of the city's industry. It is hard for the women of today to give up a good sal-

ary and better expectations to divide a smaller salary with a man who in all human probability will never get more. The girl of today wants as much to start with as her father has to end up with. She wants her ser- vants and she wants a nice home. The model tenements, however, would prove a great benefit for those who desire attractive dwellings at a low price."

Some persons' idea of right living is in driving all pleasure out of life. He isn't very honest who is honest because he believes that honesty is the best policy.

Don't look for trouble. You'll bump up against it soon enough.
