LEGISLATURE AFTER BOARD OF HEALTH PINKHAM AND DR. COOPER ARE SEVERELY CRITICIZED

(By Wireless to THE TRIBUNE.)

Honolulu, March 24.—The Board of Health was brought before the House on motion of Coelho to answer the complaints growing out of the trip to the leper settlement. Achi in the Senate calls for Pinkham's resignation.

[Charges were made that the Board of Health neglected its duty in looking after the visitors who made the trip to the leper settlement with the legislative committee. It is reported that lepers and their friends and relatives who accompanied the expedition, were permitted to fall into each others arms, weeping and embracing each other and bestowing kisses promiscuously among the crowd. Neither President Pinkham nor the settlement police interposed any protest, when it is alleged the Board of Health and its officers should have taken charge. Subsequently, when a legislative committee asked for permission to visit the Kailhi receiving station, where the suspects are kept, President Pinkham refused point blank, which caused considerable bitter feeling among the legislators.]

Senator McCandless Roasts Dr. Cooper.

Honolulu, March 23.—Senator L. L. McCandless yesterday made a scathing speech condemning Dr. Cooper and the Board of Health for continuing Iwelei, which he declares to be worse than in days of the "stockade."

[It is reported that there are 135 women at Iwelei, whose presence there is permitted under a quasi agreement from the Board of Health, one of its members, Dr. C. B. Cooper, collecting from each inmate one dollar a week for medical examinations. It is said that these examinations are compulsory and that over \$500 a month is collected in this manner. A police officer is detailed to enforce the payment, according to Senator McCandless' charges.]

A VOLCANIC LAKE OF LAVA IS FORMING AT CRATER

(By Wireless to THE TRIBUNE.)

The latest news from the Volcano House indicates that there is no abatement in the activity which developed with such renewed force one week ago yesterday. There is one large fountain of lava at the end of the lake now forming in the bottom of the pit, which plays almost continuously. At no time is the lake without cracks of fire radiating across its crusted surface. There is a steady outpour of lava from a central cone, which it is believed will eventually fill the pit. The explosions from bursting rocks and boulders continues to be heard. Weather cool during the day and very cold at night. There is little steam or smoke issuing from the pit.

Stanford Investigation Discontinued.

San Francisco, Cal., March 27.—The police have practically dropped investigation of the death of Mrs. Stanford.

San Francisco, Cal., March 23.—The indications are that the police who have been investigating the Stanford case are inclined to the natural death theory.

[Just prior to departing for San Francisco on the S. S. Alameda with the remains of Mrs. Jane L. Stanford, David Starr Jordan and Timothy Hopkins of the Stanford University gave out a statement denying the conclusions of the local Honolulu doctors that Mrs. Stanford was poisoned. It is in part as follows:

"In our judgment, after careful consideration of all facts brought to our knowledge, we are fully convinced that Mrs. Stanford's death was not due to strychnine poisoning nor to intentional wrong doing on the part of any one. We find in the statements of those with her in her last moments no evidence that any of the characteristic symptoms of strychnine poisoning were present. We think it probable that her death was due to a combination of conditions and circumstances. Among these we may note in connection with her advanced age, the unaccustomed exertion, a surfeit of unsuitable food and the unusual exposure on the picnic party of the day in question. These conditions were, perhaps, somewhat aggravated by the presence of strychnine and other drugs in a medicinal capsule, and possibly also by the presence of a small amount of strychnine contained in a dose of bicarbonate of soda. The occurrence of this strychnine in the bicarbonate of soda is as yet unexplained. The fact that it is not in excess of usual medicinal proportions suggests either an error of a pharmacist or else that the combination was prepared for tonic purposes. We must recognize that the preliminary hypothesis of accidental poisoning seemed a natural one under the extraordinary circumstances. We regard it, however, as without foundation and wholly incompatible with the evidence in our possession."

In support of their position, Dr. F. Howard Humphris, Dr. C. B. Wood, Dr. H. V. Murray and Dr. F. R. Day have published an elaborate statement defending their diagnosis. They affirm that the briefness of her illness and death in a convulsion indicates strychnine poisoning. There was no undigested food in her stomach, as shown by post mortem, which the doctors hold refutes the acute indigestion theory. They scoff at death from hysteria by a woman of Mrs. Stanford's age and known mental characteristics, and refer to corroborative evidence taken before the coroner's inquest to support their diagnosis of the case.]

Shakeup in Bureau of Education.

Superintendent A. T. Atkinson of the Department of Public Instruction has resigned at the request of Governor Carter, who, in the light of the investigation and report of the House Committee, believed that the public service would be benefited by his quitting the office. Atkinson asked for a free and full investigation of his department, which has been made by the committee, with the above result, that the Governor has at his disposal the appointment of a new Superintendent of Public Instruction.

The name of Charles Baldwin has been suggested in this connection, and it is expected that all of the powerful influence of H. P. Baldwin and the Maui delegation will be exerted in his behalf. The charges made against Superintendent Atkinson, which prompted the action of the Governor in calling for the resignation, are as follows:

"1. The Superintendent of Public Instruction has long maintained a personal indifference as to the proper or improper performance, by teachers, of their duties, and takes little, if any personal interest in their responsibilities and advancement. His personal presence is an unknown factor in the schools.

"2. The course of study has not been properly provided for the schools. The one vogue has not been revised for many years past. There are no printed rules or regulations to control the 400 teachers under the department

"3. Teachers have been discharged from the Department without cause.

"4. The Agricultural department in the school is useless.

"5. Commissioners of Education have rarely, if ever, for many years visited any of the schools, or made any personal inquiries as to the conditions prevailing in the schools or among the teachers, the public schools being almost entirely under the control of school agents.

"6. No provision has been made for lavatories and facilities for the procurement of drinking water in the schools. No care exercised in this regard even in new buildings. The new Royal School has water facilities for neither drinking nor fire purposes.

"7. Architectural extravagance has been indulged in in building the schools. No care has been exercised in placing school buildings, and the existing sanitary conditions are bad, buildings being absolutely unfit for school purposes."
