OPPORTUNITY FOR EMPLOYMENT Oregon Short Line Railroad

The Oregon Short Line Railroad Company announces its intention to give preference to young men residing on its lines in employing men, as far as possible, to fill places in all classes of the railroad service and advances the following reasons therefor.

FIRST—It will eliminate the "Floater" among our employes and substitute local citizens and taxpayers. SECOND—It will create a mutual interest and a common understanding between the railroads and the people they serve whereby each will be able to understand and appreciate the problems and difficulties of the other, and work to a common end, viz: the welfare of the country generally as the interests of the railroad and the communities they serve are identical.

At the present time their greatest need is for rough carpenters and experienced shop men and mechanics, and while they prefer men who have had some mechanical experience that would enable them to finish their training at an early date, they are willing to employ, to a certain extent, young men who are ambitious and willing to learn, and teach them the various trades or professions which enter into railroad work.

There are also a number of advantages which railroad employes enjoy which do not obtain in other lines of work, and employment with prospective employes.

Following is a list of positions and rates of pay now in effect for shop employes:

Table with 4 columns: Payroll Classification, Rate, Payroll Classification, Rate. Lists various roles like Machinist, Blacksmith, and their respective pay rates.

Any additional information desired may be obtained by writing to, or personally calling on the undersigned. Approved: H. V. PLATT, General Manager.
