

MIGHTY ICEBERG THAT CRUMPLED THE TITANIC WAS FORMING BEFORE HUMAN BEINGS WERE BORN

Extends Thousands of Feet Under Water—What It Means When a Ship Strikes Head On.

... and slowly that giant iceberg has been forming and coming to break as a toy the biggest of man's steamers, and send it to the bottom of the sea.

Probably long before man as a human being trod the surface of the earth soft white snow was falling on Greenland's mountains

Year after year, layer after layer of crystal snow covered Greenland. As succeeding ages passed the weight of the upper layers turned the bottom snow into ice, until finally there were great rivers of ice, glaciers we call them.

Then the glacier started mov-
