

DISCLOSE SOVIETS OF RUSSIA BEHIND AMERICAN 'REVOLT'

LUSK LEGISLATIVE COMMITTEE EXPOSES NAMES OF MANY PERSONS IDENTIFIED WITH BOLSHEVISTIC MOVEMENT IN THE UNITED STATES.

New York, June 20.—Revelations which tend to show the existence of a concerted effort on the part of certain so-called "agitators," educators and ministers in behalf of revolutionary theories in this country and aiming to halt participation of the United States in the world war, are contained in the report of the Lusk legislative committee which investigated soviet activities in this state. In the report is printed correspondence supposed to sustain the charge that the opponents of the war had some with the aids in the war department, on the federal bench and in congress in some respects the efforts were allied to those of I. W. W. and socialist agitators.

Among the many mentioned in the report are Miss Lillian Wald of the Henry street settlement, Miss Jane Addams of Hull House, Chicago; David Star Jordan, former president of Island Stanford university of California; Senator Robert La Follette and former Representative Claude Kitchin.

Others mentioned prominently are Scott Nearing, Morris Hillquit, "Big Bill" Haywood and Victor Berger. In the report is published much correspondence showing activities and opposition in the promotion of the war, which causes the Lusk committee to make this general charge as to their purposes.

A drawing together of all the radical forces of workingmen, suggesting mass action, a plan of soviet representation, and an international cooperation with the socialist forces of Europe.

The prime movers were said to be Louis P. Lochner, who was the aid of Miss Schwimmer, the Hungarian representative of Germany in this country prior to the war, and who arranges for the Ford peace party, and Roger Baldwin, who served a year in prison for violating the selective draft act and was at the head of the national civil liberties bureau at 26 Fifth avenue. In a letter of September, 1917, Baldwin wrote as follows:

"We want to look like patriots in everything we do. We want to get a lot of good fees, talk a good deal about the constitution and what our forefathers wanted to make this country and to show that we are the folks that really stand for the spirit of our institutions."

The correspondence published shows: "One letter in which the writer claims that he can influence a federal judge in behalf of I. W. W. defendant, who had been indicted for violation of the espionage law.

A claim on the part of Roger Baldwin that Secretary of War Newton D. Baker was showing considerable sympathy for the conscientious objectors, adding "that the men all will be freed as soon as the war is over." This later, in large measure, happened.

A letter in which the charge is made that Victor Berger, the Milwaukee socialist, knew that the Russian revolution of March, 1917, would result in Russia withdrawing her support from the allies.

PROSPERITY OF U. S. DEPENDS ON CREDITS

San Francisco, June 18.—Restoration of American foreign trade depends upon extension of long term credits and increased buying abroad, W. F. Koehn, president of the National Association of Credit Men, declared today in his annual report to the convention of the organization. "It is high time," he said, "that we as a people began to realize that we cannot prosper alone. While it is true that the United States needs foreign trade more than at any time in its history, this trade will not be secured and held without great efforts on our part. At home, those efforts will have to be directed against measures devised by men who believe that America can be prosperous even if the rest of the world faces industrial stagnation.

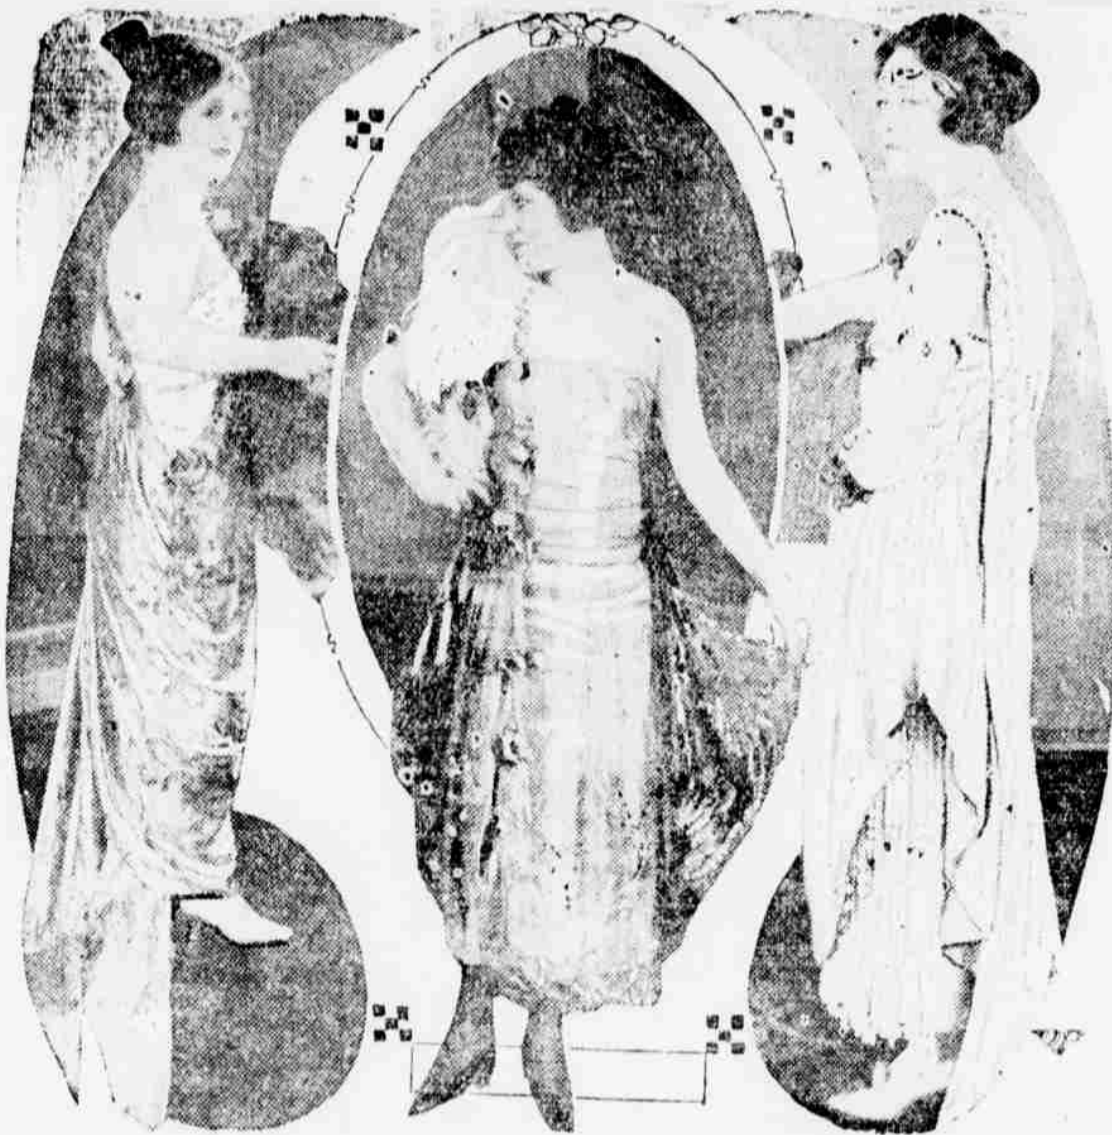

The restoration of our international commerce depends largely upon long credits. In my sincere judgment these credits are better able to extend than any other people. The reversal of our position from a debtor to creditor nation brings obligations which we have not yet recognized but must if we are to be saved from muddling our opportunities and seriously affecting our return to prosperity.

"We must learn to invest in foreign lands. Trade will follow our investments. We must also learn to expect to sell alone as a creditor nation for there is no rule in business which would long permit that. We would simply continue to demoralize our opportunities and retard our production for foreign markets."

The Mountains Change Not. We change our point of view, but the mountains themselves change not. Whatever face they turn to us, whatever their appearance, it is always one of beauty. They are mere breaks in the crust—crustings of the earth-shell—and by the same re-eroding color is a mere break in the beam of light, but what a wonder work each of them spreads before us!—John C. Van Dyke.

Queen for Nine Days. The shortest reign of an English monarch was that of Lady Jane Grey, in 1553. She was queen for nine days, and then she was beheaded, and Mary, the daughter of Henry VIII, came to the throne.

THE LINE THAT MAKES THE GOWN

It's the perfect line that makes the perfect evening gown.

In the beaded chain and chiffon combined with crystal beads on the right, the graceful draperies forming a straight panel and train, with tulle on front and sides, bring out the

value of the line. This artistic costume is worn by Pauline Frederick in "Solitaire," the new Kabotzopoulos picture written by David Whitehead.

The advantages of brocade in simplicity is brought out in the simplicity of the evening gown, on left, designed by the

Goldenwyn modiste for use in "The Night Rose." In the center before the straight line, relieved by the beautiful effect of the hips is accentuated by the simple strap of pines over the left shoulder and falling into the skirt. This also is a Goldenwyn modiste creation.

HEALTH AND EDUCATION OF ILLINOIS PUPILS

Springfield, Ill., June 20.—The recently issued statistical report concerning the school children of Illinois contains some interesting facts relative to health and education. There are 1,187,000 school children with a total of 13,963 school buildings in the state, housing 1,436,370 pupils. The report further shows an average cost, for educational purposes, of \$67.18 per pupil.

But how about the health of the school children of Illinois? There are 1,501 special teachers in the state, 328 teaching music, 138 drawing, 222 domestic science, 237 manual training, 182 physical training, 282 commercial training and 109 teaching agriculture. In the promotion of health 156 districts employ 371 public-school nurses and 141 physicians. These officers in 1920 examined 193,197 school children, or 14.1 per cent of the children attending the schools of the state, and found 69,437 of them, or 35.9 per cent of those examined, affected. It is, therefore, apparent that 1,243,575 school children had no medical or nursing attention, 446,180 of whom at the same rate as those examined, were affected.

The school children of Illinois are the state's greatest asset and the hope of the future. They not only need, but by divine right are entitled to every precautionary measure of protection that the men and women of the present generation can bestow upon them. School physicians and health nurses are just as essential during the school life of these children as are the teachers of the highest learning. In fact, the best of instructors cannot render efficient service to children who are not physically fit to absorb mental training.

Medical and nursing services are essential in our schools, first, to keep well children well by protecting them against contact with sick children, and, second, to examine all children for the purpose of detecting and correcting the deficiencies of those who are below normal. This is a problem of state-wide importance and can be solved only by intelligent and concerted community action.

The Cheviot Hills. The Cheviot hills, celebrated in literary and romance, are in Northumberland, England, and in Roxburghshire, Scotland. The range is 30 miles long. The highest peak is Cheviot hill, 2,973 feet.

Rotation of Numbers. Numbers run as follows: Units, tens, hundreds, thousands, millions, billions, trillions, quadrillions, quintillions, sextillions, septillions, octillions, nonillions, decillions.

BRYN MAWR HAS COURSE FOR WORKING WOMEN

Bryn Mawr, Pa., June 20.—A group of women workers in industry, representing many states, gathered at Bryn Mawr college today for the opening tomorrow of an educational experiment without precedent in America, a two months' summer college course for working women.

Scholarships covering tuition, board, room, everything but such personal expenses such as laundry had been provided for these young women by trade unions or through working girls' clubs. The college has assembled a corps of instructors from colleges and universities through the east and middle west, to help train these young women along broad and constructive lines, so that they may exercise an increased influence in the social and industrial world.

Only 70 students could be accepted and it was a difficult task for the joint administrative committee, representing the college and women workers in industry, to select them from the many applications. They were chosen because of character and ability from among those who had shown a natural aptitude for leadership.

Subjects offered include English, both written and spoken, public speaking, literature, history, economics, labor movements and problems, industrial organization, contemporary law, physiology and medicine, comparative ethics, the origin and evolution of the state and of the national psychology and appreciation of art. Lectures and discussions will fill the morning hours and in the afternoon there will be two hours of conferences and preparations. The remainder of the day will be filled with various college activities, field athletics, training in the gymnasium and dancing on its roof, plays and entertainments. The college library will offer a good summer retreat for the

REOLO BUILDS RICH RED BLOOD, BUILDS STRENGTH, BUILDS VITALITY. REOLO builds health and strength; restores energy, vitality, vigor; increases weight.

Flowers Not for Sick Room.

All flowers grown from bulbs are dangerous in rooms where there is illness. Although bunches of flowers are invariably taken to the sick, such flowers as lily-of-the-valley, tulips, carnations, and even daffodils and narcissus, should be carefully avoided. The perfume is said to be as dangerous to a person in a critical state of health as a dose of morphine would be without possessing the benefits which that drug sometimes confers.

Trades represented include weavers, sewing machine operators, shoemakers and pillow case workers, shirt and collar makers, cap makers, milliners and trousseau, clothing makers of various sorts, hosiery and knit goods makers, laundry workers, cigar box makers, etc.

Mason Bee's Substantial Nest.

The Mason bee, as its name implies, is a builder of structures of stone and mortar. The nest is attached to almost any solid structure and actually does consist of small stones cemented together with mortar. The house consists of many cells of oval shape, and into each an egg is laid. The cell is lined with spider webs by the mother, who gets out of it by a hole in its top. Before leaving, however, she has meticulously sealed the exit.

Real Stove First Made in 1885.

Stoves are a comparatively recent invention. The stoves of some sort were used by the ancients and were by the savage tribes which preceded their civilization for the first real modern improvement in the production and use of heat, as he called it, was made by Dr. Sott Arnot and introduced by a manufacturing England November 4, 1821.

SILVER DOLLARS IN COINAGE FOR FIRST TIME SINCE 1904

250,000,000 "EIGHT BIT" PIECES, SUSPENDED LONG TIME AGO, ARE IN THE MAKING AT U. S. MINTS—SOLD METAL TO BRITISH.

Washington, June 20.—Coinage of silver dollars has been resumed by the mint after a lapse of seventeen years, and the work of replacing 250,000,000 standard silver dollars taken from the treasury during the war to sell to Great Britain has been begun.

Since late in March, treasury officials and mint staff, approximately 20,000,000 silver dollars, have been coined. In the same period, certain special amounts of silver certificates were issued and federal reserve notes and treasury certificates securing them retired.

This process, officials said, would probably continue for the next five years, until the treasury's reserve of silver dollars is back to its pre-war basis.

The mint officials explained ceased coining silver dollars in 1904, when the supply of metal purchased under the contract was exhausted. The mint's authority to issue the dollars was not renewed until 1918, when congress passed the Pittman act to enable the sale of melted dollars to England for the relief of the silver famine in India.

Under the terms of the act Director of the Mint Baker sold to England 250,000,000 silver dollars, amounting to 200,000,000 ounces of silver, at \$1.15 cents, Mr. Baker explained, paid for the cost of melting and transportation and the cost of recoinage.

The work of recoinage the mint said, was now well under way, the mint striking off silver dollars at the rate of about 5,000,000 to 10,000,000 a month.

Since May, 1920, the mint has bought about 75,000,000 ounces of American silver at \$1 an ounce and will continue to make its purchases at this price until the treasury's stock is replenished.

PARIS VIVAUDOU NEW YORK MAVIS FACE POWDER. This delightful Face Powder contains no harmful ingredients. Women tell us that it "glows" with their complexion better than other powders. It is amazingly fine.

MOVIES LURE ILLINOIS GIRL FAR AWAY

New York, June 20.—If Eva Schiller had not been a blonde she might have found a job with a moving picture company. But when she came to New York after putting away from her home in Havana, Ill., she learned that brunettes were more popular than blondes with the movie men. So she was found wandering in Central Park Saturday night with no money and no place to go.

Eva is only 14. She told Police Corporal Charles O'neal, who saw her alone and apparently deserted on a walk in Central Park, that when she came to New York two weeks ago she had \$50.

She lived at the cheaper hotels on Broadway, but yesterday her money was all gone. Except for a few cents with which she bought sandwiches she was taken to the Children's society and word was sent to her stepfather, Bruce Barke of Havana.

Dog Went to Church. An English correspondent writes: "My terrier was very fond of going to church. He would sit quietly with his nose between his paws. For two successive services he attended all the confirmation classes. I told the bishop, 'Well, Thelma,' said the bishop, turning to him. 'You very sorry I cannot bring you.' Thelma looked at me as if gravely, and from that day never attended another class.' It may be added that the story, as well as the dog, lacks confirmation."

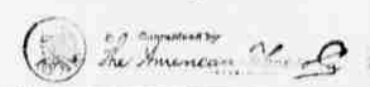

Mongolian Pony Hardy Animal. For endurance, cleverness and originality the Mongolian pony is said to have few rivals. In the depth of winter his owner neither feeds nor provides him shelter. An extra growth of hair and thickness of hoofs for he is never shod—protect him from the bitter cold. For food he learns to scrape away the snow with his forefeet and find the sparse remains of the summer grass underneath.

Chloropicrin as Insecticide. An report to the French navy states that no other weapon against vermin and insects is so effective as chloropicrin. If five grains of this for every cubic meter of space be placed in a room, every flea, moth, fly, and other insect will be dead in a few hours, and the gas has no effect upon metal, wood, paint or dye.

Cigarette

No cigarette has the same delicious flavor as Lucky Strike. Because Lucky Strike is the toasted cigarette.
