WICHITA, KANSAS, THURSDAY MORNING, JULY 7, 1892

WHOLE NO. 2556.

BITTING BROS.

It fortunately happens that light clothing is light on the pocket-book. You don't have to be rich to be comfortable. You get one of our \$5.00 suits you can laugh at the heat and laugh at the outlay that it costs you. It will make you look like a featherweight and feel like a featherweight. The thermometer may go up to record smothering figure without bothering you a particle. You can be sure of comfort and sure of something else—the man who is many times a millionaire won't look any better dressed than you.

BITTING BROS.,

TERRITORIAL TOPICS.
GUTHRIE, July 6.—[Special]—The all-absorbing topic is the calling of the legislature. Attorney General Brown has come out with an open letter to Governor Seay, showing why it should be called, and why it should be called now.

Secretary Martin is outspoken against the calling of the legislature, and goes so far as to assert that the legislature has no power to pass bills providing for the payment of the debt. He says that the national returns from the national capitol we shall know more.

A meeting of the board of regents of the normal school takes place today at noon. This is the regular annual meeting. On the 12th instant the Oklahoma Press association meets at Guthrie, with headquarters at the city hall. There are indications of a large attendance.

Dennis Flynn is gaining ground every day. Delegate Harvey is working day and night, and has quite a strong reinforcement behind him. Many of the administrators men are warmly supporting him.

A COLORED MOB DISPERSED.
JACKSONVILLE, Fla., July 6.—The only serious disturbance growing out of last night's demonstrations by the negroes about the county jail was an attempt of a negro guard to stop the passage of a white man. Four deputy sheriffs hastened to the assistance of the white man, and were fired upon by the negroes from all sides. Three of the deputies received slight wounds. The troops now have control of the situation.

THE CHOLERA.
St. PETERSBURG, July 6.—The cholera has reached Tampa. In the government of Tampa, on the Volga. Fifteen cases and six deaths have been reported there. In the city of Taratoff, twenty-nine cases and six deaths have been reported. In Baku, a Russian port on the Caspian sea, the deaths number 100 daily. The disease is rapidly increasing in severity throughout the Caucasus. It is reported that the cholera has reached Kootroum, a city of European Russia, 300 miles northwest of Moscow.

BRITISH POLITICS.
GLASGOW, July 6.—Mr. Gladstone addressed a large and highly enthusiastic meeting in the town of Cotswold today. Referring to the returns from the election, he said that he was satisfied with the result of the polling in London.

DEBILITY, July 6.—A crowd of anti-Parliamentary demonstrators gathered for a meeting at Strathearn, Justice of the Peace Donaldson had his skull fractured. Others received serious wounds.

THE PINKERTON SURRENDER.
At 5 o'clock the Pinkerton men hung out another white flag. This time it was respected and a committee of the strikers was appointed to receive the Pinkerton men. The strikers were determined to proceed to prepare for the contest, which culminated in such deeds of violence and bloodshed as were witnessed today. The contest was precipitated by the refusal of the Carnegie company to start up the plants with non-union men.

As both sides were determined, both proceeded to prepare for the contest, which culminated in such deeds of violence and bloodshed as were witnessed today. The contest was precipitated by the refusal of the Carnegie company to start up the plants with non-union men.

the river got word of the threatened invasion and the Pinkertons and prepared to receive them.

THE FIGHT.
The barges were towed up the river by a towboat, but long before the Pinkerton men could be landed, thousands of strikers had gathered on the banks of the river ready to give them a warm welcome. When the boats attempted to land the women on the shore, the men surrounding the mills, and entrenched themselves behind piled up steel billets, prepared to resist the landing of the detectives. The Pinkertons, however, making an effort was made to land the detectives, but the strikers met them, and a fierce battle was precipitated, both sides exchanging blows and firing with their revolvers.

The detectives were all armed with Winchester, but at the point where the attempt to land was made there was a steep embankment, and they were compelled to single file, and were soon driven back to the boats by a steady fire from the shore.

The strikers, who were spread about the borough like wildfire, and thousands of men, women and children thronged to the river bank to witness the fight in progress. The Pinkertons, however, determined to land, and they poured volley after volley into the ranks of the strikers, many of whom were struck down by the bullets, some being badly injured.

Others killed outright. As the battle progressed the strikers took a position behind breastworks hastily constructed of steel billets and other material. An effort was made to pick off the detectives as soon as they appeared on the decks of the boats. Captain Hind and the workmen were performing in the boats were disabled, and the fire became so fierce that the crew of the towboat hastily cut loose from the barges and steamed up the river.

As they could reach Braddock, from which place they were sent down to the hospitals at Pittsburgh for treatment. The Pinkertons, however, were thus cured for, while the strikers that fell wounded were carried to their homes to be nursed, the strikers were now taking the conference on the scale, congregated in the streets, while hundreds of others, armed with guns and revolvers, were well equipped for the occasion, took up the line of march to reinforce the strikers.

As soon as day broke the strikers secured a breastwork of steel billets and planted it within the steel billet embankment, so as to command the barges, which were moored at the river bank. At the same time the strikers took up a position on the opposite side of the river, and also planted a cannon, which they protected with a breastwork of railroad iron. The strikers, however, were trained on the boats, and for several hours an awful bombardment was kept up. The stout oak timbers forming the hull of the boats were shattered, but the heavy steel plates on the inside prevented the balls from penetrating the interior. Many of the strikers, however, were expert marksmen, and they kept up a steady stream of bullets into the boats, and inflicted terrible injury upon the imprisoned men.

When it was found that little impression could be made by the cannon on the boats, an effort was made to fire the barges and thus compel the detectives to leave the vessels or suffer the fate of being burned alive. A hose was procured and was sprayed upon the decks and sides of the barges. While this was being done, the strikers were kept up a steady stream of bullets into the boats, and inflicted terrible injury upon the imprisoned men.
