As it has been quite awhile since our last contribution, so we come again as a reminder that we are yet living in the land of the free and the home of the brave.

This world is composed of many kinds of people, in fact it takes many different kinds to make a world, but there is one particular kind of whom we wish to speak. We shall therefore, for the sake of distinction, call them knockers or kickers. They are not pleased with anything other people do and are always finding fault. The people are plentiful, who could teach a better school than those who teach, preach a better sermon than those who preach, who could run a better business and publish a better paper. Yes, the woods are full of them, but they do nothing but talk. They are like the lilies of the field, "They toil not, neither do they spin."
