Miss Margaret Collins and Miss Alice Mackey, of Uniontown, have been the guests of Mrs. P. E. Marsh, and had a most pleasant visit in her home on the hill. Mrs. Marsh says she thinks every girl should have a visit for it gives them something to talk about. "Boys, as a rule, can go away, come back and you never know they have been any place," said Mrs. Marsh, "and a girl will tell you everything she saw and heard. My mother always loved for her daughters to take trips so they could come home and tell her what was going on in the world."

PROGRESSIVE FARMERS

Robert French And Louis Perkins Making Money In Breckenridge County--Have A Large Pay Roll And Interesting Business.

French & Perkins are progressive, enterprising farmers at Ammons. They own and cultivate nearly a thousand acres of land in the fertile river bottoms above Stephensport. They are now feeding 80 head of cattle, 100 head of hogs and 100 head of pigs. These pigs are, now on the beech bottoms, thriving luxuriously on beech nuts, the best feed in the world for pigs, and the kind of feed our fore fathers used almost exclusively for fattening hogs. They have a standing offer of 8 cents for 20 head of their cattle and 7 cents for the remainder. They cut this season 200 acres of meadow and are now shipping the hay. However, they ship very little feed off their farm as they feed everything and turn it back to their land. They are young, ambitious farmers, they give employment to lots of men and pay good wages. And they make money.

COMPLETE STANDSTILL

Is The Tobacco Situation In The Green River District--Growers And Buyers Can't Agree.

HODGE TO INSPECT SAMPLES

The tobacco situation in the Green River district just at present is at a complete standstill, and neither the buyers nor the growers are in a position to state just what the outcome will be.

The samples at the office of the Green River Tobacco Growers' association have been examined by many of the representatives of the largest tobacco industries in the country, and all are of the opinion that the price as fixed by the association of \$6 to \$10 for lugs and leaf and \$3 for trash is too high for the grade of tobacco offered. They have gone so far as to be frank with the officials of the associations that \$8 is about all that they consider the tobacco is worth, according to the samples presented to them.

It is almost a certainty that the association will not come down one penny and will insist that they be paid the same price as they received last year. It is contended that while some of the tobacco possibly is not up to the grade of last year, the cost of production has not lessened in the least, and there is no reason why the farmer should be asked to take any less than the price fixed by the association.

The board of control of the Green River association, which has been in session most of the past week, adjourned Friday night to meet again on Tuesday, when it is hoped that Mr. Hodge of the Imperial Company will be in Owensboro, and will also make an examination of the samples. Mr. Hodge is now on his way from England and he is expected to be in this city by Tuesday.

In the meantime the tobacco growers are telling the association to "stand pat" and insist on the price as fixed by it. The fact that no sale has been made does not disturb the growers to any great extent, as there has been no stripping season, and even if the tobacco had been sold, it could not be brought to the market until there is a season. The indications are not very favorable for a season real soon.

At the Green River Equity office, the officials have nothing to give out, claiming that while things looked gloomy just at this time, because the buyers were much unconcerned about purchasing the crop at the prices fixed, the farmers were not discouraged, and were perfectly willing to wait for results.—Owensboro Inquirer.
