The Deadly Finger Nail
Every time you scratch yourself you run
a risk. No, don't smile that superior smile
and say that you have never yet had any
trouble from it. What we say is true. Ask
any physician. To scratch your scalp, on
pimple or a scab is particularly dangerous.
Your finger nails carry germs of Erysipelas,
Tetanus (Lockjaw) Erysipelas and all
kinds of skin diseases. Let one germ
get into the scratched place and you
are sure to follow. Because you have
been lucky enough to escape so far in the
future. Don't take chances. For preventing
use Little's Liquid Sulphur, stop scratching
instantly, and permanently relieve all
forms of skin complaint, eczema, erysipelas,
pimples, running sores, tetter, ring worms,
chaps, roughness, redness or skin blemishes.
Gentlemen: November, 1902, I was
traced facial erysipelas and my physician
prescribed ichtyol ointment and retirement
from business. After one day's use of the
ointment I concluded the erysipelas was
preferable, on account of the villainous odor
and color of the ointment. Having bought
a bottle of Little's Liquid Sulphur with
which I had cured, with one application,
an aggravated case of prickly heat the pre-
vious summer, I abandoned all other reme-
dies and applied that with most satisfactory
results, as the disease was confined to the
original limits and in due time disappeared.
Respectfully,
S. G. Warner,
General Passenger Agent, Kansas City
Southern Railway.
