

A CHINESE STORY.

Two young, near-sighted fellows, Chang and...

MONSTROSITIES.

Marvelous Productions of Nature and Art.

Largest of Every Thing—An Interesting and Instructive Compendium of Facts Gleaned From All Quarters.

The highest mountain range is the Himalayas, the mean elevation being estimated at 18,000 feet.

The loftiest mountain is Mount Everest, or Gaurisankar, of the Himalaya range, having an elevation of 29,022 feet above the sea level.

The largest city in the world is London. Its population numbers 4,021,875 souls.

The largest theater is the new opera house in Paris. It covers nearly three acres of ground.

The loftiest active volcano is Popocatepetl (smoking mountain), thirty-five miles southwest of Pueblo, Mex.

The largest span of wire in the world is used for a telegraph in India over the river Kistnah, between Bezorah and Settaugrum.

The largest ship in the world is the Great Eastern. She is 680 feet long, 83 feet broad and 60 feet deep.

The largest island in the world—which is also regarded as a continent—is Australia. It is twenty-five hundred miles in length from east to west, and measures 1,920 miles from north to south.

The largest span of wire in the world is used for a telegraph in India over the river Kistnah, between Bezorah and Settaugrum.

grove in Tulare County, according to the measurement made by members of the State Geological Survey, was shown to be 276 feet high, 106 feet in circumference at base and 76 feet at a point twelve feet above the ground.

The largest inland sea is the Caspian, lying between Europe and Asia. Its greatest length is 760 miles, its greatest breadth 270 miles, and its area 180,000 square miles.

The highest mountain range in the world is the Himalayas, the mean elevation being estimated at 18,000 feet.

The loftiest mountain is Mount Everest, or Gaurisankar, of the Himalaya range, having an elevation of 29,022 feet above the sea level.

The largest city in the world is London. Its population numbers 4,021,875 souls. New York, with a population of 1,560,000, comes fifth in the list of great cities.

The largest theater is the new opera house in Paris. It covers nearly three acres of ground. Its cubic mass, 4,287,000 feet. It cost 63,000,000 francs.

The loftiest active volcano is Popocatepetl (smoking mountain), thirty-five miles southwest of Pueblo, Mex. It is 17,784 feet above the sea level, and has a crater three miles in circumference and one thousand feet deep.

The largest span of wire in the world is used for a telegraph in India over the river Kistnah, between Bezorah and Settaugrum. It is more than six thousand feet long, and is stretched between two hills, each of which is twelve hundred feet high.

The largest ship in the world is the Great Eastern. She is 680 feet long, 83 feet broad and 60 feet deep, being 29,227 tons builder's, 28,915 gross and 15,344 net register. She was built at Millwall, on the Thames, and was launched January 31, 1869.

The largest island in the world—which is also regarded as a continent—is Australia. It is twenty-five hundred miles in length from east to west, and measures 1,920 miles from north to south. Its area is 2,294,287 square miles.

The largest span of wire in the world is used for a telegraph in India over the river Kistnah, between Bezorah and Settaugrum. It is more than six thousand feet long, and is stretched between two hills, each of which is twelve hundred feet high.

The largest island in the world—which is also regarded as a continent—is Australia. It is twenty-five hundred miles in length from east to west, and measures 1,920 miles from north to south.

bridge in Rockbridge County, Va., about 125 miles west of Richmond, and about two miles from the James River. It extends over Cedar Creek. The height of the arch is two hundred feet, and the upper surface of the bridge is 240 feet above the stream.

The largest suspension bridge in the world is the New York and Brooklyn Bridge. It was commenced under the direction of J. Roebling in 1870, and completed in about thirteen years.

The highest tower in the world will be the Eiffel Tower when completed. The iron tower which the engineer Eiffel proposes to erect on the banks of the Seine, opposite the Trocadero Palace, as a feature of the Paris Exposition of 1889, will, if completed, dwarf all other structures yet reared by human hands.

The largest church in the world is the basilica of St. Peter's in Rome. Its dimensions are as follows: Length of interior, 613 feet; breadth of nave and aisles, 107 3/4 feet; height of the nave, 152 feet; length of the transepts, 446 1/2 feet; diameter of the dome, including the walls, 195 feet, or nearly two feet more than that of the Pantheon; diameter of the interior, 139 feet; height from the pavement to the base of the lantern, 465 feet; the summit of the cross outside, 448 feet.

The whole of St. Paul's Cathedral in London might stand within the shell of St. Peter's, with room to spare. The transepts of the Cologne Cathedral, when completed, will be the highest church towers in the world—511 feet—which is the length of the Cathedral. The breadth of this edifice is 281 feet.

The greatest fortress, from a strategic point of view, is the famous stronghold of Gibraltar, belonging to Great Britain, situated upon the most southern point of land upon the coast of Southern Spain. It occupies a rocky peninsula, jutting out into the sea about three miles long and three-quarters of a mile wide. One central rock rises to a height of 1439 feet above the sea level.

The greatest river of the world is the Amazon. It rises in the Peruvian Andes, about sixty miles from the Pacific Ocean, and flows, including its windings, a distance of 4,000 miles to the Atlantic, which it enters under the equator in Brazil. The average velocity of the current is three miles an hour. It is navigable for large ships 2,200 miles from its mouth. The area drained by the Amazon and its tributaries is estimated at 2,000,000 square miles.

The greatest cataract in the world is that of Niagara. The Horseshoe fall, on the Canadian side, has a perpendicular descent of 158 feet. The height of the American fall is 167 feet. The Horseshoe fall, which carries a larger volume of water than the American fall, is about 600 yards wide, and extends from the Canadian shore to Goat Island. Geologists are agreed that the cataract was once six miles nearer Lake Ontario than at present.

The most remarkable artificial echo known is that in the castle of Simonetta, about two miles from Milan. It is occasioned by the existence of two parallel walls of considerable length. It repeats the report of a pistol sixty times.

The most remarkable whirlpool in the maelstrom off the northwest coast of Norway and southwest coast of Moskensoel, the most southerly of the Lofoden Isles. It was once supposed to be unfathomable, but the depth has been shown not to exceed twenty fathoms. The whirlpool is navigable under ordinary circumstances, but when the wind is northwest it often attains great fury and becomes extremely dangerous.

The largest library in the world is the Bibliotheque Nationale in Paris, founded by Louis XIV. It contains 1,400,000 volumes, 300,000 pamphlets, 175,000 manuscripts, 300,000 maps and charts and 150,000 coins and medals. The collection of engravings exceeds 10,000,000. The portraits number about 100,000. The building which contains these treasures is situated on the Rue Richelieu. Its length is 540 feet; its breadth 130 feet. The largest library in New York in respect to separate works is the Astor; about 195,000 volumes are on its shelves.

The largest desert is that of Sahara, a vast region of Northern Africa, extending from the Atlantic ocean on the west to the valley of the Nile on the east. The length from east to west is about 3,000 miles, its average breadth about 900 miles, its area 2,000,000 square miles. Rain falls in torrents in the Sahara at intervals of five, ten and twenty years. In summer the heat during the day is excessive, but the nights are often cold. In winter the temperature is sometimes below freezing point.

The greatest pyramid is that of Cheops, one of the three pyramids forming the Memphis group, situated on a plateau about 187 feet above the level of the highest rise in the Nile. Its dimensions have been reduced by the removal of the outer portions to furnish stone for the city of Cairo. Its masonry consisted originally of 89,028,000 cubic feet, and still amounts to 82,111,000 feet. The present vertical height is 459 feet, against 475 feet originally, and the present length of the sides is 746 feet against 764 feet originally. The total weight of the stone is estimated at 6,316,000 tons.—San Francisco Chronicle.

STICKLER'S CLOSE CALL. He joked about finding a bear and found one in earnest.

A Philadelphia farmer and Stickler spends several weeks each year in the Catskill mountains. He had an exciting adventure the other day.

The hunter descended the mountain side into the valley, which he crossed, and then he tramped on for a mile or two. Stickler kept a sharp lookout for game.

With Headache, Neuralgia, Rheumatism, Biliousness, Blood Troubles, Kidney Disease, Constipation, Female Troubles, Fever and Ague, Sleeplessness, Partial Paralysis, or Nervous Prostration, use Pain's Celery Compound and be cured.

Will Cure You! Sold by druggists, \$1; six for \$5. Prepared only by W. L. B. H. & Co., Burlington, Vt.

DRICKLY ASH BITTERS. One of the most important organs of the human body is the LIVER. When it fails to properly perform its functions the entire system becomes deranged.
