**Tested 250,000 Miles
 Three-Point Cantilever Springs
 Greatest Improvement Since
 Pneumatic Tires**

OVERLAND 4 has been put through the most thorough and severe test possible. 250,000 miles of mountain trails, desert sand, heat, cold, mud and dust, demonstrated the quality of every part of the car long before we began manufacturing.
 This remarkable test showed conclusively that Three-Point Cantilever Springs, exclusive with Overland, are the greatest improvement in riding comfort since the introduction of pneumatic tires.
 They protect the car from road shocks and prolong the life of every part.
 They enable the wheels to hold better to the road. They give

greater comfort under all road conditions. They do away almost entirely with side sway and rebound which twist and rack the car.
 Diagonal attachment of the Three-Point Springs at both ends of a 130-inch Spring-base gives the steadiness and smooth riding of the heavy car of long wheelbase.
 Equipment is complete from Auto-Lite Starting and Lighting System to Marshall Divan Spring Upholstery.
 Come in and see this car. Ask for Booklet. Overland 4 Touring, \$845; Roadster, \$845; Coupe, \$1325; Sedan, \$1375; Prices f. o. b. Toledo.
