HOUSEWORK

Too much housework wrecks women's nerves. And the constant care of children, day and night, is often too trying for even a strong woman. A haggard face tells the story of the overworked housewife and mother. Deranged menses, leucorrhœa and falling of the womb result from overwork. Every housewife needs a remedy to regulate her menses and to keep her sensitive female organs in perfect condition.

WINE OF CARDUI

is doing this for thousands of American women to-day. It cured Mrs. Jones and that is why she writes this frank letter:

Glendeane, Ky., Feb. 15, 1901.
I am so glad that your Wine of Cardui helped me. I am feeling better than I have for years. I am doing my own work without any help, and I washed last week and was not one bit tired. All shows that the Wine is doing me good. I am getting flesher than I ever was before, and sleep good and am hearty. Before I began taking Wine of Cardui, I used to have to lay down five or six times every day, but now I do not think of lying down through the day.

LOWEST ON RECOD.

The Average Yield of Corn For 1901.

Washington, Nov. 11.—The following crop report was issued this afternoon by the department of agriculture.

The preliminary estimate of the average yield per acre of corn, as published in the monthly report of the statistician of the department of agriculture, is in 16.4 bushels, as compared with an average yield of 25.3 bushels per acre in 1900 and 1899, and a ten years average of 24.4 bushels. The present indicated yield per acre is the lowest general ever recorded for this crop, being 2.2 bushels per acre below the yield in 1881 which has stood for twenty years as the lowest on record. The indicated yield in bushels per acre in the seven principal states is as following:

Ohio, 25.1; Indiana, 19.8; Illinois, 21.4, Iowa, 25; Missouri, 10.1; Kansas, 7.8; and Nebraska, 14.1: Of the twenty three states having one million acres or upward in corn, all but Pennsylvania, Virginia and Michigan report an average yield per acre below their respective ten year averages. The general average as to quality is 73.7; percent, as compared with 85.5 percent, in November last and 78.2 percent in November, 1899. It is estimated that 4.5 percent of corn crop of 1900 was still in the hands of farmers on November 1, 1901, as compared with 4.4 percent of the crop of 1899 in farmers' hands on Nonember 1, 1900, and 5.9 percent of that of 1898 in hand November 1, 1899.

Jasper Can Beat it.

Wilbur Haughawout was exhibiting today a turnip grown in his back yard which beats the record—at least so far as the Press has been able to discover. It weighs 5¼ pounds and is 23½ inches in circumfesence. This big turnip was grown without irrigation and how it matured in such a dry season is hard to understand.—Press.

That is a big turnip for a fact, but it quit growing too soon to come up to a Jasper turnip which tips the beam at 6 pounds.

A Big Land Sale.

James McKay and his son E. R. McKay of Nashville township, were in the city Friday. Mr. McKay has sold his fine section of land to C. F. Barnwarts of Iowa, for $21.000. The deal was consummated through Peter Roth, the well known German farmer of Nashville township. Mr. Roth also made a sale of S. T. McCunes half section, in the same neighborhood to another Iowa man, and the parties were in town Friday, closing the deal.—Leader.

S. W. Nealy, the well known Esrom merchant, met with a painful accident recently while going home from Jasper in a wagon. He was sitting on the end of a board which extended over the side of the bed, besides three others, who rose to leave the wagon, causing him to fall to the ground, badly spraining one of his knees.

A thousand things by it are done far better than most things do one. We refer to Rocky Mountain Tea made by Madison Medicine Co. 35c. Ask your druggis.

A NEW FAIR PROJECT.

THIS TIME THE FARMERS WILL BE ASKSED TO CO-OPERATE.

A Meeting Was Held at Carthage and the Plans Discussed--Another Meeting Next Saturday.

At the solicitation of E. Knell a number of farmers met at that gentleman's office in Carthage last Saturday for the purpose of discussing plans for a new fair at that place.

Among the farmers present were I. Elting, John Wickstraw, G. W. Daugherty, H. G. Tangner, Frank C. Griffith, H. C. Smith, J. P. Elliott, John V. Koontz, Geo. W. Koontz, J. W. Gray, Geo. Stout, Wesley Ralston, Sanford Smith, A. C. Post, John Parker, J. H. Ralston, Albert Rhinehart, A. S. Cattingham, H. Campbell and a number of others whose names were not learned.

The delegation was taken out to the proposed site of the new fair ground, joining the town on the northwest. All seemed to be pleased with the natural adaptability of the place and each expressed himself freely and encourageingly on the feasibility of the plan.

It was decided to hold another meeting next Saturday and each one present was requested to bring his neighbor with him.

Heretofore the fairs have been run on the side-show order sadly to the neglect of the agricultural and stock features. This is in all probability the cause of the many failures. By having the farmers to take a hand in it is hoped to get it back to the old time fair when the big pumpkin and the thoroughbreds took an active part.

The promoters are on the right road to a permanent and successful fair if they do not fly the track and try to make a fortune out of it the first year.

Rev. Iri R. Hicks Is not Dead.

Notwithstanding a widely current rumor that the Rev. Iri R. Hicks was dead, he never was in better health, and never did a harder and more successful year's work than that just closing. He has just completed his large and splendid Almanac for 1902 and, with his staff of able helpers, has brought his journal, Word and Works, justly forward into international reputation. For a quarter of a century Mr. Hicks has grown in reputation and usefulness as the people's astronomer, and forecaster of storms and the character of coming season. Never were his weather forecasts so sought after as now, his timely warning of a serious drouth this year having saved the people from loss and suffering. Millions of bushels of wheat were harvested through his advice to plant crops that would mature early. The American people will certainly stand by Prof. Hicks when it costs them so little and the benefits are so great. His fine Almanac of 200 pages is only 25c, and his splendid family journal is only one dollar a year including the Almanac. Send to Word and Works Pub. Co., 2201 Locust St., St. Louis, Mo.

Keeps Up His Gate.

Peter Roth of Nashville township, made a sale of the David Price farm, Monday, consisting of 280 acres, to a German farmer from Iowa. The purchase price was $80.00. This makes $40,000, worth of Barton county land that Mr. Roth has sold within eight days. Pretty good for a man who does't claim to be an expert.—Lamar Leader,

Steers Killed by Lightning.

Link Faskin of Lincoln township was in Carthage today and reported the loss of two steers by lightning Monday night They were insured in Farmers Mutual.—Press
