F. L. Limerick, Manager, Is Ordered by Court to Pay \$500 Damages.

WILL APPEAL CASE

C. H. Early and J. T. Mitchell, Owners, Say Contract Expired July 1.

The suit for possession of the Athens Hotel bought by C. H. Early and J. T. Mitchell, owners of the hotel, against F. L. Limerick, the manager, which was tried in the justice court Wednesday, has been decided by Judge John S. Bicknell in favor of the hotel owners.

Judge Bicknell found that Early and Mitchell were entitled to possession of the hotel, that they were entitled to \$500 damages because of illegal possession of the hotel by the manager since July 1, and the monthly rental value of the hotel, \$350.

Frank G. Harris, attorney for Mr. Limerick, said he would appeal the case.

The owners sued for possession of the hotel and for damages accruing from illegal possession. They claimed that their contract with Mr. Limerick expired July 1, 1920.

Mr. Limerick contended that under the contract he was in lawful possession of the hotel as manager and that he had the lawful privilege of renewing the contract with Early and Mitchell when it expired.

3,500,000 ARE AFFECTED

Workers Lose \$3,000,000 a Day in Both Steel and Railway Controversies.

WASHINGTON, July 17.—Approximately 3,500,000 workers were affected by labor controversies, strikes and lockouts during the government fiscal year ending June 30, it is estimated here today, on a basis of reports being prepared for Director Hugh Kerwin of the conciliation bureau of the Department of Labor.

The reports when completed will show that the bureau has been asked to mediate in 800 cases involving approximately 1,055,000 workers. Kerwin believed, or about half the number involved during the fiscal year ending June 30, 1919.

It is estimated that in 1920 workers lost roughly \$175,000,000 in wages, assuming an average wage of \$5 a day and a total of ten days lost by each man. Strikes not continuing at least ten days are rare.

The loss to employers is about \$700,000,000 in value of production curtailed if wages represent one-fourth of the value of production.

The steel strike alone is estimated to have cost the workers approximately \$3,000,000 a day in lost wages. The wage losses of the outlaw railway strike totaled nearly as much as those of the steel workers.
